2. Key Decisions

The Council is required to publish details of key decisions that will be taken at least 28 days before the decision is due to be taken. Details of key decisions that are due to be taken are published on a monthly basis in the Register of Key Decisions.

A key decision, as defined in the Council's Constitution is an executive decision, which is likely:

- To result in the Council incurring expenditure which is, or the making of savings which are, significant having regard to the Council's budget for the service or function to which the decision relates, or
- To be significant in terms of its effects on communities living or working in an area comprising two or more wards in the area of the city.

The Council Constitution defines 'significant' as being expenditure or savings (including the loss of income or capital receipts) in excess of £500k, providing that is not more than 10% of the gross operating expenditure for any budget heading in the in the Council's Revenue Budget Book, and subject to other defined exceptions.

An extract of the most recent Register of Key Decisions, published on **11 September 2014**, containing details of the decisions under the Committee's remit is included below. This is to keep members informed of what decisions are being taken and, where appropriate, include in the work programme of the Committee.

	This report will highlight progress that has been made with the redevelopment of Collyhurst since the Executive approved a Planning and Development Framework for the area in October 2012. The report will also include proposals for the next phase of development within Collyhurst.				
	The report will present for endorsement by the Executive an updated spatial master plan and implementation strategy to guide the redevelopment of Collyhurst. The proposed plan builds on progress made within the area to date and sets out broad proposals for its transformation over the next 15 – 20 years. The views of local stakeholders consulted about the				

Masterplan, will be contained		
within the report.		

3. Items for Information

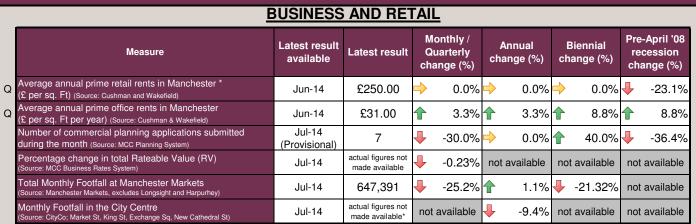

The August Real Time Economy Dashboard is attached below.

Measure Definitions					
Title of Measure	Desired direction of travel & (% change)	Definition of Measure	Data Source		
Average Annual Prime Retail Rents in Manchester (£ per sq Ft.)	INCREASE (+)	The data relates to the whole of Manchester, but prime rents will be heavily focused on the city centre because that's where the highest rents are found. Prime rents essentially relate to the headline rent being achieved for a particular type of space in an area. CBRE defines prime retail rents as "the typical 'achievable' open market headline rent which an international retail chain would be expected to pay for a ground floor retail unit (either high street or shopping centre depending on the market) of up to 200 sq. m of the highest quality and specification and in the best location in a given market."	Cushman and Wakefield Marketbeat UK Reports		
Average Annual Prime Office Rents in Manchester (£ per sq Ft.)	INCREASE (+)	The data relates to the whole of Manchester, but prime rents will be heavily focused on the city centre because that's where the highest rents are found. Prime rents essentially relate to the headline rent being achieved for a particular type of space in an area. Jones Lang Lasalle state that for offices "Prime Rent represents the top open-market rent that could be expected for a notional unit of the highest quality and specification in the best location in a market, as at the survey date. The rent quoted normally reflects prime units of over 500 sq. m of lettable floorspace, which excludes rents that represent a premium level paid for a small quantity of space."	Cushman and Wakefield Marketbeat UK Reports		
Number of commercial planning applications submitted during the month.	INCREASE (+)	Number of commercial planning applications submitted during the month. This data represents the number of commercial planning applications, defined as floor space greater than 1,000sqm or a site area of 1 hectare or larger, submitted to Manchester City Council's Planning Department during each month. The latest month's figures are always reported as provisional and are subject to revision the following month.	Manchester City Council Planning Department		
Percentage change in total Rateable Value (RV) - excluding adjustments	INCREASE (+)	Rateable value represents the open market annual rental value of a business / non-domestic property. This means the rent the property would let for on the valuation date, if it was being offered on the open market. (The current valuation date is 01 April 2008 and will be updated at the next revaluation, due on 01 April 2017). The rateable value is used by Manchester City Council to calculate the business rates due. The rateable value reported here excludes adjustments such as appeals, charity relief and empty property relief. Although there may be many reasons for movements, in general an increase would indicate there is growth in Manchester's business base and a decrease would indicate a reduction.	Business Rates System (NNDR), Manchester City Council		
Total Monthly Footfall at Manchester Markets	INCREASE (+)	The combined monthly footfall figures from Arndale, Gorton and Wythenshawe markets, and Sunday Market and Car Boot footfall figures.	Manchester Markets, Manchester City Council

		Number of work programme referrals by JobCentre Plus broken down by benefit payment group. The Work Programme is an integrated package of support, providing personalised work-focused help for a wide range of customers delivered by public, private and voluntary sector organisations, working under contract to DWP. These organisations will tailor services to what works best for individual customers in helping them back in to sustained work.		
Work Programme - Number of referrals	referrals (+) s	Official statistics on referrals are obtained from the Labour Market System (LMS). This is the admin system Jobcentre Plus uses to administer customer claims and also refer customers to the Work Programme. The data contains information on the claimants' individual characteristics and claim details. Standard DWP statistics disclosure control policy has been applied: values less than ten, including zeros, are suppressed and marked with a dash and values above ten are rounded to the nearest ten, therefore tables may not sum. Cumulative figures include referrals and attachments from the start of the Work Programme up to the end of the relevant month.	Department of Work & Pensions (IGS)	
Work Programme -	INCREASE (+)	Number of work programme attachments broken down by benefit payment group. An attachment is defined as the date of the first engagement activity between a provider and the claimant. Following the referral, providers will engage with the claimant; this involves conducting specified 'attachment activity' with the claimant, and the date the activity takes place is recorded on the payment system by the provider (this is the closest proxy for a 'start' to the Work Programme).	Department of Work &	
Number of attachments		Statistics on attachments are obtained from the Provider Referral and Payment data (PRaP). This is the system which underpins the Work Programme and which providers use to attach customers and claim job outcomes and sustainment payments. Standard DWP statistics disclosure control policy has been applied: values less than ten, including zeros, are suppressed and marked with a dash and values above ten are rounded to the nearest ten, therefore tables may not sum. Cumulative figures include referrals and attachments from the start of the Work Programme up to the end of the relevant month.	Pensions (IGS)	
Work Programme - Attachment to referral ratio	INCREASE (+)	Proportion of work programme referrals which resulted in an attachment. Referrals are all those eligible claimants who are referred to the Work Programme. The claimant remains on the Work Programme for 104 weeks from that date. Attachment is the point from which a provider engages and works with a claimant. There will be a proportion of claimants who either sign off benefit or move into work after referral but before the point which the provider seeks to actively engage. Therefore the number of attachments will be slightly lower than the number of referrals. If a claimant who has not been attached to the Work Programme makes a further claim to benefit over the 104 week period, then the provider will engage with and attach the claimant at this point.	Department of Work & Pensions (IGS)	
Work Programme - Job outcomes	INCREASE (+)	The focus of the Work Programme is on supporting participants to achieve sustained employment. Participants are supported by the Work Programme for two years. Providers receive job outcome payments when a participant has been in work for either three or six months, depending on the participant's circumstances - payments are made for Job Seeker's Allowance (JSA) claimants after completing six months in paid work, but for more disadvantaged people (including some on JSA), job outcomes are paid after completing three months in paid work. Once a job outcome payment has been paid, providers will receive sustainment payments for each subsequent four week period the participant spends in employment up to a maximum of two years, depending on the participant's circumstances.
