Background documents (available for public inspection):

The following documents disclose important facts on which the report is based and have been relied upon in preparing the report. Copies of the background documents are available up to 4 years after the date of the meeting. If you would like a copy please contact one of the contact officers above.

None

1. Introduction

1.1 This is a health update paper produced by North, Central and South Manchester Clinical Commissioning Groups (CCGs) for the Health and Wellbeing Overview and Scrutiny Committee. It provides a brief summary of issues or news items that may be of interest to the Committee.

1.2 If Committee members of the Committee have any specific questions about the contents of this paper, please email them to n.gomm@nhs.net.

2. New Models of Care Programme

2.1 In October, NHS England published their Five Year Forward View. This set out how the health service needs to change over the coming years to improve the quality and accessibility of health services and meet the financial challenges we face as a result of increasing costs and an ageing population. Amongst other things, it recognised that England is too diverse for a 'one size fits all' health service. It explained how local health communities will be supported to choose from a number of 'radical new care delivery' options. These include Multispecialty Community Providers and Integrated Primary and Acute Systems.

2.2 As a result of this, NHS England, and its national partners, have announced the New Models of Care Programme, focusing on accelerating the design and implementation of these new models of care in the NHS. Through the programme, individual organisations and partnerships are invited to apply to be 'vanguard' sites and have the opportunity to work with national partners to co-design and establish new care models, tackling national challenges in the process. The deadline for submitting expressions of interest is Monday, 9 February 2015.

2.3 A Manchester application is being developed by the Living Longer Living Better programme team. If successful, further information will be brought to a future meeting.

3. Prioritising specialised services

3.1 NHS England directly commissions around 145 specialised services. In order to ensure the maximum number of patients benefit from new innovative treatments, choices need to be made about which of these to fund. To address this issue, NHS England has launched a new consultation about how it will prioritise which specialised services and treatments to invest in.

3.2 Further information, and details of how to feed in comments, is available here <https://www.engage.england.nhs.uk/consultation/investing-in-specialised-commissioning>

4. Manchester Clinical Commissioning Groups' Website

4.1 The Manchester Clinical Commissioning Groups' (CCGs) new website is now up and running. Aiming to achieve greater visits to the site and increase awareness of

the CCGs' objectives, there are opportunities for the public and patients to have their say and get involved throughout the site.

4.2 The site can be found at www.manchesterccgs.nhs.uk

5. Epilepsy and headache service

5.1 Manchester CCGs are developing an epilepsy and headache community service and want patients and carers to help co-design it. Local people who are registered with a GP in Manchester and would be interested in attending a focus group or would just like to share their experiences, can contribute by emailing communicationsmanchester@nhs.net or calling 0161 765 4168.

6. Carers survey

6.1 In partnership with Manchester Carers Forum, the Manchester CCGs have developed a survey to identify how health services could improve the way they work with, and support, carers.

6.2 The survey can be found at <https://www.surveymonkey.com/s/9NHRXBN>

7. Choice and Equity

7.1 NHS continuing healthcare is the name given to a package of care that is arranged and funded solely by the NHS for individuals who are not in hospital but have complex on-going healthcare needs.

7.2 The Choice and Equity Policy describes the way in which Manchester CCGs will provide care for people who have been assessed as eligible for fully funded NHS Continuing Healthcare. The CCGs are currently inviting comment and feedback about the policy.

7.3 The policy can be found here and any comments can be fed in at <https://www.surveymonkey.com/s/GKHS3XW>

8. 'Cancer and you' event

8.1 The MacMillan Cancer Improvement Partnership is holding a number of public events to listen to local people and their experiences of cancer. The learning from the event will shape how services develop in the city and inform the direction of the work streams being delivered by the Partnership.

8.2 The event will take place in Wythenshawe Forum on 19th February. Further details are available here http://86.28.76.242/document_uploads/e-bulletins/MCIP.pdf

9. Recommendations

9.1 The Committee is asked to note this report.
