Challenges

- Long Waits for some services, and thus limited access and not as responsive as needed
- Fragmentation of providers across the city, which can result in difficulty for patients in easily accessing the right help
- Fragmentation in transition for young people to adults
- There are still some people in receipt of care offered out of area (outside of Manchester)
- There is a need to provide more proactive and less reactive care, so people can get evidenced based care as early on as possible
- There is a need to ensure that services deliver improved outcomes for people – with more of a focus on recovery and to have an improved quality of life
- Financial challenges within the system
