

Executive

Date: Wednesday, 4 October 2023

Time: 8.30 am

Venue: Council Antechamber, Level 2, Town Hall Extension

Everyone is welcome to attend this Executive meeting.

Access to the Public Gallery

Public access to the Council Antechamber is on Level 2 of the Town Hall Extension, using the lift or stairs in the lobby of the Mount Street entrance to the Extension. **There is no public access from any other entrance.**

Filming and broadcast of the meeting

Meetings of the Executive are 'webcast'. These meetings are filmed and broadcast live on the Internet. If you attend this meeting you should be aware that you might be filmed and included in that transmission.

Membership of the Executive

Councillors

Craig (Chair), Akbar, Bridges, Hacking, Igbon, Midgley, Rahman, Rawlins, T Robinson and White

Membership of the Consultative Panel

Councillors

Ahmed Ali, Butt, Chambers, Douglas, Foley, Johnson, Leech, Lynch and Moran

The Consultative Panel has a standing invitation to attend meetings of the Executive. The Members of the Panel may speak at these meetings but cannot vote on the decisions taken at the meetings.

Agenda

1. Appeals

To consider any appeals from the public against refusal to allow inspection of background documents and/or the inclusion of items in the confidential part of the agenda.

2. Interests

To allow Members an opportunity to [a] declare any personal, prejudicial or disclosable pecuniary interests they might have in any items which appear on this agenda; and [b] record any items from which they are precluded from voting as a result of Council Tax/Council rent arrears; [c] the existence and nature of party whipping arrangements in respect of any item to be considered at this meeting. Members with a personal interest should declare that at the start of the item under consideration. If Members also have a prejudicial or disclosable pecuniary interest they must withdraw from the meeting during the consideration of the item.

3. Minutes

To approve as a correct record the minutes of the meeting held on 13 September 2023.

5 - 16

4. Places for Everyone Plan: A Joint Development Plan Document for 9 Greater Manchester Local Authorities - Proposed Modifications Consultation

17 - 1958

Report of the Strategic Director (Growth and Development) attached

Due to the large sizes of the various appendices these will be viewable on the Council's website (link address below) and paper copy - on request.

Information about the Executive

The Executive is made up of 10 Councillors: the Leader and two Deputy Leaders of the Council and 7 Executive Members with responsibility for: Early Years, Children and Young People; Health Manchester and Adult Social Care; Finance and Resources; Environment and Transport; Vibrant Neighbourhoods; Housing and Development; and Skills, Employment and Leisure. The Leader of the Council chairs the meetings of the Executive

The Executive has full authority for implementing the Council's Budgetary and Policy Framework, and this means that most of its decisions do not need approval by Council, although they may still be subject to detailed review through the Council's overview and scrutiny procedures.

It is the Council's policy to consult people as fully as possible before making decisions that affect them. Members of the public do not have a right to speak at meetings but may do so if invited by the Chair.

The Council is concerned to ensure that its meetings are as open as possible and confidential business is kept to a strict minimum. When confidential items are involved these are considered at the end of the meeting at which point members of the public and the press are asked to leave.

Joanne Roney OBE
Chief Executive
Level 3, Town Hall Extension,
Albert Square,
Manchester, M60 2LA

Executive

Minutes of the meeting held on Wednesday, 13 September 2023

Present: Councillor Craig (Chair)

Councillors: Akbar, Bridges, Hacking, Igbon, Midgley, Rawlins, T Robinson, White

Also present as Members of the Standing Consultative Panel:

Councillors: Ahmed Ali, Butt, Chambers, Douglas, Johnson, Leech, Lynch and Moran

Apologies: Councillor Rahman and Foley

Exe/23/74 Minutes

Decision

The Executive approved as a correct record the minutes of the meeting on 26 July 2023.

Exe/23/75 Our Manchester Progress Update

The Executive considered a report of the Chief Executive which provided an update on key areas of progress against the Our Manchester Strategy – Forward to 2025 which reset Manchester’s priorities for the next five years to ensure the Council could still achieve the city’s ambition set out in the Our Manchester Strategy 2016 – 2025.

The Executive Member for Skills, Culture and Leisure reported that the Council had formally submitted a bid to make Manchester the European Capital of Cycling for 2024. It was hoped that being named the European Capital of Cycling for 2024 would not only recognise the work which had been done to promote cycling in the city but also help leverage further funding and other improvements and encourage even more Mancunians to cycle. He also reported that the National Cycling Centre’s Velodrome re-opened on Saturday 3 September following £27m investment in improvements from the Council, Sport England and Government. As well as improving its facilities, it was now the UK’s first all-electric Velodrome.

Councillor Johnson sought clarity as to whether there were any plans to improve the standard of a number of existing cycle routes that were in need of maintenance.

The Executive Member for Skills, Culture and Leisure next reported on the recent Ofsted inspection of Manchester’s Adult Education Service (MAES). Government inspectors had MAES for its inclusive and ambitious curriculum, high quality education and training and passionate leaders. Ofsted inspectors had graded every aspect of the service Good - from its overall effectiveness, quality of education, and adult learning programmes, through to provision for learners with high needs, and its leadership and management.

The Executive Member for Skills, Culture and Leisure final update was to report on the reopening of Abraham Moss Library and Leisure Centre following a multi-million pound refurbishment. The refurbishment was part of the Council's ongoing sport and leisure investment strategy. Leisure facilities and libraries across the city were being modernised so they could be better equipped to suit the needs of residents.

The Deputy Executive Member for Skills, Culture and Leisure reported that Manchester had been named as the most digitally inclusive city in the UK in a national survey. Analysis of the number of databanks, digital inclusion hubs and digital skills workshops on offer nationally put the city out ahead in the survey carried out by Uswitch mobiles. The findings reflected work which had taken place to combat issues such as digital exclusion, generational poverty and health inequality.

The Deputy Leader reported on the progress which had been made on key themes in the Making Manchester Fairer Action Plan, including cutting unemployment and creating good jobs. In particular the Individualised Placement Support in Primary Care and Ambition Manchester In-Work Progression initiatives were cited which supported those with physical and/or mental disabilities into employment and helped people with low-incomes to progress within their current workplaces or acquire the skills to move into higher-paid roles elsewhere.

The Executive Member for Growth and Development reported on the recently approved planning application to re-develop the former Chorlton Leisure Centre site as an affordable later living housing scheme. The new development would provide 50 apartments (a mix of one bed and two bed) for the over 55s. Seven of the apartments would be for sale by shared ownership, three would be neighbourhood apartments providing step up accommodation, with the remaining 40 capped at the Manchester Living Rent. Lettings would be prioritized to over 55s with a housing priority need, including those wishing to right-size and free up a social rented family home in the local area for families on the housing waiting list.

The Executive Member for Growth and Development also reported that the first residents had moved into the Silk Street development of low carbon homes for social rent in Newton Heath. As the first 11 homes were handed over to the council following their completion at the end of July, they had been allocated to local people on the Council's social housing register Manchester Move. Altogether the site would deliver a mixture of 69 homes with 16 of these homes available to people over the age of 55 who were right-sizing from other properties in Newton Heath and North Manchester, freeing up larger properties for social rent

Councillor Leech sought clarification as to whether there would be any financial assistance to those residents who were seeking to down size as part of the Chorlton Leisure Centre redevelopment. The Executive Member for Growth and Development confirmed this would be looked into with the developer.

Decision

The Executive note the report.

Exe/23/76 Revenue Monitoring to the end of July 2023

The Executive considered a report of the Deputy Chief Executive and City Treasurer, which outlined the projected outturn position for 2023/24, based on expenditure and income activity as at the end of July 2023 and future projections.

The Executive Member for Finance and Resources reported that the current budget monitoring forecast was an overspend of £9.6m and that there were considerable risks to the position relating to the impact of rising demand and increasing costs.

The main pressures were being felt in the social care budgets reflecting the national pressures in the health and social care sector and trends being experienced across most Social Care providing local authorities. A £3.7m forecasted overspend in Adult Social care was largely in relation to the provision of long term care arrangements with demand above 2023/24 budget assumptions. Whilst strong progress on the approach to reduce demand through 'prevent, reduce and delay' was being made through the Better Outcomes Better Lives (BOBL) initiative, it was unlikely that the additional demand management savings (£5.5m) envisaged from client social care packages would be delivered. As such the overspend was in part being offset by employee underspends across the Directorate due to difficulties in recruitment.

The forecasted £4.9m overspend in Children's Services was after taking account of £3.9m of mitigations against key pressures. The underlying cost drivers related to higher placement costs for Looked After Children (LAC) and Care Leavers Supported Accommodation, small increases in External Residential and Care Leaver placements numbers, Remand activity, and Home to School Transport pressures. The biggest pressure related to external residential placements and increased complexity of need of the current cohort with placement costs having increased by 44% in the current financial year. Investment in provision for those children with higher levels of needs was underway. Once this work was complete it was expected that this would reduce some of the pressures on the external residential care budgets. The main variations in the other service departments totalled £0.9m.

As part of the 2023/24 budget setting process £25.2m of savings were agreed. Of these £15.1m (60%) were on track for delivery, £1.5m (7%) were risk rated medium, and £8.5m (33%) rated high risk in terms of the likelihood of delivery. Officers were working to identify alternative savings where original plans might not be achieved or delayed.

The report went on to outline the following budget virements which required approval

- The transfer of part year funding for Graduate Management trainees from HROD to directorates totalling £293k

The report also provided details of additional grant notifications that had been received since the budget had been set and which were now reflected in revised budgets:-

- Adults - Market Sustainability and improvement fund £4.055m
- Corporate Core - Household Support Budget £12.906m

- Libraries - Build a business in GM libraries - £0.601m
- City Policy - Innovate UK Net Zero Pathfinder GM £86k 2023/24, £0.516m 24/25, £301k 25/26
- Corporate Core - Transparency Code New Burdens £13k
- Housing - Tenant Satisfaction New Burdens £63k

In addition, when the budget was set in February 2023 a total of £14.3m was identified for price and electricity inflation. £2.2m was allocated to Children's for internal placements, £0.5m to Education Home to School Transport and £2.7m to Adults as a contribution to market sustainability. At period 2 requests from Childrens services totalling £2.4m were agreed, mostly relating to fostering and residential placements. This left £6.4m in the corporate price and utilities inflation budget for inflation pressures. Additional inflation requests were currently being considered and would be brought back to a future Executive meeting for approval.

At this stage it was envisioned that the known increased costs could be contained within the available inflationary budgets made available for 2023/24 however this remained a risk.

It was also reported that allowance for a 6% pay increase was allowed for in the budget costing an estimated £15.6m. In February the National Employers offered a £1,925 pay increase from 1 April 2023 and 3.88% for those above the top of the pay spine. The estimated budget requirement to fund this offer for MCC staff was £15.5m for 2023/24, and therefore within the available budget. Should any pay award above this level be agreed, this would exceed the current provision in the budget.

The Executive Member for Finance and Resources concluded that it was very early in the financial year and vigilance was needed given there were significant uncertainties and risks to the position as cost of living and inflationary pressures could increase. Any overspend this year would be a direct call on the General Fund Reserve which would need to be reimbursed in future years. In addition any ongoing impact of the pressures faced this year would need to be addressed in the 2024/25 budget. It was therefore important mitigations were identified to bring forecast spend back in line with the available budget.

Councillor Leech sought clarification as to whether the increase in placement costs within Children's Services were as a result of an increase in overall costs, inflationary pressures or an increase in the demand on this service. He also sought clarification as to the cause of the projected overspend in the Corporate Core as he noted that in previous years, this Directorate had usually produced a budget underspend

Decisions

The Executive:-

- (1) Note the global revenue monitoring report and forecast outturn position which is showing a £9.6m overspend.
- (2) Approve budget virements to be reflected in the budget as set out at paragraph 2.9 of the report

- (3) Approve the use of additional revenue grant funding as set out at paragraph 2.10 of the report.

Exe/23/77 Capital Programme Monitoring P4 2023/24

The Executive considered a report of the Deputy Chief Executive and City Treasurer, which provided progress against the delivery of the 2023/24 capital programme to the end of July 2023, the latest forecast of capital expenditure and the major variances since the Capital Programme Outturn report submitted in June 2023 and the proposed financing of capital expenditure for 2023/24 and affordability of the Capital Programme.

The Executive Member for Finance and Resources reported that the latest forecast of expenditure for 2023/24 for Manchester City Council was £454.0m compared to the current approved budget of £473.7m. Spend as of 31 July 2023 was £91.9m. The main variances related to the Asset Management Programme, Hammerstone Road Depot, Campfield Redevelopment, Our Town Hall Refurbishment, Home Upgrade Grant, Social Housing Decarbonisation Fund and Varley Street SEND Secondary School. These variances mostly related to timing differences meaning reprofiling would be required.

A more focussed look at the top 10 projects was provided in Appendix A. These projects covered 47% of the total programme. The programme also contained some budgets yet to be allocated to specific projects but reserved for a particular purpose, such as Education Basic Need funding, Housing Affordability Fund, ICT Investment Plan and the budget for inflation pressures. These would be allocated once the specific schemes were progressed and approved, or in the case of inflation the business case showing the impact of inflationary pressures on a scheme completed. They would also then be subject to approval through the Council's capital approval process.

As in previous reports the most significant risk facing the programme and major projects overall was the continued high levels of inflation being experienced. Inflation in the UK in the 12 months to July 2023, as measured through CPI, was currently 6.8%, down from 7.9% in May and from a recent peak of 11.1% in October 2022. Whilst this showed a downward trend which was expected to continue, the figure remained elevated.

The current forecasts showed that the financing costs remained affordable within the revenue budget available including reserves with the capital financing reserves being required to meet the costs associated with the borrowing by 2026/27.

In addition, it was reported that there were schemes that had been developed or had received external funding that were now ready for inclusion in the Capital Programme. The proposals which required Council approval were those which were funded by the use of reserves above a cumulative total of £10 million, where the use of borrowing was required or a virement exceeded £1m. These included the following proposed changes:-

- Aviva Studios, Home of Factory International - to reach practical completion, a capital budget increase of £22.2m was recommended, funded by borrowing and supported by the Council's share of all future commercial sponsorship income.
- Corporate Services - Our New Finance & HRODT System – a revenue budget increase of £17.4m was requested, to be spread across 4 financial years, and funded from the Capital Fund reserve, to replace the Council's existing HR and Finance System.
- Neighbourhoods – Manchester Aquatic Centre (MAC) – a capital budget increase of £0.640m was requested, funded by borrowing, to fund additional works deemed essential to address build, health and safety issues and safeguard the MACs future operations and services, whilst also ensuring that the building remained complaint to host World-Class Events.
- Growth and Development – Piccadilly Garden Design Phase – a capital budget increase of £0.782m was requested, funded by borrowing, to enable the project cost to progress to end of RIBA Stage 3 / submission of planning application.

The proposals which only required Executive approval were those which were funded by the use of external resources, use of capital receipts, use of reserves below £10.0m, where the proposal could be funded from existing revenue budgets or where the use of borrowing on a spend to save basis is required. The following proposals required Executive approval for changes to the City Council's capital programme:-

- ICT - Digitising Registrars Certificates – a revenue budget increase of £0.244m was requested, funded from the Capital Fund reserve, to deliver a project that will lead the implementation of imaging software to digitise birth, death and marriage certificates, enabling the Registrars service to streamline and automate the current copy certificate process, increase team efficiencies and improve the service offered to customers.
- ICT - Manchester ContrOCC Client Finance Portal (CFP) and Online Financial Assessments (OFA) Resources – a revenue budget increase of £0.092m was requested, funded from the Capital Fund reserve, to deliver a project that would enable the implementation of the two ContrOCC portals; Client Finance Portal (CFP) and Online Financial Assessment Portal (OFA).
- ICT – Adults Care Management System – a revenue budget increase of £0.258m was requested, funded from the Capital Fund reserve, to implement a new care management system covering; rostering, care monitoring reporting, electronic medication administration record and mileage wizard for the Reablement and Disability Supported Accommodation Services (DSAS) teams within Adult's Services.
- Public Sector Housing – Collyhurst – a budget virement of £3.693m funded from capital receipts, between the Private Sector and Public Sector Housing budgets was requested as the existing budget was no longer required for its original purpose, and there was inflationary pressure in the wider regeneration scheme relating to the construction costs for new homes, a new park and associated infrastructure, and not all of this pressure could be mitigated through value engineering.

Councillor Leech sought clarification as to why the highways budget had been reprofiled and whether this would have any detrimental impact on the maintenance of roads and gullies. He also expressed concern over the increasing level of borrowing

for Aviva Studios and that following its completion the Executive should receive a further report that provided an in-depth detailed analysis as to what the extra funding had been required for.

The Deputy Chief Executive and City Treasurer clarified that the Council did not borrow funding against individual schemes but rather against the whole capital programme. She also confirmed that there would be a future report to both Resources and Governance Scrutiny Committee and the Executive which would provide an in-depth detailed analysis as to what the extra funding for Aviva Studios had been required for

Decisions

The Executive:-

- (1) Note the Progress against the delivery of the 2023/24 capital programme to the end of July 2023
- (2) Recommends that the Council approve the following changes to the Council's capital programme:-
 - Aviva Studios, Home of Factory International - a capital budget increase of £22.2m, funded by borrowing.
 - Corporate Services - Our New Finance & HRODT System – a revenue budget increase of £17.4m, to be spread across 4 financial years, and funded from the Capital Fund reserve.
 - Neighbourhoods – Manchester Aquatic Centre (MAC) – a capital budget increase of £0.640m, funded by borrowing.
 - Growth and Development – Piccadilly Garden Design Phase – a capital budget increase of £0.782m, funded by borrowing.
- (3) Approve the following changes to the Council's capital programme:-
 - ICT - Digitising Registrars Certificates – a revenue budget increase of £0.244m, funded from the Capital Fund reserve.
 - ICT - Manchester ContrOCC Client Finance Portal (CFP) and Online Financial Assessments (OFA) Resources – a revenue budget increase of £0.092m, funded from the Capital Fund reserve.
 - ICT – Adults Care Management System – a revenue budget increase of £0.258m was requested, funded from the Capital Fund reserve.
 - Public Sector Housing – Collyhurst – a budget virement of £3.693m funded from capital receipts, between the Private Sector and Public Sector Housing budgets

Exe/23/78 Hackney Carriage Fares - Interim Review 2023

The Executive considered a report of the Strategic Director (Growth and Development), which set out recommendations in relation to Hackney Carriage Fares following a review of these fares by the Council's Licensing and Appeals Committee.

The Executive last reviewed the Hackney Fares in October 2022. Since then numerous other local authorities had further reviewed their Hackney fares and as a result Manchester was now at position 161 out of 344 local authorities ranked by the cost of a 2-mile journey on Tariff One . As many authorities have the same fare however (and discounting the airports tariffs) in real terms Manchester is joint 39th out of 81 different fare tariffs. Either way, Manchester was sitting around halfway on the league table which may be considered fairly low for a major city.

The current methodology used in Manchester for calculating the fares had now been in place for over a decade and the 2022 review highlighted the sensitivity of the current formula to any significant changes in data components or assumptions that reflected policy or market changes, as well as the challenge in obtaining accurate and localised running cost data.

Prior to consideration by the Executive, the proposals had been considered by the Council's Licensing and Appeals Committee and in doing so had recommended:-

- An increase to the unit cost per mile on all tariffs by 8%
- An increase to the waiting time fare by 23%
- An increase to the Day flag tariff to £3.40
- An increase the Night flag tariff to £3.80

In making its decision, the Executive has the authority to: apply all, part or none of the recommended amendments to the Fare Tariff and apply any additional amendment(s) it determined as appropriate.

Decisions

The Executive:-

- (1) Agrees to increase the unit cost per mile on all tariffs by 8%
- (2) Agrees to Increase the waiting time fare by 23%
- (3) Agrees to increase the Day flag tariff to £3.40
- (4) Agrees to increase the Night flag tariff to £3.80
- (5) Notes the decision to make the acceptance of card payments mandatory in Hackney Vehicles

Exe/23/79 Manchester Piccadilly SRF Addendum: East Village Central Framework

The Executive considered a report of the Strategic Director (Growth and Development), which set out the outcome of a public consultation exercise with residents, businesses and stakeholders, on the draft East Village Central Framework which was an addendum to the Manchester Piccadilly Strategic Regeneration Framework (SRF).

The Leader explained that the site identified in the draft East Village Central Framework was centrally located within the Piccadilly SRF area. As well as contributing to the overall objectives within the Piccadilly SRF, the draft framework proposals had been developed to ensure that they will complement the wider economic priorities and regeneration strategy for the city centre.

The report provided details of the response received to the consultation from a key stakeholder, a national charity, a statutory body and local residents

It was noted that the East Village Central Framework responded to the opportunity to review how this strategically significant site could be repurposed and redeveloped in a manner that maximises its contribution to the growth of the city centre. The new commercially-led, mixed use neighbourhood would support the creation of new jobs, homes and public realm in the city centre, for both existing and new residents. The development would be highly connected, functionally and physically, to the wider city centre and adjoining regeneration priority areas and would complement the arrival of HS2 and NPR.

Given the increasing need for new high quality commercial development space, the draft framework would complement the proposed commercial development at Central Retail Park. It would also add further momentum to the development of the Piccadilly SRF, building on the ongoing delivery at Portugal Street East and Mayfield.

Decisions

The Executive:-

- (1) Note the outcome of the public consultation on the East Village Central Framework.
- (2) Approve the East Village Central Framework, as an addendum to the Manchester Piccadilly SRF, and request that Planning and Highways Committee take the framework into account as a material consideration when considering planning applications for the area.

Exe/23/80 Strategic approach to developments of social homes via a city-wide New Build Local Lettings Policy

The Executive considered a report of the Strategic Director (Growth and Development), which proposed a strategic response in the form of a New Build Local Lettings Policy (LLP) for all new developments of social homes to be let at social or affordable rent.

The Executive Member for Growth and Development explained how it was necessary to put in place a strategic response to ensure that new build developments had a mix of residents to help to make them sustainable in the longer term. The aim was to avoid the likely concentrations of dependency and higher-level support needs in new builds while also offering local people a chance of a local home and thereby contribute to achieving sustainable communities for the benefit of all.

This strategic response would result in a New Build Local Lettings Policy (LLP) for all new developments of social homes to be let at social rent or affordable rent. It was proposed that this approach was taken on all new build social developments of 10 or more homes. It was also reported that after five years the effectiveness of the LLP would be reviewed with a view to it being amended, ended or extended for such period as necessary.

Under the LLP:-

- 50% of any development would be let to working households who are in priority housing need on the Manchester housing register;
- 20% of the new development would be let to applicants living in the Manchester City Council boundary area who were in priority housing need on the housing register and had an established connection to the immediate area of the development; and
- 30% of the new development would be let as normal, in accordance with the allocation scheme.

The policy would only apply to what were called “general needs” properties – general housing for most applicants, not specialist housing developed for a particular purpose, such as retirement homes or extra care provision. The policy would also apply only at first let. Having created a mixed community through this policy, all subsequent relets would be to the applicable allocations scheme.

Councillor Leech sought clarification as to whether consideration would be given to applicants living in a geographical area as opposed to the rigidity of a ward boundary. The Executive Member for Growth and Development confirmed that the Policy was to be used as a template and would be applied as appropriate for each scheme, which would include taking into account an applicant’s geographical location to a scheme where appropriate.

Decision

The Executive approve and adopts the New Build LLP with a review of the policy to take place in 5 years

Exe/23/81 Climate Change Action Plan Annual Report

The Executive considered a report of the Deputy Chief Executive and City Treasurer, which presented the third Annual Report of the Manchester City Council Climate Change Action Plan (CCAP) 2020-25.

It was reported that the Council had remained within its allocated carbon budget for the year 2022-23, using 89% of the budget. Overall the Council had used 57% of its carbon budget for the 2020-25 period and was on track to remain within the carbon budget for this period. In addition, 55% of the actions in the CCAP 2020-25 were working to target and the remaining were work in progress.

Over the course of this 12-month period, in addition to the previous 2 years’ work, the Council had been able to secure over £227m to support delivering the CCAP. This

investment included funding for dedicated resource with the creation of 13 new posts, whilst a number of services also identified opportunities to create zero carbon focused posts, all providing additional capacity to aid delivery of the CCAP.

There would be a number of important milestones on the next stage of the Council's journey to becoming zero carbon. This included:-

- A joint Innovate UK bid with GMCA and Oldham MBC for investment to further explore new net zero finance and funding models;
- Progressing with the procurement of a partner to provide an electricity Power Purchase Agreement (PPA) for the Council's future energy supply; and
- The adoption of Places for Everyone (Joint Local Plan) expected in spring 2024 and the development of the Manchester Local Plan over the next two Years.

Councillor Leech sought clarification on how dependent the Council would be on the joint Innovate UK in achieving its targets for the next reporting period.

Decision

The Executive approve the Climate Change Action Plan Annual Report for 2022 - 2023.

Exe/23/82 Winter preparedness in the health system

The Executive considered a report of the Deputy Place Based Lead, which provided an overview of the key elements of the approach to winter planning 2023/24 alongside organisational updates relating to what would be delivered by partner organisations.

The Executive Member for Healthy Manchester and Adult Social Care reported that a full system winter plan would be developed through two urgent care system boards – Manchester and Trafford Operational Delivery Group (ODG) and Urgent Care Board (UCB). A first iteration of the system plan would be shared at the September Urgent Care Board, with a further update in October, and then as required throughout winter. In line with previous years, the Manchester and Trafford System Resilience Team would lead and co-ordinate on all aspects of winter planning and the lessons learnt from winter 2022/23 had been incorporated into the organisational delivery plans.

As with previous years, the locality winter communications plan would be led by the overall GM ICS winter strategy and NHS GM winter communications and engagement plan. There would be an integrated communications and marketing campaign approach that used engaging content across multiple channels including social media, website, internal and stakeholder, outdoor media and digital channels at both a GM and locality level. While the GM approach would allow for consistency across the region, the Council had additional activity planned across Manchester that reflected its diverse population and the health inequalities that existed. This would include additional communications and engagement activity relating to vaccination

programmes and the cost-of-living crisis with both translated materials and easy read materials.

Decision

The Executive note the report.

**Manchester City Council
Report for Resolution**

Report to: Executive – 4 October 2023

Subject: Places for Everyone Plan: A Joint Development Plan Document for 9 Greater Manchester Local Authorities (Bolton, Bury, Manchester, Oldham, Rochdale, Salford, Tameside, Trafford and Wigan) - Proposed Modifications Consultation

Report of: Strategic Director (Growth and Development)

Summary

To update members on the progress of Places for Everyone Plan: A Joint Development Plan Document for 9 Greater Manchester Local Authorities (Places for Everyone Plan) and to seek approval for proposed modifications to the plan.

Recommendations

The Executive is recommended to:-

- (1) Note progress made in respect of the Places for Everyone Plan (PfE).
 - (2) Agree that the PfE modifications (Main, Additional and those relating to the policies map), and associated supporting background documents be subject to a period of representations for a period of 8 weeks commencing no earlier than 9 October 2023.
 - (3) Agree the next steps for the production of the PfE Plan (as detailed in section 12 of the report).
-

Wards Affected: All

Environmental Impact Assessment - the impact of the issues addressed in this report on achieving the zero-carbon target for the city

The consultation on the main modifications on PfE is the final stage of the plan prior to adoption of the plan. The consultation is a statutory stage that provides an opportunity for organisations and individuals to submit their final views on any proposed main modifications proposed for the plan. The PfE includes objectives and policies that seek to achieve a zero carbon Greater Manchester by 2038. The PfE also covers a range of issues that will have a direct bearing on successfully meeting the zero-carbon challenge by 2038.

Equality, Diversity and Inclusion - the impact of the issues addressed in this report in meeting our Public Sector Equality Duty and broader equality commitments

Places for Everyone has been subject to an equalities impact assessment as part of the process of integrated appraisal. The updated integrated assessment documentation includes a revised equalities impact assessment (Appendix A of the Addendum Report) which considers the changes proposed to the plan and any consequential impacts on the nine protected characteristics.

Manchester Strategy outcomes	Summary of how this report aligns to the OMS/Contribution to the Strategy
A thriving and sustainable city: supporting a diverse and distinctive economy that creates jobs and opportunities	The draft PfE covers this outcome, both in the strategic policies and other specific thematic policies. If Greater Manchester is to flourish in the long run, then it will need to make the most of its key assets and advantages, which can differentiate it from other places. The growth potential of a small number of locations that can boost international competitiveness will need to be maximised in order to support the prosperity of Greater Manchester as a whole.
A highly skilled city: world class and home grown talent sustaining the city's economic success	The draft PfE covers this outcome, both in the strategic policies and other specific thematic policies. The central theme of the spatial strategy for the plan is to deliver inclusive growth across the plan area, with everyone sharing in the benefits of rising prosperity.
A progressive and equitable city: making a positive contribution by unlocking the potential of our communities	The draft PfE covers this outcome, both in the strategic policies and other specific thematic policies. The central theme of the spatial strategy for the plan is to deliver inclusive growth across the plan area, with everyone sharing in the benefits of rising prosperity.
A liveable and low carbon city: a destination of choice to live, visit, work	The draft PfE covers this outcome, both in the strategic policies and other specific thematic policies. Objective 7 of the plan seeks to ensure that Greater Manchester is a more resilient and carbon neutral area.
A connected city: world class infrastructure and connectivity to drive growth	The draft PfE covers this outcome, both in the strategic policies and other specific thematic policies. Objective 6 of the plan promotes the sustainable movement of people, goods and information. Moreover, Objective 9 of the plan

	seeks to ensure access to physical and social infrastructure.
--	---

Full details are in the body of the report, along with any implications for:

- Equal Opportunities Policy
- Risk Management
- Legal Considerations

Financial Consequences – Revenue

The consultation process will incur some revenue costs which can be absorbed within the planning service budget. Details of the consultation activities are set out in section 11.

Financial Consequences – Capital

No capital costs are involved in this process.

1.0 Introduction

- 1.1 Up until December 2020 a joint development plan document (DPD) of the ten Greater Manchester local authorities was being prepared, Greater Manchester's Plan for Jobs, Homes & the Environment (known as the "GMSF"). The GMSF 2020 had reached the Regulation 19 (Publication) stage of the process, however, decisions taken by Stockport Council in December 2020 signaled the end of the joint plan of the 10. Following that decision, the remaining nine GM authorities (Bolton, Bury, Manchester, Oldham, Rochdale, Salford, Tameside, Trafford and Wigan) decided to progress a joint plan of the nine and this became known as "Places for Everyone" (PfE).
- 1.2 At its meeting on the 20 July 2021, members of the Places for Everyone (PfE) Joint Committee recommended the PfE plan (and its supporting background documents) to the nine authorities for "Publication", pursuant to Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012 for an 8 week period for representations.
- 1.3 The "Publication" stage is a formal consultation on the draft joint DPD pursuant to Reg. 19 of the Local Planning Regulations. It is a statutory stage that provides an opportunity for organisations and individuals to submit their views on the content of the plan.
- 1.4 The "Publication" stage consultation ran from August 9, 2021, for 8 weeks, ending on October 3, 2021. Over 15,000 representations were duly made, by over 3,800 individuals and organisations during that consultation stage.
- 1.5 All duly made representations, together with the Regulation 19 PfE plan, supporting background documents and a number of reports (including details of the consultation that took place, summaries of the main issues raised and the nine authorities' responses to those issues) were submitted to the Secretary of State on February 14, 2022, pursuant to Reg. 22 of the Local Planning Regulations. This is called the "Submission" stage and marked the beginning of the independent examination into the plan.

2.0 The Places for Everyone Examination

- 2.1 The examination is the final stage in the plan making process. The legislative requirements for the examination are contained in the Planning and Compulsory Purchase Act 2004 (as amended) [PCPA] and the Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended) [the Regulations]. Some guidance on procedure is also provided in the National Planning Practice Guidance (PPG) chapter on Plan-making. However, many of the detailed procedural aspects of the examination are not prescribed in legislation, allowing the Inspector a degree of flexibility in conducting the examination. This enables the Inspector to adapt the procedures to deal with situations as they arise, so as to achieve positive outcomes in a range of different circumstances.
- 2.2 Following submission of a plan, the Inspector(s) take control of the examination process from start to finish. The Inspectors' role is to examine

whether the submitted plan meets the tests of soundness defined in the National Planning Policy Framework (NPPF)¹ and meets all the relevant legislative requirements, including the duty to co-operate². The PfE examination therefore concentrated on the issues that affect the plan's soundness and legal compliance and did not delve into other matters.

- 2.3 Three inspectors were appointed by the Planning Inspectorate (PINS) to hold an independent examination into PfE: William Fieldhouse, Louise Gibbons and Steven Lee. All three are very experienced planning inspectors and conducted the examination in a very thorough and professional way throughout.
- 2.4 The Examination officially began at the point of "Submission" (February 2022), however the hearing sessions did not start until the beginning of November 2022. In the early stages of the Examination, the Inspectors raised a number of Preliminary Questions (PQs) and Matters, Issues, and Questions (MIQs) that were prompted by their review of the plan. These probed issues of soundness and specific issues raised through consultation on the plan. The PfE authorities responded to the PQs and (together with other stakeholders) to the MIQs. In response to some of the MIQs, the PfE Team, proposed modifications to the PfE authorities to address issues raised.
- 2.5 The examination hearings sat for 12 weeks in total, including a final session at the beginning of July 2023. The sessions before Christmas considered the Spatial Strategy and thematic policies and the sessions in 2023 focused on the strategic allocations, Green Belt Additions and Monitoring. The additional session in July related to five specific proposed allocations (JPA1.1 Heywood/Pilsworth; JPA28 North of Irlam Station; JPA29 Port Salford Extension; JPA30 Ashton Moss; and JPA33 New Carrington) which include land that has been identified on the Natural England map of deep peaty soils.
- 2.6 The PfE authorities were represented by Christopher Katkowski KC throughout, with staff from the GMCA, all nine authorities and TfGM providing expert witnesses.
- 2.7 The Examination hearing sessions took place at the former Manchester Fire and Rescue Training and Development Centre in Manchester city centre. It ran very smoothly, with the Inspectors and participants alike commenting on how well organised it was. The livestreaming worked well and all the sessions remain available to view via the CA website.
- 2.8 In addition to the PQs and MIQs, the Inspectors issued 'Action Points' (APs) regularly throughout the duration of the sitting weeks. In these they asked the PfE authorities to prepare modifications to policies, which related to the detailed wording of the policies, and in respect of the allocations, involved clarification of how the allocation policies link to the thematic (sustainable, housing, greener etc) policies in the plan. With the exception of two sites, one

¹ The tests of soundness in paragraph 35 of the NPPF require that the plan is positively prepared, justified, effective and consistent with national policy.

² Paragraph 24 of the NPPF requires that local planning authorities cooperate with each other, and with other prescribed bodies, on strategic matters that cross administrative boundaries.

in Salford (JPA28 – North of Irlam Station) and one in Manchester, close to the Airport (JPA10 – Global Logistics), the Inspectors did not recommend the removal of any allocations although, in a small number of cases, they did recommend the amendment of allocation boundaries. Further details on the Inspectors reasons for recommending the deletion of the Global Logistics allocation are set out in paragraph 5.2.

- 2.9 Within their APs, the inspectors made it clear that they considered the modifications to be necessary at that stage of the examination to inform their consideration of whether the Plan is sound and/or how it could be made sound and/or legally compliant by main modifications. They also made it clear when they published their action points that they may decide that other or different main modifications are required.
- 2.10 The PfE authorities submitted responses to the Inspectors' APs with modifications proposed to the policies where these were considered necessary to make the plan sound. The responses to the individual PQs, MIQs and APs are available on the Examination website. As requested by the Inspectors, all the proposed main modifications were compiled into a main modifications schedule which was first published in July 2022 with subsequent editions being published in October and November 2022 and January, May June and August 2023. Since November 2022 iterations of a composite plan have also been published on the Examination website, alongside the proposed main modifications' schedules, to aid the reader by identifying the proposed modifications in-situ within the plan.

3.0 PfE Proposed Modifications

- 3.1 It is very normal for the outcome of a local plan examination to be that the Inspectors(s) recommend main modifications [MMs] to the plan, where necessary to make the plan sound and legally compliant. As a matter of law a "main modification" can only be made if it is necessary in order to make the Plan "sound". The tests which are applied to determine whether a Plan is "sound" are those set out in the National Planning Policy Framework (NPPF). Therefore, legislation enables the Inspector to recommend a MM only if the plan would otherwise be unsound or legally non-compliant. The Inspector has no power to recommend other changes, even if they would improve the plan.
- 3.2 The Inspector agrees the text of the proposed MMs with the LPA, based in most cases on discussion at the hearing sessions. This was done through the process of Action Points outlined above and it was the responses to these, the various iterations of the proposed MMs' schedules and composite plan which informed the Inspectors' consideration of whether the PfE 2021 Plan was sound and/or how it could be made sound and/or legally compliant by MMs.
- 3.3 The Inspectors' post hearing letters was published on the examination website on 11th August 2023 and 11th September 2023. The Inspectors' post hearings' letters are based on a consideration of all the evidence and on the application of professional expertise and judgment. In their letters, the Inspectors state that they are now satisfied, at this stage of the examination, that all of the

proposed main modifications are necessary to make the Plan sound and would be effective in that regard. This conclusion is, however, without prejudice to their final conclusions that they will reach following consideration of responses to the public consultation to be carried out on the main modifications and which are the subject of this report.

- 3.4 Additional modifications (sometimes also referred to as “minor modifications”) are changes which do not materially affect the policies in the Plan. They may be made to the PfE Plan, but do not fall within the scope of the examination. A separate schedule of additional modifications has been prepared which will sit alongside the Main Modifications’ schedule during the consultation period. It should be noted that these have been prepared at this point in time to make the modified plan more readable, but the Inspectors will not consider responses made in respect of these additional modifications, as they do not fall within the scope of the Examination.
- 3.5 Whilst the consultation is only about the proposed main modifications and the policy map changes associated with these main modifications, a schedule of additional modifications and a composite plan illustrating all the proposed modifications in situ have been prepared and are available alongside this report. All documents will be made available at the time of the consultation, to assist the reader, but only representations on the main modifications are considered by the inspectors.
- 3.6 The following sections of this report set out what they mean in terms of the overall aims of the plan and also for Manchester specifically.

4.0 What do the Modifications mean for the overall aims of the Plan

- 4.1 Whilst there are a large number of proposed modifications, including amending the plan period from 2020 to 2037 to 2022 to 2039, they do not change the overall Vision, Objectives and Spatial Strategy of the plan. The Inspectors consider that the proposed modification to the Plan period is necessary to make the plan sound to ensure that, in line with Government Policy, the PfE Strategic policies look ahead over a minimum 15 year period from adoption and thus provide sufficient policy framework for the individual local plans which will follow on from the PfE’s adoption.

Spatial Strategy

- 4.2 The spatial strategy remains to deliver sustainable, inclusive growth with the following spatial elements;
- Significant growth in jobs and housing at the core – continuing development in the ‘core growth area’ encompassing the city centre and beyond to the Etihad in the east, through to the Quays, Trafford Park and Port Salford in the west. The majority of commercial employment growth is proposed in this area and around 50% of overall housing supply is found here and, in the wards, immediately surrounding it (inner areas).

- Boosting northern competitiveness – provision of significant new employment opportunities and supporting infrastructure and a commitment that collectively the northern districts meet their own local housing need.
- Sustaining southern competitiveness – supporting key economic drivers, for example around Wythenshawe hospital and the Airport, realising the opportunities offered by national infrastructure investment, e.g. HS2, whilst recognising the important green infrastructure assets in the area.

Jobs

- 4.3 Economic prosperity remains central to the overall strategy. It is essential to raising incomes, improving health and quality of life, and providing the finances to deliver better infrastructure, services and facilities. PfE continues to attract investment in our city and town centres alongside recognising the importance of investing in strengthening existing and creating new employment locations, so that all communities are able to contribute to, and benefit from, growth.
- 4.4 In order to achieve the economic growth, the plan sets a global target for the nine authorities of just over 2 million sq.m. of new office floorspace and just over 3,500,000 sq.m. of industrial and warehousing floorspace over the plan period. These figures have been modified to reflect the revised plan period, and will inform the preparation of district local plans.

Homes

- 4.5 Greater Manchester is facing a housing crisis. Although the Greater Manchester authorities have built more houses in recent years, wages have not been keeping pace with property price increases and affordability issues have intensified. To address the supply side, Government policy sets out a standard methodology for calculating local housing needs to provide local authorities with a clear and consistent understanding of the number of new homes needed in an area. This standard methodology remains Government policy and the Inspectors did not consider there were exceptional circumstances to deviate from using it, in the case of the PfE Plan. Therefore, the PfE still identifies that around 10,300 (10,305) homes are required per annum. However, as a result of the change to the Plan period, the number of homes to be delivered over the lifetime of the plan has increased from just under 165,000 to just over 175,000 (175,185) new homes. The plan also continues to support Greater Manchester's commitment to deliver more affordable housing including ones for social or affordable rent. Local plans will set targets for the provision of affordable housing based on evidence relating to need and viability.

Environment

- 4.6 The Plan is not solely concerned with accommodating development. It also includes a range of policies designed to protect and enhance our many and varied green spaces and features which are used in many different ways and

afforded many different values by the people who live, work or visit the city-region.

- 4.7 The Plan supports the important role of our natural assets by:
- Taking a landscape scale approach to nature restoration;
 - Seeking to protect and enhance our network of green and blue infrastructure;
 - Seeking a significant overall enhancement of biodiversity and geodiversity; and
 - Seeking to maintain a new and defensible Green Belt which will endure beyond the plan period.
- 4.8 Furthermore, the plan supports wider strategies around clean air, walking and cycling and underpins Greater Manchester's ambition to be a carbon neutral city-region by 2038. A key element of this remains that there is an expectation that all new development to be net zero carbon by 2028.

Brownfield land preference

- 4.9 There remains a strong focus in the plan on directing new development towards sites within the existing urban area, which are often in sustainable locations, close to facilities and served by existing infrastructure. Maximising the use of land in the urban area enables us to minimise the release of greenfield and Green Belt land for development. The land supply identified for development in the plan is largely within the urban area:
- Offices - 98%
 - Industry and Warehousing- 51%
 - Housing - 90%
- 4.10 There are significant viability issues in parts of the conurbation and there is a need to continue to press Government for support to remediate contaminated land, to provide funding for infrastructure and to support alternative models of housing delivery. The Brownfield Housing Fund is targeted at Combined Authorities and begins to help to address viability issues, but it is not enough to enable the full potential of our brownfield land supply to be realised.

Green Belt

- 4.11 The PfE Plan includes a limited release of Green Belt for both housing and employment. The net loss of Green Belt proposed is 2,213 hectares. This compares to a net loss of 1,754 hectares in the PfE 2021 Plan. Although the net loss is higher than that in the PfE 2021 Plan, this is not as a result of more land being proposed for release by the introduction of further development allocations. Instead, it is due to the fact that the Inspectors concluded that exceptional circumstances existed to justify only 18 of the 49 proposed Green Belt Additions and therefore only those 18 Green Belt Additions could remain in the plan and thereby contribute to the area covered by Green Belt. In concluding that exceptional circumstances had not been fully evidenced and

justified for each of the other 31 proposed Green Belt Additions, including one which is almost 200 hectares in size, the overall net let loss of Green Belt, taking account of the Green Belt releases and additions, compared against the previously adopted Green Belt boundary is greater than it would have been had the inspectors concluded that all 49 Green Belt Additions were fully evidenced and justified. The reduction in the Green Belt Additions as proposed by the Inspectors does not, however, impact on the delivery of the overall Vision, Spatial Strategy and Strategic Objectives of the Plan.

- 4.12 The Policies in the Plan would result in the overall extent of the nine authorities' Green Belt reducing by 4.1%. The previously adopted Green Belt covers almost 47% of the land covered by the nine authorities. The Policies in the PfE Plan would reduce this to just under 45% of the PfE authorities remaining as designated Green Belt.

5.0 What do the Modifications mean for Manchester

- 5.1 The Plan continues to feature specific policies and an allocation that directly relate to Manchester including:

- Delivery of a minimum of around 60,000 new homes; and over 2 million square metres of office floorspace in Manchester by 2039;
- Policies to deliver growth and regeneration across the City
- Seeking to achieve a carbon neutral city no later than 2038;
- Inclusion of the requirement to deliver biodiversity net gain in line with national policy;
- Policies across a range of other themes including flood risk, water resources, air quality, economic and housing matters, heritage, culture, education and skills, health, and sport and recreation; and
- Specific allocation identified in the plan for Manchester for new jobs at Wythenshawe Hospital.

- 5.2 The housing and employment figures in the main modifications reflect that fact that the plan has been extend to a period from 2022 to 2039 meaning an additional year of housing and employment development has been included. This is required to ensure the adopted plan has a 15-year time horizon previously explained at paragraph 4.1.

- 5.3 As previously noted in paragraph 2.8, the Inspectors have recommended the deletion of the proposed allocation at Global Logistics (see Further Action Points note IN36 in the Examination Library). The Inspectors reasons for the deletion of the allocation are reproduced below:

“The scale of floorspace delivered would not be significant in terms of the overall employment supply; neither would it provide substantial qualitative benefits through its proximity to the airport. Accordingly, the site would make a very limited contribution to the overall economic strategy. Given the size and constrained nature of the site, we are also not persuaded that the requirements of the policy would be sufficient in this case to ensure the delivery of a satisfactory form of development. This is particularly the case in

relation to biodiversity assets in and around the site, including the effects on the mitigation measures already identified for the adjacent development. Notwithstanding the overall moderate harm identified to the Green Belt, we therefore do not consider that exceptional circumstances have been fully evidenced and justified for the release of this site from the Green Belt, contrary to paragraph 140 of the NPPF. Reducing the allocation to areas outside the Green Belt would not overcome our concerns relating to potential effects of development and a satisfactory form of development.

AP144. GMCA to prepare main modifications which delete policy JPA10 from the Plan, along with any consequential changes to other policies, reasoned justification and maps.”

6.0 Relationship with Manchester Local Plan

- 6.1 The Places for Everyone Plan is the strategic spatial plan for the nine constituent boroughs and as such sets out a collective planning policy framework. All policies within the plan are "strategic policies". It is being prepared as a Joint Development Plan Document of the nine local planning authorities. Once the Places for Everyone Plan is adopted it will form part of Manchester's development plan. As such Manchester's local plan will need to be consistent with it and any neighbourhood plans will need to be in general conformity with the strategic policies.
- 6.2 The evidence that underpins the Places for Everyone Plan will also inform Manchester's local plan but, as a strategic plan, it does not cover everything that the local plan would. Therefore, Manchester's Local Plan will set out more detailed policies including both strategic and non-strategic policies, as appropriate, reflecting local circumstances. Appendix A of the PfE Plan sets out the policies in the relevant adopted GM district local plans which will be replaced by the Places for Everyone Plan.
- 6.3 Manchester's local plan will be expected to look ahead a minimum period from its adoption, in line with national policy. In amending the plan period from 2020 to 2037 to 2022 to 2039 the PfE Plan should provide an appropriate strategic policy framework for the local plan which will be produced, following its adoption. However, in the event that the local plan looks beyond 2039, the minimum requirement figures set out in Policies JP-J3, JP-J4 and JP-H1 should be used to inform local plan target(s).

7.0 Integrated Assessment and Habitats Regulations Assessment

- 7.1 As part of the development of the PfE Plan, an Integrated Assessment (IA) was undertaken incorporating the requirements of:
- Sustainability Appraisal (SA): mandatory under section 19 (5) of the Planning and Compulsory Purchase Act 2004.
 - Strategic Environmental Assessment (SEA): mandatory under the Environmental Assessment of Plans and Programmes Regulations 2004 (which transpose the European Directive 2001/42/EC into English law).

- Equality Impact Assessment (EqIA): required to be undertaken for plans, policies and strategies by the Equality Act 2010.
 - Health Impact Assessment (HIA): there is no statutory requirement to undertake HIA, however it has been included to add value and depth to the assessment process.
- 7.2 The IA contributed to the development of the PfE through an iterative assessment, which reviews the draft policies and the discrete site allocations against the IA framework.
- 7.3 A Habitats Regulations Assessment (HRA) refers to several distinct stages of Assessment which must be undertaken in accordance with the Conservation of Habitats and Species Regulations 2017 (as amended) to determine if a plan or project may affect the protected features of a habitats site before deciding whether to undertake, permit or authorise it.
- 7.4 All plans and projects (including planning applications) which are not directly connected with, or necessary for, the conservation management of a habitat site, require consideration of whether the plan or project is likely to have significant effects on that site. If a proposed plan or project is considered likely to have a significant effect on a protected habitats site (either individually or in combination with other plans or projects) then an Appropriate Assessment of the implications for the site is required.
- 7.5 The PfE2021 was assessed as a Plan which was considered likely to have significant effect on one or more European protected site and was therefore informed (and accompanied) by an HRA with mitigation measures identified as appropriate.
- 7.6 The Inspectors have made it clear that the modifications they have decided should be made to the Plan should be subject to sustainability appraisal and Habitat Regulations Assessment as appropriate. Furthermore, the Inspectors have made it clear that the sustainability appraisal and Habitat Regulation Assessment reports will be subject to public consultation, alongside the modifications, before the end of the examination. Accordingly addendums have been produced for both the IA (incorporating the sustainability appraisal) and the HRA, assessing the impact of the modifications.
- 7.7 With respect to the sustainability appraisal, where individual policy scores have moved from positive to uncertain or neutral, the SA acknowledges that when the plan is read as a whole, the topic is covered in other relevant policies and therefore no residual impacts have been recommended.
- 7.8 The outcome of the HRA screening assessment is that there are no “Likely Significant Effects” on European sites, other than those identified in the Submission version HRA. Therefore, it has not been necessary to amend the PfE Appropriate Assessment as a result of the proposed main modifications.
- 7.9 The IA and HRA addendum reports are available alongside this report and will be published alongside the main modifications schedule.

8.0 Evidence Base

- 8.1 A comprehensive evidence base was assembled to support the policies and proposals in the PfE Plan which was made available for consultation in 2021. This evidence was submitted alongside the PfE Plan in February 2022 and has remained available on the GMCA's website since then and throughout the examination. As one of the tests of soundness is whether a plan is "justified – ...based on proportionate evidence", the Inspectors considered this evidence as part of their Examination into whether, or not, the PfE Plan is "sound". As detailed above, this evidence base will also be used to inform Manchester's local plan.

9.0 Status of NPPF Proposed Changes

- 9.1 In December 2022 the Government consulted upon a number of changes to the National Planning Policy Framework (NPPF). The consultation ran from 22 December 2022 to 2 March 2023. The consultation sought views on a proposed approach to updating NPPF whilst at the same time seeking views on proposals to prepare National Development Management Policies, how policy could be developed to support levelling up, and how national planning policy is currently accessed by users.
- 9.2 The Inspectors made a statement that in light of the transitional arrangements (contained within the draft NPPF changes), they would carry on with the examination as programmed in the context of the tests of soundness set out in current NPPF, published in 2021.
- 9.3 The Government is still analysing the feedback, therefore the draft, as proposed to be changed, version of the NPPF cannot be used to determine whether a Plan is "sound"; accordingly it would be unlawful to propose any "main modification" to PfE and/or withdraw from PfE, on the basis of the draft proposed changes to the NPPF. This is especially the case given that PfE is at such an advanced stage of preparation.
- 9.4 As the Department for Levelling Up, Housing, and Communities is currently analysing the feedback to the consultation and no changes to the NPPF have yet been published, the examination progressed through its scheduled programme of sessions. The Inspectors duly issued their post hearings' letter with the schedule of proposed main modifications that they consider are necessary to make the plan sound and/or legally compliant and which should therefore be made available for a period of public consultation.
- 9.5 The schedule of main modifications, which is available alongside this report, represents those changes to the plan that the inspectors consider are necessary. They do not include any modifications on the basis of the draft proposed changes to the NPPF. To make further changes to the schedule, e.g. amending overall development targets, removing additional sites which PfE proposes to take out of the Green Belt and/or amending the Green Belt Addition sites, on the basis of the consultation draft NPPF would not be lawful.

10.0 Previous Consultation

10.1 Five consultations have taken place in relation to the plan, the first four in relation to the GMSF and the fifth one being in relation to the PfE plan. The first, in November 2014 was on the scope of the plan and the initial evidence base, the second in November 2015, was on the vision, strategy and strategic growth options, and the third, on a Draft Plan in October 2016. The fourth consultation was on The Greater Manchester Plan for Homes, Jobs and the Environment: the Greater Manchester Spatial Framework Revised Draft 2019 (GMSF 2019) and took place in 2019. It received over 17,000 responses. The responses received informed the production of GMSF 2020. The withdrawal of Stockport Council in December 2020 prevented GMSF 2020 proceeding to Regulation 19 Publication stage and instead work was undertaken to prepare PfE 2021. Therefore, the responses to GMSF 2019 were used to inform the production of the PfE plan instead. The fifth consultation ran from August 9, 2021, for 8 weeks, ending on October 3, 2021. It related to publication of the plan and over 15,000 representations were duly made, by over 3,800 individuals and organisations.

11.0 PfE Modifications Consultation

- 11.1 At this modifications' consultation stage, whilst anyone can make a representation, the PINS Procedure Guide for Local Plan Examinations (<https://www.gov.uk/government/publications/examining-local-plans-procedural-practice/procedure-guide-for-local-plan-examinations>) makes it clear (at section 6) that the consultation is only about the proposed main modifications and any policies map changes and no other aspect of the plan.
- 11.2 Whilst it is only necessary to consult on the Main Modifications and any related policy map changes, it is proposed to consult on all modifications so that the overall proposed changes to the plan are clear. The Inspectors will, however, only consider comments received to the Main Modifications; the nine PfE authorities will consider those comments relating to the additional modifications.
- 11.3 As with the Regulation 19 consultation, the consultation will be hosted by the GMCA, with the consultation being carried out in line with the requirements of the relevant authority's Statements of Community Involvement and the guidance contained in the above mentioned PINS guidance note. The guidance note states that "the nature and duration of the consultation should reflect that of the consultation held at Regulation 19 stage, where appropriate. This means it should last at least six weeks." However, as the Regulation 19 consultation ran for eight weeks, it is considered appropriate to reflect that in the duration of the modifications' consultation. Therefore, it is proposed that the consultation would run for a period of eight weeks.
- 11.4 Manchester's Statement of Community Involvement (SCI) specifically states that at main modifications stage,

“The Inspector may recommend changes to the Local Plan to make it sound and / or legally compliant. The changes are called 'main modifications' and we will consult on these and forward the responses to the Inspector for consideration. At the same time we may put forward our own 'additional modifications' to deal with more minor issues. There is no legal requirement to consult on the additional modifications but we will usually consult on these alongside the main modifications.”

- 11.5 The SCI identifies at Picture 4.1 that at the main modifications consultation stage, the primary means of contact will be via information on the Council’s website, and notification of consultees on our Local Plan database either by email or letter. Hard copies of the consultation documents will be placed in the Central Library and site notices will be erected around the remaining allocation proposal at Medipark.

12.0 Next Steps

- 12.1 Following the conclusion of the consultation, the representations received will be forwarded to the Programme Officers along with a report listing all of the representations; a summary of the main issues raised; and a brief response, on behalf of the nine districts, to those main issues.
- 12.2 The Inspectors will consider all the representations made on the proposed MMs before finalising the examination report and the schedule of recommended MMs. Further hearing sessions will not usually be held, unless the Inspectors consider them essential to deal with substantial issues raised in the representations, or to ensure fairness.
- 12.3 When deciding whether or not to recommend that the local planning authorities should make the MMs, the Inspectors will normally consider them in the form in which they were published for consultation. However, in some limited circumstances, the responses to consultation may lead the Inspector to consider that a new MM, or an amendment to one that has already been consulted on, is also necessary to make the plan sound or legally compliant; or that a proposed MM is not in fact necessary for soundness and should not be recommended. The Inspectors may only recommend such changes to the MMs without further consultation if they are satisfied that no party would be prejudiced as a result. For example, the consultation already undertaken on the MMs might have adequately addressed the point, or the amendment might be a very minor one. Should further consultation be necessary a further report will be presented to the nine authorities for approval. Alternatively, if the Inspectors consider that no further consultation is necessary following the modifications’ consultation (which is the subject of this report), the ultimate decision to adopt must be taken by each of the Full Councils of the nine participating local authorities. This will be the subject of a further report at the appropriate time.

13.0 Recommendations

13.1 The Executive is recommended to:

- (1) Note progress made in respect of the Places for Everyone Plan (PfE).
- (2) Agree that the PfE modifications (Main, Additional and those relating to the policies map), and associated supporting background documents be subject to a period of representations for a period of 8 weeks commencing no earlier than 9 October 2023; and
- (3) Agree the next steps for the production of the PfE Plan (section 12).

Schedule of Main Modifications to the Places for Everyone Plan

Introduction

This schedule contains all of the main modifications to the submitted version of the Place for Everyone (PfE) Plan ([SD1](#)) which have been proposed in order to make the PfE Plan 'sound'. The main modifications are clearly set out with deletions being shown as strikethrough and new text being underlined. The format of the modifications is in line with guidance published by the Planning Inspectorate [Procedure Guide for Local Plan Examinations - GOV.UK \(www.gov.uk\)](http://www.gov.uk).

This version supersedes all earlier versions of proposed main modifications schedules published on the examination website.

Chapter One Introduction Proposed Main Modifications

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
MM1.1	Para. 1.20 Introduction	11	Modify first bullet point of paragraph 1.20 as follows: <ul style="list-style-type: none"> “progress the strategic policies in GMSF 2020, for example net zero carbon development, affordable housing, and space and accessibility ‘<u>accessible and adaptable</u>’ standards as set out in Part M4 (2) of the Building Regulations for new housing” 	To clarify, ensuring consistency across the Plan and removing any ambiguity in the use of the terms “access”, “accessible” and “accessibility”.	GMCA24 AP36
MM1.2	Para. 1.26 Introduction	12	Modify paragraph 1.26 as follows: <ul style="list-style-type: none"> “sets out how they should develop up to the year 2037 for the years 2022-2039; <u>provides the strategic framework for local plans;</u> <u>sets specific requirements to be taken forward in local plans identifies the amount of new development that will come forward</u> in terms of housing, offices, and industry and warehousing, and the main areas in which this will be focused; <u>sets out policies to inform the preparation and determination of planning applications;...</u>” 	To ensure that there is no ambiguity and clarify the role of the Plan in relation to local plans and neighbourhood plans.	M1.1 Q1.9 GMCA11.1 AP5

MM1.4	Para. 1.27 Introduction	12	Modify paragraph 1.27 as follows: “The Places for Everyone Plan reinforces our ambition to bring forward brownfield land, it reduces the net loss of Green Belt further from previous versions of the GMSF by reducing the number of sites being allocated, identifying a Broad Location and provides stronger protection for our important environmental assets...”	A consequential change to ensure a justified and unambiguous plan, following the removal of High Crompton Broad Location from JP-Strat7.	GMCA21 AP14
MM1.5	Para. 1.34 Introduction	14	Modify paragraph 1.34 as follows: “... In response to comments received both in 2016 and further in 2019, the amount of employment land identified in the PfE Plan area, up to 2037 has been significantly reduced since the 2016 GMSF (by approx. 40%) to keep the release of Green Belt to a minimum and in order that the level of employment growth broadly correlates with our new housing requirement for Greater Manchester. Several of the sites are large in scale and will be partially delivered beyond 2037 <u>2039</u> . We have also identified a potential growth area in north east Oldham as a Broad Location rather than an allocation to provide flexibility for the future.”	Required as a result of the change to the plan period and to reflect the passage of time. Consequential change to ensure a justified and unambiguous plan.	GMCA11.1 AP5 GMCA21 AP14 GMCA96 AP147
MM1.6	Para. 1.36 Introduction	14	Modify paragraph 1.36 as follows: “A key objective of the Places for Everyone Plan is to meet our Local Housing Need – using the Government’s standard methodology this equates to almost 165,000 <u>just over 175,000</u> homes over the plan period (2021-2037 <u>2022 -2039</u>)...”	Required as a result of the change to the plan period.	GMCA11.1 AP5

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
MM1.7	Para. 1.42 Introduction	15	Modify paragraph 1.42 as follows: “The majority of development between 2024 <u>2022</u> and 2037 <u>2039</u> (the "plan period") will be on land within the urban area, most of which is brownfield land. Within the plan period around 90% of housing, 99% <u>98%</u> of offices and 47% <u>51%</u> of industrial and warehousing development is within the urban area.”	Required as a result of the change to the plan period.	GMCA11.1 AP5
MM1.8	Paras 1.49 to 1.51 Introduction	16	Delete paragraph 1.49 in its entirety. Modify paragraph 1.50 as follows: “The net amount of Green Belt land proposed for release is 4,754 <u>2,213</u> hectares – in relation to the nine districts preparing this Plan, this means a 3.3% <u>4.1%</u> reduction in the size of the Green Belt compared to an 8.1% reduction in 2016. ” Modify paragraph 1.51 as follows: “The nine boroughs cover some 115,084 hectares (<u>including land covered by the Peak District National Park</u>), almost half (46.7%) is <u>was previously</u> designated as Green Belt. The proposals in the Places for Everyone: Publication Plan 2024 would result in Green Belt covering just over <u>under</u> 45% of the nine districts.”	To reflect passage of time and consequential changes reflecting main modifications to the PfE plan.	GMCA96 AP147
MM1.9	Para. 1.52 Introduction	16	Modify paragraph 1.52 as follows: “... A key element of this is to require all <u>set out a pathway for</u> new development to be net zero carbon by 2028 at the latest – we do not want to build homes and workplaces which require retrofitting in the future and we have set an ambitious target, backed up by our evidence to achieve this as soon as possible.	A consequential change, as a result of modifications proposed to Policy JP-S2.	GMCA21 AP20

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			Our commitment to keep fossil fuels in the ground remains, at this time therefore we will not support fracking.		
MM1.10	Para. 1.57 Introduction	17	Modify paragraph 1.57 as follows: “... It is being prepared as a Joint Development Plan Document of the nine local planning authorities. <u>Once the Places for Everyone Plan is adopted it will form part of the relevant authority’s development plan. As such local plans will need to be consistent with it and neighbourhood plans will need to be in general conformity with the strategic policies. Local plans will be expected to look ahead a minimum period from their adoption, in line with national policy. In the event that a local plan looks beyond 2039, the minimum requirement figures set out in Policies JP-J3, JP-J4 and JP-H1 should be used to inform local plan target(s). It is a strategic plan and does not cover everything that a district local plan would. Districts will continue to produce their own Local Plans, setting out more detailed policies reflecting local circumstances. Appendix A sets out the policies in the relevant GM district local plans which will be replaced by the Places for Everyone Plan.</u>”	To ensure that there is no ambiguity and clarify the role of the Plan in relation to local plans and neighbourhood plans. To clarify that any strategic policies in local plans will be expected to look ahead a minimum period from their adoption in line with national policy, and to clarify how the requirements would be used in local plan preparation.	M1.1 Q1.9 GMCA11.1 AP4
MM1.11	Para. 1.58 Introduction	18	Modify paragraph 1.58 as follows: “Once the Places for Everyone Plan is adopted it will form part of the relevant authority’s development plan. The evidence that underpins the Places for Everyone Plan will also inform district level plans, but, as a strategic plan it does not cover everything that a district local plan would. Districts will continue to produce their own Local Plans, setting out more detailed policies including both strategic and non-strategic policies, as appropriate, reflecting local circumstances. Appendix A sets out	To ensure that there is no ambiguity and clarify the role of the Plan in relation to local plans and neighbourhood plans.	M1.1 Q1.9

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			<u>the policies in the relevant GM district local plans which will be replaced by the Places for Everyone Plan.</u> “		
MM1.12	New para. after 1.58 Introduction	18	Insert new paragraph after 1.58 as follows: <u>“Due to the presence of the Peak District National Park in the eastern part of the borough of Oldham, it should be noted that the Places for Everyone Plan covers the whole of the borough of Oldham except that part which falls within the Peak District National Park. Developments within the National Park should refer to Development Plan Documents prepared by the Peak District National Park Authority.”</u>	To clarify that part of Oldham Borough is within the Peak District National Park and that that area is not subject to policies in the Plan but rather subject to the Peak District National Park development plan.	GMCA3.1 PQ44

Chapter Two Context Proposed Main Modifications

MM3.1	Figure 3.1 Key Diagram	38	The Key Diagram, Figure 3.1: Modify to clearly illustrate the strategy and, as necessary, to take account of modifications in the plan. See Annex 3, Map MM3.1.	To clarify and ensure effectiveness of the Key Diagram.	GMCA11.1 AP8

Chapter Four Strategy Proposed Modifications

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
MM4.1	Para.4.10 Strategy	46	Modify paragraph 4.10 as follows: “An essential aspect of the efficient and effective use of land will be <u>for preference to be given to making as much use as possible of suitable</u> prioritise the reuse of previously-developed (brownfield) land <u>and vacant buildings</u> when meeting development needs...”	To clarify as a consequential change to other policies in the framework.	GMCA21.1 AP19
MM4.2	Para. 4.11 Strategy	46	Modify paragraph 4.11 as follows: “... Securing higher densities in the most accessible locations will help to maximise the ability of people to travel by walking, cycling and public transport, and reduce reliance on the car. <u>Unless specified, the terms “accessible” and “accessibility” refer to being able to reach, approach or enter a location, making the most efficient use of land resources, delivering a sustainable pattern of development, reducing the need to travel by unsustainable modes and increasing the proportion of trips made by walking, cycling and public transport. In relation to places or services, it means accessible to all, inclusive of people with disabilities and particular mobility requirements. The term “access” is used in accordance with the dictionary definition “to enable the means or opportunity to approach or enter a place.”</u>	To clarify, removing any ambiguity in the use of the terms “access”, “accessible” and “accessibility”.	GMCA24 AP36
MM4.3	Para. 4.20 Strategy	48	Modify paragraph 4.20 as follows: “This approach is summarised in Figure 4.1 'Spatial Strategy' and explained in more detail in the rest of this chapter. <u>The Figures (4.1 to 4.8) and Picture 4.2 provide an illustrative representation of key aspects of policies JP-Strat 1 to JP-</u>	To clarify the illustrative purpose of the diagrammatic maps with key aspects within Plan, including a consequential	M5.1 Q5.2 AP85

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			<u>Strat11. They assist both further plan making and decision makers considering planning applications by providing additional visual context for the policies. The transport infrastructure improvements shown in Figures 4.4; 4.5; 4.6; 4.7; 4.8; and Picture 4.2 are for illustrative purposes only. There is a comprehensive list of indicative transport interventions for the delivery of allocations in Appendix D. The 2040 Transport Strategy and Five Year Delivery Plan set out the transport interventions and policies important to improving the transport network and helping to deliver more sustainable growth across GM as a whole.</u>	change as a result of modifications to JP-C7 and to confirm the status of the transport infrastructure improvements.	
MM4.4	New para. after 4.22 Strategy	49	Insert new paragraph after 4.22 as follows: <u>“The Policies within this Chapter establish the overall spatial strategy for the Plan. In addition, Policies JP-Strat1 to JP-Strat11 provide a strategic framework for local plans.”</u>	To clarify that the status of policies JP-Strat1 to JP-Strat11 is not to set out specific requirements to be taken forward in local plans or to inform the preparation and determination of planning applications.	GMCA8 SQ5.3
MM4.5	Figure 4.2 Core Growth Area	50	Modify Figure 4.2 to clearly illustrate the strategy and, as necessary, to take account of modifications in the plan. See Annex 3, Map MM4.5.	To clarify geographical extent of the Core Growth Area as illustrated on Figure 4.2.	GMCA96 AP147 GMCA21 AP10
MM4.6	JP-Strat1 Core Growth Area	51	Modify paragraph 4.26 as follows: <u>“In total sufficient land has been identified in the Core Growth Area for almost 69,000 new homes. Development within the City Centre and the Quays will...”</u>	To clarify that reference to the available land supply is moved from Policy JP-Strat1 to the reasoned	GMCA21 AP11 AP12

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
	Reasoned Justification			justification at paragraph 4.26. Required as a result of the change to the plan period and the updated 2022 land supply.	
MM4.7	JP-Strat1 Core Growth Area Policy	51	<p>Modify second paragraph as follows: “Complementary to, but not at the expense of, its economic function it will see a significant increase in the number and range of homes in areas with good connections to employment, training and education facilities. These homes will be supported by necessary green spaces and social infrastructure and will be of an appropriate design. In total sufficient land has been identified in the Core Growth Area for almost 98,000 new homes.”</p> <p>Modify third paragraph as follows: “Infrastructure provision will support the growth and continued capacity of the Core Growth Area having particular regard to the Greater Manchester Transport Strategy 2040 refresh and accompanying Delivery Plans.”</p>	<p>To clarify that reference to the available land supply is moved from Policy JP-Strat1 to the reasoned justification at paragraph 4.26 in order to demonstrate that sufficient land is available to deliver the ambitions of the spatial strategy for the Core Growth Area.</p> <p>To clarify, ensuring consistency of approach across the strategic policies in relation to general matters such as infrastructure provision and quality of design.</p>	GMCA21 AP11 AP12 GMCA21 AP12
MM4.8	JP-Strat2 City Centre	52	Modify paragraph 4.29 as follows:	To clarify that reference to the available land supply is	GMCA4.1 PQ49

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
	Reasoned Justification		<p>“Although there is already a very high level of activity within the City Centre, the area has significant development potential and will be the largest source of new jobs and homes in Greater Manchester over the next few decades. <u>Over the period 2022-2039, land to accommodate around 1,700,000 sqm of office floorspace, around 54,000 new dwellings and minimal industry and warehousing (just under 38,000 sqm) has been identified within the City Centre.</u> The City Centre offers significant opportunity to maximise the use of previously developed land. It will enable the delivery of a range of...”</p>	<p>moved from Policy JP-Strat2 to the reasoned justification at paragraph 4.29 in order to demonstrate that sufficient land is available to deliver the ambitions of the spatial strategy for the City Centre Required as a result of the change to the plan period and the updated 2022 land supply.</p>	<p>GMCA11.1 AP5 GMCA21 AP11</p>
MM4.9	JP-Strat2 City Centre Policy	52	<p>Modify first paragraph as follows: “The role of the City Centre as the most significant economic location in the country outside London will be strengthened considerably. The City Centre will continue to provide the primary focus for business, retail, leisure, culture and tourism activity in Greater Manchester, but the increasingly important residential role of the City Centre will be expanded considerably by a range of high density new homes, supported by necessary infrastructure. <u>Development will generally be high density.</u> It will enable people to take advantage of the access to education and training and the extensive public transport offer, reducing the need to travel to work whilst supporting economic growth and reducing levels of poverty.”</p> <p>Delete fourth paragraph as follows: “Over the period 2020-2037, land to accommodate around 2,200,000 sqm of office floorspace, around 56,000 new</p>	<p>To clarify, ensuring consistency of approach across the strategic policies in relation to general matters such as infrastructure provision and quality of design.</p> <p>To clarify that reference to the available land supply is moved from Policy JP-Strat2 to the reasoned justification at paragraph 4.29.</p>	<p>GMCA21 AP12 GMCA11.1 AP5 GMCA4.1 PQ49</p>

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			 dwellings and minimal industry and warehousing (just over 35,000 sqm) has been identified within the City Centre.		
MM4.10	Figure 4.3 City Centre	53	Modify to clearly illustrate the strategy and, as necessary, to take account of modifications in the plan. See Annex 3, Map MM4.10.	Modify Figure 4.3 to clarify that Salford Quays does not form part of the City Centre.	GMCA96 AP147 GMCA21 AP10
MM4.11	JP-Strat3 The Quays Reasoned Justification	54	Modify paragraph 4.32 as follows: “Although the Quays has seen very significant levels of investment in recent years, there is still enormous development potential within the area across all of its functions, including major expansion of the digital/creative cluster and significant residential opportunities. <u>Over the period 2022-2039, land to accommodate around 155,000 sqm of office floorspace, around 12,200 new dwellings and minimal industry and warehousing (around 6,000 sqm) has been identified within the Quays.</u> It offers significant opportunity to maximise the use of previously developed land by delivering large scale residential development close to a major source of jobs, education...”	Required as a result of the change to the plan period and the updated 2022 land supply.	GMCA21 AP11
MM4.12	JP-Strat3 The Quays Policy	54	Modify first paragraph as follows: “The Quays will continue to develop as an economic location of national significance, characterised by a wide mix of uses. Its business, housing, leisure and tourism roles will all be significantly expanded, in a mutually supportive way, reinforcing the area’s interest, vibrancy and unique identity to reduce levels of unemployment and poverty in our communities. <u>Development will generally be high density.</u> The high environmental quality of the Quays (including its public realm, green infrastructure, wildlife sites and heritage assets) will be	To clarify, ensuring consistency of approach across the strategic policies in relation to general matters such as infrastructure provision and quality of design. To clarify that reference to the available land supply is	GMCA21 AP12 GMCA4.1 PQ50

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			<p>protected and enhanced as <u>one of</u> its essential distinguishing features, and excellent, distinctive design will continue to be a priority.”</p> <p>Modify second paragraph as follows: “Over the period 2020-2037, land to accommodate around 192,000 sqm of office floorspace, around 12,500 new dwellings and minimal industry and warehousing (around 6,000 sqm) has been identified within the Quays. The new homes will be a range of high density homes, close to major sources of jobs and education, supported by the necessary infrastructure and amenities. Major improvements in accessibility by public transport, cycling and walking will be sought, including much better links to key rail stations and greater connectivity with the City Centre.”</p>	moved from Policy JP-Strat3 to the reasoned justification at paragraph 4.32 to demonstrate that sufficient land is available to deliver the ambitions of the spatial strategy for the Quays.	
MM4.13	JP-Strat4 Port Salford Policy	56	<p>Modify third paragraph as follows: “<u>The development of Port Salford must <u>be delivered together with ensure that necessary transport infrastructure is delivered, including highway improvements to accommodate the likely scale of traffic generation, in a way that is compatible with committed proposals for the enhancement of the wider motorway network and the provision of appropriate sustainable travel opportunities to meet the needs of the employees accessing the site. The growth of Port Salford will be managed to reflect the creation of additional capacity in the transport network and in accordance with the requirements of policy JPA29.</u></u>”</p>	To clarify, ensuring consistency of approach across the strategic policies in relation to general matters such as infrastructure provision and quality of design.	GMCA21 AP12

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
MM4.14	Figure 4.5 Port Salford	57	Modify to clearly illustrate the strategy and, as necessary, to take account of modifications in the plan. See Annex 3, Map MM4.14.	To clarify, ensuring that the policy is justified and provides an effective framework for local plans.	GMCA96 AP147 GMCA21 AP10
MM4.15	JP-Strat5 Inner Areas Reasoned Justification	58	Modify paragraph 4.41 as follows: “... Maintaining a good supply of affordable housing will be especially important, helping to reduce travel costs for those on lower incomes who need access to the Core Growth Area for employment and services. <u>Over the period 2022-2039, land to accommodate around 175,000 sqm of office, around 86,500 sqm of industry and warehousing and around 35,000 new dwellings has been identified within the inner areas.</u> ”	To clarify, ensuring consistency of approach across the strategic policies in relation to general matters such as infrastructure provision and quality of design. To clarify that reference to the available land supply is moved from Policy JP-Strat5 to the reasoned justification at paragraph 4.41 to demonstrate that sufficient land is available to deliver the ambitions of the spatial strategy for the Inner Areas.	GMCA4.1 PQ55 GMCA11.1 AP5 GMCA21 AP11
MM4.16	JP-Strat5 Inner Areas Policy	58-59	Modify first paragraph as follows: “The continued regeneration of the inner areas will be promoted and will be linked to reducing levels of deprivation and poverty and supporting the improved health and wellbeing of the communities. High levels of well-designed new development	To clarify, ensuring consistency of approach across the strategic policies in relation to general matters such as	GMCA4.1 PQ55 GMCA11.1 AP5 GMCA21 AP11

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			<p>will be accommodated in this highly accessible and sustainable location, prioritising the use of previously developed land."</p> <p>Modify second paragraph as follows: "New development will be of high quality, predominantly, residential (in a mix of size, type and tenure). It will be supported by necessary infrastructure, including high quality open space and improved access to the wider green infrastructure network, together with improved transport and social infrastructure."</p> <p>Delete third paragraph as follows: "Where a mix of uses is being proposed, it will seek to protect the amenity of existing and new residents and it will seek to protect and enhance the location's historic and natural environment and assets."</p> <p>Modify fourth paragraph as follows, to merge with second paragraph: "New development and will be integrated with existing communities, enhancing the quality of places and their local character, including through good quality design, enhanced green infrastructure (and access to it) and improvements in air quality. Infrastructure provision will facilitate the growth and continued capacity of the Inner Area, including high quality open spaces and improved access to the wider green infrastructure network."</p>	<p>infrastructure provision and quality of design.</p>	

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			Delete fifth paragraph as follows: “ Over the period 2020-2037, land to accommodate around 270,000 sqm of office, around 132,000 sqm of industry and warehousing and around 30,000 new dwellings has been identified within the inner areas. ”		
MM4.17	JP-Strat6 Northern Areas Reasoned Justification	59-60	Modify paragraph 4.43 as follows: “Over recent years, the northern areas of Greater Manchester, <u>namely Bolton, Bury, Oldham, Rochdale, Tameside, Wigan, and west Salford</u> , have seen relatively low levels of growth overall compared to other parts of the city region, and this is forecast to continue...”	To clarify, identifying the areas covered by policy JP-Strat6.	GMCA21 AP13
MM4.18	JP-Strat6 Northern Areas Policy	59-61	Modify first paragraph as follows: “A significant increase in the competitiveness of the northern areas will be sought. There will be a strong focus on <u>making as much use as possible of suitable previously-developed</u> prioritising the re-use of (brownfield) land through urban regeneration, enhancing the role of the town centres and diversifying increasing the mix, type, quality and range of residential offer. This will be complemented by improvements to transport connectivity and the selective release of Green Belt and previously safeguarded land in key locations <u>the allocation of sites for development identified in Chapter 11 of this plan,</u> that will help to boost economic opportunities and diversify housing provision (GM-Strat7 and GM-Strat8). Improving transport connections and accessibility by public transport, cycling and walking will be a priority to ensure access to key employment opportunities. In supporting the principles of	To clarify, ensuring consistency of approach across the strategic policies in relation to general matters such as infrastructure provision and quality of design. Also, by referring to the Green Belt changes being as those set out in chapter 11 and focussing on making as much use as possible of suitable previously-developed (brownfield) land through urban regeneration. 	assessments 2020-2037																												
MM6.13	JP-J4 Industry and Warehousing Development Reasoned Justification (cont.)	119 - 123	<p>Modify paragraph 6.34 as follows: “Table 6.2 'Industry and warehousing land supply 2020-2037 <u>2022-2039</u>' summarises the sources of industry and warehousing land supply up to 2037<u>2039</u>. Although all of the sites could potentially be developed in full during the plan period. In practice, the high level of land supply, the size of some individual sites and infrastructure requirements mean that some of the Green Belt sites may come forward in part after 2037<u>2039</u>. This will help to ensure that there is a diverse range of opportunities, providing choice and flexibility in the market. Additionally given the scale of some of the opportunities, almost a further 480,000 <u>368,400</u> sqm has been identified which is likely to be delivered after 2037<u>2039</u>.”</p> <p>Replace Table 6.2 with the updated version, as follows: Table 6.2 Industry and warehousing land supply 2020-2037 <u>2022-2039</u></p> <table border="1"> <thead> <tr> <th>District</th> <th>Existing supply 2020-2037: Brownfield (sqm floorspace)</th> <th>Existing supply 2020-2037: Greenfield (sqm floorspace)</th> <th>Existing supply 2020-2037: Mixed (sqm floorspace)</th> <th>Places for Everyone Allocations 2020-2037 (sqm floorspace)¹⁴</th> <th>Total 2020-2037</th> <th>Estimated Completions 2021-21</th> <th>Total 2021-37</th> </tr> </thead> <tbody> <tr> <td>Bolton</td> <td>252,156</td> <td>15,673</td> <td>8,653</td> <td>486,000</td> <td>762,482</td> <td>-8,274</td> <td>754,208</td> </tr> <tr> <td>Bury</td> <td>3,734</td> <td>6,500</td> <td>0</td> <td>491,000</td> <td>501,234</td> <td>-750</td> <td>500,484</td> </tr> </tbody> </table>	District	Existing supply 2020-2037: Brownfield (sqm floorspace)	Existing supply 2020-2037: Greenfield (sqm floorspace)	Existing supply 2020-2037: Mixed (sqm floorspace)	Places for Everyone Allocations 2020-2037 (sqm floorspace) ¹⁴	Total 2020-2037	Estimated Completions 2021-21	Total 2021-37	Bolton	252,156	15,673	8,653	486,000	762,482	-8,274	754,208	Bury	3,734	6,500	0	491,000	501,234	-750	500,484	<p>Required as a result of the change to the plan period and the updated 2022 land supply.</p> <p>To ensure the policy is consistent with the supply evidence.</p>	GMCA11.1 AP5 GMCA21 AP26 GMCA87 AP137

				To clarify, ensuring flexibility and responsive support measures can be readily identified to creative industries, as appropriate.	
MM9.5	JP-P3 Cultural Facilities Policy	180	<p>Modify the opening sentence as follows: “Through this Plan we <u>We</u> will proactively develop and support cultural businesses and attractions in our cities and towns through a range of measures, <u>where appropriate</u>, including:”</p> <p>Modify criterion 7 as follows: “7. Considering the designation <u>identification</u> of ‘Creative Improvement Districts’ where there is evidence that the designation <u>identification</u> will enhance the local economy and provide facilities and workspace for the creative industries;”</p>	<p>To clarify, ensuring consistency across the Plan.</p> <p>To clarify, allowing the Plan to provide a strategic framework for Creative Improvement Districts to be identified proactively and flexibly to address local need.</p> <p>To clarify the role and purpose of ‘Creative Improvement Districts’ which form part of Greater Manchester’s cultural and economic response to the pandemic and are intended to support the recovery of high streets across Greater Manchester’s town centres.</p>	GMCA23 AP70 AP71 AP72 M10.1 Q10.3 GMCA5.1 PQ95

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
				To clarify, ensuring flexibility and responsive support measures can be readily identified to creative industries, as appropriate.	
MM9.6	JP-P4 New Retail and Leisure Uses in Town Centres Policy	181-182	<p>Modify the first paragraph as follows: “The existing <u>upper levels of the</u> hierarchy of centres for retail and leisure uses will be maintained and enhanced. These upper levels of the hierarchy of centres are:</p> <p>A. City Centre (within Manchester and Salford) B. Main town centres: 1. Altrincham (Trafford) 2. Ashton-under-Lyne (Tameside) 3. Bolton (Bolton) 4. Bury (Bury) 5. Oldham (Oldham) 6. Rochdale (Rochdale) <u>Salford Quays (Salford)</u> 7 <u>Wigan (Wigan)</u>”</p> <p>Delete the second paragraph as follows: “A new town centre is proposed for designation at Salford Quays in the Publication Draft Salford Local Plan: Development Management Policies and Designations. Should this designation become part of the Salford Local Plan, Salford</p>	<p>To clarify, ensuring that policies in the Plan are clearly written and unambiguous, whilst reflecting the status of Salford Quays as a main town centre.</p> <p>To clarify Policy JP-P4 by correcting a drafting error and re-instating policy content that existed in an earlier version of the plan (GMSF 2019).</p>	GMCA23 AP73 AP74 M10.1 Q10.5

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			<p>Quays will be classed as a Main Town Centre for the purposes of this policy.</p> <p>Modify by transferring paragraph 9.21 of the reasoned justification (in its entirety) into a new paragraph at the end of the policy, as follows: <u>“The boundaries of the centres and detail of other centres at lower levels of the hierarchy are defined in district local plans. Appropriate large-scale retail and leisure development will be accommodated within the centres in the upper levels of the hierarchy. The need for the expansion of any existing centres, or the provision of new centres, will be identified in district local plans.”</u></p>		
MM9.7	JP-P6 Health Reasoned Justification	184 - 185	<p>Modify the second bullet point of paragraph 9.32 as follows: “Increasing the supply of high quality and affordable homes that meet minimum size and <u>‘accessible and adaptable’ accessibility standards, as set out in Part M4 (2) of the Building Regulations for new housing</u>, helping to ensure that everyone has a decent place to live“</p> <p>Delete the final sentence of paragraph 9.33 as follows: “...It is expected that Health Impact Assessments are undertaken in support of all developments which require an Environmental Impact Assessment, and other proposals which, due to their location, nature or proximity to sensitive receptors, are likely to have a notable impact on health and wellbeing.”</p>	<p>To clarify, ensuring consistency across the Plan and removing any ambiguity in the use of the terms “access”, “accessible” and “accessibility”.</p> <p>To provide clarity on the threshold for the requirement for a Health Impact Assessment and by ensuring that policies in the Plan are clearly written and unambiguous.</p>	GMCA24 AP36 GMCA23 AP75 AP76

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
MM9.8	JP-P6 Health Policy	186	<p>Modify criterion C as follows: “C. Be supported by a Health Impact Assessment for all developments which require <u>to be screened for an Environmental Impact Assessment, and other proposals where the local planning authority considers it appropriate which, due to their location, nature or proximity to sensitive receptors, are likely to have a notable impact on health and wellbeing.</u>”</p> <p>Modify criterion 1 as follows: “1. Requiring, where appropriate, the provision of new or improved health facilities as part of new developments <u>that would significantly increase demand proportionate to the additional demand that they would generate;</u>”</p>	<p>To provide clarity on the threshold for the requirement for a Health Impact Assessment and by ensuring that policies in the Plan are clearly written and unambiguous.</p> <p>To clarify, ensuring that Policy JP-P6 is effective and consistent with national policy.</p>	GMCA23 AP75 AP76 AP77
MM9.9	JP-P7 Sport and Recreation Reasoned Justification	187	<p>Modify paragraph 9.38 as follows: “Ensuring the continued availability of and easy access to a high-quality range of sport and recreation facilities, meeting accessibility standards, would therefore help to achieve key objectives such as improving the health of residents, and making Greater Manchester a more attractive place to live and visit. The appropriate level of provision will often depend on local circumstances such as the type and scale of demand,</p>	<p>To clarify, ensuring consistency across the Plan and removing any ambiguity in the use of the terms “access”, “accessible” and “accessibility”.</p>	GMCA24 AP36 GMCA5.1 PQ96 M10.1 Q10.8

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			and the availability of suitable land. Consequently, <u>where appropriate</u> , standards for access to some recreation facilities such as parks, sports pitches and allotments will be set by individual local authorities and set out in Local Plans. <u>The provision of sports facilities will be determined by individual local authorities through an evidence based rather than standards based approach.</u>	To clarify that the reasoned justification aligns with the policy. To clarify by ensuring that Policy JP-P7 more accurately aligns with NPPF 98 and advice from Sport England.	
MM9.10	JP-P7 Sport and Recreation Policy	187-188	Delete criterion 2 as follows: “ 2. Developing a common standard for the provision of designated play areas to meet the needs of the population “ Modify criterion 3 as follows: “3. Where appropriate setting out more comprehensive and detailed recreational standards <u>and standards for provision for designated play areas</u> in district local plans, having regard to existing and future needs” Modify criterion 4 as follows: “4. Requiring new development to support the achievement of strategic and local plan standards by providing <u>provide</u> new and/or improving improved existing facilities commensurate with the demand they would generate, ensuring that they meet accessibility standards. The provision of sports facilities will be determined by individual local authorities through an evidence based approach” ”	To clarify, ensuring that Policy JP-P7 provides an effective strategic framework to inform the preparation of local plans. To clarify by ensuring that Policy JP-P7 more accurately aligns with NPPF 98 and advice from Sport England.	GMCA23 AP78 M10.1 Q10.8

			<p>Modify criterion 7 as follows: “7. Encouraging the incorporation of <u>a sports facilities mix</u> in all education settings, <u>that meet both curriculum and local community sport needs as identified by an up to date Local Authority Sports Needs Assessment, and made available for community use where possible,</u>ensuring they meet accessibility standards.”</p>		

Chapter Ten Connected Places Proposed Main Modifications

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
MM10.1	Para. 10.14 An Integrated Network	194	Modify the introductory text at paragraph 10.14 by deleting the final sentence, as follows: “10.14 The 10 GM authorities are currently developing a Clean Air Plan, to accelerate compliance with the legal limit for Nitrogen dioxide and to protect and promote the health of its population and the environment. This will see the introduction of a Clean Air Zone covering the whole of the GM conurbation, to tackle the most polluting vehicles on the road network, alongside further supporting measures. ”	To clarify the position of the Clean Air Plan across the 10 GM authorities and ensure consistency within the Plan.	GMCA5.1 PQ79
MM10.2	Picture 10.4 Change in daily trips, now-2040	198	Modify Picture 10.4 with a revised title as follows: Picture 10.4 “Change in daily trips; (now- 2017 to 2040) Modify Picture 10.4 with a revised key: <u>Public Transport and Active Travel</u> <u>Car or Other</u>	To clarify, providing alignment with the Transport Strategy 2040 for monitoring purposes and ensuring a consistent baseline between the two strategies. To clarify the mode split for daily trips.	GMCA23 AP79
MM10.3	JP-C1 An Integrated Network Reasoned Justification	199	Modify paragraph 10.27 to include an additional bullet point, as follows: “Targeted behaviour change activities through established programmes; and Safety and security measures and programmes to make the transport network safe and secure for all users; <u>and</u>	To clarify that the source of the hierarchy set out within paragraph 10.27. To clarify further, prioritising more vulnerable transport users.	GMCA23 AP80

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			<u>Enabling the prioritisation of more sustainable modes of transport to encourage use and put more vulnerable transport users first informed by the hierarchy contained in the 2016 NACTO Global Street Design Guide adopted by GMCA in 2017.”</u>		
MM10.4	JP-C1 An Integrated Network Policy	200	Modify criterion 5 as follows: “5. Ensuring that development and transport investment fully considers the needs of all people and those modes which make most efficient and sustainable use of limited road space, by following the Global Street Design Guide(125) hierarchy <u>set out below</u> (highest priority first).”	To clarify that the reference is appropriately phrased.	GMCA23 AP80
MM10.5	JP-C2 Digital Connectivity Policy	201- 202	Modify first paragraph as follows: “ We support the provision of affordable, high quality, digital infrastructure. Developers are expected to work and share costs with telecoms operators as appropriate to maximise coverage and enable consumers to make informed choices. It is expected that internet connections will work immediately when residents move into new properties” Modify criterion 2 as follows: “2. Requiring all new development to have full fibre to premises connections, unless technically infeasible <u>and/or unviable</u> , and to incorporate multiple-ducting compliant with telecoms standards, to facilitate future-proof gigabit-capable network connections. <u>It is expected that internet connections will be operational and immediately accessible to network providers when occupiers move into new properties; and”</u>	To provide further clarity in respect of the expectations for developers including in relation to issues of costs and viability.	GMCA23 AP81

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
MM10.6	JP-C3 Public Transport Policy	205	Modify first paragraph as follows: “ Major improvements to the public transport network are at various stages of development and an ambitious programme for delivering public transport interventions is set out within Our Five Year Transport Delivery Plan. In order to help deliver major improvements to public transport, we will support a range of measures, including:”	To clarify that the reference is appropriately phrased.	GMCA5.1 PQ74
MM10.7	New Policy JP-CX Reasoned Justification	206	Modify the start of paragraph 10.54 as follows: “ <u>The Strategic Road Network will be required to perform the function of facilitating the safe and efficient movement of people and goods. Ongoing collaboration between National Highways, TfGM and the Local Authorities will be essential in ensuring that the SRN in Greater Manchester operates in an effective and efficient manner; and best contributes to sustainable economic growth.</u> Greater Manchester benefits from a strategic location on the national motorway network...”	To clarify, ensuring that there is a coordinated approach to the planning and delivery of interventions on the SRN.	GMCA23 AP82 M11.1 Q11.1
MM10.8	New Policy JP-CX	206	Insert new policy after paragraph 10.55 as follows: “ <u>New Policy - The Strategic Road Network</u> <u>We will work with Department for Transport, National Highways, Transport for the North and TfGM to ensure a co-ordinated approach to the planning and delivery of potential interventions on the SRN and at interfaces with the local street network, as Local Plans, site Masterplans and planning applications come forward in accordance with Department for Transport, National Highways, and other UK Government policy and guidance as applicable.</u> ”	To clarify, following agreement with National Highways, by including an additional policy relating to the Strategic Road Network.	GMCA23 AP82

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
MM10.9	JP-C4 Streets for All Policy	208	<p>Modify first sentence of the second paragraph as follows: “We will work with Department for of Transport, Highways England, Transport for the North and TfGM seek to ensure:“</p> <p>Modify criterion 1c as follows: “c. Delivering new and improved walking and cycling routes <u>and facilities</u> as part of the delivery of the “Bee Network” <u>an integrated sustainable transport network;</u>”</p>	<p>To clarify removing any ambiguity about what is sought and by whom from the Policy.</p> <p>To clarify that the reference is appropriately phrased.</p>	GMCA23 AP83 GMCA5.1 PQ74
MM10.10	JP-C5 Walking and Cycling Policy	210	<p>Modify criterion 1 as follows: “1. Creating safe, attractive and integrated walking and cycling infrastructure, connecting every neighbourhood and community <u>with reference to using</u>-national and locally adopted design guidance;”</p> <p>Modify criterion 4 as follows: “4. Creating, where needed, dedicated separate space for people walking and cycling, with pedestrians and cyclists given priority at junctions and crossings which form part of the Bee Network;”</p> <p>Delete criterion 7 as follows: “7. Ensuring that new developments are planned and constructed with walking and cycling as the primary means of local access, and fully integrated into the existing walking and cycling infrastructure in accordance with JP C7.”</p>	<p>To clarify that the reference is appropriately phrased.</p> <p>To avoid duplication of policy criterion.</p>	GMCA5.1 PQ74 M11.1 Q11.1c
MM10.11	JP-C6	211	<p>Insert a new paragraph after 10.71 as follows: <u>New Paragraph</u></p>	To clarify, resulting in a consequential change to	GMCA23 AP84

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
	Freight and Logistics Reasoned Justification		<u>“It is recognised that on certain parts of the SRN and at certain times a shortage of parking facilities for HGVs can make it difficult for drivers to find safe space to stop and adhere to requirements for mandatory breaks and rests. The provision of new and improved facilities would improve driver welfare and help avoid inappropriate HGV parking on local roads. To alleviate the shortage, the expansion and improvement of existing facilities, or creation of new facilities, will be supported where it is appropriate to do so.”</u>	the Plan by including reference to the provision of overnight parking facilities for heavy goods vehicles on employment sites in defined circumstances.	AP147
MM10.12	JP-C6 Freight and Logistics Policy	211	Insert new criterion after criterion 4 as follows: <u>New Criterion</u> <u>“Enabling the provision of overnight parking and rest areas, with appropriate facilities, for heavy goods vehicle drivers, where there is likely to be demand, and it is appropriate to the location.”</u>	To clarify, resulting in a consequential change to the Plan by including reference to the provision of overnight parking facilities for heavy goods vehicles on employment sites in defined circumstances.	GMCA23 AP84 AP147
MM10.13	JP-C7 Transport Requirements of New Development Reasoned Justification	212	Insert new paragraphs after paragraph 10.76 as follows: <u>New Paragraphs</u> <u>“Policies within JP-C7 seek to enable a reduction in the need to travel by private car and prioritise sustainable transport opportunities ahead of capacity enhancements on the highway network. Where a transport assessment is required, this should start with a vision of what the development/allocation is seeking to achieve and then test a set of scenarios to</u>	To clarify, providing the appropriate context for Policy JP-C7 and the new Appendix D.	GMCA23 AP85(c)

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			<p><u>determine the optimum design and transport infrastructure to realise this vision.</u></p> <p><u>In the first instance, new development should give priority to walking, wheeling and cycle movements and facilitate access to high-quality public transport where possible. Appendix D¹ sets out the indicative transport mitigation that has been identified in relation to the Plan allocations (through the Locality Assessment process and the SRN Future Work Programme Technical Report) in a single strategic “worst-case” scenario. Detailed scenarios, underpinned by local traffic counts, will need to be assessed and developers will need to develop effective detailed mitigation for the site which demonstrates that the mitigation will deliver the vision identified.</u></p> <p><u>The interventions in Appendix D to support walking, wheeling and cycle movements and to facilitate access to high-quality public transport should be considered as a starting point for developers to mitigate the impacts of allocations.</u></p> <p><u>The highway interventions in Appendix D should be considered by developers to mitigate the impact of allocations only once alternative options to manage down the traffic impacts of planned development have been considered as a first preference.</u></p> <p><u>The existing evidence suggests that the “necessary” mitigation would be required to deliver the allocations in the scenario</u></p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			<p><u>tested, and “supporting” mitigation are complementary measures that could further improve the accessibility and/or transport sustainability of the allocation. As a starting point, it would be beneficial to consider both necessary and supporting interventions through the Transport Assessment scenario testing.</u></p> <p><u>In order to assess the cumulative impacts of growth, when undertaking a Transport Assessment for development proposals that are consistent with the Plan, developers will need to consider committed development, including relevant local plan allocations, where there is a reasonable degree of certainty they will proceed within the next 3 years. In consultation with local highways authorities, developers should agree the committed developments / allocations and potential transport interventions (which may come forward in the next 3 years) that should be considered in the assessment. Where development proposals are not consistent with an up-to-date plan or strategy, the Transport Assessment should include all relevant development that is consented or allocated over the entirety of the plan period.</u></p> <p><u>Developers will be expected to contribute to the funding and delivery of required new infrastructure or services.”</u></p>		
MM10.14	JP-C7 Transport Requirements	212-214	<p>Modify first paragraph as follows: “Planning applications will be accompanied by a Transport Assessment/Transport Statement and Travel Plan where appropriate. We will require new development to be located</p>	To clarify, by moving this part of the policy to ensure it is effective.	GMCA23 AP85(c) GMCA23 AP85(a)

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
	of New Development Policy		<p>and designed to enable and encourage walking, cycling and public transport use, to reduce the negative effects of car dependency, and help deliver high quality, attractive, liveable and sustainable environments.”</p> <p>Replace second bullet point of criterion 1 as follows: “Ensuring that new developments are planned and constructed with walking and cycling as the primary means of local access, and fully integrated into the existing walking and cycling infrastructure <u>Ensuring that the layout, design and landscaping of development prioritises the provision of safe, secure and attractive access to local services and facilities for pedestrians, cyclists, and people with a disability; and”</u></p> <p>Modify criterion 7 as follows: “Complying with any parking standards set out in local plans including making adequate parking provision for disabled car drivers and passengers; Making adequate car parking provision, including for disabled car drivers and passengers.”</p> <p>Insert new criterion after criterion 11 as follows: <u>New Criterion</u> <u>“Providing for overnight parking and rest areas, with appropriate facilities, for heavy goods vehicle drivers, where the development is likely to generate demand, and it is appropriate to the location.”</u></p> <p>Insert new criteria after criterion 14 as follows:</p>	<p>To improve the clarity of the policy.</p> <p>To clarify, resulting in a consequential change to the Plan by including reference to the provision of overnight parking facilities for heavy goods vehicles on employment sites in defined circumstances.</p> <p>To clarify, moving this part of the policy to ensure it is effective. It is also necessary to reference Appendix D which lists the potential interventions that should be considered during the TA process.</p> <p>To reflect the Revised HRA and implement the delivery of the Habitat Mitigation Plan to reduce air quality impacts on the Manchester Mosses SAC from traffic on the M62 which runs</p>	<p>GMCA23 AP85(b) GMCA23 AP84 AP147 OD7.4 GMCA20 GMCA23 AP85(d)</p>

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			<p><u>New Criterion</u> “Planning applications will be accompanied by a Transport Assessment / Transport Statement and Travel Plan where appropriate, in order to assess impacts and determine the most appropriate mitigation on the SRN and local transport network. Where a transport assessment is required, this should start with a vision of what the development/allocation is seeking to achieve and then test a set of scenarios to determine the optimum design and transport infrastructure to realise this vision. Consultation should be undertaken, at pre-application stage, with the relevant local highway authorities to agree which committed developments / allocations and which potential transport interventions should be considered, with reference to Appendix D, as appropriate.”</p> <p><u>New Criterion</u> “Planning applications which are required to be accompanied by a Transport Assessment will need to consider air quality impacts on Holcroft Moss, within the Manchester Mosses Special Area of Conservation (SAC). Any proposals that would result in increased traffic flows on the M62 past Holcroft Moss of more than 100 vehicles per day or 20 Heavy Goods Vehicles (HGVs) per day must devise a scheme-specific range of measures to reduce reliance on cars, reduce trip generation and promote ultra-low emission vehicles and provide a contribution towards restoration measures in accordance with the Holcroft Moss Habitat Mitigation Plan.”</p> <p>Delete final paragraph as follows:</p>	<p>adjacent to the Holcroft Moss portion of the site.</p> <p>To avoid duplication of policy with JP-D1.</p>	

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			<p>“District Local Plans may set out mechanisms through which new development will be required to make a proportionate financial contribution to the delivery of new transport infrastructure and/or services, necessary to support its successful functioning in accordance with relevant national policy, guidance and regulations.”</p>		

Chapter Eleven Site Allocations Proposed Main Modifications

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
MM11.1	Para.11.2	218	<p>Modify paragraph 11.2 by inserting additional text, deletion of the original modification and by inserting a new paragraph after 11.2, as follows: “The majority of the development required to deliver this Plan’s spatial strategy will be within the existing urban area. Figure 11.1 'Existing land identified for office, industrial/warehousing and housing development 2020-2022' shows the existing land identified for office, industrial and housing development through our land availability assessments. This land supply is <u>updated annually and</u> includes the identification of suitable brownfield sites and where appropriate the optimisation of density ratios, in line with the overall strategy. As appropriate, district Local Plans will allocate sites from this supply.”</p> <p>Modify by inserting new paragraph after paragraph 11.2, as follows: <u>As appropriate, district Local Plans will allocate sites from this supply reflecting the distribution set out in tables 6.1, 6.2 and 7.2, to ensure that the spatial strategy can be met. In the event that it proves necessary to look to land beyond the existing supply, as updated, national planning policy would apply including in the case of the Green Belt the requirement for exceptional circumstances.</u></p>	<p>To clarify, ensuring that there is no ambiguity in the role of the Plan in relation to local plans and neighbourhood plans.</p> <p>To clarify and to avoid repetition</p> <p>To clarify that local plans will allocate land reflecting the distribution set out in tables 6.1, 6.2 and 7.2 in order to ensure that the spatial strategy set out in the Plan can be met</p>	<p>M1.1 Q1.9 and GMCA8 SQ1.9</p> <p>GMCA1.1 AP3</p> <p>GMCA1.1 AP3</p>

MMCB12	Picture 11.9 JPA3.2 Timperley Wedge	244	Modify the proposed Green Belt boundary to retain ponds at Davenport Green Site of Biological Importance (SBI) within the Green Belt located in the centre of the site between the rural park and the development. Picture 11.9 JPA 3.2 Timperley Wedge will be modified accordingly. See Annex 3, see Map MMCB12	To clarify that development is not proposed within the SBI and it will be retained in the Green Belt. A strong Green Belt boundary is provided through existing mature hedgerows.	AP99 GMCA71
MMCB13	Picture 11.10 JPA3.2 Timperley Wedge	245	Modify Picture 11.10 to reflect the modification to the Green Belt boundary in AP99 and ensure accuracy and clarity in relation to the development area. In addition, the title is modified and here and throughout the policy where reference is made to Picture 11.10 to make it clear that Picture 11.10 is indicative only. Amend title of Picture 11.10: <i>Timperley Wedge <u>Indicative</u> Allocation Policy Plan</i> See Annex 3, see Map MMCB13	To clarify, ensuring that the policy is effective and provides clear and unambiguous guidance in relation to the Indicative Allocation Plan.	AP99 GMCA71

<p>MMCB14</p>	<p>JPA3.2 Timperley Wedge Policy</p>	<p>244- 249</p>	<p>Modify Criterion 1 as follows: Be in accordance with a <u>Masterplan or SPD that has been developed in consultation with the local community and other stakeholders, and approved agreed</u> by the Local Planning Authority. <u>The Masterplan must include a robust phasing and delivery strategy, as required by policy JP-D1. This will be prepared in partnership with key stakeholders and to ensure the whole allocation site is planned and delivered in a coordinated and comprehensive manner with proportionate contributions to fund necessary infrastructure;</u></p> <p>Modify Criterion 2 as follows: 2. Deliver around 2,500 homes of which 1,7800 will be in the plan period as set out <u>on the Indicative Allocation Policy Plan (Picture 11.10);</u></p> <p>Delete Criterion 4 in its entirety.</p> <p>Modify Criterion 7 as follows: 7. Make specific <u>appropriate</u> provision for self-build custom build plots, subject to local demand as set out in the Council's self-build register;</p> <p>Modify Criterion 8 as follows: 8. Deliver around 60,000 sqm <u>E (g(i))</u>-B4 office employment land within a mixed employment residential area set out in the <u>Indicative Allocation Policy Plan (picture 11.10)</u> of which <u>1530,000</u> sqm will be in the Plan period;</p> <p>Delete Criteria 9 - 12 in their entirety.</p> <p>Modify criterion 13 of Policy JPA3.2 as follows:</p>	<p>To clarify, ensuring that the policy is effective and provides clear and unambiguous guidance.</p> <p>To clarify, ensuring consistency across the Plan.</p> <p>To remove any duplication with other policies in the Plan.</p>	<p>AP98 GMCA71</p>
---------------	---	---------------------	--	--	------------------------

		<p>13. Deliver accessible streets which prioritise cycling, walking and public transport over the private car; <u>Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7:</u></p> <p>Modify Criterion 15 as follows: 15. Accommodate and contribute to the delivery of the Manchester Airport Metrolink Line Western Leg extension including Metrolink stop(s);</p> <p>Modify Criterion 16 as follows: 16. Deliver a new spine road through the site with connections to the existing road network and local access to development sites, incorporating separate pedestrian and cycling space <u>as well as</u> and provision for future bus priority infrastructure rapid transit to improve east west connections between Altrincham and Manchester Airport;</p> <p>Delete Criterion 17 in its entirety.</p> <p>Modify Criterion 18 as follows: 18. Provide a new local centre <u>comprising a range of shops and services to meet local needs with convenience shopping facilities as a hub for local services in the region of 3,000 sqm of retail floorspace</u> close to the Davenport Green stop of the Metrolink Western Leg extension;</p> <p>Modify criterion 19 of Policy JPA3.2 as follows: 19. Provide additional primary school places, including a new primary school and contribute to the provision of secondary school places; <u>Make financial contributions for offsite additional primary</u></p>		
--	--	---	--	--

		<p><u>and/or secondary school provision to meet needs generated by the development (where appropriate) and make provision for a new primary school, located close to the local centre, in accordance with JP-P5;</u></p> <p>Delete Criterion 20 in its entirety.</p> <p>Modify Criterion 21 as follows: 21. Create defensible <u>Define and/or strengthen the boundaries of the Green Belt around/within the site such that they will comprise physical features that are readily recognisable and likely to be permanent; utilising, where appropriate, existing landscape features;</u></p> <p>Modify Criterion 22 as follows: 22. Mitigate any impact on and improve the environmental quality and accessibility of remaining Green Belt land; <u>Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt within and in the vicinity of the site in accordance with policy JP-G2;</u></p> <p>Modify Criterion 23 as follows: 23. Provide a significant area of enhanced and <u>publicly</u> accessible green infrastructure (including new public rights of way) within a rural park to remain in the Green Belt identified on the <u>Indicative Allocation Policy Plan (picture 11.10)</u>, ensuring protection of heritage assets in this area;</p> <p>Modify Criterion 24 of Policy JPA3.2 as follows: 24. Create wildlife corridors and steppingstone habitats within the development areas to support nature recovery networks, provide ecosystem services and <u>publicly</u> accessible green infrastructure.</p>		
--	--	---	--	--

		<p>Including <u>the following green links which will be defined through the Masterplan and Trafford Local Plan</u></p> <ul style="list-style-type: none"> i. From Clay Lane through to Brooks Drive and Fairywell Brook ii. Through Davenport Green Ponds SBI to Medipark <p>Modify Criterion 25 as follows: 25. Provide a range of types and sizes of open space within the allocation boundary in accordance with the Council's open space standards <u>policies</u>, including local parks and gardens; natural and semi-natural greenspace, equipped and informal play areas, outdoor sports pitches and allotment plots, ensuring arrangements for their long-term maintenance;</p> <p>Modify Criterion 26 as follows: 26. Protect Manor Farm identified in the <u>Indicative Allocation Policy Plan (picture 11.10)</u> and promote its <u>enhance its sports facilities to meet local needs use for future sports provision including, where appropriate, new access and car parking;</u></p> <p>Modify Criterion 27 as follows: 27. Promote improvements to <u>Accommodate land for leisure facilities (Use Class E(d) and F2 (c)) at Hale Country Club as identified on the Indicative Allocation Plan (picture 11.10);</u></p> <p>Add new Criterion after Criterion 27, as follows: <u>Seek to relocate Bowdon Rugby Club either within or in close proximity to the allocation and redevelop the existing Rugby Club site for residential use as shown on the Indicative Allocation Plan (picture 11.10)</u></p> <p>Modify Criterion 28 as follows:</p>		
--	--	--	--	--

		<p>28. Protect and enhance natural environment assets within the site and surrounding areas including SBIs, woodland and hedgerows; <u>Make provision for biodiversity, including taking appropriate account of the Ponds at Davenport Green and Davenport Green Wood SBIs, in accordance with Policy JP-G9;</u></p> <p>Delete Criterion 29 in its entirety.</p> <p>Modify Criterion 30 as follows: 30. Protect and enhance the habitats and corridors along Fairywell Brook and Timperley Brook to improve the existing water quality and seek to achieve 'good' status as required under <u>having regard to the North West River Basin management plan (2019);</u></p> <p>Modify Criterion 33 as follows: 33. Ensure new development is place-led, creative and contextual in its response, respecting the local character, <u>heritage</u> and positive local design features of the area;</p> <p>Delete Criterion 34 in its entirety.</p> <p>Modify Criterion 36 as follows: 36. Conserve and enhance the historic environment in line with the findings and recommendations of the Historic Environment Assessment (2020 in the Plan's evidence base and any updated (HIA) submitted as part of the planning application process; <u>Take appropriate account of relevant heritage assets and their settings, including the Deer Park, listed buildings and areas of high archaeological potential in the south west of the site, in accordance with Policy JP-P2;</u></p> <p>Delete Criteria 37-41 in their entirety.</p>		
--	--	--	--	--

		<p>Modify Criterion 42 of Policy JPA3.2 as follows: 42. Mitigate flood risk and surface water management issues including provision of SUDS through the design and layout of development in accordance with <u>an allocation wide flood risk, foul and surface water management strategy, which forms part of the Masterplan/delivery strategy (Criterion 1)</u> The allocation wide drainage strategy should be prepared after having fully assessed site topography, flood risk, existing water features and naturally occurring flow paths to identify where water will naturally accumulate. The strategy will demonstrate how each phase interacts with other phases of development and further detail will be set out in the Masterplan / SPD</p> <p>Delete Criteria 43-45 in their entirety.</p> <p>Modify Criterion 46 as follows: 46. Incorporate appropriate noise and air quality mitigation, such as woodland buffers, particularly along the M56 motorway, the Metrolink and HS2/NPR corridor in line with Environmental (Noise) Regulations;</p> <p>Modify Criterion 47 as follows: 47. The land identified to the south and west of the <u>proposed</u> HS2 Airport station as shown on the <u>Indicative Allocation Policy Plan</u>, although removed from the Green Belt, <u>it is safeguarded and is not allocated for development at the present time;</u></p> <p>Modify Criterion 48 as follows: 48. The land is safeguarded in accordance with Policy JP-G 11" Safeguarded Land"; <u>Permanent development of this land will</u></p>		
--	--	--	--	--

			<p><u>only be permitted following an update to a plan that proposes its development; and</u></p> <p>Modify Criterion 49 as follows: 49. Any future allocation <u>should have regard</u> is subject to an assessment that the land directly contributes to the Greater Manchester HS2 / NPR Growth Strategy (as maybe updated and/or superseded) as part of a plan review. And it should only be developed after completion of development set out in the Timperley Wedge masterplan and following the delivery of HS2 Airport station; and</p> <p>Delete Criterion 50 in its entirety.</p>		
MMCB15	JPA3.2 Timperley Wedge Reasoned Justification	250-254	<p>Modify paragraph 11.64 as follows: 11.64 Development of the site will require a coordinated approach between all landowners and developers and Trafford Council is committed to working with stakeholders to bring forward a detailed Masterplan/SPD which provides a framework for the sustainable delivery of a new community at Timperley Wedge.</p> <p>Add new paragraphs after paragraph 11.64 as follows <u>All areas of development will be expected to make a proportionate contribution to necessary infrastructure, including transport, social and green infrastructure. Further details on supporting infrastructure requirements will be set out in the masterplan and delivery strategy together with information on trigger points for when infrastructure such as road and junction improvements, a new school and the spine road will be required, which will be linked to the development trajectory.</u></p>	Consequential changes to the reasoned justification.	

		<p><u>Approximately 700 new residential units and 30,000 sqm of employment land have been phased for delivery beyond the plan period as the development is proposed on land located within the HS2 construction boundary and therefore is expected to be unavailable for a temporary period whilst the HS2 route, Airport Station and southern tunnel portal are under construction. It is therefore anticipated that this area will come forward following the completion of HS2 Airport Station and the build-out is very likely to extend beyond the Places for Everyone plan period. The timescales for development in this area are, in part, dependent on the HS2 timescales. The area of land required for construction may be altered if changes are made to the overall HS2 construction programme. However, delivery of development is not dependent on HS2/NPR and in the unlikely event a rail scheme did not come forward, an alternative option for delivery of development in this area has been considered and is achievable.</u></p> <p>Modify paragraph 11.65, first sentence as follows: 11.65 The Timperley Wedge allocation will deliver around 1,7<u>8</u>00 homes in the plan period and around 2,500 in total.</p> <p>Modify paragraph 11.68, first sentence as follows: Employment development will deliver around <u>153</u>0,000 sqm in the plan period and 60,000 sqm in total.</p> <p>Modify paragraph 11.69, as follows: 11.69 The area is close to areas of deprivation, including Wythenshawe in Manchester and Broomwood in Trafford and it will also be accessible by bus and tram to other areas of deprivation in Trafford. Targets for the training and employment of local people could, therefore, be agreed between the developers, the local colleges and the Local Authority to ensure a realistic number of</p>		
--	--	---	--	--

		<p>local people benefit from training and new jobs as a result of the development.</p> <p>Delete paragraphs 11.70 – 11.71 in their entirety.</p> <p>Modify the reasoned justification to Policy JPA3.2 at paragraph 11.73, as follows: 11.73 The road network currently consists of country lanes which are unable to support the proposed development but <u>which</u> will be enhanced to <u>provide</u> promote them as cycling and walking routes <u>and thereby</u> promoting healthier lifestyles. These, together with new routes, will provide links through the allocation and to Medipark, Hale Barns, Timperley and beyond. A new spine road will provide safe capacity for car use and link to the surrounding road network. The route identified is indicative at this stage and further work on the most appropriate alignment will be required as part of future masterplanning / planning applications. It is envisaged the spine road will be delivered incrementally by the development as and when it requires access from it. The spine road will have a safe route for walking, cycling and bus <u>priority infrastructure</u> rapid transit and will contribute to improving east/west connectivity between Altrincham and the Airport, as well as the wider southern Greater Manchester area. The Timperley Wedge/Medipark Transport Locality Assessment has determined the key necessary transport interventions and supporting interventions needed to mitigate the impact of the development. These include interventions specific to each allocation but also shared interventions between the allocations.</p> <p>Add new paragraph after paragraph 11.77 as follows: <u>The new Green Belt boundary is defined by existing features, where possible, and there is also a requirement to strengthen the</u></p>		
--	--	---	--	--

		<p><u>boundary as part of the development. The majority of the boundary is defined by existing roads and hedgerows. There is a particular need to strengthen the boundary which borders the rural park and also the safeguarded land boundary. The western boundary of the safeguarded land area will be defined by the woodland planting proposed by HS2 and the eastern boundary by the HS2 Airport Station and associated infrastructure. It is therefore not currently identified by existing features.</u></p> <p>Modify paragraph 11.79 as follows: 11.79 The allocation contains Bowdon Rugby Club along Clay Lane, <u>which is identified as suitable for residential development.</u> As part of the development proposals, <u>the club is intending to relocate and improve its facilities within the Timperley Wedge area and it</u> may be appropriate to look at opportunities to relocate the facilities within the wider allocation area. Such proposals will be considered as part of future detailed masterplanning work.</p> <p>Modify paragraph 11.81 as follows: 11.81 Hale Country Club is looking to make improvements to its leisure facilities <u>(Use Class E(d) and F2(c))</u> creating job opportunities and providing a higher quality of leisure experience for local communities.</p> <p>Modify paragraph 11.84 as follows: 11.84 Development will need to set a new high quality design standard for this area and should draw upon the guidance in the Council's adopted <u>relevant Design Guides and codes.</u> Specific parameters for the development of the site will be set out in the Masterplan /SPD.</p> <p>Modify paragraph 11.87, as follows:</p>		
--	--	--	--	--

		<p>11.87 Opportunities will be explored to maximise the potential of the Timperley Brook and Fairywell Brook in terms of urban flood management. The Brooks currently have a rating of 'moderate' under the North West River Basin Management Plan (2019), the development should seek opportunities to improve this to 'good'.</p> <p>Delete paragraphs 11.90 – 11.91 in their entirety.</p> <p>Modify the first and second sentences of paragraph 11.93 as follows: 11.93 The Greater Manchester HS2/NPR Growth Strategy identifies the opportunities of this strategically important and well-connected location adjacent to the <u>proposed</u> HS2 Airport station. The exceptional circumstances for taking this <u>the safeguarded land</u> out of the Green Belt are directly related to the potential this land has to capitalise directly on the economic benefit brought by HS2.</p> <p>Modify the first sentence of paragraph 11.94 as follows: 11.95 The area around the <u>proposed</u> Manchester Airport HS2 Station has been removed from the Green Belt but will only be considered a sustainable location after delivery of HS2 Airport Station.</p>

			<p>Add new paragraph to the end of the reasoned justification after paragraph 11.212, as follows: <u>“The allocation is identified as containing Mineral Safeguarding Areas for brickclay (98.1% of the site); and surface coal (98.1%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.”</u></p>		

Chapter Eleven - Strategic Allocations in Rochdale Proposed Main Modifications

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
MMR1	Picture 11.29 Rochdale District Overview	306	Modify picture to reflect modifications elsewhere in the plan, such as the land supply and the Green Belt boundary. See Annex 3, Map MMR1	Consequential changes to the overview map resulting from modifications elsewhere in the plan	AP147
MMR2	JPA19 Bamford and Norden Policy	307 - 308	<p>Modify criterion 1 as follows: “1. Deliver around 450 new homes predominantly in the western and southern parts of the site, with a focus on larger, higher value family housing to balance out the current offer within the borough and <u>including significant provision of larger (4, 5 and 6 bedroom) houses in spacious plots, to reflect the grain and density of the surrounding residential areas, and affordable housing in accordance with relevant local plan requirements;</u>”</p> <p>Modify criterion 2 as follows: “2. Retain and significantly enhance the existing recreational facilities as part of an integrated green and blue infrastructure network on the site. <u>The residential development on the site will provide contributions towards</u> the <u>improvement of the facilities which will create a high quality recreational and sports ‘hub’ serving the local area and the borough as a whole. The development should</u></p>	<p>Clarification to specify type and size of new homes expected in the allocation, to replace ‘higher value’, in response to AP119. In addition, clarification that allocation will be expected to make provision for affordable housing in accordance with local plan policy.</p> <p>To clarify that all residential development on the site will be required to contribute to improvements to recreational facilities. Additional part regarding rights of way and green infrastructure moved to Criterion 2 from 9 and 12, in response to AP113.</p>	AP9 AP113 AP119 AP143 GMCA77 GMCA44

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p><u>incorporate existing public rights of way along with new routes for active travel into a high quality integrated green infrastructure network that links to existing public rights of way in the countryside to the west and north west of the site;</u>"</p> <p>Modify criterion 3 to add additional sentence as follows: <u>3....This will include the need for an infrastructure phasing and delivery strategy in accordance with policy JP-D1</u></p> <p>Modify criterion 6 as follows: Provide financial contributions to mitigate impacts on the highway network identified through a transport assessment <u>Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;</u></p> <p>Delete criterion 7 in its entirety.</p> <p>Delete criterion 8 in its entirety.</p> <p>Modify criterion 9 as follows: <u>9. Reflect and respond to the special qualities and sensitivities of the key characteristics of the Pennine</u></p>	<p>To clarify that development will require an infrastructure phasing and delivery strategy.</p> <p>To provide consistency throughout the plan's allocations and with Policy JP-C7 to refer to transport interventions listed in Appendix D.</p> <p>Criterion deleted as transport intervention included in Appendix D as above in Criterion 6.</p> <p>Criterion deleted to avoid duplication as generic policy which is covered adequately by thematic policies.</p> <p>Clarification of which landscape character type the allocation falls under.</p> <p>Clarification that development will be required to make compensatory improvements to remaining Green Belt.</p>	

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p><u>Foothills (West /South Pennines) landscape character type in accordance with policy JP-G1. This should take account of any visual impact from Ashworth Valley to the west given the high landscape and recreational value of that area and ensure there are high quality links/routes to the wider countryside;</u></p> <p>Modify to add new criterion after criterion 9 as follows: <u>Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with policy JP-G2.</u></p> <p>Modify criterion 10 as follows: 10. Ensure that the design of the scheme preserves or enhances the setting of the listed Bamford United Reform Church immediately to the south of the site. Proposals should be informed by the findings and recommendations of the Historic Environment Assessment (2020) in the Plan's evidence base and any updated assessment submitted as part of the planning application process; Take <u>appropriate account of relevant heritage assets and their settings, including the listed Bamford United Reform Church, in accordance with Policy JP-P2</u></p>	<p>To provide clarity for heritage requirements and consistency between allocations.</p> <p>Clarification of the requirement for school places provision.</p> <p>Deleted as incorporated with other green infrastructure requirements in part 2.</p> <p>To clarify, setting out an unambiguous policy framework for these allocations.</p>	

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>Modify criterion 11 as follows: <u>Make financial contributions for offsite additional primary and secondary school provision to meet needs generated by the development in accordance with policy JP-P5</u> Provide contributions to ensure that there are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities; and</p> <p>Delete criterion 12 in its entirety.</p> <p>Modify to add new criterion after criterion 12 as follows: <u>Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).</u></p>		
MMR3	JPA19 Bamford and Norden Reasoned Justification	308 - 309	<p>Modify paragraph 11.213 as follows: “11.213. Norden and Bamford are well-established residential areas to the west of Rochdale town centre and there is a strong market demand for housing<u>homes</u> within the area. It is one of the most significant areas of larger, higher value housing<u>homes</u> within the sub-region and is considered to be a desirable and aspirational place to live. ... <u>Rochdale currently has a relatively small proportion of</u></p>	Clarification to specify type and size of new homes expected in the allocation, to replace ‘higher value’, in response to AP119. In addition, clarification that allocation will be expected to make provision for affordable housing in accordance with local plan policy.	AP9 AP113 AP119 GMCA77 GMCA44

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p><u>properties in Council Tax bands E and above and the conurbation as a whole. Properties in these bands are situated in well-landscaped settings, with spacious plot sizes and larger internal floorspaces.</u> The provision of such housing is important to ensure that a good range of housing is available across the plan area to support economic growth and will help to achieve the spatial objective of <u>boosting northern competitiveness. This will also include the delivery of affordable housing, in line with the requirements of the Local Plan.</u>”</p> <p>Modify paragraph 11.214 as follows: “11.214 ... Any proposal should seek to ensure that these pitches and the other sporting facilities are retained and significantly enhanced as part of a high quality, integrated development, <u>and the residential development on the site should contribute towards the delivery of these improvements.</u> ...</p> <p>Modify paragraph 11.217 as follows: “11.217...It is important that any development does not have a negative impact on <u>Ashworth Valley</u> this natural asset and where practical historic field boundaries as identified in the Bamford /Norden Heritage Assessment should be retained and incorporated into the masterplan...”</p>	<p>To clarify that all residential development on the site will be required to contribute to improvements to recreational facilities.</p> <p>Clarification of the local asset that is referred to. In the second part, clarification that the development will be required to make compensatory improvements to remaining Green Belt.</p> <p>To clarify, setting out an unambiguous policy framework for these allocations.</p>	

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>...The site is also relatively close to Ashworth Valley to the west. This river valley is of high landscape value and provides some attractive recreational routes. <u>Where land is to be removed from the Green Belt, national guidance seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. This requirement offers an opportunity to improve existing routes along with other identified improvements. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020)...</u></p> <p>Modify to add new paragraph after 11.219 as follows: <u>“The allocation is identified as containing Mineral Safeguarding Areas for brickclay (99.9% of the site); sand and gravel (10.6%); sandstone (22.0%) and surface coal (99.9%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.”</u></p>

Chapter Eleven - Strategic Allocations in Trafford Proposed Main Modifications

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
MMTr1	Picture 11.46 Trafford District Overview	355	Modify picture to reflect modifications elsewhere in the plan, such as the land supply and the Green Belt boundary – See Annex 3, Map MMTr1	Consequential changes to the overview map resulting from modifications elsewhere in the plan	IN37 AP147
MMTr2	Picture 11.48 JPA33 New Carrington	357	Modify picture 11.48 to clarify that picture 11.48 is indicative only. Amend title of Picture 11.48 to: <i>Picture 11.48 New Carrington <u>Indicative</u> Allocation Policy Plan</i> Modify picture 11.48 to label the area identified as 'Local Plan' to 'Mixed Residential and Employment Use'. Also to add the 'Character Areas' to the plan. See Annex 3, Map MMTr2	To clarify, ensuring that the policy is effective and provides clear and unambiguous guidance in relation to the Indicative Allocation Plan.	AP132 GMCA85
MMTr3	JPA33 New Carrington Policy	356 - 363	Modify Criterion 1 as follows: 1. Be in accordance with a masterplan or Supplementary Planning Document (SPD) that has been <u>developed in consultation with the local community, and approved by the Local Planning Authority. The masterplan must include a phasing and delivery strategy as required by policy JP-D1. Central to the masterplan shall be the consideration of opportunities to restore habitats, strengthen ecological networks, and manage the carbon and hydrological implications of development, having regard to the presence of peat on parts of the site. It should also have regard to the anticipated Hynet North</u>	To clarify, ensuring that the policy is effective and provides clear and unambiguous guidance. To clarify, ensuring consistency across the Plan. Deleted reference to the indicative requirements for each 'character area'.	AP132 AP133 AP147 AP156 AP157 AP159 GMCA85 GMCA96

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p><u>West Hydrogen pipeline (as relevant). The masterplan will be prepared in partnership with key stakeholders to ensure the site whole allocation is planned and delivered in a coordinated and comprehensive manner, with proportionate contributions to fund necessary infrastructure;</u></p> <p>Add new criterion under Criterion 1 as follows: <u>Have regard to the relevant Health and Safety Executive’s consultation zones and Land Use Planning advice;</u></p> <p>Modify Criterion 2, as follows: 2. Deliver around 5,000 units, of which 4,300 will be delivered in the plan period at Carrington / Partington and Sale West; , in the following distinct character areas, as set out on the Allocation Policy Plan:-</p> <ul style="list-style-type: none"> ● Carrington Village – approximately 600 units ● Sale West – approximately 1,450 units ● East Partington – approximately 2,600 units ● Warburton Lane – approximately 420 units <p>Delete Criteria 3 - 5 in their entirety.</p> <p>Modify Criterion 6 as follows: 6. Deliver residential development at the following average densities, recognising the distinct characteristics of each area <u>(as set out on the Indicative Allocation Plan (Picture 11.48):</u></p>	<p>To remove any duplication with other policies in the Plan.</p> <p>To clarify that as part of the updated HRA, it is considered that this requirement and associated justification is no longer necessary in JPA33 as the matter is appropriately addressed through modifications to JP-G9 (see PfE response to IN9, Q9.10).</p>	

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<ul style="list-style-type: none"> • <u>Central Carrington Village</u> – average 35 dph • Sale West – average 40 dph • <u>East Partington East</u> – average 35 dph, increasing to an average of 40 dph in areas close to the existing Partington urban area. Higher density development at an average of 55 dph will be appropriate close to the local centre; • Warburton Lane – average 25 dph <p>Modify Criterion 7 as follows: 7. Provide <u>Make provision for</u> a minimum of 15% affordable housing across the New Carrington allocation <u>to be provided in accordance with local policy requirements</u>. In determining appropriate affordable housing provision regard should be had to the distinct Character Areas within the New Carrington site which each reflect different housing markets. The New Carrington Masterplan / SPD and the Trafford Local Plan will provide additional guidance on appropriate affordable housing contributions for each of the Character Areas</p> <p>Modify Criterion 8 as follows: 8. Make <u>appropriate</u> specific provision for self-build/custom-build plots, subject to local demand as set out in the Council’s self-build register;</p> <p>Modify Criterion 9 as follows:</p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>Deliver around 350,000 sqm (gross) of employment opportunities for <u>B2 / B8 uses; industry and warehousing as set out on the Allocation Policy Plan</u></p> <p>Delete Criteria 10 -13 in their entirety.</p> <p>Modify Criterion 14 as follows: 14. Deliver accessible streets which prioritise cycling, walking and public transport over the private car; Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;</p> <p>Modify Criterion 15 as follows: Deliver a network of safe cycling and walking routes through the allocation <u>and linking to surrounding areas, including</u> utilising the Carrington rides, improving the Trans Pennine Trail and creating new/enhancing existing Public Rights of Way and bridleways;</p> <p>Modify Criterion 16 as follows: 16. Deliver connected neighbourhoods which successfully link with existing communities at Carrington, Partington and Sale West, overcoming barriers such as the Red Brook <u>and the disused railway line between Timperley and Irlam,</u> to successfully integrate development;</p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>Modify Criterion 17 as follows: 17. <u>Provide an east / west</u> Utilise the route of the disused railway line through the site as a strategic sustainable transport corridor <u>across the site from the Manchester Ship Canal to Sale to link with</u> providing links from New Carrington to the wider area as part of the Carrington Greenway scheme which includes reinstatement of the Cadishead viaduct for pedestrians and cyclists, as well as contributing to future improved east/west public transport linkages;</p> <p>Modify Criterion 18 as follows: 18. <u>Contribute to new / enhanced bus services and</u> Deliver bus priority infrastructure within the site and, where appropriate, on bus routes linking to the site;</p> <p>Modify Criterion 19 as follows: 19. <u>Facilitate delivery of</u> Deliver and directly contribute to the Carrington Relief Road to provide an alternative route to the A6144 and a strategic link through Carrington, incorporating provision for pedestrians, cyclists and bus priority measures.</p> <p>Delete Criterion 19, i-iii in its entirety.</p> <p>Delete Criterion 20 in its entirety.</p> <p>Modify Criterion 21 as follows:</p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>21. Provide <u>Create a new local centre comprising a range of small shops with convenience shopping facilities and services providing up to in the region of 2,500 sqm of retail floorspace, within the East Partington East development area at a scale to serve the needs of the proposed communities and improve the sustainability of the wider Partington and Carrington area</u></p> <p>Modify Criterion 22 as follows: Provide a <u>new Neighbourhood Centres at in the Central Carrington Village and Sale West character areas to provide local services and community facilities to meet local needs</u></p> <p>Modify Criterion 23 as follows: 23. Provide and contribute to the provision of <u>Make financial contributions for offsite additional primary and/or secondary school provision to meet needs generated by the development and, where appropriate, make provision for a new primary school on site, in accordance with JP-P5; places. Extensions will be required to primary and secondary schools in Partington and Sale West;</u></p> <p>Delete Criterion 24 in its entirety.</p> <p>Modify Criterion 25 as follows: 25. Provide a significant green corridor through the site which remains in the Green Belt and provides an area of</p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>protected, high quality, <u>publicly</u> accessible green infrastructure;</p> <p>Modify Criterion 26 as follows: 26. Create defensible <u>Define and/or strengthen the boundaries of the Green Belt around/within the site such that they will comprise physical features that are readily recognisable and likely to be permanent; boundaries utilising, where appropriate, existing landscape features;</u></p> <p>Modify Criterion 27 as follows: 27. Make provision for compensatory improvements to Mitigate any impact and improve the environmental quality and accessibility of remaining Green Belt land <u>within and/or in the vicinity of the site in accordance with policy JP-G2;</u></p> <p>Modify Criterion 28 as follows: 28. Provide significant areas of open and <u>publicly</u> accessible green space throughout the allocation as part of the wider strategic green infrastructure network. <u>Creating These will provide</u> important multi-functional recreational spaces and active travel routes, linking different areas within and beyond the site;</p> <p>Delete Criterion 29 in its entirety.</p> <p>Modify Criterion 30 as follows:</p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>Provide a range of types and sizes of open space within the allocation boundary in accordance with <u>local planning policy requirements</u> the Council's open space and outdoor sports policies, including local open space; natural and semi-natural greenspace; equipped and informal play and youth provision; outdoor sports facilities and allotments, ensuring arrangements for their long-term maintenance;</p> <p>Modify Criterion 31 as follows: 31. Protect the <u>Provide strategic</u> green spaces at Sale West identified broadly in the locations identified on the Indicative Allocation Policy Plan (Picture 11.48) and promote their use as an accessible green infrastructure area. These areas <u>will be</u> protected from development and proposals will need to demonstrate how they and will deliver improved green infrastructure and access (including new or improved public rights of way), to these parcels to mitigate the impacts of development</p> <p>Modify Criterion 32 as follows: Protect and enhance natural environment assets within the site and the surrounding area, <u>Make provision for biodiversity, including taking appropriate account of</u> including Brookheys Covert Site of Special Scientific Interest (SSSI), <u>eight</u> local Sites of Biological Importance (SBIs), and local nature conservation sites and features including woodland and hedgerows both within and</p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>adjacent to the allocation, in accordance with Policy JP-G9;</p> <p>Add new criterion after Criterion 32 as follows: <u>Undertake hydrological and ground investigations as necessary to inform the comprehensive masterplan and use of suitable construction techniques to ensure any loss or deterioration of irreplaceable habitat, and adverse impacts on the hydrology of undeveloped areas, is minimised. Where loss or deterioration is unavoidable, a suitable compensation strategy should be identified and delivered, including the potential restoration of lowland raised bog and complementary habitats elsewhere within the site;</u></p> <p>Modify Criterion 33 as follows: 33. Achieve enhanced delivery of ecosystem services through the restoration and creation of <u>wildlife corridors, steppingstone habitats and areas of wetland within the site, commensurate with the identified high potential of the area in this regard and the role of the allocation site in the context of the Local Nature Recovery Network for Greater Manchester and, in accordance with policy JP-G2. These areas will seek to deliver the objectives of the Great Manchester Wetlands Nature Improvement Area;</u></p> <p>Modify Criterion 35 as follows: 35. Protect and enhance the habitats and corridors along Sinderland Brook, the River Mersey and the</p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>Manchester Ship Canal as part of the catchment-based approach for the Upper Mersey to improve the existing water quality and seek to achieve 'good' status as required under the North West River Basin Management Plan (2019);</p> <p>Delete Criterion 36 in its entirety.</p> <p>Modify Criterion 38 as follows: 38. <u>Reflect and respond to the special qualities and sensitivities of the key characteristics of the Mossland and Lowland Farmland landscape character type in accordance with Policy JP-G1, Conserve and enhance local landscape character, including particularly as regards layout and design that respects the settings of the Dunham Massey estate, Warburton Village and Warburton Deer Park;</u></p> <p>Modify Criterion 39 as follows: Provide appropriate landscape buffers across the site, including a substantial landscape buffer along the southern boundary of the Warburton Lane development parcels to mitigate the impact on the rural landscape to the south of the allocation area</p> <p>Modify Criterion 40 as follows: Ensure new development is place-led, creative and contextual in its response, respecting the local character, <u>heritage and positive local design features of the area;</u></p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>Delete Criterion 41 in its entirety.</p> <p>Modify Criterion 43 as follows: 43. Conserve and enhance the historic environment in line with the findings and recommendations of the Historic Environment Assessment (2020) in the Plan's evidence base and any updated HIA submitted as part of the planning application process <u>Take appropriate account of relevant heritage assets and their settings, including the Warburton Deer Park, listed buildings and areas of high archaeological potential in the south west of the site, in accordance with Policy JP – P2;</u></p> <p>Delete Criteria 44 - 48 in their entirety.</p> <p>Modify criterion 49 as follows: 49. Mitigate flood risk and surface water management issues, both within and beyond the site, including provision of SUDS through the design and layout of development and in accordance with an allocation wide <u>a flood risk, foul and surface water management strategy, which will form part of the Masterplan/delivery strategy (Criterion 1);</u> The allocation-wide drainage strategy should be prepared after having fully assessed site topography, flood risk, existing water features and naturally occurring flow paths to identify where water will naturally accumulate. The strategy will demonstrate how each phase interacts with other phases of development</p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>and further detail will be set out in the Masterplan / SPD;</p> <p>Delete Criteria 50-51 in their entirety.</p> <p>Modify Criterion 53 as follows: Incorporate appropriate noise and air quality mitigation particularly along major transport corridors, including HS2, and in relation to existing and new businesses, facilities and employment uses, including existing operational wastewater treatment works;</p> <p>Modify Criterion 54 as follows: Improvements to the existing Partington and Altrincham wastewater treatment works will be supported where they are needed to respond to future foul and surface water infrastructure requirements; <u>and</u></p> <p>Add new Criterion after Criterion 54 as follows: <u>Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).</u></p>		
MMTr4	JPA33	363 - 368	Modify paragraph 11.320 as follows:	Consequential changes to the reasoned justification.	AP132 AP133

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
	New Carrington Reasoned Justification		<p>11.320 The New Carrington allocation will deliver a new community that links to the existing Carrington, Partington and Sale West areas and provides improved transport, social and green infrastructure. New development will create a distinct, attractive place which capitalises on the industrial history and prominent landscape features on the site. <u>As set out on the Indicative Allocation Plan (Picture 11.48) the allocation includes areas identified for residential use, employment use and mixed residential and employment use. This is alongside areas of retained Green Belt, Strategic Green Spaces and strategic transport improvements.</u></p> <p>Modify paragraph 11.321, second sentence, as follows: Trafford Council is therefore committed to working with stakeholders to bring forward a detailed Masterplan / SPD which provides a framework for the sustainable delivery of a new community at Carrington, Partington and Sale West.</p> <p>Add the following sentence at the end of paragraph 11.321: <u>All development will be expected to make a proportionate contribution to necessary infrastructure, including transport, social and green infrastructure.</u></p> <p>Add a new paragraph under paragraph 11.321 as follows:</p>		AP147 AP156 AP157 AP158 AP159 GMCA85 GMCA96

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p><u>The masterplan will need to have regard to the presence of peat on parts of the site and identify opportunities to restore habitats and minimise the loss of carbon as part of the development. The allocation was found sound at examination on the basis that, in principle, the public benefit arising from the development proposed would be likely to clearly outweigh the loss or deterioration of an irreplaceable habitat and that a suitable compensation strategy was capable of being delivered. The policy seeks to ensure that detailed development proposals are consistent with that conclusion.</u></p> <p>Add a new paragraph under paragraph 11.321 as follows: <u>Development of the New Carrington site will need to be phased alongside the necessary infrastructure to ensure a successful, sustainable development. A high level, indicative phasing plan has been developed which recognises the distinctive character areas and demonstrates the deliverability of the site. A more detailed development and infrastructure phasing plan will be required as part of the Masterplan. It is expected that multiple residential sites will be delivered alongside each other throughout the plan period in order to maximise the delivery rate and cater for the distinct market areas.</u></p> <p>Delete paragraph 11.322 in its entirety.</p> <p>Modify by inserting a new paragraph</p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>after paragraph 11.322: <u>In determining any planning application up to date advice from the Health and Safety Executive (HSE) will be needed to understand the full extent of the HSE consultation zone constraints in relation to existing uses and the Hynet North West Hydrogen pipeline.</u></p> <p>Modify by inserting a new paragraph after paragraph 11.323 as follows: <u>Picture 11.48 identifies four distinct residential character areas across the allocation: Central Carrington, Partington East, Sale West and Warburton Lane. The approximate number of units expected in each character area is set out below. These are not policy requirements but they reflect the average density which is considered to be appropriate in each area (Criterion 6):</u></p> <ul style="list-style-type: none"> • <u>Central Carrington – approx. 600 units</u> • <u>Partington East – approx. 2,600 units</u> • <u>Sale West – approx. 1,450 units</u> • <u>Warburton Lane – approx. 400 units</u> <p>Delete paragraph 11.324 in its entirety.</p> <p>Modify paragraph 11.326 of as follows: Trafford has an acute affordable housing need and this site offers an opportunity to deliver affordable housing on a greenfield site. <u>Reflecting the PfE Viability Assessment, the policy requires a minimum of 15% affordable housing to be delivered across the whole</u></p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p><u>allocation. To achieve this, it is possible that some parts of the allocation will need to deliver a higher proportion of affordable housing than others. This should be considered as part of the preparation of the masterplan, the delivery strategy and through individual planning applications, having regard to differing levels of viability within the site. The Council will monitor affordable housing provision across the allocation to ensure the 15% overall requirement is met. Any affordable housing provision should be delivered in accordance with the Trafford Local Plan. A minimum of 15% affordable housing contribution is required across the whole allocation, however, regard will be given to the distinct Character Areas identified within the New Carrington allocation: Carrington Village, East Partington, Sale West and Warburton Lane in determining an appropriate contribution. Further guidance will also be provided in the Carrington Masterplan / SPD and the Trafford Local Plan.</u></p> <p>Modify paragraph 11.327 first and second sentence, as follows:</p> <p>11.327 Employment development for <u>B2 / B8 uses</u> will be located in the north western area of New Carrington, largely on existing brownfield land. This is the most appropriate use in this area considering the existing Control of Major Accidents Hazards (COMAH) HSE consultation zone constraints.</p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>Delete paragraph 11.328 – 11.330 in their entirety.</p> <p>Modify paragraph 11.331, as follows: A significantly improved active travel and public transport network is central to the success of the New Carrington allocation. Development will be designed to support walking and cycling, encouraging sustainable short journeys and promoting healthier lifestyles. <u>Development will also need to be connected to existing communities and, where required, overcome any physical barriers to ensure it is integrated.</u> The development should have regard to the Greater Manchester Transport Strategy 2040 refresh, providing improved links to the city centre, enhancing sustainable travel links to/from New Carrington and Flixton Station, as well as contributing to east-west links to Altrincham and Salford through the use of the <u>Cadishead viaduct disused rail route</u>. This route will <u>form part of the wider deliver the Carrington Greenway scheme providing an important sustainable transport active travel link to Irlam Station, and improved east/west connections through the New Carrington site and linking to surrounding communities. as well as a potential future public transport corridor.</u></p> <p>Modify paragraph 11.334, as follows The New Carrington Transport Locality Assessment also identified key highway junctions which <u>may will</u> require intervention to mitigate the impact of development, as well as other link roads which will be required to access</p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>development parcels within the site. The detailed design of these interventions will be determined by Transport Assessments to fully understand the impact of the development and to identify appropriate solutions.</p> <p>Modify paragraph 11.336 first and second sentence as follows: 11.336 A new local centre, located in the east Partington <u>East</u> character area, will be a hub for community infrastructure and will service the needs of the new community. Smaller neighbourhood centres will also provide local community hubs <u>in the</u> at Sale West and <u>Central Carrington Village character areas</u>.</p> <p>Modify paragraph 11.337 final sentence, as follows: Development will also be required to provide new and improved health facilities to support the new community, <u>as required by Policy JP-P6</u>.</p> <p>Modify by inserting a new paragraph under paragraph 11.338, as follows: <u>The new Green Belt boundary is defined by existing features such as hedgerows, roads and field boundaries, although in some locations there is a need to strengthen the boundary as part of the development. This includes the southern boundary of the employment land, which is not currently identifiable, as well as the boundary to the east of the Manchester United Football Club training</u></p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p><u>facilities. The new Green Belt boundary to the east of the Altrincham Waste Water Treatment Works should also be strengthened.</u></p> <p>Modify paragraph 11.339, third sentence as follows: Enhancements to the mature tree belt along the existing Sale West boundary (which forms part of Dainewell Wood) will contribute to the green setting of the Sale West extension as well as improved access and green infrastructure enhancement to the <u>strategic</u> green spaces identified at Sale West which are protected from development. Improved access within and through these parcels will be a priority and should include enhancement of the Trans Pennine Trail.</p> <p>Modify paragraph 11.340, second sentence as follows: This includes <u>the eight SBIs within the site boundary and the</u> habitats and green corridors along Sinderland Brook and Red Brook.</p> <p>Modify paragraph 11.341 as follows: Parts of the allocation also support organic soils (peat) which, when taken together with a low-lying topography and existing nature conservation interest, makes the area <u>potentially particularly</u> suitable for <u>peat</u> restoration <u>or to important</u> wetland habitats. Much of the area which <u>may be is</u> suitable for <u>peatland restoration or wetland habitats restoration</u> is within the identified Green Belt gap and it will therefore be protected from development.</p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p><u>Other other locations within the proposed development area across the site will require ground investigations to establish the depth and quality of peat and to consider the potential for restoration, alongside development also be considered in relation to their wetlands potential. Regard should also be had to the hydrology of development parcels and surrounding areas in assessing the impact on peat.</u></p> <p>The Carrington area is included in the <u>locally determined Great Manchester Wetlands Nature Improvement Area whose objectives seek to deliver a living landscape between Greater Manchester and Merseyside through identified wildlife corridors and through the complementary creation of, or restoration of, wetland habitat. and has been identified as New Carrington has the potentially to be an important part of a developing this Wetlands Ecological Network through the creation and restoration of wetland habitats and their designation in the Local Plan, where appropriate.</u> In addition, the conservation of organic soils will help to reduce carbon emissions.</p> <p>Delete paragraph 11.342 in its entirety.</p> <p>Modify paragraph 11.343 as follows: 11.343 Much of the Carrington / Partington area is currently undeveloped and open, development proposals will therefore be required to consider the</p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>landscape setting of the site and enhance the transition from the urban edge to the open countryside.</p> <p><u>Development should haveing regard to views/vistas into and out of the site, as well as sensitive receptors through the retention of existing natural features important to the Mossland and Lowland Farmland landscape character type of the area in particular hedgerows, ditches, rides and small pockets of woodland</u> and the introduction of additional tree planting and vegetation to soften new development. Areas of the site <u>and surrounding area</u>, such as Warburton Deer Park, <u>Warburton Village Conservation Area</u> and Carrington Moss, have particularly high landscape sensitivity <u>as regards views south to Warrington and Cheshire and therefore development proposals in these areas will need to have regard to these sensitivities (where relevant) and demonstrate</u> how any landscape impact can be appropriately mitigated.</p> <p>Modify paragraph 11.344 as follows: 11.344 The New Carrington development will need to set a new high quality design standard for this area and development should draw upon the guidance in the Council's adopted <u>relevant Design Guides / Codes</u>. Specific parameters for the development of the site will be set out in the Masterplan / SPD.</p> <p>Modify paragraph 11.345, final sentence as follows:</p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>Issues such as design and linkages <u>to existing communities and</u> through the site should be carefully considered.</p> <p>Modify paragraph 11.346 of Policy JPA33 as follows: The New Carrington Historic Environment Assessment considered the characterisation of the site in respect of the known archaeological, built heritage and historic landscape within the allocation. It assessed the potential for the development to affect designated and non-designated heritage assets and this has been taken into account in considering an appropriate development quantum for the site. <u>The Assessment makes recommendations for mitigation and identifies opportunities for enhancement. Further archaeological investigation and a Heritage Impact Assessment will be required as part of future planning applications.</u> The area of highest archaeological potential is land to the south of Partington and to the west of Warburton Lane, which has been identified as a potentially significant medieval deer park. Other areas of the Carrington site which are of potentially high value include areas of peat where assessments to establish the depth and condition of any remaining peat will be required. For the areas of highest archaeological value, work will need to be undertaken in advance of any planning application to understand the heritage significance of these areas. A suitable mitigation strategy should be developed which also identifies opportunities to enhance the heritage assets.</p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>Delete paragraph 11.347 in its entirety.</p> <p>Modify paragraph 11.348 as follows: 11.348 A high-quality coordinated drainage strategy will be required for New Carrington which is integrated with the green and blue environment and which is a key component of the new high quality design standard for the area – <u>this is required as part of the overall Delivery Strategy (Criterion 1)</u>. Landowners / developers will be expected to work together in the interest of sustainable drainage and if pumping stations are identified as necessary, the strategy will demonstrate how the number of pumping stations is minimised so to avoid a proliferation of pumping stations between phases. Where necessary, the strategy must be updated and agreed with the local planning authority to reflect any changing circumstances between each phase of development.</p> <p>Modify paragraph 11.349 as follows: 11.349 Opportunities will also be explored to maximise the potential of the Sinderland Brook in terms of urban flood management. The brook currently has a rating of ‘moderate’ under the EU Water Framework Directive, and the development should seek opportunities to improve this to ‘good’.</p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/PQ/MIQ/AP Ref
			<p>Insert new paragraph under paragraph 11.351 as follows: <u>The allocation is identified as containing a Mineral Safeguarding Area for sand and gravel (26.5%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.</u></p>		

Chapter Eleven - Strategic Allocations in Wigan Proposed Main Modifications

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
MMW1	Picture 11.49 Wigan District Overview	369	Modify picture to reflect modifications elsewhere in the plan, such as the land supply and the Green Belt boundary. See Annex 3, Map MMW1	Consequential changes to the overview map resulting from modifications elsewhere in the plan	GMCA96 AP147

			<p>Modify Policy JPA37 (criterion 9), as follows: “Make Ensure appropriate provision is made to sufficiently mitigate the impact of development on for great crested newts sufficient to mitigate the development;”</p> <p>Modify Policy JPA37 (after criterion 9) by adding a new criterion, as follows: <u>“Make provision for biodiversity, including taking appropriate account of Sites of Biological Importance and areas of priority habitat, which include ponds, watercourses, dry heath/acid grassland, hedgerows and areas of woodland on and/or around the site in accordance with Policy JP-G9;”</u></p> <p>Modify Policy JPA37 by deleting criterion 10 in it’s entirety.</p> <p>Modify Policy JPA37 (after criterion 10) by adding a new criterion, as follows: <u>“Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with Policy JP-G2; and”</u></p> <p>Modify Policy JPA37 by deleting criterion 11 in it’s entirety.</p> <p>Modify Policy JPA37 (after criterion 11) by adding a new criterion, as follows: <u>“Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals</u></p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			<u>Development Plan (or any relevant policies in subsequent minerals plans).</u>		
MMW9	JPA37 West of Gibfield Reasoned Justification	380-381	<p>Modify paragraph 11.377, as follows: “The West of Gibfield area provides an opportunity for a substantial housing and employment development to the west of Atherton. The employment development will <u>be on land in the southern part of the site</u> extend the existing Gibfield Park Industrial Area and is considered suitable for E(g), B2 and/or B8 employment floorspace. The development will include new green infrastructure serving Atherton and Daisy Hill, Westhoughton.”</p> <p>Modify paragraph 11.379, as follows: “<u>In accordance with Policy JP-C7, h</u>Highway improvement measures will be needed to mitigate the impact of the development, notably at the junction of the A577 and Gibfield Park Way and between the site and the A6 and Junction 5 of the M61 in Bolton. The development will be required to make an effective contribution to the provision of these measures.”</p> <p>Modify paragraph 11.380, as follows: “There is also a need for strategic improvements to services along the Atherton railway line between Wigan and Manchester, via Daisy Hill station, specifically to increase capacity at peak times, and increase service frequencies and extent, <u>in accordance with Policy JP-C7</u>. The increased use of the existing rail line could include its conversion to</p>	<p>To clarify, ensuring that the policy and reasoned justification are consistent, effective and provide clear and unambiguous guidance</p> <p>To clarify, setting out an unambiguous policy framework for this allocation</p>	GMCA86 AP138 GMCA21 AP9

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			<p>tram-train use, enabling greater frequency of services. This development is required to ensure <u>good convenient and safe access within the site towards</u> Daisy Hill and Hag Fold stations for pedestrians and cyclists and contribute appropriately to passenger improvements at those stations.</p> <p>Modify paragraph 11.381, as follows: “The green infrastructure requirement will need to be delivered in advance and alongside the housing development and should provide effectively for a country park with wildlife habitats and recreational space. Appropriate provision should be made to <u>sufficiently mitigate the impact of the development on great crested newts that are present in the area, as well as the presence of priority habitats in accordance with Policy JP-G9.</u> The ongoing maintenance of the country park will need to be agreed with the Council.”</p> <p>Modify by adding a new paragraph after paragraph 11.382, as follows: <u>“Where land is to be removed from the Green Belt, national policy seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).”</u></p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			<p>Modify paragraph 11.383, as follows: “To ensure that a co-ordinated approach is taken to the delivery of this site, a masterplan will need to be prepared and agreed by the Council. The design and layout will need to be informed by site investigations, an archaeological assessment and other constraints and opportunities provided by the site. The development will be also required to provide easements for the significant utilities infrastructure that runs through the site.”</p> <p>Modify by adding a new paragraph after paragraph 11.383, as follows: <u>“The allocation is identified as containing Mineral Safeguarding Areas for brickclay (99.7% of the site); sandstone (18.1%) and surface coal (99.7%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.”</u></p>		

Chapter Twelve Delivering the Plan Proposed Modifications

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
MM12.1	JP-D1 Infrastructure Implementation Policy	385 - 386	<p>Modify first paragraph as follows: “To make this happen we will:<u>To ensure the effective development and implementation of the infrastructure needed to support the delivery of the vision and objectives set out in this document.”</u></p> <p>Modify by including new sub-headings before criteria 1 and 2 as follows:</p> <p><u>“We will:</u></p> <p>Take a long term...</p> <p><u>will work with infrastructure providers to:</u></p> <p>Promote collaboration and synchronisation of investment plans between ourselves and the main infrastructure providers: <u>Key infrastructure providers include the NHS Greater Manchester Integrated Care Partnership (formerly Clinical Commissioning Groups), the NHS, Highways England, Network Rail, Transport for Greater Manchester, United Utilities, the Environment Agency, National Grid, Cadent, United Utilities and digital/telecommunication providers;</u></p>	<p>To clarify and improve the effectiveness (soundness) of the policy.</p> <p>To ensure that the policy’s requirements are clear and unambiguous Policy JP-D1 has been restructured into three parts, incorporating all previous modifications, and with some rewording of criteria to reflect the new sub-headings.</p> <p>Modifications clarify that references are appropriately phrased and ensure that the plan text is up to date.</p> <p>Specific modifications provide further clarity in respect of the content of the infrastructure phasing and delivery strategy required by the policy and brings in a specific reference to the need to reach agreement with</p>	M12.1 Q12.1 Q12.2 Q12.3 Q12.5 GMCA5.1 PQ74 GMCA23 AP86 AP87

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			<p>ify criterion 3 as follows: Work directly with the infrastructure providers and regulators (including Ofcom, Ofwat and Ofgem) to ensure that future investment plans are consistent with have regard to this Plan; <u>The involvement of regulators (including Ofcom, Ofwat and Ofgem) will be critical in this regard;</u></p> <p>ate criterion 4 as follows: Establish a new long term funding mechanism for transport and site specific infrastructure to ensure timely delivery and capture of developer contributions;</p> <p>and two new criteria after criterion 3 as follows:</p> <p><u>Minimise disruption to highways and businesses during major infrastructure upgrades and pipe subway construction; and</u></p> <p><u>Promote the provision and use of shared routing, trenching and programming particularly in areas where there is extreme pipe and cable congestion under the streets to reduce disruption.</u></p> <p>Modify by including new sub-heading before criterion 5 as follows:</p> <p><u>“We will, through local plans, other local planning documents and development management decisions:”</u></p>	<p>the relevant local planning authority. The modifications ensure consistency with the tests for planning obligations set out under NPPF paragraph 57.</p> <p>Modifications finally ensure there is no unnecessary overlap / inconsistencies within the plan, and with other statutory or regulatory regimes.</p>	

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			<p>Modify criteria 6 and 7 as follows: Require applicants to prepare an infrastructure phasing and delivery strategy for strategic sites, and major sites to be agreed by the local planning authority for sites where build out will be delivered by different developers or in phases. This strategy must outline what needs to be provided by when and who will fund and deliver it; <u>and</u></p> <p>Ensure that development does not lead to capacity or reliability problems in the surrounding area by requiring applicants to demonstrate that there will be adequate utility infrastructure capacity to support the delivery and occupation of their proposed development, from first occupation until development completion. Where potential capacity problems are identified and no improvements are programmed by the relevant infrastructure provider, we will require the developer to contribute to and/or facilitate necessary improvements where this would be necessary to mitigate the impact of development. As a minimum, applicants should identify and plan for:</p> <p>Minimising the demand for energy, water and utility services by requiring sustainable building design and the incorporation of demand management measures within all new development and conversions where practicable;</p> <p>Electricity supply to serve the construction phase and the intended use for the site, and identify, in conjunction with</p>		

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			<p>electricity providers the estimated load capacity of the building and the substations and routes for supply;</p> <p>Reasonable gas and water supply, considering the need to conserve natural resources;</p> <p>The provision of multiple ducting to support full fibre digital connections from different providers;</p> <p>Heating and cooling demand and the viability of its provision via decentralised energy networks. Designs must incorporate access to existing networks where feasible and viable; and</p> <p>Where potential capacity problems are identified and no improvements are programmed by the relevant infrastructure provider, we will require the developer to contribute to and/or facilitate necessary improvements.”</p> <p>Delete criteria 8 and 9 as follows: Work with infrastructure providers to minimise disruption to highways and businesses during major infrastructure upgrades and pipe subway construction; and Promote the provision and use of shared routing, trenching and programming particularly in areas where there is extreme pipe and cable congestion under the streets to reduce disruption.”</p>		
MM12.2	JP-D2 Developer Contributions	388	<p>Modify paragraph 12.16 as follows: “...These methods include: Section 106 planning obligations, the Community Infrastructure Levy, <u>and</u> agreements made under Section 278 of the Highways Act</p>	To clarify, ensuring consistency with the Policy.	M12.1 Q12.6 GMCA23 AP88

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
	Reasoned Justification		1990 (as amended), or the potential introduction of a Strategic Infrastructure Tariff.		
MM12.3	JP-D2 Developer Contributions Policy	390	<p>Modify first paragraph as follows: "...These will be secured through the most appropriate mechanism, including, but not limited to, planning conditions, legal contracts <u>Section 106 planning obligations, agreements made under Section 278 of the Highways Act 1990 (as amended), or CIL (or any subsequently adopted planning gain regime).</u>"</p> <p>Delete second paragraph and replace with revised text, as follows: "Applicants should take account of policies in development plans and other relevant documents when developing proposals and acquiring land. It is expected that viability assessments should only be undertaken where there are clear circumstances creating barriers to delivery. If an applicant wishes to make the case that viability should be considered, they should provide clear evidence at the planning application submission stage, demonstrating the specific issues that would create barriers to delivery in a transparent manner and reflecting national guidance.</p> <p><u>If an applicant wishes to make a case that a development is not viable, they should provide clear evidence at the planning application stage, identifying the specific issues and/or changes in circumstance which would create barriers</u></p>	<p>To clarify the policy, avoid any potential ambiguity and to be consistent with paragraph 12.16 of the reasoned justification.</p> <p>To clarify, ensuring consistency with national guidance in respect of the consideration of viability as part of the planning application process.</p>	M12.1 Q12.6 GMCA23 AP88

Main Mod Ref	PfE Ref.	PfE Page No.	Main Modification Text	Reason for modification	Doc/ PQ/ MIQ/AP Ref
			<u>to delivery in a transparent manner and reflecting national guidance.</u>		
MM12.4	Para. 12.23 Monitoring	390	<p>Modify paragraph 12.23 as follows: <u>“The table below sets out the proposed monitoring framework for the Plan. It focuses on the key priorities of the plan. It sets out the indicators which will be used and the geographical areas each will be applied to. In order to monitor the Vision, Objectives and Strategy effectively, the data for the indicators will be collected across varying geographical areas of the plan. The analysis will have a particular focus on the Core Growth Area (JP-Strat 1), the Inner Areas (JP-Strat 5), the Northern Areas (JP-Strat 6) and the Southern areas (JP-Strat 9). The spatial strategy geographical areas referred to in table 12.1 reflect the Strategic Policies set out in Chapter 4 of the Plan. Until such time that the detailed boundaries of these areas are established in district local plans, the authority monitoring report will illustrate the geographical boundaries to which the data refers.”</u></p> <p>Insert new paragraphs after paragraph 12.23 as follows: <u>“12.24 The Allocations will be monitored by districts but where a PfE indicator will form part of this monitoring it is noted in the ‘Allocation’ column of table 12.1.</u></p> <p><u>12.25 The outcomes of PfE monitoring will form part of each of the districts own Local Plan Authority Monitoring Reports.”</u></p>	<p>Required to clarify the purpose of Table 12.1 and set out the key linkages with policies in the plan.</p> <p>New paragraphs inserted to explain the process of monitoring with respect to allocations and also in relation to districts’ AMRs.</p>	GMCA87 AP138

Annex 3 - Proposed main modifications to the illustrative maps, pictures and diagrams compared to the PfE Plan SD1

Please note that proposed changes to the policies map are set out in a separate schedule, the schedule of proposed map changes.

The table below is an index of all the maps, pictures and diagrams contained within this annex, the main modification references correlate with those in the main modifications schedule.

Schedule of modifications to the illustrative maps, pictures and diagrams in Places for Everyone

Main Modification Ref	PfE Ref	PfE Page Number	Modification	Reason
MM2.1	Figure 2.1 - The Places for Everyone boundary within the Greater Manchester context	24	Modification to Picture 2.1 to make it clear that the area of Peak District National Park, lying within Oldham, is excluded from the jurisdiction of the PfE Plan	To clarify that part of Oldham Borough is within the Peak District National Park and that that area is not subject to policies in the Plan but rather subject to the Peak District National Park development plan.
MM3.1	Figure 3.1 Key Diagram	38	Modify to clearly illustrate the strategy and, as necessary, to take account of modifications in the plan	To clarify and ensure effectiveness of the Key Diagram
MM4.5	Figure 4.2 Core Growth Area	50	Modify to clearly illustrate the strategy and, as necessary, to take account of modifications in the plan	To clarify and ensure effectiveness of the diagram
MM4.10	Figure 4.3 City Centre	53	Modify to clearly illustrate the strategy, clarifying that Salford Quays does not form part of the City Centre.	To clarify and ensure effectiveness of the diagram

Main Modification Ref	PfE Ref	PfE Page Number	Modification	Reason
MM4.14	Figure 4.5 Port Salford	57	Modify to clearly illustrate the strategy and, as necessary, to take account of modifications in the plan	To clarify and ensure effectiveness of the diagram
MM4.21	Picture 4.2 North-East Growth Corridor	63	Modify to clearly illustrate the strategy and, as necessary, to take account of modifications in the plan	To clarify and ensure effectiveness of the diagram
MM4.24	Figure 4.6 Wigan-Bolton Growth Corridor	66	Modify to clearly illustrate the strategy and, as necessary, to take account of modifications in the plan	To clarify and ensure effectiveness of the diagram
MM4.28	Figure 4.7 Manchester Airport	72	Modify to clearly illustrate the strategy and, as necessary, to take account of modifications in the plan	To clarify and ensure effectiveness of the diagram
MM4.30	Figure 4.8 New Carrington	74	Change label "Potential Multi Modal Corridor" to "Sustainable Transport Corridor".	To clarify and ensure effectiveness of the diagram
MM5.6	Figure 5.1 Heat and energy network opportunities	44	Modify the title of Figure 5.1 as follows: Figure 5.1 Heat and eEnergy nNetwork opportunities <u>Opportunity Areas</u> . Amend the boundaries of the Heat and Energy Network Opportunity Areas and clarify that all PfE allocations are Heat and Energy Network Opportunity Areas.	To clarify and ensure effectiveness of the diagram
MM6.2	Figure 6.1 Strategic Locations	111	Modify to clearly illustrate the strategy and, as necessary, to take account of modifications in the plan	To clarify and ensure effectiveness of the diagram
MM6.8	Figure 6.2 Existing supply of office sites identified	115	Modify title of Figure 6.2 as follows: "Figure 6.2 Existing supply of office sites identified in strategic employment land	Required as a result of the change to the plan period and the updated 2022 land supply

Main Modification Ref	PfE Ref	PfE Page Number	Modification	Reason
	in strategic employment land availability assessments 2020-2037		availability assessments 2021-2037 <u>2022-2039</u> Figure 6.2 to be updated with 2022 data	
MM6.12	Figure 6.3 Existing supply of industry and warehousing sites identified in strategic employment land availability assessments 2020-2037	119	Modify title of Figure 6.3 as follows: “Figure 6.3 Existing supply of industry and warehousing sites identified in strategic employment land availability assessments 2020-2037 <u>2022-2039</u> ” Figure 6.3 to be updated with 2022 data.	Required as a result of the change to the plan period and the updated 2022 land supply
MM7.1	Figure 7.1 Existing supply of sites identified in strategic housing land availability assessments 2020-2037	128	Modify title of Figure 7.1 as follows: “Figure 7.1 Existing supply of sites identified in strategic housing land availability assessments 2020-2037 <u>2022-2039</u> ” Update Figure 7.1 to reflect 2022 land supply.	Required as a result of the change to the plan period and the updated 2022 land supply.
MM8.20	Figure 8.6 The Green Belt 2021	168	Modify Figure 8.6 as follows: Figure caption to be: “Figure 8.6 The Green Belt 2021 <u>Places for Everyone Green Belt</u> ” Amend Green Belt boundaries to reflect modifications elsewhere in the plan.	To clarify, and as a consequential change reflecting main

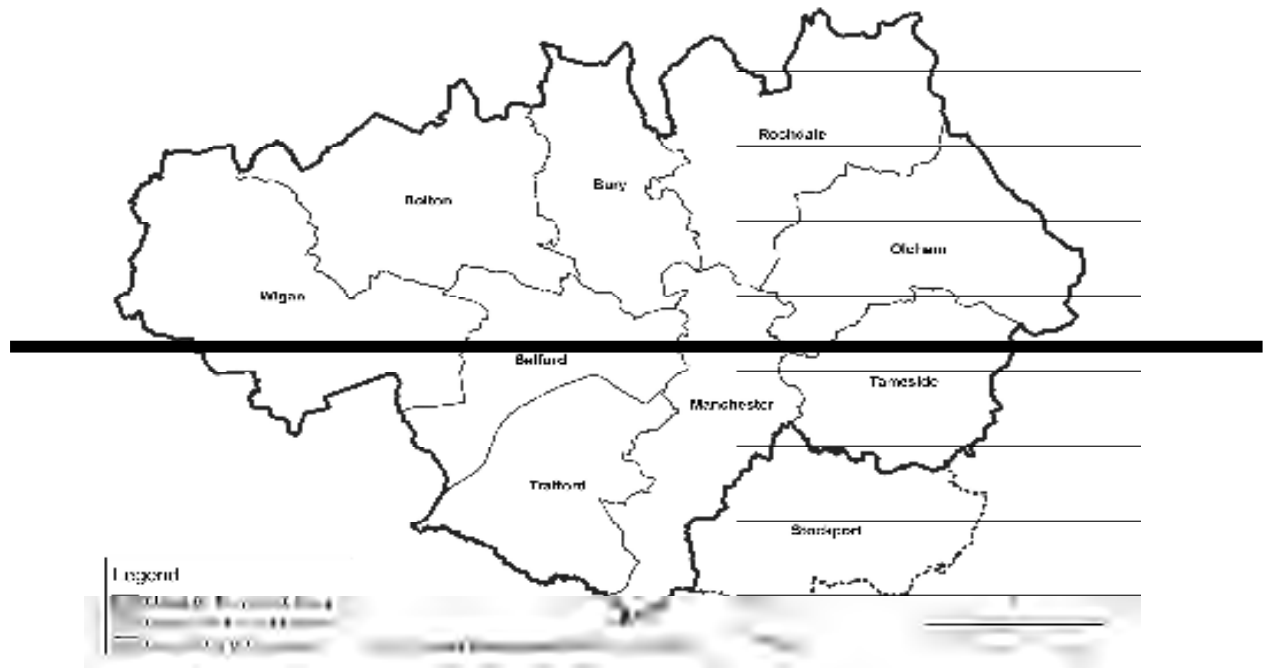

Main Modification Ref	PfE Ref	PfE Page Number	Modification	Reason
MM11.2	Figure 11.1 Existing land identified for office, industrial/warehousing and housing development 2020	218	Amend title of Figure 11.1: Figure 11.1 Existing land identified for office, industrial/warehousing and housing development 2020 <u>2022</u> to and update the data to 2022	Consequential change and to reflect 2022 land supply
MM11.3	Picture 11.2 Places for Everyone Allocations 2021	220	Amend title as follows: Picture 11.2 Places for Everyone Allocations 2024; Modify Picture 11.2 to reflect modifications to site allocation boundaries; remove allocations JPA10 and JPA28 from the map.	To ensure consistency across the plan; To provide clarity and ensure that there is no ambiguity in relation to changes proposed to the site allocation boundaries
MMCB1	Picture 11.3 JPA1 Northern Gateway	223	Modify Picture 11.3 to reflect the change to the site allocation boundary of JPA1.2 Northern Gateway Simister/ Bowlee.	To clarify the Plan and ensure that there is no ambiguity in relation to changes proposed to the Site Allocation boundaries
MMCB4	Picture 11.5 JPA1.2 Simister and Bowlee (Northern Gateway)	231	Amendment to Picture 11.5 site allocation boundary to show a single site boundary	To amend cartographic error.
MMCB9	Picture 11.7 JPA 3 Medipark/Timperley Wedge	242	Modify picture 11.7 to illustrate modified Green Belt boundary at JPA3.2 Timperley Wedge	Consequential change as a result of modifications elsewhere in the plan
MMCB12	Picture 11.9 JPA3.2 Timperley Wedge	244	Modify Picture 11.9 to illustrate modified Green Belt Boundary	Consequential change as a result of modifications elsewhere in the plan

Main Modification Ref	PfE Ref	PfE Page Number	Modification	Reason
MMCB13	JPA3.2	245	Modify Picture 11.10 to reflect the modification to the Green Belt boundary and ensure accuracy and clarity in relation to the development area.	To clarify, ensuring that the policy is effective and provides clear and unambiguous guidance in relation to the Indicative Allocation Plan.
MMBo1	Picture 11.11 Bolton Overview	256	Modify picture to reflect modifications elsewhere in the plan, such as the land supply and the Green Belt boundary	Consequential changes to the overview map resulting from modifications elsewhere in the plan
MMBu1	Picture 11.15 Bury Overview	260	Modify picture to reflect modifications elsewhere in the plan, such as the land supply and the Green Belt boundary	Consequential changes to the overview map resulting from modifications elsewhere in the plan
MMBu2	Picture 11.16 JPA7 Elton Reservoir	261	Modify Picture 11.16 to reflect proposed change to the boundary of the retained Green Belt within the Elton Reservoir site.	To clarify, ensuring that the whole of Elton Goyt SBI is within the Green Belt.
MMM1	Picture 11.19 Manchester Overview	273	Modify picture to reflect modifications elsewhere in the plan, such as the land supply and the Green Belt boundary	Consequential changes to the overview map resulting from modifications elsewhere in the plan
MMO1	Picture 11.21 Oldham Overview	276	Modify picture to reflect modifications elsewhere in the plan, such as the land supply and the Green Belt boundary	Consequential changes to the overview map resulting from modifications elsewhere in the plan
MMO6	Picture 11.24 JPA14 Broadbent Moss	285	Modify 'Picture 11.24 JPA14 Broadbent Moss' to show amended allocation and Green Belt boundaries	To ensure the allocation is unambiguous and deliverable
MMO15	Picture 11.28 JPA18 South of Rosary Road	302	Modify "Picture 11.28 JPA18 South of Rosary Road" to show amended Green Belt boundary	showing amended Green Belt boundary.

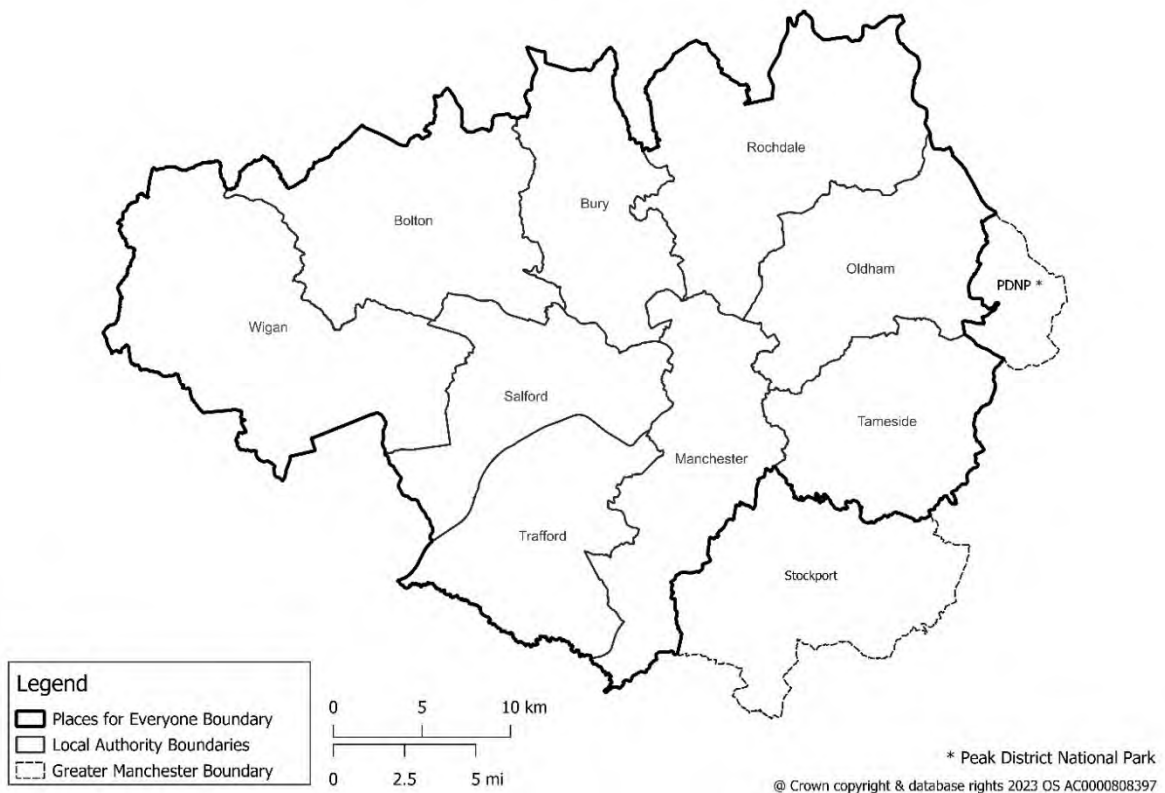

Main Modification Ref	PfE Ref	PfE Page Number	Modification	Reason
MMR1	Picture 11.29 Rochdale Overview	306	Modify picture to reflect modifications elsewhere in the plan, such as the land supply and the Green Belt boundary	Consequential changes to the overview map resulting from modifications elsewhere in the plan
MMS1	Picture 11.37 Salford Overview	325	Modify picture to reflect modifications elsewhere in the plan, such as the land supply and the Green Belt boundary	Consequential changes to the overview map resulting from modifications elsewhere in the plan
MMS2	Picture 11.38 JPA26 Hazlehurst Farm	326	Modify Picture 11.38 to show the amended allocation boundary	To reflect the main modification to amend the site allocation boundary.
MMTa1	Picture 11.15 Tameside Overview	339	Modify picture to reflect modifications elsewhere in the plan, such as the land supply and the Green Belt boundary	Consequential changes to the overview map resulting from modifications elsewhere in the plan
MMTa6	Picture 11.45 JPA32 South of Hyde	349	Modify Picture 11.45 to show amended allocation and Green Belt boundaries.	To reflect the amended Green Belt and allocation boundaries following the exclusion of all of Pole Bank North SBI from within the allocation.
MMTr1	Picture 11.46 Trafford Overview	355	Modify picture to reflect modifications elsewhere in the plan, such as the land supply and the Green Belt boundary	Consequential changes to the overview map resulting from modifications elsewhere in the plan
MMTr1	JPA33 New Carrington	357	Modify picture 11.48 to clarify that picture 11.48 is indicative only. Also modify picture 11.48 to label the area identified	To clarify, ensuring that the policy is effective and provides clear and

Main Modification Ref	PfE Ref	PfE Page Number	Modification	Reason
			as 'Local Plan' as 'Mixed Residential and Employment Use' and to add the 'Character Areas' to the plan.	unambiguous guidance in relation to the Indicative Allocation Plan.
MMW1	Picture 11.49 Wigan Overview	369	Modify picture to reflect modifications elsewhere in the plan, such as the land supply and the Green Belt boundary	Consequential changes to the overview map resulting from modifications elsewhere in the plan
MMApxB.2	Picture B.2	410	Modify Picture B.2 to reflect the consequential changes that are required resulting from proposed modifications to the Green Belt Additions	To clarify the Plan and ensure that there is no ambiguity in relation to changes proposed to the Green Belt Additions
MMApxB.5	Picture B.4	415	Modify Picture B.4 GBA2 to revise boundary.	To clarify, reflecting the changed situation and ensuring that the Plan is up to date.
MMApxC.1	Appendix C Policies Map	466	Modify Picture C2 to reflect, as necessary, changes to the policies map consequential to main modifications elsewhere in the Plan.	To ensure that the policies map reflects the written statement of the plan.

Proposed Amendments to the PfE Policies Map compared to the submitted PfE policies map SD2

The role of the policies map is to illustrate geographically the application of policies in the plan. This document illustrates the proposed changes to what is shown on the submission policies map ([SD2](#)), consequential upon the Main Modifications. It has been published for consultation alongside the Main Modifications Schedule.

The table below describes each policies map change and each entry in the table has a corresponding map, detailing the changes proposed to the policies map. The maps illustrate the changes from the submission policies map, therefore they do not illustrate changes from the original Green Belt designation, unless a further change is proposed to the Green Belt boundary as a result of a main modification.

Table of proposed changes to the policies map

Policy Map Change Ref	Policy Map Change	Reason
PMC1	Amend the Policies Map to make it clear that the area of Peak District National Park, lying within Oldham, is excluded from the jurisdiction of the PfE Plan.	To clarify that part of Oldham Borough is within the Peak District National Park and that that area is not subject to policies in the Plan but rather subject to the Peak District National Park development plan.
PMC2	JPA1.2 Simister and Bowlee Amend the policies map to show a single allocation boundary for JPA1.2 Northern Gateway Simister and Bowlee	To provide clarity and ensure effectiveness of the policies map
PMC3	JPA3.2 Timperley Wedge Amend the proposed Green Belt boundary on the policies map, reflecting changes made to JPA3.2 to retain an SBI in the Green Belt	To provide clarity and ensure effectiveness of the policies map
PMC4	JPA7 Elton Reservoir Amend the policies map to reflect the proposed change to the boundary of the retained Green Belt within JPA7	To clarify, ensuring that the whole of Elton Goyt SBI is within the Green Belt and ensure effectiveness of the policies map
PMC5	JPA10 Global Logistics Delete JPA10 from the policies map	To reflect the removal of allocation JPA10 and to ensure effectiveness of the policies map
PMC6	JPA14 Broadbent Moss Amend the policies map to reflect proposed change to the boundary of the Green Belt and to show a single allocation boundary for JPA14 Broadbent Moss	To ensure effectiveness of the policies map
PMC7	JPA18 South of Rosary Road Amend the policies map to reflect proposed change to the boundary of the Green Belt	To ensure effectiveness of the policies map

PLACES FOR EVERYONE PLAN COMPOSITE VERSION

Modifications Version 2023

Blank Page

Composite Plan Explanatory Text

This Composite version incorporates the Main Modifications to the Places for Everyone Plan, which can be found in the Main Modifications Schedule.

The Main Modifications are clearly set out with deletions being shown as strikethrough and new text being shown as underlined.

In order to assist the reader, this composite plan also includes additional modifications. Additional modifications (sometimes also referred to as “minor modifications”) are changes which do not materially affect the policies in the Plan and therefore they do not fall within the scope of the examination. However, it is considered that including them at this stage will assist the readability of the plan as some are consequential changes, following some of the Main Modifications.

For ease, the Main Modifications are shown as green text whereas the Additional Modifications are shown in amber. To aid the reader, Main Modification reference(s) (MMxx) and Additional Modification reference(s) (AMxx) have been included at the relevant sections within the document, for example at the start of an amended policy or the start of an amended section of reasoned justification text.

Please note that not all map changes under MM2.1 are illustrated as changes in this document. Only those where there have been substantive changes, for example a change to an allocation boundary or where the data has been significantly updated (such as land supply maps).

Additionally, where criteria and/or paragraphs have been added or removed the numbering has not been amended. Additionally, the nomenclature and/or the numbering of maps/figures/pictures will be subject to change.

This version supersedes all earlier versions of the composite plan published on the examination website.

Introduction

Background

(AM1.1)

- 1.1** In January 2019 Greater Manchester set out bold plans to give people, communities and businesses hope and confidence for the future. They described how a pioneering Greater Manchester was ‘open for business’ globally, how we would thrive and prosper into the future, how we would support everyone to reach their full potential, and how we would ensure that nobody was left behind - the Future of GM.
- 1.2** Collectively our plans are focused on delivering the ambitions in the Greater Manchester Strategy: a good start in life for everyone; good opportunities for our young people to equip them for life; good work and the best jobs in a valuable, productive, zero carbon economy; safe, secure housing in inclusive and diverse communities; a good cultural and leisure offer for everyone; a green city-region; good health and support for people to live fulfilling lives, with quality care for those who need it; to be a good place to grow older and to be a place where everyone is connected – socially, digitally and by a clean, integrated and accessible transport system.
- 1.3** Those plans have been put into action, delivering:
- Significant falls in homelessness
 - An increase in new homes;
 - An economic plan for the city region, agreed with Government in a Local Industrial Strategy, delivering growth in GM’s world-leading sectors, and tackling low pay and insecure work through our Good Employment Charter;
 - The delivery of a new Metrolink line, and Opportunity Pass giving young people free bus travel;
 - Help for many people to get back into employment through our Working Well programmes of support;
 - Improvements to connectivity including through promotion of active travel and the extension of full fibre;

- Programmes to support increased levels of school readiness.
- 1.4** Since we set out that vision and plans for the Future of GM, Covid-19 has had an unprecedented health and economic impact on the city region as a whole. It has affected every person and every business in every part of our boroughs; however the impact has been unequal and unfair, starkly highlighting and deepening the inequalities we know have existed for many years and which we were beginning to change. There is now a substantive body of evidence proving that more deprived areas and our ethnic minority communities are experiencing higher mortality rates from Covid than other areas and communities.
- 1.5** The health impacts are ongoing, however the impacts on the economy are only just beginning to be understood. Many more people in our boroughs are now experiencing unemployment, businesses have closed or reduced staff numbers, with far more redundancies and business closures anticipated.
- 1.6** Covid 19 has had a major impact on the way people live and work over the shorter term with a high degree of uncertainty over its impact in the long term. In response the Government has been very clear that we need to positively plan for recovery. The Government first made commitments to supporting economic recovery in mid-2020, for example with the Prime Minister's Build, Build, Build announcement at the end of June 2020 setting a context for England as we recover from Covid-19.
- 1.7** Additionally, the Chancellor's Statement at the beginning of July sought to kick-start the UK's economic recovery. A three point Plan for Jobs was unveiled to support, protect and create jobs, with total fiscal support amounting to £30 billion. Since then the Government has made a number of further announcements, committing to supporting the recovery of the economy post-pandemic, including within the Covid-19 Response - Spring 2021 and the March 2021 Budget.
- 1.8** Whilst the arrival of Covid 19 was not anticipated and its impact is very significant, our approach needs to be flexible to address unpredictable challenges that will arise over the course of any long-term strategy. The

Greater Manchester Independent Prosperity Review: One Year On report acknowledges that there is a high degree of uncertainty about the speed and pace of the economic recovery from Covid 19, let alone what the final impact will be, however the chair of the panel, Professor Diane Coyle concludes: “All of us agree with Professor Ed Glaeser’s crucial observation that now is not the time to lose confidence in the driving role that major city-regions have always played in improving collective prosperity and in leading national recovery from major traumas.”

- 1.9** The emergence of a global pandemic in March 2020 rightly resulted in the Greater Manchester authorities pausing the production of the then joint development plan, the GMSF 2020, to understand what, if any, actions should be taken in relation to the level of development being proposed. An initial assessment of the potential impacts of Covid-19 on the economy, including the housing market, was carried out prior to the draft GMSF 2020 being considered by the Greater Manchester authorities. At that time it was considered there was insufficient evidence (either at a national or local level) to change the assumptions behind our growth targets. An update to that initial assessment has since been carried out to inform the production of this Plan and although slightly over a year has passed since the pandemic emerged, the update concluded that there remains insufficient evidence to amend the assumptions behind the growth targets underpinning the Places for Everyone Plan.
- 1.10** Whilst it is recognised that the country is still in a state of flux, it is very clear that to delay the production of a strategic plan of this nature further could have a negative effect on the proper planning of the nine boroughs and therefore their recovery. Instead it is considered appropriate to proceed as a plan of the nine boroughs, excluding Stockport, but to use the process of plan review to monitor the situation and if necessary, to undertake a formal review outside of statutory review timetable.
- 1.11** It is vital that we have bold plans, shaping a better future for our communities – building back better - rather than a future being shaped by others, building back the same. Covid has exposed economic and societal issues to address,

Places for Everyone Composite Plan – Modifications Version 2023

and the need for a new approach with people at its heart, which embraces diversity, tackles inequalities, builds resilience and rebuilds productivity.

A renewed vision

- 1.12** In these extremely challenging times, the need for bold ambitious plans for good quality employment are critical. We are striving to define our new 'normal' however we know that we need to continue to invest in our city and town centres to drive our recovery. We need to continue to develop our Research and Development capabilities underpinned by our excellent academic institutions as well as investing in strengthening existing, and creating new, employment locations so that we are all able to contribute to, and benefit from, growth as part of a thriving Northern Powerhouse.
- 1.13** (AM1.2) Jobs are not enough however if our residents lack the skills to take advantage of the opportunities. It is essential we create the conditions for everyone to reach their full potential. We need to both develop a skills offering that meets the needs of employers to support growing innovative businesses as well as support companies and individuals who need to work differently/in different sectors as a result of Covid. Of course, we need to underpin all of this ~~this~~ with quality education, work and skills provision across the Plan area: using science and digital to engage people at a young age; developing a clear ~~lightline~~ of sight to opportunities; guaranteeing opportunities for all young People; and support those furthest from the labour market back into work.
- 1.14** (AM1.3) Our vision is to have capitalised on the opportunities highlighted by the recent pandemic, for example the increase in cycling and walking and the acceleration in flexible working and harnessed this to cement real benefits for our towns and cities. This offers a real opportunity to support the transition of our centres as they experience the continued (and possibly accelerated) decline in their traditional retail role. Our boroughs need to be places where we can meet the housing needs of our residents, where all of our people can access the services, they require through high quality digital communications. And one of the biggest lessons of the pandemic is the importance of good quality greenspace close to where people live. This is particularly important in

our densely populated and deprived neighbourhoods. Urban greenspace is under pressure and needs to be protected and enhanced wherever possible. The proposals for the first city centre park at Mayfield ~~is leading~~ has led the way.

- 1.15** Our ambitions to be carbon neutral by 2038 have never been more necessary – we need to support the creation of resilient, liveable places where walking and cycling are the obvious choice for shorter journeys, where facilities and services are accessible and close at hand and where the past dependency on the car is superseded by a reliable and responsive public transport system.
- 1.16** (AM1.4) The Places for Everyone: ~~Publication~~ Plan is our spatial plan to underpin our recovery.

Places for Everyone: ~~Publication~~ Plan (AM1.5)

- 1.17** Up until December 2020 a joint development plan document of the ten Greater Manchester local authorities was being prepared, Greater Manchester’s Plan for Jobs, Homes & the Environment (known as the “GMSF”). However, the decision at Stockport Council’s meeting on 3 December to not submit the GMSF 2020 to the Secretary of State for independent examination following the consultation period, and the subsequent resolution at its Cabinet meeting on 4 December not to publish the GMSF 2020 for consultation, in effect signalled the end of the GMSF as a joint plan of the ten.
- 1.18** S.28(6)-(9) of the Planning and Compulsory Purchase Act 2004 and regulation 32 of the Town and Country Planning Local Plan Regulations apply where one authority withdraws from an agreement to prepare a joint DPD. Together they enable a joint plan to continue to progress in the event of one of the authorities withdrawing, provided that the plan has “substantially the same effect” on the remaining authorities as the original joint plan.
- 1.19** Consequently, at its meeting on the 11th December 2020, members of the AGMA Executive Committee asked officers to report back on the implications and process of producing a joint DPD of the nine remaining Greater

Manchester (GM) districts (Bolton, Bury, Manchester, Oldham, Rochdale, Salford, Tameside, Trafford and Wigan). After that meeting, in February and March 2021, each of the nine districts agreed to establish a Joint Committee responsible for the preparation of a joint Development Plan Document.

1.20 (MM1.1) Producing such a plan would enable the nine districts to continue to:

- progress the strategic policies in GMSF 2020, for example net zero carbon development, affordable housing, and space accessibility and 'accessible and adaptable' standards as set out in Part M4 (2) of the Building Regulations for new housing
- maximise the use of sustainable urban/brownfield land and limit the need for Green Belt to accommodate the development needs of the nine
- align with wider Greater Manchester strategies for transport and other infrastructure investment utilise the evidence base already commissioned and completed, minimising the cost of producing further evidence
- spread the cost jointly of the independent examination

1.21 (AM1.6) The text of the GMSF2020 ~~was~~ ~~has been~~ revised following the withdrawal of Stockport. The revisions to the PfE2021 (as compared to GMSF 2020) fall into 5 broad categories:

- i. As a direct result of the withdrawal of Stockport Council from GMSF
- ii. As a direct result of changes to government policy since October 2020
- iii. As a direct result of new evidence/information being made available since October 2020
- iv. Clarification of policy wording
- v. Minor typographical changes

1.22 The impact of the five different categories of changes above, together with that of their cumulative impact was considered and it was determined that the PfE 2021 would result in a plan which has a substantially the same effect on the participating nine districts as GMSF 2020. In this context, it is important to note that, “substantially the same effect” does not mean “the same effect”. It

allows for flexibility to address the fact that the plan now covers a different geographical area, with consequently different levels of needs and resulting changes to allocations.

- 1.23** The changes made between GMSF 2020 and PfE 2021 are not insignificant in numerical terms, indeed all sections of the plan have seen some form of change. However, in determining the cumulative impact of these multiple changes, it is important to consider what impact they have had on the overall Vision, Objectives and Spatial Strategy of PfE 2021 compared to GMSF 2020, particularly for the decision maker in implementation terms.
- 1.24** The conclusion of the above assessment was that the resultant impact of the changes on the overall strategy of the joint plan and its effect on the remaining nine districts is limited. On this basis, it has been concluded that the PfE2021 has substantially the same effect on the nine boroughs as the GMSF 2020.
- 1.25** The Places for Everyone Plan (PfE 2021) provides an important opportunity to create the conditions for inclusive economic growth, provide opportunities for provision of much needed homes and protect and enhance the natural environment. The Plan is not being prepared in isolation. It is supported by the Transport 2040 Delivery Plan, which will outline the interventions required to achieve the transport vision for the city region and is one of a suite of strategic documents setting out how Greater Manchester can achieve the ambition set out in the Greater Manchester Strategy. It sits alongside the Local Industrial Strategy, Housing Strategy, 5 Year Environment Plan, Digital and Cultural Strategies.
- 1.26** (MM1.2); This is our plan for sustainable growth in the nine boroughs, it:
- sets out how they should develop ~~up to the year 2037~~ for the years 2022 - 2039;
 - provides the strategic framework for local plans;
 - sets specific requirements to be taken forward in local plans ~~identifies the amount of new development that will come forward~~ in terms of housing,

offices, and industry and warehousing, and the main areas in which this will be focused;

- [sets out policies to inform the preparation and determination of planning applications;](#)
- identifies the important environmental assets which will be protected and enhanced;
- allocates sites for employment and housing outside of the urban area;
- supports the delivery of key infrastructure, such as transport and utilities;
- defines a new Green Belt boundary for the nine boroughs.

1.27 (MM1.4) The Places for Everyone Plan reinforces our ambition to bring forward brownfield land, it reduces the net loss of Green Belt further from previous versions of the GMSF by reducing the number of sites being allocated, [identifying a Broad Location](#) and provides stronger protection for our important environmental assets. It enables us to meet our Local Housing Need, supports increased provision of affordable housing, promotes our new approach to town centres, supports wider strategies around clean air, walking and cycling and underpins the ambition to be a carbon neutral city-region by 2038.

Spatial Strategy

1.28 The Places for Everyone spatial strategy seeks to deliver sustainable, inclusive growth. It has 4 key spatial elements:

- Significant growth in jobs and housing at the core – continuing development in that part of the ‘core growth area’ encompassing the city centre and beyond to the Etihad in the east, through to the Quays, Trafford Park and Port Salford in the west. The majority of commercial employment growth is proposed in this area;
- Inner Area Regeneration of those parts of Manchester, Salford and Trafford surrounding the Core Growth Area. Together with the Core Growth Area, around 50% of overall housing supply is found here;
- Boosting the competitiveness of the northern districts – addressing the disparities by the provision of significant new employment opportunities

and supporting infrastructure and a commitment that collectively the northern districts meet their own local housing need;

- Sustaining the competitiveness of the southern districts – supporting key economic drivers, for example around Wythenshawe hospital and the Airport and realising the opportunities offered by national infrastructure investment, e.g. HS2, whilst recognising the important green infrastructure assets in the area.

Good jobs

- 1.29** (AM1.7) In extremely challenging times, the need for bold ambitious plans for good quality employment ~~are~~ is critical. We are striving to define our new ‘normal’ however we know that we need to continue to invest in our city and town centres to drive our recovery. We need to continue to develop our Research and Development capabilities underpinned by our excellent academic institutions as well as investing in strengthening existing, and creating new, employment locations so that we are all able to contribute to, and benefit from, growth as part of a thriving Northern Powerhouse.
- 1.30** (AM1.8) Opportunities for ‘re-shoring’, that is bringing manufacturing activity back to the UK, and the increasing demand for logistics and warehousing, could lead to opportunities to provide good employment opportunities across the Plan area. Meeting market demand for sites and infrastructure is essential ~~however~~ as all places in the UK will be seeking to capture growth to offset the impact of the economic downturn and the loss of jobs in our current growth sectors.
- 1.31** Greater Manchester has developed a Local Industrial Strategy, agreed with Government which sets out how the city region will build on its unique strengths and opportunities and capitalise on the creativity of its people to create a digital-enabled, green city region. This plan seeks to support Greater Manchester’s economic ambitions by providing land to meet the widest range of employment opportunities helping to ensure that Greater Manchester remains as competitive as possible in uncertain times.

- 1.32** The majority of new jobs will be in the City Centre and wider Core Growth Area stretching from Port Salford in the west to the Etihad campus in the east as well as around Manchester Airport. This area encompasses established employment areas such as Trafford Park, locations such as MediaCity which has seen strong growth over more recent times and our Universities which are driving growth in world leading research and development.
- 1.33** Our ambition is to deliver more inclusive growth to benefit all our boroughs. We are currently not fully realising the possibilities of our key assets, for example the outstanding research base has much greater potential to support business activity and growth across the conurbation. Further improvements in transport connections and skills development are required to ensure that everyone can contribute to and share in the benefits of economic activity, helping to deliver genuinely inclusive growth.
- 1.34** (MM1.5) Through this plan we are looking to create more favourable conditions for growth by providing sites for advanced manufacturing, digital and tech jobs in areas where the urban land supply cannot support the scale or quality of development required. ~~In response to comments received both in 2016 and further in 2019, the amount of employment land identified in the PFE Plan area, up to 2037, has been significantly reduced since the 2016 GMSF (by approx. 40%) to keep the release of Green Belt to a minimum and in order that the level of employment growth broadly correlates with our new housing requirement for Greater Manchester.~~ Several of the sites are large in scale and will be partially delivered beyond ~~2037~~ 2039. ~~We have also identified a potential growth area in north east Oldham as a Broad Location rather than an allocation to provide flexibility for the future.~~

Good homes

- 1.35** The Greater Manchester Housing Strategy sets out our vision for new homes and seeks to ensure that we consistently deliver the right homes in the right places, providing the number and mix of new homes for our future needs.
- 1.36** (MM1.6) A key objective of the Places for Everyone Plan is to meet our Local Housing Need – using the Government’s standard methodology this equates

to ~~almost 165,000~~ just over 175,000 homes over the plan period (~~2021-2037~~ 2022 -2039). Government has been very clear that deviation from the standard methodology can only be justified in ‘exceptional circumstances’. No exceptional circumstances have been identified to justify deviation from the standard methodology in this Plan.

- 1.37** By working together we have been able to direct development to the most sustainable areas – primarily the city and town centres – and enable most efficient use of our brownfield land supply.
- 1.38** The plan sets out an ambition for the boroughs to enable delivery of their share of Greater Manchester's 50,000 additional affordable homes over the plan period as well as a requirement for all homes to meet the nationally described space standards and the ‘accessible and adaptable’ standard as set out in Part M of the Building regulations.

Good places

- 1.39** (AM1.9) This Plan sets out our aspirations for our neighbourhoods –inclusive, well designed, resilient, safe and well served by local services. Connection to high quality and well managed green infrastructure is key – we are seeking to protect our most valuable green spaces and improve them by delivering a net gain in biodiversity assets. We ~~are piloting~~ piloted the development of a Local Nature Recovery Network Strategy with Natural England.
- 1.40** As part of this work we have identified our most important ‘Green Infrastructure’ – for example our parks, open spaces, trees, woodlands, rivers and canals which provide multiple benefits and make a huge contribution to quality of life, promote good mental and physical health and supports economic growth. Our strategic Green Infrastructure network is extensive. Around 60% is within the Green Belt and therefore is afforded significant policy protection. The remaining 40% does not meet the tests of Green Belt but it is very important for the continued wellbeing of our boroughs.

Brownfield preference

- 1.41** ~~(AM1.10) As part of this consultation we are being as transparent as possible about the land we have identified within the urban area. The land supply position for the nine districts is published alongside this consultation.~~ Districts have looked to maximise the contribution of brownfield land by applying higher densities in the most accessible locations, reviewing the employment land supply and seeking to identify more opportunities in our town centres. By working together the nine districts have been able to maximise the supply of the brownfield land at the core of the conurbation and limit the need extent of Green Belt release.
- 1.42** (MM1.7) The majority of development between ~~2024~~ 2022 and ~~2037~~ 2039 (the "plan period") will be on land within the urban area, most of which is brownfield land. Within the plan period around 90% of housing, ~~99%~~ 98% of offices and ~~47%~~ 51% of industrial and warehousing development is within the urban area.
- 1.43** (AM1.11) National planning policy does not support an explicit 'brownfield first' approach, as Local Authorities are required to be able to provide a 5 year supply of housing sites which are available and deliverable. If we cannot demonstrate that our brownfield land is available, ~~and~~ then we are required to identify other land which ~~is—this~~ may be Protected Open Land or Green Belt.
- 1.44** We are however adopting a 'brownfield preference' policy – we will do all that we can to make sure that our brownfield sites come forward in the early part of the plan period however to do this we need to continue to press Government for support to remediate contaminated land, to provide funding for infrastructure and to support alternative models of housing delivery.
- 1.45** (AM1.12) Our Strategic Viability Study identifies challenges with a significant proportion of our land supply and this is acknowledged within the plan by the provision of a land supply 'buffer'. The ~~recently announced~~ Brownfield Land Fund is targeted at Combined Authorities and begins to help to address viability issues across the conurbation, but it is not enough. We ~~continue are bidding for more funding but and further discussions to work~~ with Government

~~are critical~~ to enable the full potential of our brownfield land supply to be realised.

- 1.46** The plan supports the continuing renewal of our town centres, with an increase in the supply of land identified for housing. Our strategic approach to town centres is complemented by initiatives co-ordinated by the GMCA. Government has also recognised the need to strengthen the role of town centres and several of our towns have been successful in accessing funding through the Future High Street Fund and Towns Fund.

Green Belt

- 1.47** Given the lack of sufficient land to ensure that our overall housing and employment needs can be met, it is considered that there is a strategic exceptional circumstances case to be made to release Green Belt for development. However, this release has been kept to the minimum and has been done in locations which will help to meet our overall vision and objectives. The strategic case and the detailed case for each strategic allocation is set out in the 'The Green Belt Topic Paper'.
- 1.48** The release of Green Belt has not been proposed lightly and evidence has been prepared to demonstrate how the harm that this could cause to the remaining Green Belt land can be mitigated, including identifying opportunities to improve and enhance green infrastructure within the remaining Green Belt land. We are also proposing to add new Green Belt where we have identified land that meets the purposes of Green Belt. These proposals have been incorporated into the Places for Everyone Plan as part of the overall proposals.

Net loss

- 1.49** ~~(MM1.8) The net loss of Green Belt has been reduced by nearly 60% since 2016 through:~~
- ~~• reducing the number of proposed sites~~
 - ~~• reducing the loss of Green Belt within sites~~
 - ~~• proposing 'new' Green Belt additions~~

- 1.50** (MM1.8) The net amount of Green Belt land proposed for release is ~~1,754~~ 2,213 hectares – in relation to the nine districts preparing this Plan, this means a ~~3.3%~~ 4.1% reduction in the size of the Green Belt ~~compared to an 8.1% reduction in 2016.~~
- 1.51** (MM1.8) The nine boroughs cover some 115,084 hectares (including land covered by the Peak District National Park), almost half (46.7%) ~~is~~ was ~~previously~~ designated as Green Belt. The ~~proposals in the~~ Places for Everyone: ~~Publication~~ Plan ~~2021~~ would result in Green Belt covering just ~~over~~ under 45% of the nine districts.

Becoming Carbon Neutral by 2038

- 1.52** (MM1.9) This Plan sets out proposals to support the Greater Manchester ambition to be a carbon neutral city-region by 2038. A key element of this is to ~~require all~~ set out a pathway for new development to be net zero carbon by 2028 at the latest – we do not want to build homes and workplaces which require retrofitting in the future and we have set an ambitious target, backed up by our evidence to achieve this as soon possible. ~~Our commitment to keep fossil fuels in the ground remains, at this time therefore we will not support fracking.~~

Infrastructure required to support scale and pattern of growth

- 1.53** (AM1.13) Many of the responses raised the issue of the impact of new development on existing infrastructure. As the majority of new development will be in the urban area, the capacity of the existing infrastructure is particularly important. ~~We~~ Greater Manchester have looked at the major challenges that we consider our existing infrastructure networks will have to respond to and have produced an Infrastructure Framework setting this out.
- 1.54** Since the 2019 GMSF consultation we have undertaken significant work on our transport evidence base, both in relation to the urban area and the strategic allocations. A refreshed Greater Manchester Transport Strategy 2040, Our Five Year Transport Delivery Plan (2020-2025) and Local Implementation Plans are published alongside this Plan. Our Transport Delivery Plan sets out all the transport projects we hope to achieve in the next

five years to ensure that the planned new housing and employment can be sustainably integrated into Greater Manchester's existing transport infrastructure as far as possible. We have an unparalleled track record in delivery of transport projects, and a large number of projects are identified for delivery in the next five years, including Metrolink capacity improvements through the introduction of 27 new trams; better rail infrastructure including on the Castlefield corridor, Transpennine Route Upgrade to Leeds and 'Access for All' station improvements; bus network and town centre improvements; new walking and cycling infrastructure across all ten districts; expanding the city-region's electric vehicle charging network; and development of the Clean Air Plan.

- 1.55** Our Transport Delivery Plan also sets out how we plan to deliver our longer-term aspirations for an integrated transport network that supports future growth. It includes, amongst other things, plans for improved orbital public transport links, capacity enhancements to the rail and metrolink networks, clean air measures, transformative investment in walking and cycling, and reform of the bus market and rail franchising. All of these will contribute to our carbon reduction goals and delivery of our transport vision.
- 1.56** The detailed policies for site allocations and the thematic policies for new development, together, set out the necessary infrastructure requirements and sites will not come forward unless it can be demonstrated this will be provided. Proposals for new Metrolink stops, improved walking and cycling connections, and new or improved public transport services, all form part of the package for the allocations – which, when combined with the investment proposals flagged in Our Transport Delivery Plan, will enable a significant change in the sustainability of the transport network.

Relationship with District Local Plans

- 1.57** (MM1.10) The Places for Everyone Plan is the strategic spatial plan for our nine boroughs and as such sets out our planning policy framework. All policies within the plan are "strategic policies". It is being prepared as a Joint Development Plan Document of the nine local planning authorities. [Once the](#)

~~Places for Everyone Plan is adopted it will form part of the relevant authority's development plan. As such local plans will need to be consistent with it and neighbourhood plans will need to be in general conformity with the strategic policies. Local plans will be expected to look ahead a minimum period from their adoption, in line with national policy. In the event that a local plan looks beyond 2039, the minimum requirement figures set out in Policies JP-J3, JP-J4 and JP-H1 should be used to inform local plan target(s). It is a strategic plan and does not cover everything that a district local plan would. Districts will continue to produce their own Local Plans, setting out more detailed policies reflecting local circumstances. Appendix A sets out the policies in the relevant GM district local plans which will be replaced by the Places for Everyone Plan.~~

- 1.58** (MM1.11) ~~Once the Places for Everyone Plan is adopted it will form part of the relevant authority's development plan.~~ The evidence that underpins the Places for Everyone Plan will also inform district level plans. but, as a strategic plan, it does not cover everything that a district local plan would. Districts will continue to produce their own Local Plans, setting out more detailed policies including both strategic and non-strategic policies, as appropriate, reflecting local circumstances. Appendix A sets out the policies in the relevant GM district local plans which will be replaced by the Places for Everyone Plan.

New paragraph (MM1.12)

Due to the presence of the Peak District National Park in the eastern part of the borough of Oldham, it should be noted that the Places for Everyone Plan covers the whole of the borough of Oldham **except** that part which falls within the Peak District National Park. Developments within the National Park should refer to Development Plan Documents prepared by the Peak District National Park Authority.

Process for Producing the Places for Everyone Plan

- 1.59** The Places for Everyone Plan began life as a joint Development Plan Document of the ten Greater Manchester districts. Following a recommendation from AGMA Executive Board in November 2014, the 10 Local Planning Authorities in Greater Manchester (Bolton, Bury, Manchester, Oldham, Rochdale, Salford, Stockport, Tameside, Trafford and Wigan) agreed to prepare a joint Development Plan Document to set out the approach to housing and employment land across Greater Manchester for the next 20 years.
- 1.60** Four consultations have taken place in relation to the GMSF. The first, in November 2014 was on the scope of the plan and our initial evidence base, the second in November 2015, was on the vision, strategy and strategic growth options, and the third, on a Draft Plan in October 2016.
- 1.61** The fourth and most recent consultation on The Greater Manchester Plan for Homes, Jobs and the Environment: the Greater Manchester Spatial Framework Revised Draft 2019 (GMSF 2019) took place in 2019. It received over 17,000 responses. The responses received informed the production of GMSF 2020. The withdrawal of Stockport Council in December 2020 prevented GMSF 2020 proceeding to Regulation 19 Publication stage and instead work was undertaken to prepare PfE 2021.
- 1.62** (AM1.14) Where a local planning authority withdraws from a joint plan and that plan continues to have substantially the same effect as the original joint plan on the remaining authorities, s28(7) of the Planning and Compulsory Purchase Act 2004 provides that any step taken in relation to the plan must be treated as a step taken by the remaining authorities for the purposes of the joint plan. On this basis, it ~~is proposed~~ was agreed to proceed directly to Publication stage under Regulation 19 of the Town and Country Planning (Local Planning) England Regulations 2012.
- 1.63 (AM1.15) The consultation under Regulation 19 ran for 8 weeks, starting in August 2021. The draft joint DPD (Places for Everyone) and all representations received during the Regulation 19 consultation were sent to

~~the Secretary of State (the "Submission stage") pursuant to Reg. 22 of the Local Planning Regulations. Following that, three independent inspectors were appointed to examine the plan and the formal hearing sessions of the examination began in November 2022. At this stage, whilst anyone can make a representation on any point, only those pertaining to 'soundness' will be taken into account by the Inspector(s). The term 'sound' is used to describe a Local Plan that has been prepared in accordance with what Government expects of local planning authorities. These expectations are set out in paragraph 35 of the National Planning Policy Framework:~~

~~"Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development". **This means that the nine councils must produce a plan which promotes economic growth and makes provision for the homes, employment and infrastructure which it determines is needed.**~~

- ~~• "Justified – the plan should be an appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence". **This means that the nine councils must have considered other policies and determined its approach based upon the most up to date and robust evidence including population figures, economic forecasts, Strategic Housing Market Assessment, land availability etc.**~~
- ~~• "Effective – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities". **This means that the nine councils must be confident that the policies within the Plan can be achieved within the Plan period (2021 to 2037). The nine councils must also work with neighbouring authorities such as Stockport, Rossendale, Cheshire East, Warrington and Derbyshire.**~~
- ~~• "Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies within the National Planning Policy Framework". **The National Planning Policy**~~

~~Framework sets out the Government's policies for planning in England. Policies within the Places for Everyone Plan must not conflict with these policies.~~

~~Submissions will also be considered by the Inspectors appointed to carry out the independent Examination in Public, concerning legal compliance issues, for example the Integrated Assessment, the Habitats Assessment Regulation and the Duty to Co-operate.~~

~~1.64 At the end of the consultation period, the draft joint DPD and all representations received are then sent to the Secretary of State (the "Submission stage") pursuant to Reg. 22 of the Local Planning Regulations. Submission is likely to happen in summer 2021. The Secretary of State will pass these on to the Planning Inspectorate who will arrange an Examination into the plan.~~

~~How to Get Involved~~

~~1.65 The consultation will run for 8 weeks, beginning in August 2021.~~

~~1.66 The consultation portal gmconsult.org will become live at the beginning of the consultation.~~

~~1.67 All responses will be forwarded electronically for consideration at the Examination in Public (EiP). The easiest way to respond is online. This is easy to do via our online portal. You can access the online consultation at gmconsult.org once the consultation has formally begun. This will help all of us to stay safer both in terms of responding but also when staff are handling the responses. However, we know that some people will not be able to respond via the portal. Therefore, details of how to respond by email or post will be made available. Please note that personal details of those making representations, including name and contact information must be published and shared with the Programme Officer and Planning Inspectorate for those that wish their representations to be considered through the Examination in Public process. A full privacy notice is available, explaining how your data will~~

~~be shared. It is strongly advised that this is read before submitting any representation to this Plan.~~

~~**1.68**—If you have any questions about the process, how to access the documents (including alternative formats) or how to respond when the consultation opens, you can email planningandhousing@greatermanchester-ca.gov.uk or leave a message on the following number 0161 778 7006 and someone will get back to you.~~

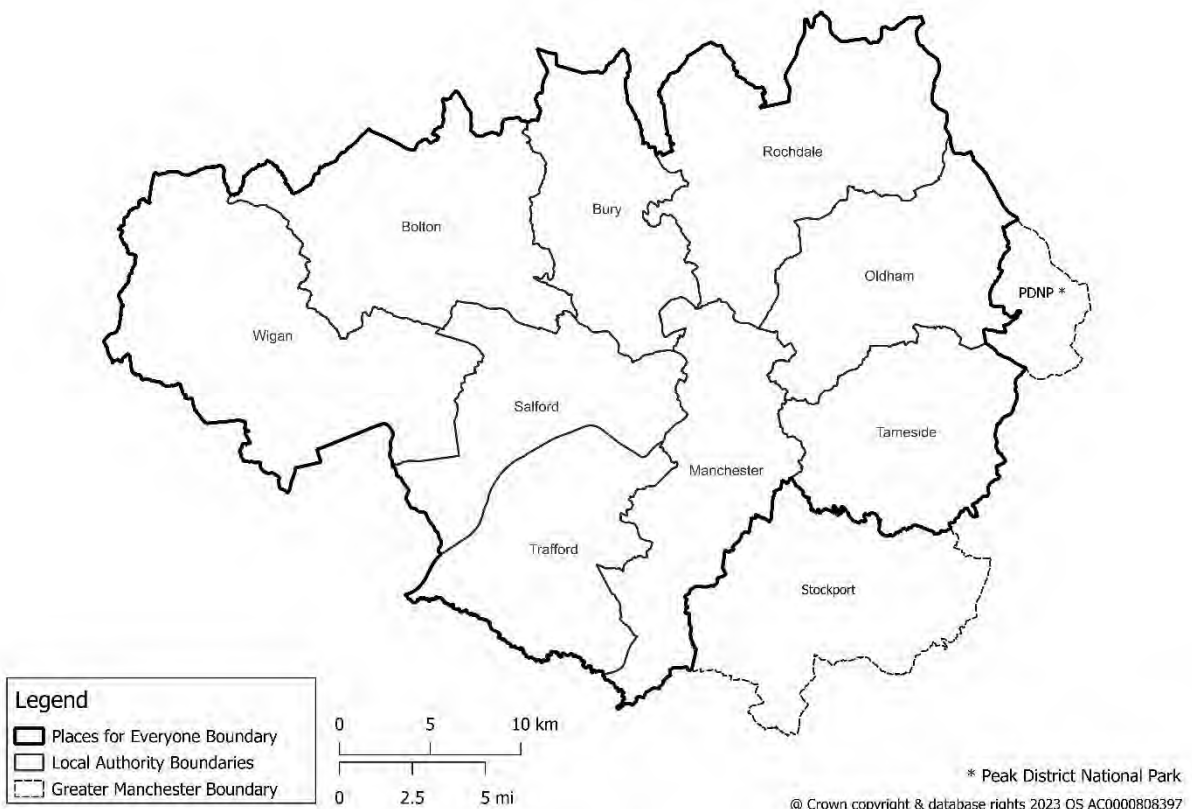

Blank Page

Context

Our Plan Area

- 2.1** As part of Greater Manchester we have a long and proud history. Greater Manchester became the world's first industrial city, when its position as the global hub for textile manufacturing led to rapid urbanisation and numerous technological innovations, including the world's first steam passenger railway. It has also been at the forefront of hugely influential social and political movements, being the birthplace of both the modern cooperative movement and the suffragettes, as well as leading the campaign to repeal the Corn Laws in the nineteenth century which ushered in the start of the modern global economy. England's first civic university, the University of Manchester, was established in the city-region and the area is now home to four universities that play a leading role in social and economic progress.
- 2.2** Today, Greater Manchester is a vibrant, dynamic and diverse city-region, which continues to play an important role in the economic and social fabric of the country and the wider world.
- 2.3** Our Plan area covers nine of the ten Greater Manchester local authority areas: of Bolton, Bury, Manchester, Oldham, Rochdale, Salford, Tameside, Trafford and Wigan. It is located at the heart of the UK, with easy access to all its constituent nations and is only a short distance from other major cities such as Leeds and Liverpool. Manchester Airport is the UK's third largest airport, London is only two hours away by rail, and there are also direct rail connections to other major cities of the North of England. Greater Manchester has good motorway infrastructure providing links across the country.

Figure 2.1 The Places for Everyone boundary within the Greater Manchester context (MM2.1)

- 2.4** (AM2.1) Greater Manchester is home to around 2.8 million people and has seen an increase of almost 200,000 residents in the last decade alone¹. The population of the nine districts in PfE 2021 is approximately 2.5 million, having grown by almost 185,000 in a decade. The population of Greater Manchester is forecast to have grown by around another 1959,000 people by 2039.7 (of which just over 177.9,000 will be within the nine districts making up the PfE Plan area). This growth, in turn, will contribute to a significant increase in households. 66.9% of the population growth is expected to be in those aged 65 and over, and approximately 40% of the growth will be amongst those aged 75 and over. Growth in the working age population (18-64) will be lower (approximately 40.38% of the total growth), but still significant at around 75,000. This concentration of growth is likely to continue in the future, with Manchester, Salford and Rochdale forecast to account for around 47% of Greater Manchester's population growth over the period up to 2039.7 or just over 50% of the population growth in the PfE Plan area
- 2.5** Greater Manchester is one of the most economically diverse conurbations in the UK.² It is the main driver of the Northern economy, generating nearly 40% of total output (GVA) in the North West and almost 20% across the North of England, of which the districts in the PfE Plan area contribute nearly 90%.
- 2.6** (AM2.2) Around 1.5 million jobs are provided within Greater Manchester (with just under 1.4 million within the PfE Plan area), with considerable growth over the last few decades in service sector employment such as professional services and administration. There has been a considerable reduction in manufacturing jobs, but this sector continues to be one of the most productive in Greater Manchester. The baseline economic forecast foresees an increase of around 100,000 jobs by 2039.7 (of which approximately 90% is forecast to be within the PfE Plan area). Similar

¹ ONS 2019-midyear estimates Population estimates - Office for National Statistics (ons.gov.uk)

² ONS (2016) Krugman Specialisation Index

changes in the sectoral mix to the recent past are forecast, although a more ambitious accelerated growth scenario estimates an increase of just over 170,000 jobs across Greater Manchester. Employment opportunities are unevenly dispersed across Greater Manchester, with by far the most significant concentration currently being in the City Centre and adjoining areas such as Salford Quays, which collectively account for around 20% of all jobs. Baseline economic trends³ suggest the majority of the employment growth would be in Salford, Manchester and Trafford. The remaining districts would see only modest change in employment in the period 2020-39⁷, with some districts (Oldham, Rochdale, Tameside and Wigan) seeing small decreases in total employment in this period.

- 2.7** There are two significant challenges which will impact our districts over the coming years: the exit of the UK from the European Union and the Covid-19 pandemic. There are significant uncertainties over future trade and customs arrangements, the level and type of international migration, future exchange rate movements and the impacts that all of this could have for business investment, job creation and labour supply as a result of the UK exit from the European Union.
- 2.8** As set out in the Independent Prosperity Review, 'One Year On' report, the COVID-19 pandemic has significantly added to the uncertainty: "At the time of writing, there remains a high degree of uncertainty about the speed and pace of the economic recovery from COVID-19, let alone what the final impact will be. There have been a succession of assessments of the likely impact of COVID-19 on the UK economy by a range of private forecasting consultancy, research firms and think tanks such as the Institute for Fiscal Studies (IFS) and National Institute of Economic and Social Research (NIESR), and by the Bank of England and by the Office of Budget Responsibility (OBR). All those attempting any assessment of likely economic effects emphasise the extraordinary level of uncertainty at present. The normal forecasting tools and models are not well designed to assess a shock like COVID-19. This stems from the fact that this is a health-driven

³ GMFM 2018

economic shock which is unlike previous economic shocks (such as the 2008 Great Financial Crisis) so we cannot simply apply the lessons from previous recessions. The OBR summarises these uncertainties as being:

- The course of the pandemic and the development of effective vaccines and treatments
- The speed and consistency with which the government can lift public health restrictions (i.e. “lockdown” measures)
- The response of individuals and businesses as it does so (in terms of consumer confidence etc), and
- The effectiveness of the policy measures put in place to protect viable businesses, foster new opportunities and sustain employment.”

2.9 However, Professor Diane Coyle, Chair of the Independent Prosperity Review Panel concludes; “All of us agree with Professor Ed Glaeser’s crucial observation that now is not the time to lose confidence in the driving role that major city-regions have always played in improving collective prosperity and in leading national recovery from major traumas.”

Core Growth Area

2.10 (AM2.3) This covers the City Centre and the Quays and extends eastwards to include Central Park and the Etihad eCampus, and westwards through Trafford Park which is one of Europe’s largest industrial estates. This area provides a huge scale and diversity of economic opportunity, which is accessible from across the Plan area and beyond.

2.11 The Core Growth Area offers the conditions to boost the role of Greater Manchester as a Global City. It is the home of many global businesses and continues to attract high profile companies seeking to invest. Conditions for growth are in place, with high rates of productivity, innovation and global competitiveness. The Core Growth Area offers businesses, residents and visitors access to a highly skilled population, a wide range of premises and accommodation, digital infrastructure, excellent accessibility, a high-quality environment, cultural and retail opportunities.

- 2.12** The growth potential of the Core Growth Area will continue through higher density development, building in opportunity areas, The Oxford Road Corridor, the existing office sectors, HS2 station proposals and improving the connections to other areas of Greater Manchester, which will all assist growth within our boroughs. However, it will be particularly important that it has outstanding local and global connections supporting its wider reach.
- 2.13** The universities and the knowledge economy are other important assets for us, with a high concentration of students, research activity and scientific institutions. This activity is primarily focused within the City Centre, with The Oxford Road Corridor being an internationally important location in this regard. Our strong cultural identity is another distinguishing factor, with a global reputation for sports and the arts. Once again, the greatest concentration is within and around the Core Growth Area, but importantly it is also seen across the rest of our boroughs with a diverse range of identities and activities.

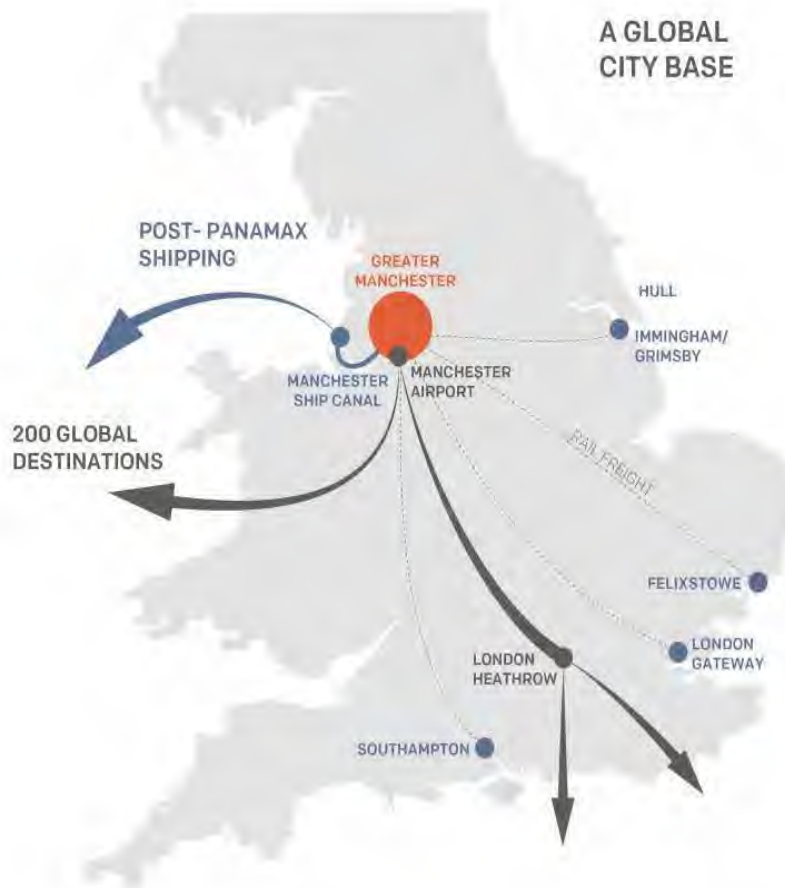

International Connections

- 2.14** (AM2.4) Manchester Airport is the third busiest passenger airport in the UK, and the largest outside London, handling c. 28 million passengers in 2019 and adding £1.4bn GVA to the regional economy and supporting c. 25,000 jobs on-site. It is the only airport in the country other than Heathrow to have two full length runways, but with the key advantage of having significant spare capacity, and the potential to grow to some 55 million passengers a year. Unique among non-London airports, it has the infrastructure, connectivity and scale to sustain a growing network of medium and long-haul routes. This enables northern Britain to benefit from a major international air gateway for both business and leisure traffic, passengers and freight. This is a vitally important role not just for us but also for a much wider area across the North and Midlands, enabling businesses and residents to access opportunities across the globe and providing a key access point for international visitors to the UK. The airport is a key factor in realising the wider growth agenda for the North and unlocking the economic potential of cities and regions within its catchment area with approximately 22 million

people living within two hours of it. More locally, the emerging Airport City development (~~part of the Greater Manchester Enterprise Zone~~) is creating a major new economic asset, attracting global occupiers and investment attracted by the unrivalled connectivity.

- 2.15** Excellent international freight connections will also support our global role, enabling the large-scale import and export of goods and components. The Manchester Ship Canal provides a direct shipping route from Greater Manchester to the Port of Liverpool, where post-Panamax facilities can accommodate the largest container vessels from around the world. Port Salford will provide an integrated tri-modal facility on the ship canal, with excellent rail and road links, enabling the benefits of easy port access. This will be complemented by maintaining and enhancing freight connections to other major ports by rail and motorway, including the Humber ports, Felixstowe, London Gateway and Southampton.
- 2.16** This Plan seeks to enhance and take advantage of these outstanding international connections, supporting our long-term growth and the ability of residents to share in its benefits. We are therefore ideally placed to help drive growth in the North of England and help provide a balance to the strength of London and the South East. However, this will not only require an appropriate scale and distribution of development and infrastructure investment within our boroughs, but also major improvements in transport connections to other parts of the North, including Northern Powerhouse Rail and motorway network enhancements.

Figure 2.2. A Global City

A Top Global City

- 2.17** By the end of the Plan period, Greater Manchester aims to be a top global city.⁴ To do this it will require a range of attributes, including a strong economy, skilled residents, a high quality of place and the environment, and a diverse portfolio of investment and development opportunities. Through this plan we can play a vital role in delivering Greater Manchester's ambition of becoming a top global city.
- 2.18** Having a stronger international outlook will be an essential aspect of this. As part of Greater Manchester we will be a key gateway into and out of the UK, trading across the world. It will be capable of competing internationally for investors, visitors, businesses, skilled workers, academic talent and

⁴ The Greater Manchester Internationalisation Strategy 2017-2020, GMCA, Our People, Our Place: Greater Manchester Strategy (2017)

students. At the same time, ensuring that the resident population can take advantage of the associated opportunities will be a high priority. Supporting growth in high value activity in sectors and on assets that are, or have the potential to be, world-leading and globally distinctive is a key part of Greater Manchester's Local Industrial Strategy.

- 2.19** If Greater Manchester can realise its ambition to be a top global city, then this would put the UK in the enviable position of having two global cities within 200 miles of each other. London is already established as one of the most successful cities in the world, often appearing in the top two in international indices along with New York. Both Greater Manchester and London acting as global cities could be hugely beneficial for the national economy, providing an outstanding scale, diversity and quality of activity. Maximising connections between the two will be vital to realising this potential, offering additional agglomeration economies.
- 2.20** At the same time, it will be important to maintain the distinctiveness and independence of Greater Manchester and avoid it being seen as a satellite of London. Greater Manchester will be a different type of global city to London, smaller and more affordable, retaining its innovative character and with a strong emphasis on inclusion and quality of place. The fact that it can offer a more cost-effective option to London in a high-quality environment, complementing the capital and regional cities, will help it to attract investment that would otherwise not come to the UK.
- 2.21** Greater Manchester has agreed a Local Industrial Strategy with Government. The Local Industrial Strategy has two key objectives:
- **Supporting our globally competitive strengths** - Building on our globally competitive research strengths and emerging industrial opportunities, enabling us to pioneer emerging sectors, create significant global competence and add value to our local economy as new sectors grow and flourish.
 - **Strengthening the foundations of our economy** - Strengthening our people, infrastructure, business environment, innovation ecosystems and

places, enabling all sectors and all places in Greater Manchester to be productive and prosperous.

- 2.22** We need to grasp global opportunities emerging from changes to world markets and develop industries of the future, while also ensuring competitiveness and job quality in our high employment, low productivity sectors.

HS2

- 2.23** Greater Manchester currently benefits from good links to London, with a number of direct rail routes taking around two hours. The proposed HS2 high-speed rail connections will reduce journey times to London to 67 minutes from the City Centre and just over an hour from Manchester Airport. They would also bring the major regional city of Birmingham within 41 minutes by train. These enhanced connections will help to deliver a more integrated national economy, opening up much greater business opportunities to support UK growth. The timely delivery of HS2 will have major benefits for the Country as a whole as well as for Greater Manchester. The benefits of HS2 are multiplied when combined with Northern Powerhouse Rail (NPR) and other committed investments in our rail networks. To capitalise on the opportunity, Greater Manchester is proposing a series of complementary investments to bring maximum benefits from high-speed rail to residents. The Greater Manchester HS2 and Northern Powerhouse Rail Growth Strategy – The Stops Are Just The Start sets out our proposals for local infrastructure investment to support the HS2 and NPR facilities which will embed them within our wider strategic plans, ensuring that people are well connected to the new homes and job opportunities that these investments offer and delivering the right training and skills to empower the next generation to continue to make our city-region successful.

The Northern Powerhouse

- 2.24** The concept of the Northern Powerhouse is central to the overall strategy for delivering more even and inclusive growth across the UK, counterbalancing the dominance of London and the South East. The Government has described the Northern Powerhouse as “a vision for joining up the North’s

great towns, cities and counties, pooling their strengths, and tackling major barriers to productivity to unleash the full economic potential of the North”.⁵

- 2.25** The strength and strategic location of Greater Manchester puts it in an ideal place to act as the primary driver for the Northern Powerhouse. Equally, Greater Manchester would benefit significantly from nearby locations in the North being more economically prosperous, as this would provide access to a wider range and diversity of businesses opportunities and to an even larger pool of skilled labour. Hence it will be important to deliver relatively high levels of growth across the Plan area for the wider benefit of the North.

Figure 2.3 Geography of jobs across the Northern Powerhouse

- 2.26** Improving connections between Greater Manchester and other parts of the North, and to other areas such as the Midlands, will be central to delivering the vision for the Northern Powerhouse. Transport for the North published their Strategic Transport Plan in February 2019. The Plan seeks to enable

⁵ HM Government (November 2016) Northern Powerhouse strategy

the North to achieve its full potential and is an opportunity to address decades of under investment and provide a legacy for future generations. The fundamental challenge for the North's economy is to improve the economic interaction between the key economic assets and clusters of the North to improve the sharing of knowledge, supply chains, resources, and innovation to drive agglomeration benefits and productivity. The major northern cities of Liverpool, Leeds and Sheffield are within 40 miles of Greater Manchester, as are other significant settlements such as Bradford, Preston, Warrington, Chester and Stoke-on-Trent. At present connectivity between the North's towns and cities, and beyond, restricts growth and opportunities. Commuting between Manchester and Leeds is 40% lower than expected when compared to city pairs that are similar distances apart in the UK. Better transport connectivity increases the physical proximity of firms, workers and consumers and concentrates economic activity in clusters. Improving transport connections between the North's cities, towns, economic centres, infrastructure and assets allows for greater opportunities for employment, collaboration and knowledge sharing. Importantly, it would also enable other parts of the North to take advantage of Greater Manchester's key assets and its role as a key international gateway and emerging top global city, connecting more people to Manchester Airport and the proposed HS2 services to London.

- 2.27** The Northern Powerhouse Rail proposals will dramatically improve journey times to 30 minutes or less from the City Centre and Manchester Airport to Liverpool, Leeds and Sheffield, through a combination of new and improved lines. This will bring these surrounding major cities within an easy commuting time of Greater Manchester. The M62 motorway is already an important east-west spine within the North, connecting Greater Manchester with Leeds and Liverpool, and further east through to Hull and the Humber ports. The ongoing North West Quadrant Study will identify how capacity, journey times and reliability can be improved on the M62/M60 around Greater Manchester, further aiding the integration with Leeds and Liverpool. The proposed Trans Pennine Tunnel has the potential to deliver similar benefits for road transport between Greater Manchester and Sheffield. In the southern part of Greater

Manchester, the study at the Airport around the M56 and the proposed study of the M60 corridor in the south-east will also be key. These transport schemes will play a very important role in realising the potential of our boroughs, Greater Manchester, as a whole, and the wider North.

- 2.28** As part of Greater Manchester, we are therefore ideally placed to drive growth in the North of England and help provide a balance to the strength of London and the South East. However, this will not only require an appropriate scale and distribution of development and infrastructure investment within our boroughs, but also major improvements in transport connections to other parts of the North, including Northern Powerhouse Rail and motorway network enhancements.

Inclusive Growth

- 2.29** (AM2.5) Over recent years, growth across the Plan area has been concentrated in the three local authority areas of Manchester, Salford and Trafford. For example, over the period 2001-2016, they accounted for two-thirds of the growth in population, employment and economic activity (measured by GVA) in Greater Manchester.⁶ Population increased by around 20% across Manchester, Salford and Trafford over that period compared to just over 6% across the remaining six districts (combined) of the PfE Plan area, although this contrasts with the preceding half century when Manchester and Salford lost well over one-third of their population.⁷ This concentration of growth is likely to continue in the future, with Manchester, Salford and Trafford forecast to account for 44.5% of population growth up to 2039.7, around 60% of GVA growth, and 90% of the increase in employment.⁸ This would consolidate the concentration of growth in the central and southern areas of Greater Manchester.

- 2.30** Picture 2.2 '2019 Index of Multiple Deprivation', produced by the Government, with the darkest colours showing the most deprived areas. It

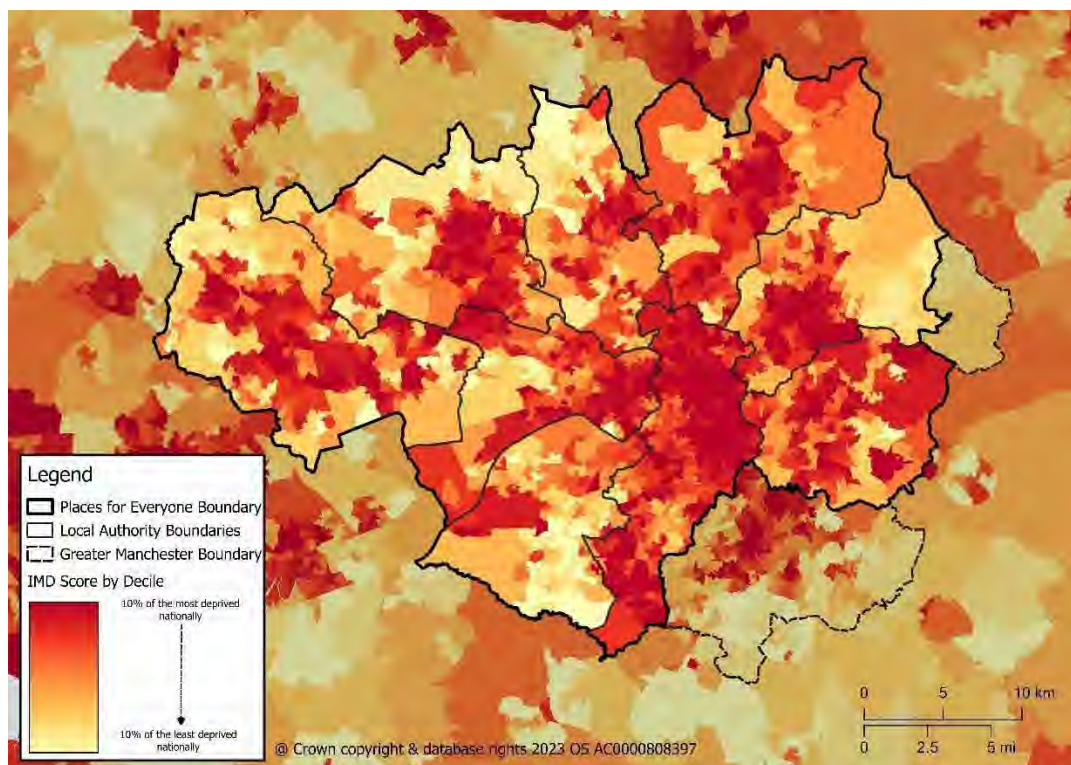

⁶ ONS mid-year population estimates, and Greater Manchester Forecasting Model 2018

⁷ Population Statistics, Total Population, A Vision of Britain through Time, 1951-2001

⁸ ONS 2018-based sub-national population projections, and Greater Manchester Forecasting Model 2018

indicates high levels of deprivation across many parts of the Plan area, including those areas that have seen a concentration of growth over recent years and in parts of otherwise affluent boroughs. There is a particularly high concentration of deprivation in the central areas, with Manchester the second most deprived local authority area in England on two measures.⁹

Picture 2.2 2019 Index of Multiple Deprivation

2.31 An analysis by the Office for National Statistics of over 100 towns and cities in England and Wales identified Oldham, Salford and Rochdale amongst some of the most deprived areas in the country.¹⁰ When a broad range of socio-economic measures are considered, such as levels of economic activity, qualifications, occupation, household incomes, house prices, poor

⁹ Measured by the 'rank of ranks', where each local authority is ranked for each of the seven domains of the index, and then an average rank is produced

¹⁰ Office for National Statistics (March 2016) Towns and cities analysis, using the 2015 Index of Multiple Deprivation

health, population change and housing development, in overall terms the northern areas of Greater Manchester excluding Bury (Wigan, Bolton, Rochdale, Oldham and Tameside) perform significantly worse overall than the southern areas.

2.32 Although both the central areas and the northern parts of Greater Manchester suffer from high levels of deprivation, there are differences between them in terms of how this manifests and the development pressures that they face. The inner areas surrounding the City Centre and the Quays have seen much higher levels of recent population growth, being a key focus for inward international migration. Just 22 wards in that area (out of a total of 215 wards in Greater Manchester) accounted for two-thirds of the increase in residents aged under 18 in Greater Manchester over the period 2002-2016, and the area saw an increase of one-third in those aged 30-44 whereas the sub-region as a whole had a reduction in that age group. The number of people aged 65 and over declined in this inner area, whereas the six northern districts had a one-quarter increase.¹¹

Key Challenges for the Places for Everyone Plan

2.33 In light of these issues, the PfE Plan will need to:

- Deliver high levels of economic growth to support the prosperity of Greater Manchester, whilst ensuring that all parts of our boroughs and all our residents share in the benefits;
- Deliver the highest possible quality of life for all our residents and address existing problems such as health disparities and air quality that currently detract from it.

¹¹ ONS: Ward-level population estimates (Experimental Statistics) 2002-2016 (released October 2017).

Vision

3.1 The vision for Greater Manchester is set out in the Greater Manchester Strategy:

Our vision is to make Greater Manchester one of the best places in the world to grow up, get on and grow old:

- A place where all children are given the best start in life and young people grow up inspired to exceed expectations.
- A place where people are proud to live, with a decent home, a fulfilling job, and stress-free journeys the norm. But if you need a helping hand, you'll get it.
- A place of ideas and invention, with a modern and productive economy that draws in investment, visitors and talent.
- A place where people live healthy lives and older people are valued.
- A place at the forefront of action on climate change with clean air and a flourishing natural environment.
- A place where all voices are heard and where, working together, we can shape our future.

3.2 Through this Plan we are committed to supporting the achievement of this vision in our boroughs. However, this Plan is one of many ways in which the vision will be delivered, and many of the necessary actions will lie outside the scope of the Plan.

3.3 Figure 3.1 'Key Diagram' illustrates the Plan's spatial strategy, showing the locations that will be the main focus for development up to [2037](#) [2039](#).

Figure 3.1 Key Diagram

Strategic Objectives

Objective 1: Meet our housing need.

We will:

- Increase net additional dwellings;
- Increase the number of affordable homes;
- Provide a diverse mix of housing.

Objective 2: Create neighbourhoods of choice.

We will:

- Prioritise the use of brownfield land;
- Focus new homes in the Core Growth Area and the town centres;
- Focus new homes within 800m of public transport hubs;
- Ensure that there is no increase in the number of homes and premises at a high risk of flooding;
- Prioritise sustainable modes of transport to reduce the impact of vehicles on communities.

Objective 3: Playing our part in ensuring a thriving and productive economy in all parts of Greater Manchester. (AM3.1)

We will:

- Ensure there is adequate development land to meet our employment needs;
- Prioritise the use of brownfield land;
- Ensure there is a diverse range of employment sites and premises;
- Facilitate the development of high value clusters in [prime key economic](#) sectors such as:
 - Advanced manufacturing;
 - Business, financial and professional services;
 - Creative and digital;
 - Health innovation;
 - Logistics.

Objective 4: Maximise the potential arising from our national and international assets. (AM3.2)

We will:

- Focus development in the Core Growth Area, Manchester Airport and key economic growth locations;
- Improve visitor facilities in the City Centre, Quays and Manchester Airport and our international and national sporting assets;
- Enhance our cultural, heritage and educational assets; Improve sustainable transport and active travel access to these locations;
- Improve access for local people to jobs in these locations;
- Ensure infrastructure provision supports growth in these locations;
- Increase graduates staying in Greater Manchester.

Objective 5: Reduce inequalities and improve prosperity.

We will:

- Ensure people in all of our neighbourhoods have access to skills training and employment opportunities;
- Prioritise development in well-connected locations;
- Deliver an inclusive and accessible transport network;
- Strengthen the competitiveness of north Greater Manchester;
- Reduce the number of our wards in the 10% most deprived nationally.

Objective 6: Promote the sustainable movement of people, goods and information.

We will:

- Enhance our existing transport network;
- Focus new development within 800m of sustainable transport hubs;
- Ensure new development is designed to encourage and enable active and sustainable travel;
- Expand our transport network to facilitate new areas of sustainable and inclusive growth;
- Capitalise on national and regional investment in transport infrastructure;

- Improve opportunities for sustainable freight;
- Ensure new development provides opportunities for affordable, high quality digital infrastructure.

Objective 7: Playing our part in ensuring that Greater Manchester is a more resilient and carbon neutral city-region.

We will:

- Promote carbon neutrality of new development by 2028;
- Promote sustainable patterns of development that minimise the need to travel and contribute to cleaner air;
- Locate and design development to reduce car dependency;
- Facilitate provision of infrastructure for cleaner vehicles;
- Improve energy efficiency and the generation of renewable and low carbon energy.

Objective 8: Improve the quality of our natural environment and access to green spaces.

We will:

- Enhance special landscapes, green infrastructure, biodiversity and geodiversity;
- Improve access to the natural environment and green spaces including parks;
- Promote the role of green space in climate resilience and reducing flood risk.

Objective 9: Ensure access to physical and social infrastructure.

We will:

- Ensure that our communities and businesses are supported by infrastructure;
- Improve the capacity and network coverage of digital, energy, telecoms, transport and water in key growth locations;
- Ensure new development is properly served by physical and social infrastructure including schools, health, social care, sports and recreation facilities.

Objective 10: Promote the health and wellbeing of communities.

We will:

- Ensure new development is properly served by health care services that meet the needs of communities;
- Improve access to healthy food options for all communities;
- Reduce the health impacts of air pollution through accessibility of sustainable travel such as public transport, cycling and walking;
- Maximise the health benefits of access to the natural environment and green spaces;
- Coordinate with and support the delivery of local and Greater Manchester wide health strategies.

Blank Page

Strategy

Inclusive Growth

4.1 The central theme of our spatial strategy is to deliver inclusive growth across the city region, with everyone sharing in the benefits of rising prosperity.

There are three main aspects to this:

- Making the most of the key locations and assets best-placed to support economic growth;
- Creating more favourable conditions for growth by providing high quality investment opportunities that help to address disparities; and
- Creating places which will be more resilient to climate change.

Making the Most of Key Locations and Assets

4.2 As globalisation continues and the pace of technological change accelerates, there will be increasing competition between cities for investment, jobs and skilled people. If Greater Manchester is to flourish in the long run, then it will need to make the most of its key assets and advantages, which can differentiate it from other places. The growth potential of a small number of locations that can boost international competitiveness will need to be maximised in order to support the prosperity of Greater Manchester as a whole.

4.3 Key locations and assets include:

- The huge agglomeration of economic activity at the centre of Greater Manchester, focused on the City Centre and the Quays but also extending westwards through Trafford Park and eastwards to Central Park and the Etihad campus, which provides an enormous number and range of jobs;
- Manchester Airport, which is the largest airport in the country outside London and the South East, and offers routes across the world;

- Connections to the post-Panamax facilities at the Port of Liverpool, via the Manchester Ship Canal, rail and motorways, enabling access to global shipping routes and the largest vessels;
- The universities and the knowledge economy, with a high concentration of students, research activity and scientific institutions. The Oxford Road Corridor is an internationally important location in this regard, whilst the University of Salford and the Crescent area have huge potential for further investment;
- The strong cultural identity of Greater Manchester and its constituent cities and towns, with a global reputation for sports and the arts; and
- The strong network of green and blue infrastructure including river valleys, lowlands uplands and woodlands.

4.4 The strength of these locations and assets will be further enhanced by significant investment in both national and sub-regional important public transport schemes.

Addressing Disparities

4.5 Over recent years, growth has been concentrated in the three local authority areas of Manchester, Salford and Trafford, and this is forecast to continue in the future. The potential for an uneven pattern of growth is reinforced by the fact that the key assets and locations discussed above are focused very much in the central parts of Greater Manchester, with the airport on the southern edge of the sub-region and the potential associated with the Port of Liverpool towards the west.

4.6 When a broad range of socio-economic measures are considered, such as levels of economic activity, qualifications, occupation, household incomes, house prices, poor health, population change and levels of housing development, the northern areas of Greater Manchester with the exception of Bury (i.e. Wigan, Bolton, Rochdale, Oldham and Tameside) perform significantly worse than the southern areas. The low forecast growth rates for these northern areas risks reinforcing rather than tackling those problems.

- 4.7** However, despite the economic success of the City Centre, the largest concentration of severe deprivation is in the central areas that surround it. In contrast with the northern areas, these deprived central parts face very high development pressures, and have been the primary focus for inward international migration to Greater Manchester in recent years.

Efficient Use of Land Resources

- 4.8** A key role of this Plan is to manage the conflicting demands on our finite land resources. The need for new housing, employment, facilities and infrastructure has to be accommodated, whilst at the same time protecting the environment, urban green spaces, the countryside and the identity of different places.
- 4.9** The rate of expansion experienced over the last 150 years cannot be continued indefinitely. In order to minimise future outward growth of the built-up area, it will be important to ensure that land resources are used efficiently and effectively, and this is a key principle behind the spatial strategy set out in this document.
- 4.10** (MM4.1) An essential aspect of the efficient and effective use of land will be for preference to be given to making as much use as possible of suitable ~~to prioritise the reuse of~~ previously-developed (brownfield) land and vacant buildings when meeting development needs. This will help to address dereliction and bring investment into existing urban areas, supporting their regeneration and enhancement. Abnormal costs such as those associated with addressing land contamination can have a negative impact on the viability of developing brownfield sites, and so securing funding to support remediation will be a priority.
- 4.11** (MM4.2) Development will need to be undertaken at an appropriate density and with suitable provision for green infrastructure. Securing higher densities in the most accessible locations will help to maximise the ability of people to travel by walking, cycling and public transport, and reduce reliance on the car. Unless specified, the terms “accessible” and “accessibility” refer to being able to reach, approach or enter a location, making the most efficient use of

land resources, delivering a sustainable pattern of development, reducing the need to travel by unsustainable modes and increasing the proportion of trips made by walking, cycling and public transport. In relation to places or services, it means accessible to all, inclusive of people with disabilities and particular mobility requirements. The term “access” is used in accordance with the dictionary definition “to enable the means or opportunity to approach or enter a place.

- 4.12** Maximising the reuse of previously-developed land and delivering higher densities in the most accessible locations will together help to reduce the total amount of land required for new buildings and hence minimise the need for development of greenfield sites.
- 4.13** This focus on utilising previously-developed land and increasing densities in accessible places further reinforces the importance of delivering high levels of growth in the Core Growth Area, as locations such as the City Centre and the Quays are already characterised by high density development and have the greatest potential to be well-connected by public transport to residents across Greater Manchester. The town centres across the plan area will also be well-placed in this regard.
- 4.14** However, even with increasing densities and the reuse of brownfield land, the scale and distribution of development required to meet our needs has necessitated the need for selective removal of Green Belt and the use of other land previously safeguarded from development.

Opportunities and Challenges

- 4.15** Different parts of Greater Manchester can therefore be seen to be facing different challenges. In broad terms:
- The central areas have a combination of a high concentration of key growth assets with large levels of past and forecast growth, but considerable deprivation;
 - The southern area also has significant forecast growth, but with typically higher levels of prosperity, as for example shown by average household incomes and house prices, lower levels of deprivation (though there are

still some concentrations), and the key economic asset of Manchester Airport; and

- The northern areas typically have lower recent and forecast growth, extensive areas of deprivation and, although there are some important infrastructure assets such as the M62 motorway and significant levels of manufacturing activity, the growth opportunities are currently more limited than in the rest of Greater Manchester.

4.16 Our spatial strategy responds to this variation, whilst also recognising both the commonalities between places and the diversity within each of them. This is essential to delivering inclusive growth that secures greater prosperity and quality of life for everyone in the city region.

Spatial Strategy

4.17 The overall spatial strategy of the Plan seeks to take advantage of the opportunities for delivering high levels of economic growth, whilst addressing the challenges for securing genuinely inclusive growth and prosperity.

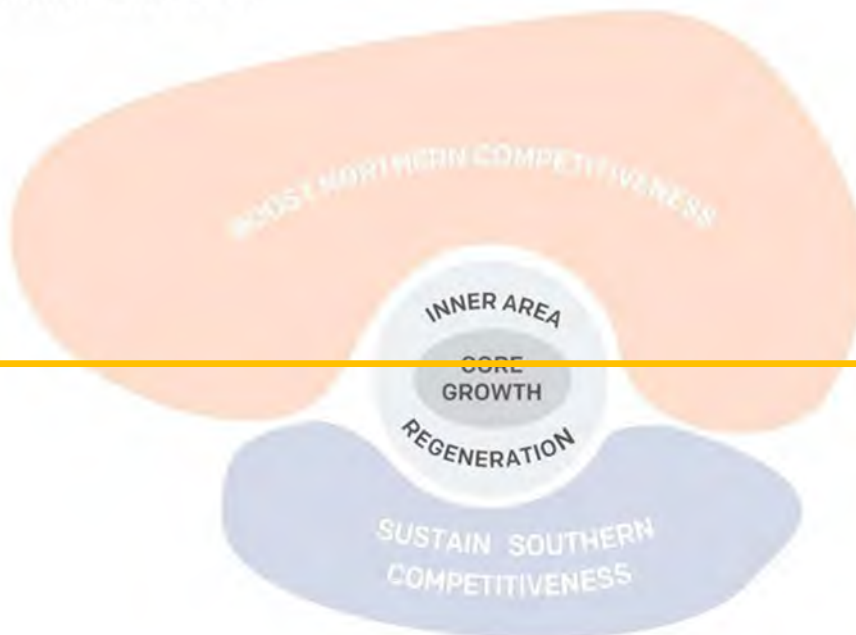

4.18 Making the most of the key assets at the core of the conurbation is central to the approach, as this will be essential to maximising the competitiveness of Greater Manchester and driving economic growth across the city region. Securing major investment in the surrounding inner areas will be important to addressing the extensive deprivation in those neighbourhoods, as well as supporting the successful functioning of the core areas.

4.19 If the forecast patterns of growth continue unchecked, reinforcing past trends, then Greater Manchester will become increasingly southward focused, with greater disparities between its northern and southern areas. This is not considered to be consistent with delivering inclusive growth and would adversely impact on the long-term prospects for Greater Manchester. Hence, the Plan seeks to boost significantly the competitiveness of the northern parts of Greater Manchester, whilst ensuring that the southern area continues to make a considerable contribution to growth by making the most of its key assets.

4.20 (MM4.3) This approach is summarised in Figure 4.1 'Spatial Strategy' and explained in more detail in the rest of this chapter. The figures (4.1 to 4.8) and Picture 4.2 provide an illustrative representation of key aspects of policies JP-Strat 1 to JP-Strat11. They assist both further plan making and decision makers considering planning applications by providing additional visual context for the policies. The transport infrastructure improvements shown in Figures 4.4; 4.5; 4.6; 4.7; 4.8; and Picture 4.2 are for illustrative purposes only. There is a comprehensive list of indicative transport interventions for the delivery of allocations in Appendix D. The 2040 Transport Strategy and Five Year Delivery Plan set out the transport interventions and policies important to improving the transport network and helping to deliver more sustainable growth across GM as a whole.

Figure 4.1 Spatial Strategy (AM4.1)

SPATIAL STRATEGY

SPATIAL STRATEGY

4.21 The areas identified in the above diagram do not have firm boundaries. There is some overlap between them, and they are likely to evolve over time. However, in broad terms they can be described as follows:

- Core Growth Area: central Manchester, south-east Salford, and north Trafford
- Inner Area Regeneration: surrounding inner parts of Manchester, Salford and Trafford
- Boost Northern Competitiveness: Bolton, Bury, Oldham, Rochdale, Tameside, Wigan, and west Salford
- Sustain Southern Competitiveness: Most of Trafford and south Manchester but also Stockport, who will play a vital role in this through its own Local Plan.

4.22 The rapid transit routes and strategic green infrastructure, which are also an important part of the spatial strategy, extend through all of these areas. The main town centres are located within the northern and southern areas.

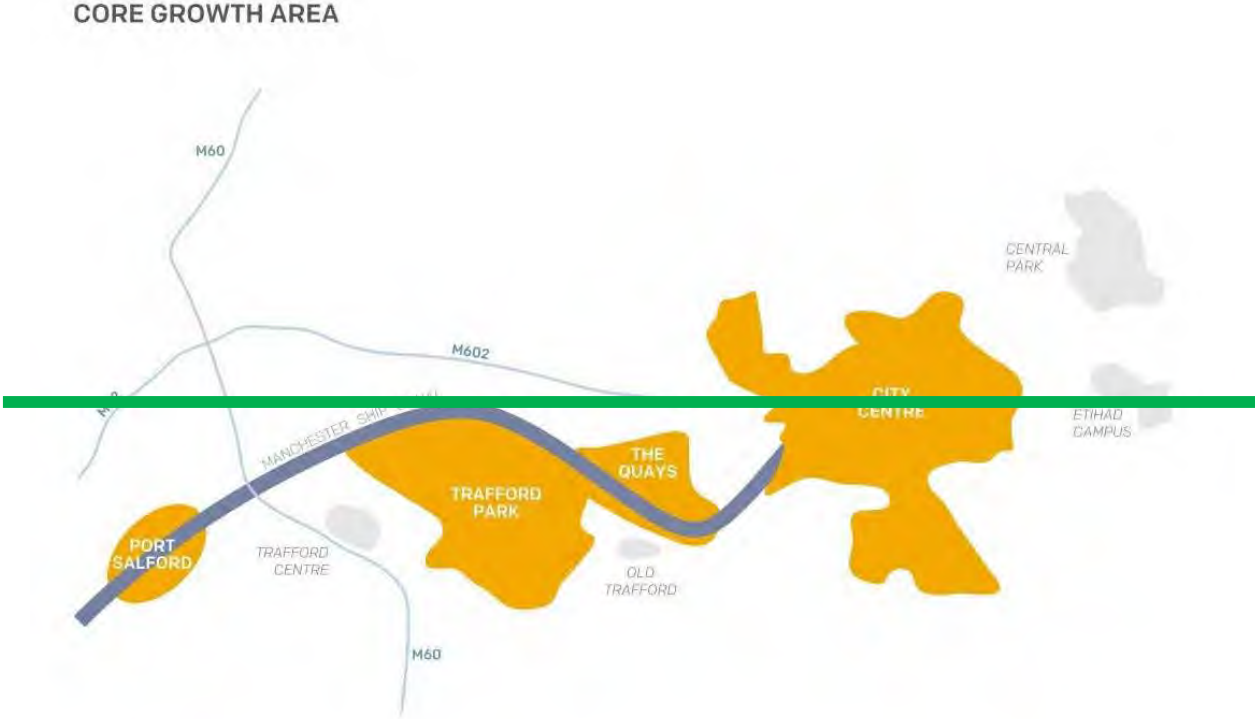

New paragraph (MM4.4)

The Policies within this Chapter establish the overall spatial strategy for the Plan. In addition, Policies JP-Strat1 to JP-Strat11 provide a strategic framework for local plans.

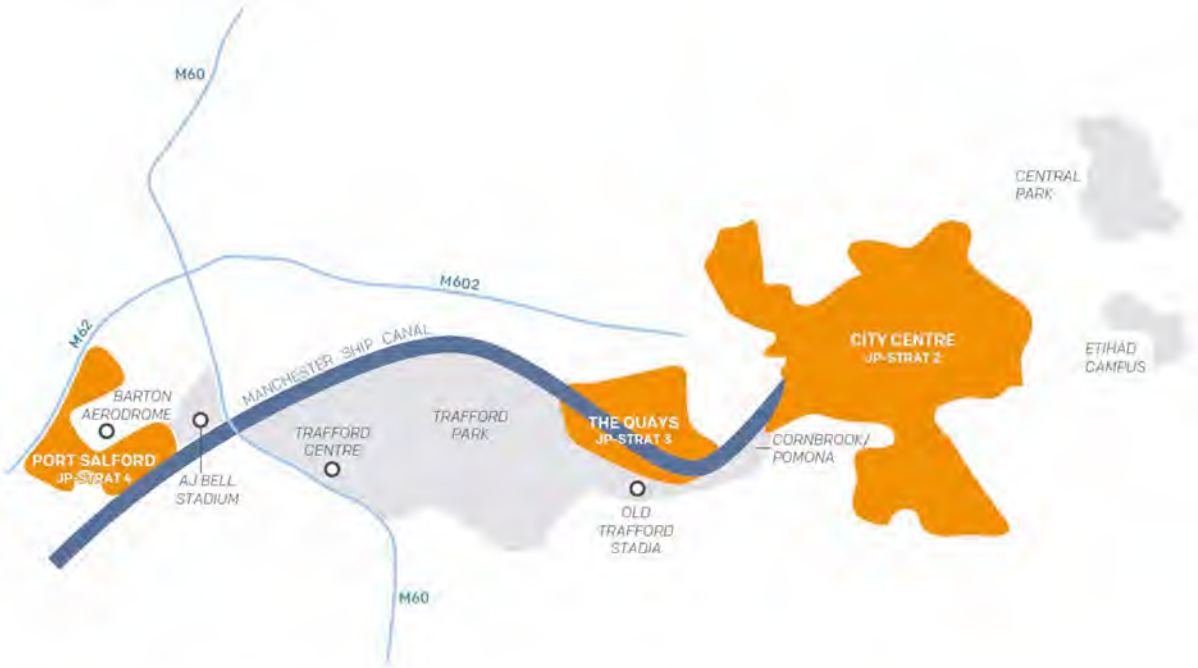

Core Growth Area

- 4.23** The huge agglomeration of economic activity at the centre of Greater Manchester is perhaps the city region's greatest strength. At the heart of this is the City Centre, which is the most significant economic location and largest office market in the country outside London. Immediately to its south-west is the Quays, which provides an internationally significant cluster of digital and creative uses. The wider central economic area extends beyond the City Centre and the Quays, eastwards to include Central Park and the Etihad campus, and westwards through Trafford Park, which is one of Europe's largest industrial estates, to Port Salford. This area provides a huge scale and diversity of economic and residential opportunity, which is accessible from across Greater Manchester and beyond.

Figure 4.2 Core Growth Area (MM4.5)

CORE GROWTH AREA

Contains OS data © Crown copyright and database right 2023

- 4.24** A strong focus of growth in the Core Growth Area, particularly the City Centre and the Quays, is fundamental to our overall strategy. This is the area with the largest concentration of key assets, and which has seen the highest level of market interest over a prolonged period of time. It provides the greatest growth potential and best opportunity to increase the international competitiveness of the city region. It offers a significant opportunity to create jobs for existing local communities, particularly those from the more deprived communities, thereby reducing poverty and delivering inclusive growth. Despite the challenges currently facing the nation as a result of the health crisis resulting from the Coronavirus pandemic, delivering high levels of employment growth in this area will be crucial to maximising the accessibility of jobs to residents across Greater Manchester in a sustainable way. This continuing agglomeration of activity will provide the scale, quality and profile of activity necessary for Greater Manchester to become a top global city.
- 4.25** There is also an opportunity to continue to grow significantly the residential role of this core area, including a broader range of dwelling types and an increase in the supply of affordable housing. Securing large numbers of new homes in this part of the sub-region will enable more people to live near to a variety of employment, business and leisure opportunities, and reduce pressure on greenfield and Green Belt land elsewhere in Greater Manchester. However, it will be important to ensure that this complements rather than displaces the economic functions.
- 4.26** [\(MM4.6\) In total sufficient land has been identified in the Core Growth Area for almost 69,000 new homes.](#) Development within the City Centre and the Quays will typically be delivered at high densities, reflecting the accessibility and prominence of those locations. There will remain extensive areas of lower density employment development such as within Trafford Park and at Port Salford, providing a diverse range of employment and business opportunities. Separate policies are set out below for the City Centre, the Quays, and Port Salford.

Policy JP-Strat1: Core Growth Area (MM4.7)

The economic role of the Core Growth Area will be protected and enhanced, with sustainable development supporting major growth in the number of jobs provided across the area providing opportunities to create jobs for local communities.

Complementary to, but not at the expense of, its economic function it will see a significant increase in the number and range of homes in areas with good connections to employment, training and education facilities. ~~These homes will be supported by necessary green spaces and social infrastructure and will be of an appropriate design. In total sufficient land has been identified in the Core Growth Area for almost 98,000 new homes.~~

Infrastructure provision will support the growth and continued capacity of the Core Growth Area ~~having particular regard to the Greater Manchester Transport Strategy 2040 refresh and accompanying Delivery Plans.~~

City Centre

- 4.27** The City Centre lies at the heart of Greater Manchester, straddling the boundary between Manchester and Salford. It is mainly contained within the Inner Relief Road but also extends beyond, including along Oxford Road to the south and along Chapel Street and the Crescent to the west.
- 4.28** The City Centre plays a key role in Greater Manchester's economy, and that of the North of England more generally, providing around 10% of all jobs in the sub-region. It offers a large range of employment, shopping, leisure and tourism opportunities, attracting significant numbers of visitors to Greater Manchester. It also has a high concentration of knowledge-based activities, with three universities, several major research centres, and a large supply of graduates, as well as a valuable historic environment with numerous heritage assets. The completion of major transport infrastructure schemes towards the end of the Plan period, such as HS2 and Northern Powerhouse Rail, will dramatically reduce journey times to London, Birmingham and major cities in the North, further enhancing the attractiveness and potential of the City Centre. Improved connectivity between the City Centre and adjacent areas, such as between The Quays and Salford Crescent, will support

growth across the City Centre, as well as in edge-of-centre locations that benefit from this improved connectivity and become increasingly suitable for higher density and the expansion of further knowledge based clusters of development.

- 4.29** (MM4.8) Although there is already a very high level of activity within the City Centre, the area has significant development potential and will be the largest source of new jobs and homes in Greater Manchester over the next few decades. Over the period 2022-2039, land to accommodate around 1,700,000 sqm of office floorspace, around 54,000 new dwellings and minimal industry and warehousing (just under 38,000 sqm) has been identified within the City Centre. The City Centre offers significant opportunity to maximise the use of previously developed land. It will enable the delivery of a range of types of homes so that people can live close to a major source of jobs, education and amenities, reducing the need to travel. This will make it essential that major improvements in public transport continue to be provided, ensuring that residents from across Greater Manchester and beyond can easily access the opportunities within the City Centre without increasing congestion, and enabling employers to take advantage of the large and diverse labour market.

Policy JP-Strat2: City Centre (MM4.9)

The role of the City Centre as the most significant economic location in the country outside London will be strengthened considerably. The City Centre will continue to provide the primary focus for business, retail, leisure, culture and tourism activity in Greater Manchester, but the increasingly important residential role of the City Centre will be expanded considerably by a range of high density new homes, supported by necessary infrastructure. Development will generally be high density. It will enable people to take advantage of the access to education and training and the extensive public transport offer, reducing the need to travel to work whilst supporting economic growth and reducing levels of poverty.

It will be a priority for investment in development and infrastructure. This will include addressing current network capacity issues in the City Centre which will enable the future expansion of the rapid transit public transport network across Greater

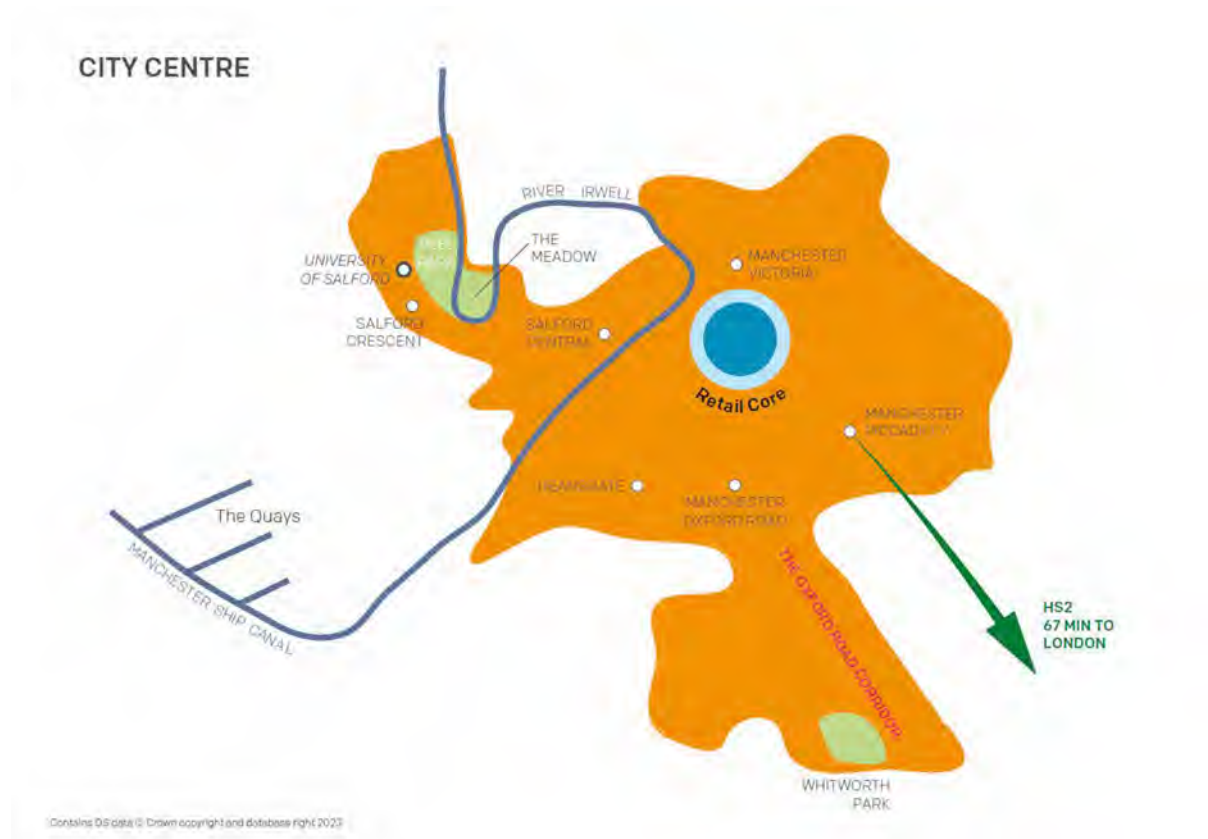

Manchester. Improvements in the public realm, walking and cycling facilities, and green infrastructure will help to enhance the local character and environmental quality of the City Centre so that it can rival city centres across the globe, enabling it to compete effectively at the international level for investment, businesses, skilled workers, residents and tourists. A broad range of commercial accommodation will be delivered, helping the City Centre to capture growth across key economic sectors.

The new functions within the City Centre will be delivered in a way that complement, rather than displace the area's non-residential functions and will seek to protect and enhance the city centre's historic environment and assets.

~~Over the period 2020–2037, land to accommodate around 2,200,000 sqm of office floorspace, around 56,000 new dwellings and minimal industry and warehousing (just over 35,000 sqm) has been identified within the City Centre.~~

Figure 4.3 City Centre (MM4.10)

The Quays

- 4.30** The Quays is located just to the south-west of the City Centre, in Salford and Trafford, focused around the Manchester Ship Canal and a series of bays and basins.
- 4.31** Since the 1980s, the Quays has gradually been transformed from a derelict docklands into a vibrant mixed-use area with well-established tourism, employment, retail and residential functions taking advantage of the high quality environment and waterside setting. The development of MediaCityUK over the last decade has helped to establish an internationally significant cluster of digital and media uses, including the BBC and ITV, but the area also has a wider business function and is one of the primary office locations in Greater Manchester. The Salford side of the Quays benefits from several Metrolink stops and the Trafford side now also benefits from the recent expansion of the Metrolink network through the completion of the new £350m Trafford Park Line in 2020.

4.32 (MM4.11) Although the Quays has seen very significant levels of investment in recent years, there is still enormous development potential within the area across all of its functions, including major expansion of the digital/creative cluster and significant residential opportunities. Over the period 2022-2039, land to accommodate around 155,000 sqm of office floorspace, around 12,200 new dwellings and minimal industry and warehousing (around 6,000 sqm) has been identified within the Quays. It offers significant opportunity to maximise the use of previously developed land by delivering large scale residential development close to a major source of jobs, education supported by the necessary infrastructure and amenities. Substantial improvements in transport infrastructure, particularly public transport, will be required if the Quays is to realise its full potential and residents across Greater Manchester are to take maximum advantage of its success. It will also be important to improve the connections between the Quays and the City Centre, as this would further strengthen the success of both strategic locations, providing an enormous concentration of integrated activity and maximising their agglomeration benefits.

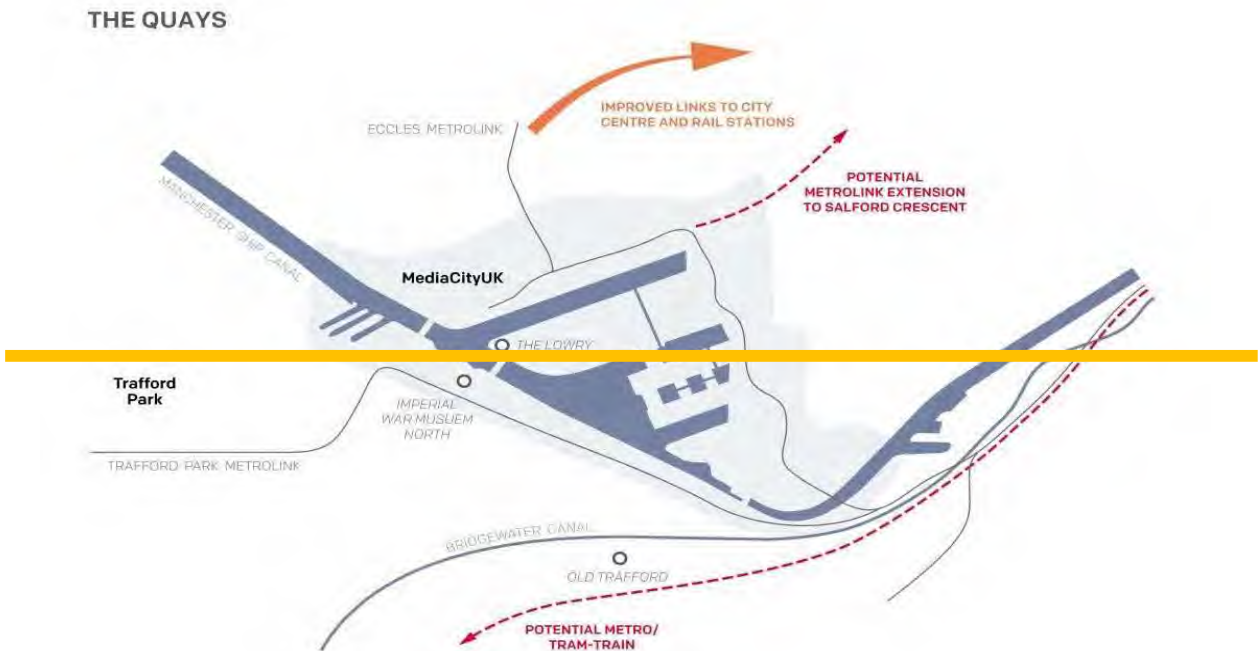

Policy JP-Strat3: The Quays (MM4.12)

The Quays will continue to develop as an economic location of national significance, characterised by a wide mix of uses. Its business, housing, leisure and tourism roles will all be significantly expanded, in a mutually supportive way, reinforcing the area's interest, vibrancy and unique identity ~~to reduce levels of unemployment and poverty in our communities.~~ Development will generally be high density. The high environmental quality of the Quays (including its public realm, green infrastructure, wildlife sites and heritage assets) will be protected and enhanced as one of its essential distinguishing features, and excellent, distinctive design will continue to be a priority.

~~Over the period 2020-2037, land to accommodate around 192,000 sqm of office floorspace, around 12,500 new dwellings and minimal industry and warehousing (around 6,000 sqm) has been identified within the Quays. The new homes will be a range of high density homes, close to major sources of jobs and education, supported by the necessary infrastructure and amenities.~~ Major improvements in

accessibility by public transport, cycling and walking will be sought, including much better links to key rail stations and greater connectivity with the City Centre.

Figure 4.4 The Quays (AM4.2)

Port Salford

- 4.33** Port Salford is currently under construction and will be the UK's first tri-modal inland waterway port. It is located on the Manchester Ship Canal, which is a unique 36-mile long seaway extending from the heart of Greater Manchester westwards to the Mersey Estuary, however, this location offers significant opportunity for further economic growth. Supported by sustainable transport it will ensure the economic growth at this location is accessible to a wide range of residents and will reduce levels of poverty in Greater Manchester, particularly in the surrounding "inner areas".
- 4.34** New canal berths at Port Salford will enable direct shipping services to the Port of Liverpool, where post-Panamax facilities can accommodate the world's largest vessels, providing access to global markets and suppliers. A new rail spur from the main Manchester-Liverpool line into the heart of the Port Salford site and alongside the canal, together with the provision of a major container terminal, will enable easy movement of goods between water, rail and road.
- 4.35** The first warehouse has been constructed and occupied, and the first phases in a series of major highway works have been completed including a new lifting bridge across the Manchester Ship Canal. A further three large-scale buildings to the south of the A57 have planning permission, and this plan takes land out of the Green Belt to the north of the A57 to enable a major expansion of the scheme. Port Salford as a whole could provide around 500,000 sqm of high quality floorspace within an integrated facility by the end of the Plan period.
- 4.36** The tri-modal facilities at Port Salford have the potential to deliver major benefits for Greater Manchester, not only supporting a larger and more sustainable logistics sector but also enabling the more efficient and cost-effective movement of components and products for manufacturers.
- 4.37** A key strength of Port Salford is its location near to the junction of the M60, M62 and M602 motorways. It is likely that major enhancements to the motorway network around Port Salford will be required, both to support the

scheme and address wider congestion issues. The ongoing Manchester North West Quadrant Study is investigating the options for broader motorway network improvements, and it will be important to coordinate the development of Port Salford with any emerging proposals.

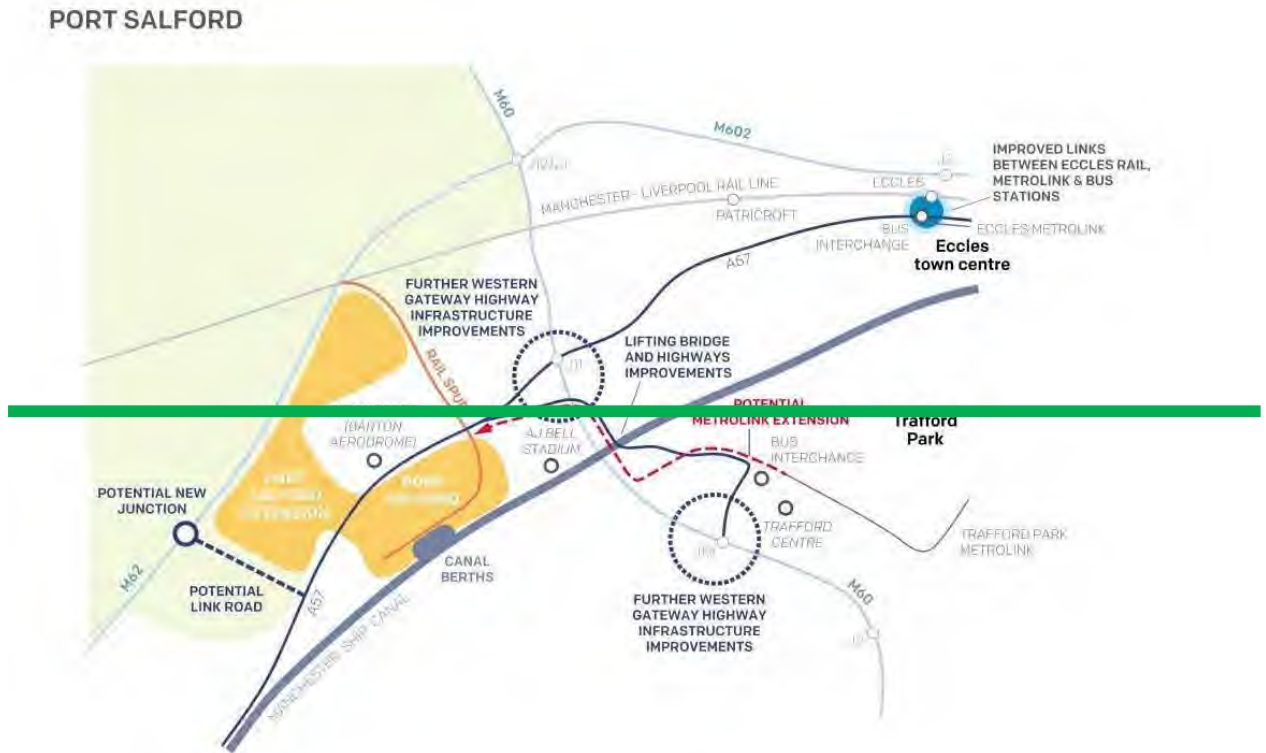

Policy JP-Strat4: Port Salford (MM4.13)

Port Salford will be developed as an integrated tri-modal facility, with on-site canal berths, rail spur and container terminal as essential elements of the scheme.

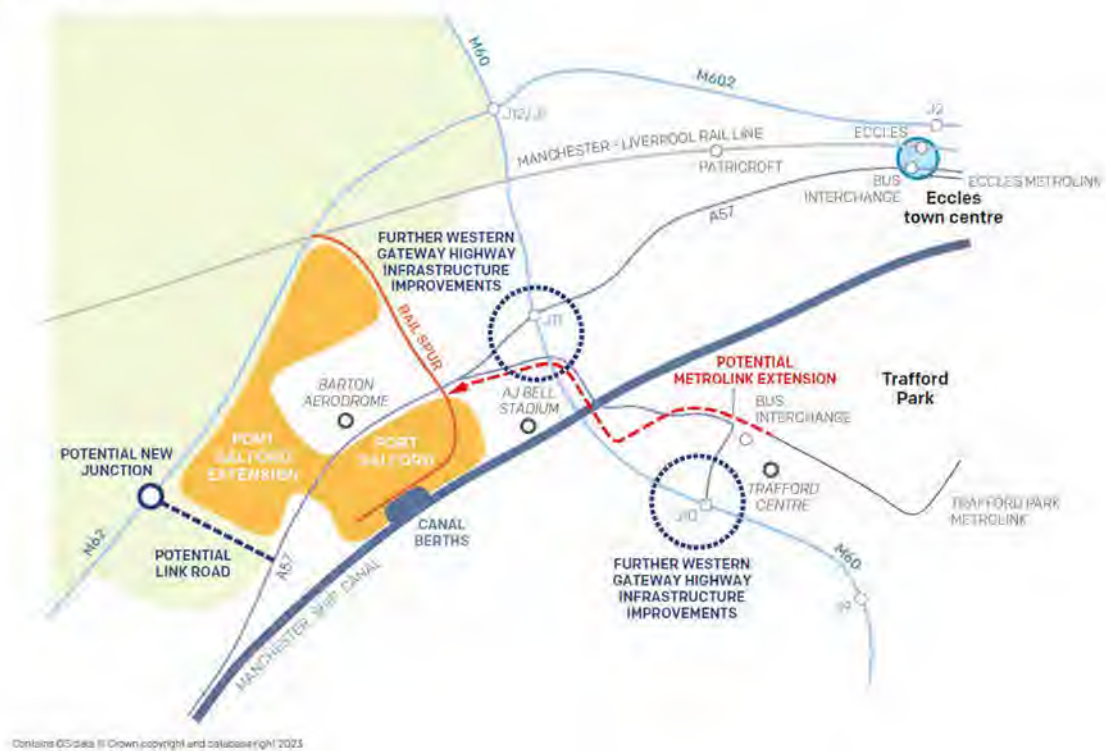

The overall facility will provide around 500,000 sqm of employment floorspace. This will include an extension of the permitted scheme onto land to the north and west of Barton Aerodrome, as allocated under Policy JP Allocation 29 'Port Salford Extension'.

The development of Port Salford must be delivered together with ~~ensure that~~ necessary transport infrastructure ~~is delivered~~, including highway improvements to accommodate the likely scale of traffic generation, in a way that is compatible with committed proposals for the enhancement of the wider motorway network and the provision of appropriate sustainable travel opportunities to meet the needs of the employees accessing the site. The growth of Port Salford will be managed to reflect the creation of additional capacity in the transport network and in accordance with the requirements of policy JPA29.

Inner Area Regeneration

- 4.38** The inner areas of the city region, surrounding the City Centre and the Quays, benefit from a position adjacent to an enormous concentration of economic activity. However, despite this proximity, these inner areas are characterised by high levels of deprivation, with extensive parts being amongst the 10% most deprived neighbourhoods in the country.
- 4.39** The challenges faced by the inner areas are quite different to most other deprived areas in Greater Manchester. Over the last 15 years, the 22 wards¹² at the heart of the inner area have collectively seen an increase in population of 38% compared to growth of 11% across the rest of the city region, and these wards have been the primary focus for international migration into Greater Manchester. The age profile of this population change has also been distinctive, with increases of 36% in 0-17 year olds, 42% in 18-29 year olds and 37% for 30-44 year olds, compared to figures of 3%, 15% and -7% respectively for the rest of Greater Manchester. In contrast, the area saw a reduction in residents aged 65 and over, whereas the rest of the city region had an increase of more than one-fifth.¹³
- 4.40** The high growth in population has led to significant development pressures, not just in terms of new build developments but also more intensified use of existing properties such as conversions to houses in multiple occupation (HMOs). The proposed scale of job growth in the Core Growth Area, and the excellent location of the inner areas in relation to them, make it likely that there will continue to be significant pressures from population growth within this part of Greater Manchester.
- 4.41** (MM4.15) Increasing housing provision in the inner areas would enable more people to access easily the opportunities of the Core Growth Area by walking, cycling and public transport and thereby reducing the need to travel.

¹² Ancoats and Clayton, Ardwick, Bradford, Cheetham, Crumpsall, Fallowfield, Gorton North, Gorton South, Harpurhey, Hulme, Levenshulme, Longsight, Miles Platting and Newton Heath, Moss Side, Old Moat, Rusholme, Whalley Range, Withington (all in Manchester), Broughton, Irwell Riverside, Langworthy (in Salford), and Clifford (in Trafford). There are 215 wards in Greater Manchester.

¹³ ONS ward-based mid-year population estimates (experimental) 2002-2017 - see [Ward-level population estimates](#).

Maintaining a good supply of affordable housing will be especially important, helping to reduce travel costs for those on lower incomes who need access to the Core Growth Area for employment and services. Over the period 2022-2039, land to accommodate around 175,000 sqm of office, around 86,500 sqm of industry and warehousing and around 35,000 new dwellings has been identified within the inner areas.

- 4.42** The high levels of deprivation highlight the need for sustained neighbourhood regeneration, with investment in improving the quality of existing housing (including its energy efficiency and access to amenity space) as well as providing a good mix of new homes. Although there is a need for significant levels of development to meet demand and to maximise the use of brownfield land, it will be essential that the network of open spaces and other green infrastructure is improved, contributing to the long-term attractiveness of these neighbourhoods. Raising the quality of these places will depend on tackling issues such as traffic congestion and air quality, which are typically more severe than in many other parts of the city region. There are also quite significant areas of flood risk.

Policy JP-Strat5: Inner Areas (MM4.16)

The continued regeneration of the inner areas will be promoted and will be linked to reducing levels of deprivation and poverty and supporting the improved health and wellbeing of the communities. High levels of well-designed new development will be accommodated in this highly accessible and sustainable location, ~~prioritising the use of previously developed land.~~

New development will be of high quality, predominantly, residential ~~(in a mix of size, type and tenure). It will be supported by necessary infrastructure, including high quality open space and improved access to the wider green infrastructure network, together with improved transport and social infrastructure.~~

~~Where a mix of uses is being proposed, it will seek to protect the amenity of existing and new residents and it will seek to protect and enhance the location's historic and natural environment and assets.~~

~~New development and~~ will be integrated with existing communities, enhancing the quality of places and their local character, ~~including through good quality design, enhanced green infrastructure (and access to it) and improvements in air quality.~~ Infrastructure provision will facilitate the growth and continued capacity of the Inner Area, including high quality open spaces and improved access to the wider green infrastructure network.

~~Over the period 2020-2037, land to accommodate around 270,000 sq m of office, around 132,000 sq m of industry and warehousing and around 30,000 new dwellings has been identified within the inner areas.~~

Boosting Northern Competitiveness

4.43 (MM4.17) Over recent years, the northern areas of Greater Manchester, namely Bolton, Bury, Oldham, Rochdale, Tameside, Wigan, and west Salford, have seen relatively low levels of growth overall compared to other parts of the city region, and this is forecast to continue. These northern areas have many strengths, such as their distinctive landscapes, proud communities, a strong manufacturing base and the opportunity for links to areas of economic prosperity beyond Greater Manchester, but their potential is not currently being fully realised. If current trends continue then disparities between the northern and southern areas will increase, and this will be harmful not only to the prospects for the north but also to those of Greater Manchester.

4.44 The northern areas are diverse, but there are considerable areas of deprivation within most districts. Deprivation is particularly extensive across the north-east, with relatively high levels through much of Rochdale, Oldham, and Tameside, extending into north Manchester. This north-eastern area is characterised by relatively low incomes, low house prices, low qualifications, low economic activity, low proportions in higher managerial/professional occupations, and poor average health. There are also significant pockets of deprivation elsewhere in the northern areas, particularly around the main town centres, which share similar problems to the north-east. However, there are also more prosperous areas across the north, especially in suburban and rural areas towards the edges of each

district, with the district of Bury sharing many of the attributes of the wealthier southern areas of Greater Manchester.

- 4.45** Some significant interventions will be required to address the extensive deprivation and the relatively low levels of growth, economic activity and prosperity. Investment will be required across the northern areas, with the provision of a good supply of high quality development sites and major transport improvements across all districts to support greater competitiveness. However, it will be vital that this is done in a sensitive way that protects the character and identity of the north, and the quality of key landscapes such as the uplands and river valleys.
- 4.46** Two locations have been identified as being especially important, having the potential to deliver significant benefits over a wider area and make a major contribution to raising the competitiveness of the northern areas as a whole: the north-east growth corridor; and the Wigan-Bolton growth corridor. These are discussed in more detail below.
- 4.47** (AM4.3) Investment in the town centres of the northern districts will be vital, particularly the main town centres of Ashton-under-Lyne, Bolton, Bury, Oldham, Rochdale and Wigan. There is a need to increase the density of high quality public transport routes to match that found in the southern areas. Improving connections between places in the north, and to key **economic growth** locations such as those within the Core Growth Area and Manchester Airport, would help to deliver a more integrated Greater Manchester economy where everyone can benefit fully from growth.
- 4.48** It will be important to increase the attractiveness of the northern areas to a wider range of people. In particular, there is the potential to increase the number of higher income households who choose to live in the north. The influx of more entrepreneurs and skilled workers could help to increase business creation and support local economic activity, as well as reducing pressures in the southern areas which currently have high levels of demand. This Plan allocates a small number of sites in the northern areas specifically to increase attractiveness of the northern areas to highly paid, highly skilled

workers, including at such sites as Chew Brook Vale (Robert Fletchers) in Oldham (Policy JP Allocation 15 'Chew Brook Vale (Robert Fletchers)'), Bamford/Norden in Rochdale (Policy JP Allocation 19 'Bamford / Norden') and East of Boothstown in Salford (Policy JP Allocation 27 'East of Boothstown') although many other sites have the potential to attract skilled workers and hence boost the competitiveness of the north.

Policy JP-Strat6: Northern Areas (MM4.18)

A significant increase in the competitiveness of the northern areas will be sought. There will be a strong focus on making as much use as possible of suitable previously-developed ~~prioritising the re-use of~~ (brownfield) land through urban regeneration, enhancing the role of the town centres and diversifying ~~increasing~~ the ~~mix, type, quality and range of~~ residential offer. This will be complemented by ~~improvements to transport connectivity and the selective release of Green Belt and previously safeguarded land in key locations~~ the allocation of sites for development identified in Chapter 11 of this plan, that will help to boost economic opportunities and diversify housing provision (~~GM-Strat7 and GM-Strat8~~). Improving transport connections and accessibility by public transport, cycling and walking will be a priority to ensure access to key employment opportunities. In supporting the principles of inclusive growth, the significant increases in economic growth in this location will help to reduce deprivation.

~~Development in this location will be of good quality and design, supported by the necessary infrastructure and amenities including improved access to green spaces.~~

~~Development in this location, particularly that on land which is being proposed to be released from the Green Belt, will seek to identify opportunities to protect and enhance the natural and historic environments to improve the local character.~~

North-East Growth Corridor

4.49 (MM4.19); (AM4.4) The most significant proposed intervention in the northern areas is focused on the M62 corridor from Junction 18 (the confluence with the M60 and M66) to Junction 21 (Milnrow), extending across parts of Bury, Rochdale and Oldham (~~GM-Strat7~~ JP-Strat7). The scale of this initiative is considered necessary in order to transform perceptions of, and opportunities

within, the north of Greater Manchester. There are ~~two~~ three major sites where land is removed from the Green Belt through this Plan, as well as significant development on land outside the Green Belt through the completion of the Kingsway Business Park. Developments in this location are not reliant on each other. The Northern Gateway site is of a transformative scale in its own right, but collectively they have the potential to significantly change the economic growth potential of the wider area.

(MM4.19) The potential for this location to deliver transformative change has led to the formal designation of the Atom Valley Mayoral Development Zone (MDZ) covering the three key areas for growth at the Northern Gateway (policy JPA1.1 and policy JPA1.2), Stakehill (policy JPA2) and Kingsway Business Park (including the proposed Advanced Machinery and Productivity Institute). The designation of the Atom Valley MDZ provides a clear mechanism to align public and private sector investment and ensure that there is commitment to the principle to delivering inclusive and sustainable growth across the three sites and adjoining towns.

- 4.50** (MM4.19) This location has been selected for large-scale intervention for three main reasons. Firstly, this part of its corridor already has well-known established employment locations such as Heywood, Pilsworth, Stakehill and Kingsway Business Park. Additionally, the M62 is a key piece of transport infrastructure connecting Greater Manchester with the major cities of Liverpool and Leeds, and beyond. As such, it has the scale, connectivity and profile required to attract a broad range of high quality occupiers and major inward investment. This will not only provide a better range of good quality jobs but will also offer opportunities for premises for new and growing sectors for example advanced manufacturing. Secondly, the corridor is close to a substantial residential population, many of whom live in deprived wards with poor connectivity to employment opportunities. Whilst Stakehill Industrial Estate has a strong reputation as an employment location and has excellent access to the motorway network, only the western edge of the site is currently served by good public transport links. In other directions, particularly to and from the Oldham borough, it requires improvement. New investment in this location, in particular that which delivers improved public

transport, could therefore make a major contribution to regeneration and addressing inequalities, whilst also offering employers easy access to a very large labour market. Thirdly, it includes opportunities for large-scale development which together will have the critical mass to enable major investment in infrastructure and attract high quality businesses, jobs and housing. [Land to accommodate almost one million sqm of new employment floorspace and around 20,000 new dwellings has been identified in the north east growth corridor.](#) Collectively, these factors will ensure that the area has the ability to make a major contribution to the overall, inclusive growth of Greater Manchester, as well as specifically helping to improve the performance of the northern areas of the city region.

- 4.51** Works to improve the capacity of Simister Island (the junction of the M62, M60 and M66 motorways) are already planned, but additional investment in the motorway network will be required to support the scale of development proposed within the North-East Growth Corridor, including improvements to Junction 3 of the M66. The area may also be the subject of proposals to improve the performance of the whole length of the M62/M60 through Greater Manchester.
- 4.52** Major public transport improvements will be required to ensure that surrounding communities can take advantage of the new jobs, and new residents can access key locations such as the City Centre, nearby main town centres and key employment locations. This provides an opportunity to deliver a more extensive and integrated public transport network in the north-east of Greater Manchester, connecting existing communities that are currently poorly served. Improvements to the Calder Valley Line have received commitments to be delivered and the North-East Growth Corridor will also benefit from additional local bus services as well as proposed Bus Rapid Transit to serve the new developments. Work is also on-going into the future development of Bus Rapid Transit connections from the North-East Growth Corridor and surrounding towns to the City Centre.
- 4.53** In addition to the transport investments needed to directly support the level of development proposed, consideration is being given to delivering

infrastructure that will benefit the wider area, including options for tram-train operation along the route of the East Lancashire Rail line, alongside the Heritage Railway and options for a Metrolink or Bus Rapid Transit extension to Middleton.

Policy JP-Strat7: North-East Growth Corridor (MM4.20)

Lying within the area and policy framework covered by [policy JP-Strat 6](#), the North-East Growth Corridor, which extends eastwards from Junction 18 of the M62 [and incorporates the Atom Valley MDZ](#), will deliver a nationally-significant area of economic activity, ~~and growth which~~ [This](#) will be supported by a significant increase in the residential offer ~~in this location, including in terms of type, quality and mix,~~ thereby delivering truly inclusive growth over the lifetime of the Plan.

~~Over the period 2020-2037, land to accommodate almost 1 million sqm of new employment floorspace and around 19,000 new dwellings has been identified within the whole Growth Corridor.~~

Specifically this Plan allocates ~~two~~ [three](#) major sites within the area, ~~and makes associated changes to the Green Belt boundaries as identified in Chapter 11,~~ to support this growth:

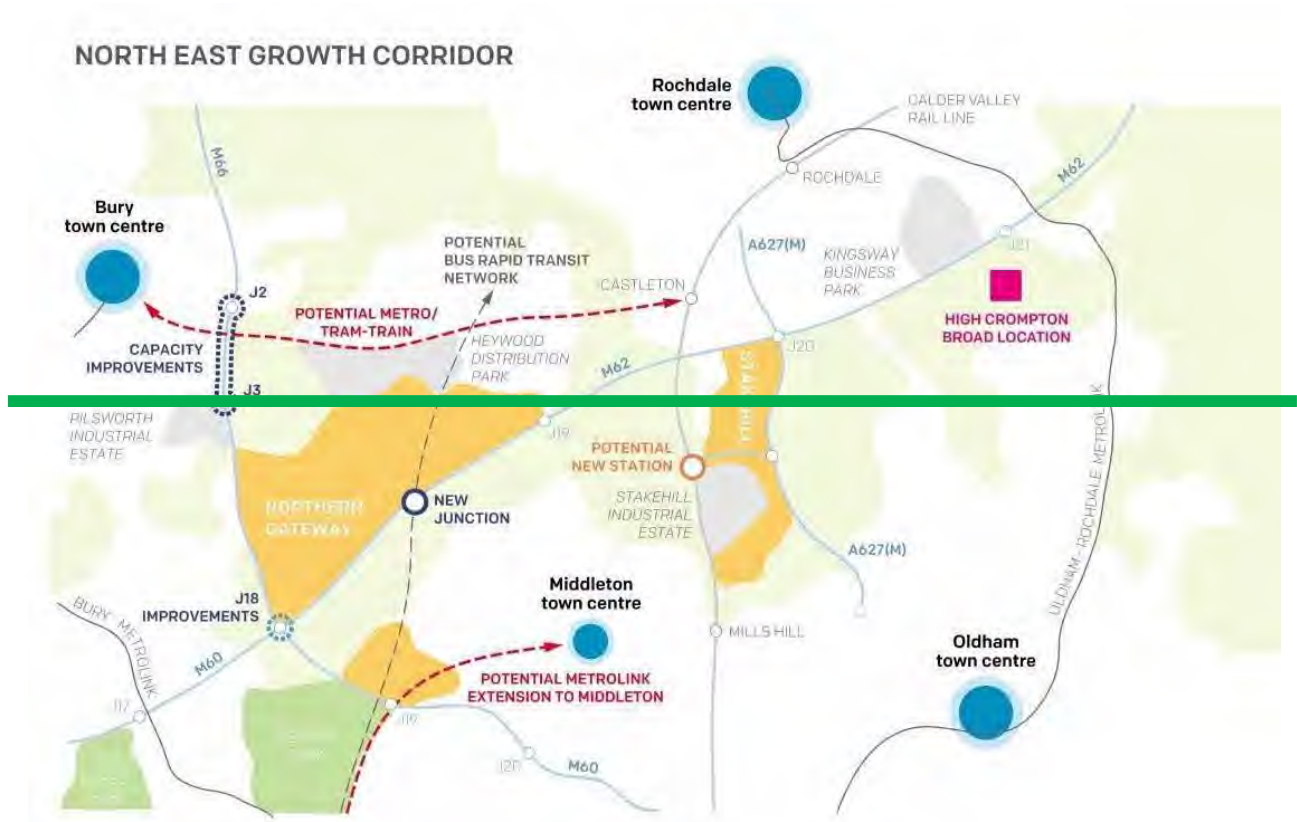

- Policy JP Allocation 1.1 'Heywood / Pilsworth (Northern Gateway)'
- Policy JP Allocation 1.2 'Simister and Bowlee (Northern Gateway)'
- Policy JP Allocation 2 'Stakehill'

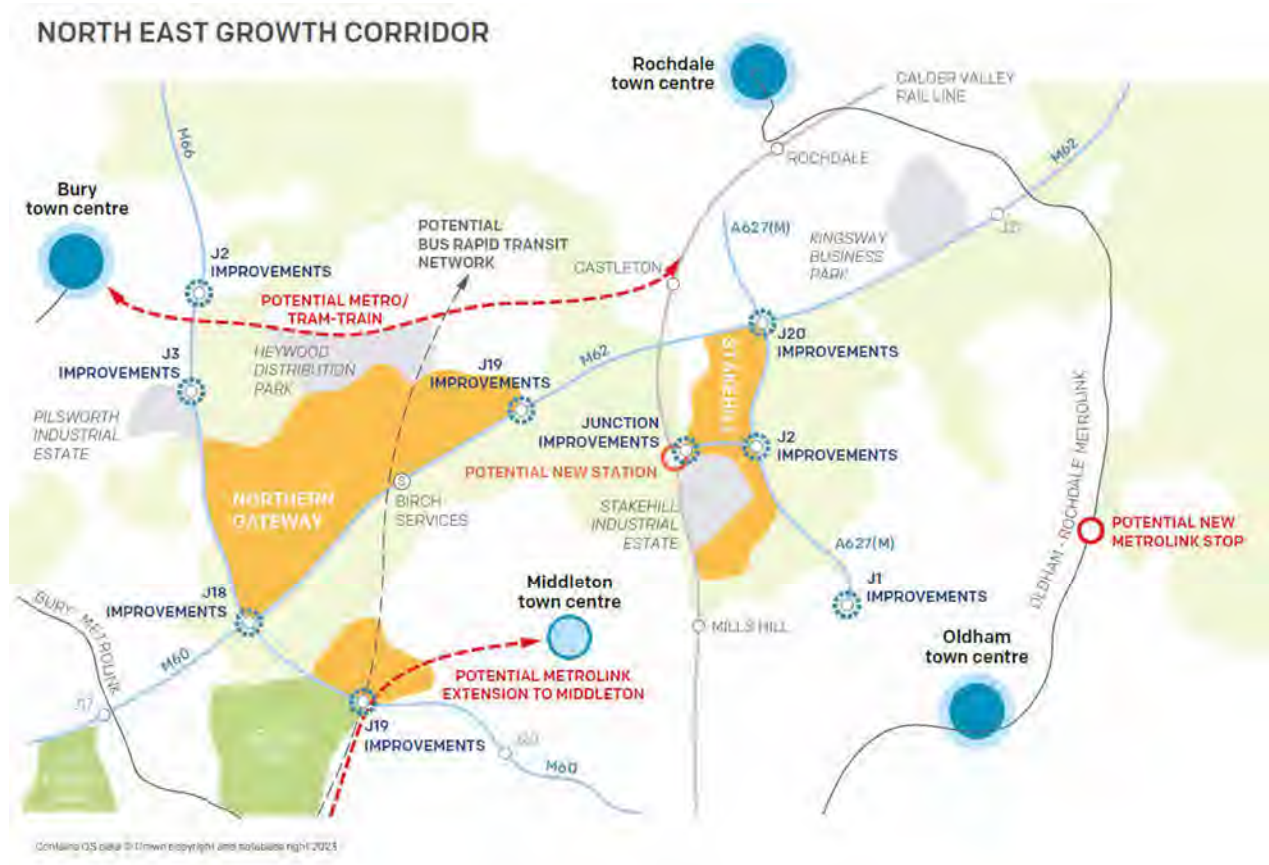

~~In addition to these two allocations, there is considered to be a potential opportunity for further expansion of the economic and residential offer in the eastern most part of this key gateway location. As such the Key Diagram identifies the High Crompton Broad Location. The land will remain in the Green Belt until such time that a review of this Plan and / or the Oldham Local Plan can demonstrate that it is necessary. The opportunity presented by the High Crompton Broad Location would serve to meet future employment and housing needs and demand of businesses and local communities in this part of the conurbation well beyond the end of the Plan period. Well designed, sustainable development at this Broad Location would diversify further the employment and housing offer in Oldham by ensuring truly inclusive~~

growth could be achieved which would help to reduce further the levels of deprivation and poverty.

The development of the area must ensure that necessary infrastructure is delivered to accommodate the likely scale of development.

Picture 4.2 North-East Growth Corridor (MM4.21)

Wigan-Bolton Growth Corridor

4.54 The Wigan-Bolton Growth Corridor is located in the north-west of Greater Manchester and complements the North-East Growth Corridor ensuring that there are significant investment opportunities across the northern areas, helping to boost the competitiveness of all parts of the north and delivering inclusive growth. The Wigan-Bolton Growth Corridor proposals are smaller in scale than the North-East Growth Corridor but are nevertheless important in supporting long-term economic prosperity. The M6 logistics hub in Wigan (extending into Warrington, St Helens and West Lancashire) provides a major cluster of warehousing and distribution activity with easy access to the Port of Liverpool via the M58.

4.55 This growth corridor is focused around improved transport links. These include new roads and a Wigan to Bolton Quality Bus corridor and, the more intense use of the Wigan – Atherton – Manchester and the Wigan – Bolton – Manchester rail lines. New road infrastructure will improve east-west connectivity between Junction 26 of the M6 (which is also the junction for the

M58 motorway that provides a direct connection to the Port of Liverpool) and Junction 5 of the M61. This transport infrastructure will significantly improve highway connections in the north-west of Greater Manchester, and better integrate the strong logistics functions along the M6 and M61 into the wider city region, as well as helping to address local congestion issues. The increased use of the existing rail lines could include conversion to tram-train use on the Atherton line and electrification on the Bolton line. This would increase capacity and, along the Atherton line has the potential to increase the number of stations. The rail lines and new road infrastructure extend through and near a series of deprived neighbourhoods across central Wigan and into south Bolton and will greatly improve access to employment opportunities, and hence will have a major regenerative role and reduce levels of deprivation.

- 4.56** (MM4.22) There are numerous development sites already identified along this corridor, including some major brownfield sites such as those to the north of Leigh, south of Hindley and at Westwood Park. However, in order to maximise the contribution of this corridor to boosting the competitiveness of the northern areas, support the economic prospects of Wigan and Bolton, and maximise the benefits of new transport infrastructure, there is also selective release of land from the Green Belt for employment and housing development. Over the period 2022-2039, land to accommodate just over 1 million sqm of new employment floorspace and approximately 13,600 new dwellings has been identified within the area.
- 4.57** (MM4.22) There are two significant assets at the eastern end of this growth corridor. Hulton Park is the proposed site for a Ryder Cup golf course and the Royal Bolton Hospital is a significant employer and the site of the Bolton College of Medical Sciences. The Further development of land at the hospital will enable its evolution and provide additional opportunities, including new health technology related activities, which would benefit from this location, alongside new housing development. The identification of land for further development in this location will be dealt with through the Bolton Local Plan or an equivalent Development Plan Document following the

adoption of Places for Everyone. The corridor also benefits from its proximity to other important assets. Wigan Town centre lies just to the north, which provides direct rail access to London, with the current journey times of 2 hours set to reduce substantially with the arrival of HS2 services. The lowland wetland and mosslands are just to the south, forming part of the strategic green infrastructure network.

Policy JP-Strat8: Wigan-Bolton Growth Corridor (MM4.23)

Lying within the area and policy framework covered by JP-Strat 6, the Wigan – Bolton Growth Corridor will deliver a regionally-significant area of economic and residential development.

New highway infrastructure will is intended to connect Junction 26 of the M6 and Junction 5 of the M61 including public transport provision. Measures to improve the provision of bus services and to increase the use of rail lines are also planned will be implemented, potentially including a Wigan to Bolton Quality Bus Transit corridor, conversion of the Atherton line to allow for metro/tram-train services, and the electrification of the Bolton to Wigan line.

~~Over the period 2020-2037, land to accommodate just over 1million sqm of new employment floorspace and approximately 13,000 new dwellings has been identified within the area.~~

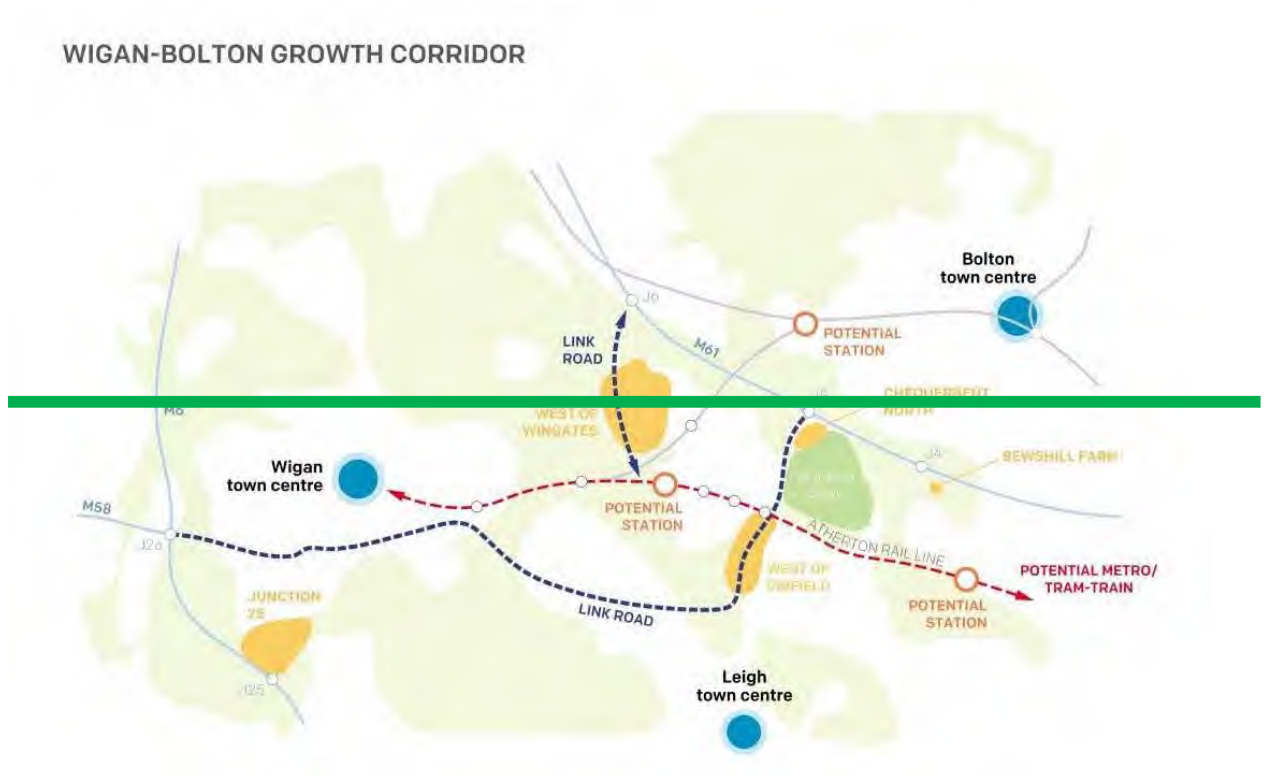

~~The majority of this new development will be on previously developed land, within the urban area. However, in order to meet the overall spatial strategy, Specifically, this Plan allocates the following sites, as identified in Chapter 11, within the area, and makes associated changes to the Green Belt, to further support the success of the growth corridor:~~

- Policy JP Allocation 4 'Bewshill Farm'
- Policy JP Allocation 5 'Chequerbent North'
- Policy JP Allocation 6 'West of Wingates / M61 Junction 6'
- Policy JP Allocation 34 'M6 Junction 25'
- Policy JP Allocation 37 'West of Gibfield'

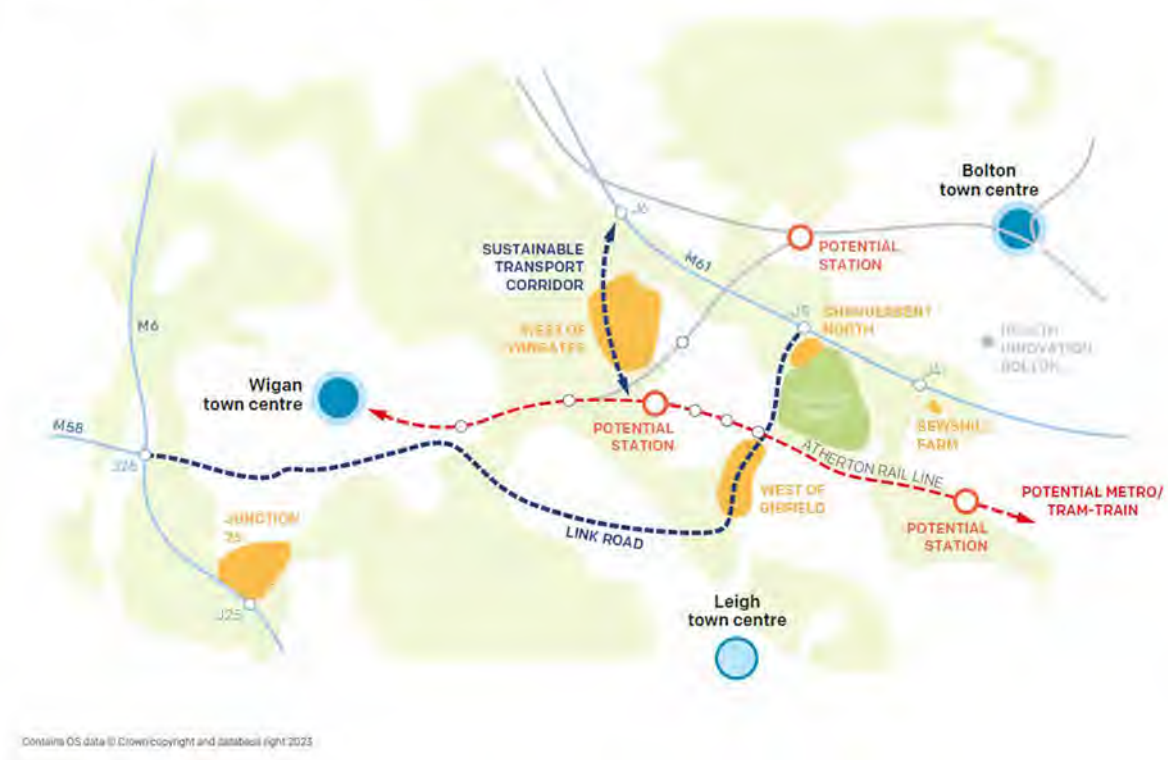

In addition, the following will also be supported:

- The restoration of Hulton Park, and the provision of a Ryder Cup standard golf course and associated leisure and tourism facilities
- The development of land at Royal Bolton Hospital a health innovation cluster, including a health village on land at Royal Bolton Hospital.

Figure 4.6 Wigan-Bolton Growth Corridor (MM4.24)

WIGAN-BOLTON GROWTH CORRIDOR

Sustaining Southern Competitiveness

- 4.58** The southern areas of Greater Manchester are typically characterised by high levels of demand and forecast growth and include some of the city region’s most popular neighbourhoods. Large parts of the south, extending into north Cheshire, have high house prices and relatively high household incomes, but also significant issues of affordability. Nevertheless, there are pockets of deprivation across the southern areas, and hence significant disparities between communities.
- 4.59** Some areas of the south have good rapid transit connections to the City Centre, however there are opportunities to improve connectivity. The area also benefits from the international connections of Manchester Airport. Following the development and completion of HS2 and Northern Powerhouse Rail, parts of Greater Manchester, including the City Centre and Manchester Airport will be amongst the best-connected locations in the country, and the southern areas will be well-located to take advantage of this.

- 4.60** The landscape of the southern areas contrast with the upland landscape of the northern parts of Greater Manchester. The southern areas contain important strategic green infrastructure assets, including major river valleys such as the Mersey and Bollin and some extensive areas of woodland.
- 4.61** Our overall spatial strategy seeks to spread prosperity to all parts of the city region. However, this must be balanced with the need to ensure that the competitiveness of the southern areas is sustained, and the potential of key assets such as the main town centres and Manchester Airport is realised. It is essential that this is done in a sensitive way that protects the character and quality of key landscapes which will also help to deliver broader sustainability objectives.
- 4.62** (AM4.5) A significant amount of investment in both development and new and improved transport infrastructure will be focused around two of Manchester's key assets, Manchester Airport and Wythenshawe Hospital. This will include the selective release of Green Belt for new employment and housing **around the airport, including the Davenport Green area** around the proposed HS2 station and beyond to the hospital and southern edge of Timperley. Development in this location will need to be cognisant of and complementary to the aspirations of existing businesses in the locality.
- 4.63** An additional location in this area which has been identified as being especially important to Greater Manchester, is the proposed development focused around the former chemicals complex at Carrington in Trafford, which will enable a significant amount of contaminated land to be restored. It will make a significant contribution to the area's new housing and economic growth as well as supporting the regeneration of neighbouring Partington and Sale West. Separate policies on the Manchester Airport area and New Carrington are set out below.
- 4.64** Our southern areas benefit from their proximity to prosperous locations, such as Cheshire East and Warrington, and taking opportunities to increase further the economic and functional connections between these areas supports their mutual success. Given the proximity of development outside

the Greater Manchester boundary, to the south, to the need to work with our partners to coordinate major development close to the boundaries of Greater Manchester, particularly in terms of transport implications.

- 4.65** Although policies in this plan do not apply to land within Stockport, it is necessary to acknowledge and welcome the role Stockport will play in sustaining the southern areas, including delivering sustainable communities at its heart. Stockport Council has signalled its intentions in this regard, with the creation of the first Mayoral Development Corporation (MDC) which will help to improve the residential, retail, leisure, office and industrial offer in and around the Town Centre. In delivering a new community of up to 3,500 homes and approaching 100,000 sqm of commercial space over the next 15-20 years, it is clear the role that this MDC will play in sustaining the competitiveness of the southern area.

Policy JP-Strat9: Southern Areas (MM4.25)

The economic competitiveness, distinctive local neighbourhood character and environmental attractiveness of the southern areas will be protected and enhanced. There will be a strong emphasis on prioritising the re-use of making as much use as possible of suitable previously developed (brownfield) land and promoting the roles of the areas' town centres and its other key assets, including education and training facilities enabling people to gain access to employment opportunities. ~~There will be an increase in the mix, type, quality and range of residential offer and a strengthening of its economic role. This will be complemented by improvements to transport connectivity, local character and the selective release of Green Belt in key locations~~ As identified in Chapter 11 of this Plan, a number of sites have been specifically allocated through this Plan in support of the area's future growth.

The economic potential of, and benefits of investment in Altrincham, Trafford's Main Town Centre and Manchester Airport, along with associated transport infrastructure will be maximised. There will be an emphasis on improving transport connections and accessibility by public transport, cycling and walking, ensuring access to key employment opportunities in this area. ~~Development in these areas will contribute to reducing poverty and will be inclusive.~~

~~Development in these locations will be of good quality and design, supported by the necessary infrastructure and amenities and will seek to identify opportunities to protect and enhance the natural and historic environments and to improve the local character.~~

Manchester Airport

- 4.66** (AM4.6) Manchester Airport is the third busiest passenger airport in the UK, and the largest outside London, handling c. 28 million passengers in 2019 and adding £1.4bn GVA to the regional economy and supporting c. 25,000 jobs on-site. It is the only airport in the country other than Heathrow to have two full length runways, but with the key advantage of having significant spare capacity, and the potential to grow to some 55 million passengers a year. Unique among non-London airports, it has the infrastructure, connectivity and scale to sustain a growing network of medium and long-haul routes. This enables Northern Britain to benefit from a major international air gateway for both business and leisure traffic, passengers and freight. This is a vitally important role not just for Greater Manchester but also for a much wider area across the North and Midlands, enabling businesses and residents to access opportunities across the globe and providing a key access point for international visitors to the UK. The airport is a key factor in realising the wider growth agenda for the North and unlocking the economic potential of cities and regions within its catchment area. More locally, the emerging Airport City development (~~part of the Greater Manchester Enterprise Zone~~) is creating a major new economic asset for Greater Manchester, attracting global occupiers and investment attracted by the unrivalled connectivity.
- 4.67** (MM4.26) A major (£1bn) investment programme is underway to transform the airport and improve its facilities to create a much improved customer experience and meet the changing needs of passengers and airlines. Its expanding route network and growth are supported by the Government's policy¹⁴ to make best use of the UK's runway capacity and maintain the UK's

¹⁴ Beyond the Horizon. Making best use of existing runways. DfT June 2018 - see [Aviation strategy: making best use of existing runways](#)

international connectivity and place in the global market. This could also help to reduce pressure on congested airports in London and the South East. Growth and an expanding route network could see throughput growing to make best use of its existing runways and handle around 55 million passengers per annum. ~~In 2020 Manchester Airport Group (MAG) published a new Corporate Social Responsibility (CSR) Strategy.⁽¹⁵⁾ In producing the CSR, MAG recognises that aviation will be one of the hardest industries to decarbonise and as such their new Strategy sets out a commitment to achieving “net zero carbon” emissions from their airport operations by 2038, ahead of the 2050 national target. The CSR has been developed at this important time, with growing awareness of the need to tackle both global and local challenges. The CSR sets out MAG’s ambitious commitments which will guide the sustainable development of the airport. It sets out ways MAG will achieve zero carbon status; how MAG will create quality employment opportunities for all and; how MAG will engage with communities.~~

- 4.68** (MM4.26); (AM4.6) To maximise the contribution of the airport to the wider growth agenda, it needs to be well-connected to the key towns and cities that it serves. High quality reliable and speedy journeys are crucial to spreading the economic stimulus that it creates and encouraging the growth in long haul services. This requires further investment in the North's strategic road and rail corridors, as part of a wider strategy to better connect the region's key gateways and economic centres. The M56 J6 to J8 smart motorway scheme ~~will serve to~~ maximise^s the benefits of recent/ongoing investment in the A556 and M6 J19 improvements. National Highways England have also commenced a South Manchester Highways and Transport Study which is exploring options for improvements to transport links to mitigate the impact on the M56 of proposed growth in this location. The provision of a new HS2 station with journey times to London of just over an hour, and the planned Northern Powerhouse rail network will significantly improve the airport's connectivity, reduce journey times and make the airport area one of the best-connected locations in the country. Journeys to the Airport will also be enhanced by the completion of the Metrolink Western Leg and proposed Bus ~~Rapid Transit~~ priority service(s) along new spine roads

linking development in Timperley Wedge and Medipark into the existing urban areas of Altrincham and Wythenshawe. This improved connectivity, along with improved links and services across Greater Manchester, will not only be vital to increasing the proportion of passengers and staff who access the airport by public transport, but will also support wider business opportunities and investment, attract inbound visitors and help to spread the employment opportunities at the airport to communities across the conurbation reducing inequalities and poverty.

- 4.69** Guided by Manchester City Council's local plan, Manchester Airport's Sustainable Development Strategy and long-term Airport master plans, the airport therefore provides a major opportunity to boost the competitiveness and prosperity of Greater Manchester, and the wider UK, and support higher levels of economic growth. Although Aerodrome safeguarding to protect the safe operation of the airport and the noise footprint associated with aircraft noise place restrictions on the acceptable type of development in certain areas, there is considerable potential to increase the scale of economic activity and housing near to the airport and the proposed HS2 station, enabling more residents and businesses to take advantage of the outstanding connectivity in an area of high market demand.

Policy JP-Strat10: Manchester Airport (MM4.27)

Lying within the area and policy framework covered by JP-Strat 9 this policy seeks to maximise the benefits of the continued operation and sustainable growth of Manchester Airport and its surrounding locality. Development which is in line with:

- Government policy [and](#)
- Manchester's [Local plan policies and](#)
- ~~Manchester Airport Group's Corporate Social Responsibility Strategy~~

will be supported delivering a sustainable world class airport which will help to address issues raised by climate change. With high quality services and facilities it will be the UK's principal international gateway outside London. The airport and its surrounding locality will make a major contribution to the competitiveness of the North, Midlands and Wales by supporting inward investment, international trade and

tourism, high quality new homes and supporting our economic and social regeneration. It will be central to raising our global profile and economic performance.

The accessibility and connectivity of the area will be greatly enhanced, including through:

- A. The development of a new HS2 station immediately to the west of the airport;
- B. Northern Powerhouse Rail connections to other city regions;
- C. The construction of the Western Leg extension of Metrolink via the proposed HS2 station, connecting through Davenport Green back to the existing line near Wythenshawe Hospital;
- D. Improved local public transport services and connections such as Bus [priority Rapid Transit](#) links by a new spine road through the Timperley Wedge allocation towards Altrincham;
- E. Improved local public transport services and connections, including to Stockport and Cheshire East areas;
- F. The provision of a network of cycling and walking routes.

The benefits of the exceptional connections will be maximised, including by:

- 1. Completing the development of Airport City immediately around the airport, which will provide a total of around 500,000 sqm of office, logistics, hotel and advanced manufacturing space ([See Manchester Local Plan](#));
- 2. Continuing to develop Medipark and Roundthorn Industrial Estate as a health and biotech cluster, taking advantage of the research strengths of the adjacent Wythenshawe Hospital and the wider Manchester University NHS Foundation Trust ([See Policy JP Allocation 3.1 'Medipark' and Manchester Local Plan](#));
- 3. Delivering [approximately around](#) 60,000 sqm of office floorspace around the new HS2 Station ([See Policy JP Allocation 3.2 'Timperley Wedge](#));
- 4. Providing [a minimum of around 1,700 1,800](#) new homes to the west of the M56 at Timperley Wedge, up to [2037 2039](#) ([See Policy JP Allocation 3.2 'Timperley Wedge](#));

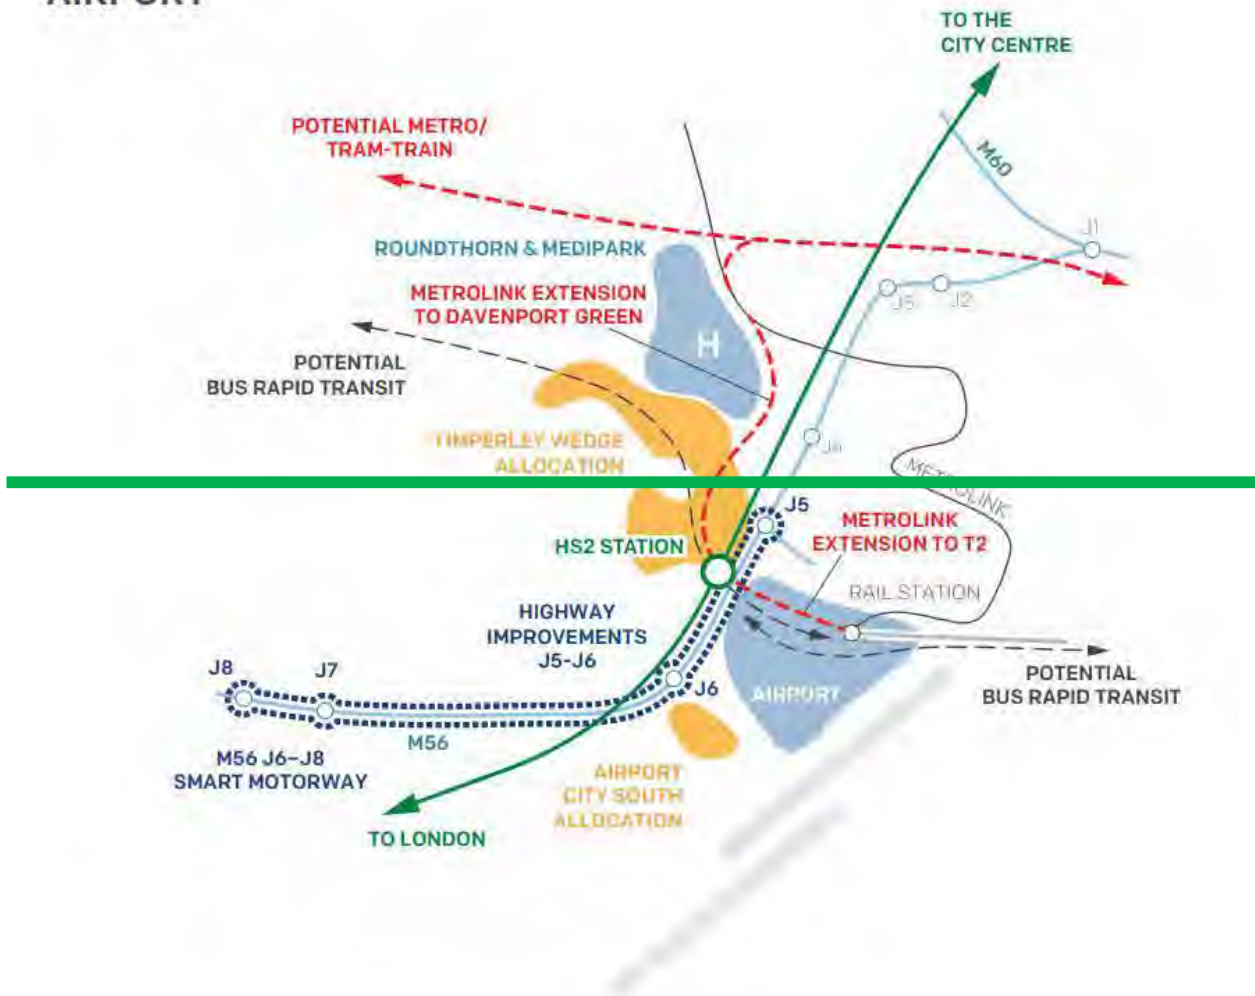

5. Providing sufficient development opportunities to take full advantage of the introduction of HS2 and NPR into this location.

This Plan allocates ~~three~~ two sites near the airport, and makes associated changes to the Green Belt boundaries, as identified in Chapter 11 to support these developments:

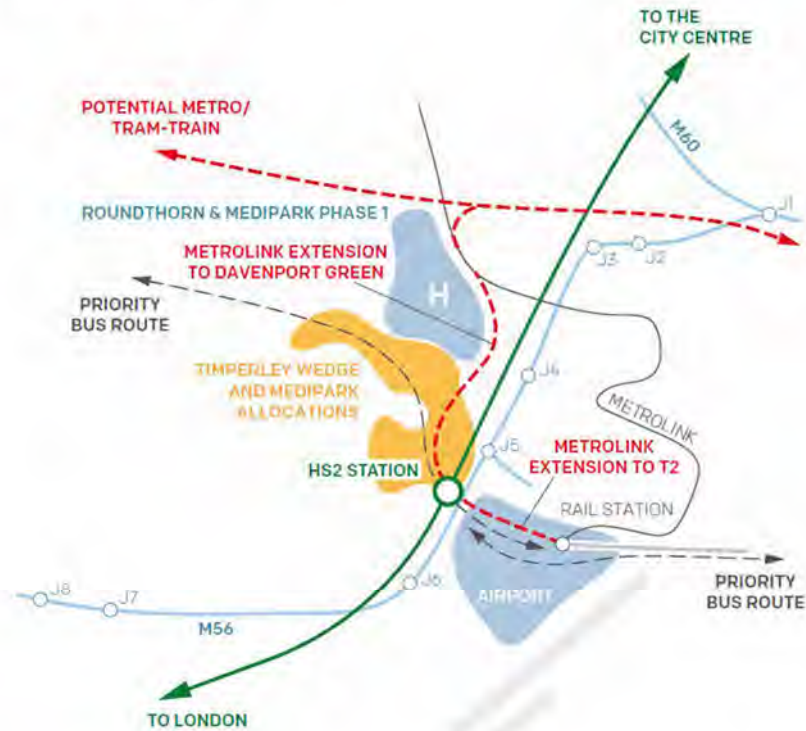

- Policy JP Allocation 3.1 'Medipark'
- Policy JP Allocation 3.2 'Timperley Wedge'
- ~~Policy JP Allocation 10 'Global Logistics'~~

Figure 4.7 Manchester Airport (MM4.28)

New Carrington

- 4.70** New Carrington provides a significant opportunity in this part of Greater Manchester to deliver a transformational mixed use development. This location in the western part of Trafford enables the redevelopment of the extensive former Shell Carrington industrial estate, support the regeneration of neighbouring Partington and Sale West. It will deliver the scale and mix of development and associated infrastructure necessary to ensure the development is sustainable and delivers inclusive growth. The release of some Green Belt land is required to achieve these objectives.
- 4.71** The inclusion of a large amount of employment development and local facilities, as well as a diverse range of housing, will enable New Carrington to function as a sustainable neighbourhood within Greater Manchester rather

than an isolated community. However, it will be important to ensure that it is fully integrated into the existing Partington and Sale West areas, so that its regenerative potential is maximised and existing and new communities are not separated.

- 4.72** The area is currently served relatively poorly by public transport, and significant investment will be required to ensure that residents and workers in the area can travel sustainably. The former railway line that runs through the site has considerable potential in this regard, offering the opportunity to deliver a sustainable transport corridor through the site to Timperley / Altrincham in the east and also extending through to Irlam / Cadishead in Salford to enable better movement across the Manchester Ship Canal. Major improvements in highway access will also be required, including the proposed Carrington Relief Road as well as upgrades to the Carrington Spur and Junction 8 of the M60 which connect into the development area.
- 4.73** New development in this location will adopt sustainable principles, maximising opportunities to mitigate environmental impacts and deliver inclusive growth for the benefit of local communities. Development in this location will extend beyond the end of the Plan period.

Policy JP-Strat11: New Carrington (MM4.29)

Lying within the area and policy framework covered by JP-Strat 9 this policy seeks to deliver a significant mixed use development. Overall, around 5,000 new dwellings ~~Over the period 2020-2037 land to accommodate around 4,300 dwellings~~ and 350,000 sqm of employment floorspace ~~has been identified and~~ will be delivered together with a new local centre.

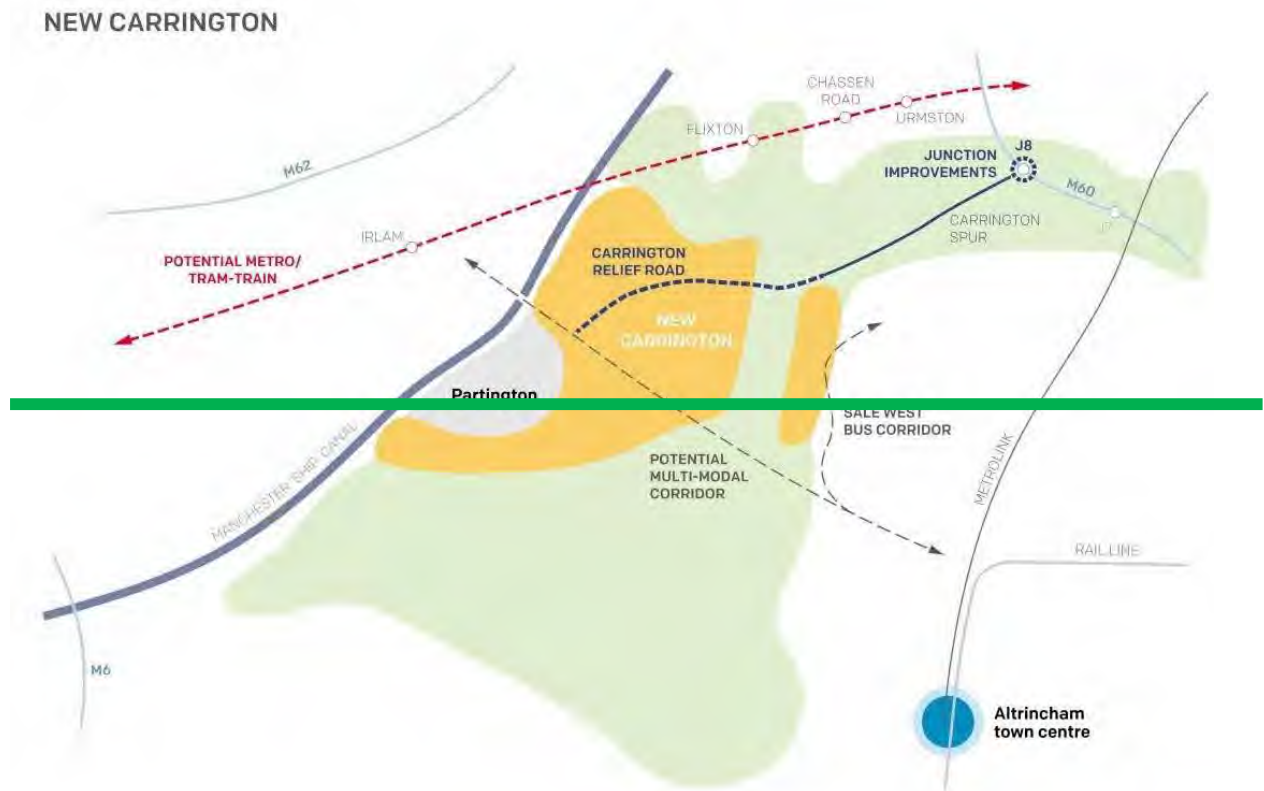

New development will be fully integrated with the existing communities of Carrington, Partington and Sale West, enhancing the quality of places and their local character, ~~including through good quality design, enhanced green infrastructure (and access to it)~~ and ensuring that maximum regeneration benefits are secured.

Major investment in active travel, public transport and highway infrastructure, such as the Carrington Relief Road, improvements to Junction 8 of the M60 and public

transport corridors will be delivered to support the development of New Carrington, ensuring it is well-connected to the rest of Greater Manchester.

Policy JP Allocation 33 'New Carrington' allocates the development site and provides more detailed requirements for its implementation.

Figure 4.8 New Carrington (MM4.30)

Main Town Centres

- 4.74** (MM4.31) We have ~~seven~~ eight main town centres: Altrincham, Ashton-under-Lyne, Bolton, Bury, Oldham, Rochdale, Salford Quays and Wigan. They are immensely important to their host districts, and Greater Manchester as a whole, as a source of local identity and pride, the prime location for shops and services, and a major supply of employment and leisure opportunities. They are complemented by a diverse collection of smaller town centres and local centres across the nine districts.
- 4.75** The main town centres are amongst the most accessible locations by public transport, walking and cycling. Each centre benefits from relatively large catchment populations, which makes them suitable locations for a range of office, retail, leisure and tourism development, but their role in acting as a location for residential use is increasing. It also means that they function as important transport gateways to the wider Greater Manchester area and beyond but services to the City Centre are generally better than between the town centres.

- 4.76** Changes in the retail market and the way that both public and private services are delivered have placed pressures on town centres, for example resulting in the closure of some shops including historic ‘anchor’ stores. The main town centres will need to adapt and respond to changing circumstances if they are to continue to flourish and successfully meet the needs of surrounding communities. The long-standing retail, leisure, cultural and community functions will remain central, but the way they are provided is likely to evolve. Businesses, service providers, community groups and other actors working together in partnership can enhance both the local economy and the popularity of centres. The Mayor's Town Centre Challenge is positively promoting our town centres' evolution.
- 4.77** (MM4.31); (AM4.7) Expanding the resident population of the main town centres will become increasingly important, helping to generate the necessary footfall and vibrancy to sustain facilities and enhance the attractiveness of the centres. Increasing the numbers of residents in town centres will also enable more people to take advantage of their transport connections and ~~for~~ brownfield land ~~to be prioritised in development opportunities~~. This residential market is quite poorly developed in most of the centres at present, but the potential in each is significant. The main town centres offer the opportunity to provide a more affordable alternative to the City Centre ~~and the Quays~~, both for businesses to locate and skilled workers to live, whilst providing excellent access to services and facilities. The public transport corridors into the main town centres will also have an important function, especially as a location for new housing, further increasing the number of people with easy access to town centre facilities by sustainable modes of transport.

Policy JP-Strat12: Main Town Centres (MM4.32)

The role of the main town centres as local economic drivers will continue to be developed, providing the primary focus for office, retail, leisure and cultural activity for their surrounding areas. Development here will offer a significant opportunity to reduce levels of poverty and deliver inclusive growth.

Opportunities to further increase the population catchments of these centres will be taken, including significantly increasing the resident population of the main town centres by providing a mix of type and size of dwellings supported by the necessary infrastructure and amenities including new and improved public spaces and green infrastructure. This will be achieved alongside, rather than displacing, the range of non-residential uses in the centres. Housing growth along the key public transport corridors into the main town centres will also be promoted, further increasing the population catchments of those centres.

The role of the main town centres as major public transport hubs will be developed and supported by a network of active travel routes, enabling residents to have improved access to opportunities across Greater Manchester as well as within the centres themselves.

Development will be carefully managed to ensure that the local distinctiveness of each main town centre is retained and enhanced. Opportunities will also be taken to protect and enhance natural and historic assets in the town centres.

~~A new town centre is proposed for designation at Salford Quays in the Publication Draft Salford Local Plan: Development Management Policies and Designations. Should that designation become part of Salford's Adopted Local Plan, development in that location will be subject to this policy.~~

Strategic Green Infrastructure

- 4.78** Green infrastructure (the network of green and blue spaces and features) provides a range of vital environmental services, contributing to quality of life, supporting economic growth, and promoting good health by enabling recreation and active travel. It is an essential component of attractive and liveable places, and hence its importance must not be underestimated. More details on the approach to green infrastructure are set out in a later chapter titled 'Greener Places' (8 'Greener Places').
- 4.79** Protecting and enhancing the green infrastructure network throughout Greater Manchester (including its accessibility) is central to the overall vision for the city region, but there are a small number of green infrastructure assets that are of particular significance and hence need to be seen as an

integral element of this Plan. They make a major contribution to the character of different parts of Greater Manchester, are key components of the wider network of habitats, and often fulfil other important functions such as managing flood risk, providing recreation opportunities and sequestering carbon.

Policy JP-Strat13: Strategic Green Infrastructure

The following strategic green infrastructure assets will be protected and enhanced as key features:

1. River valleys and waterways (see Policy JP-G 3 'River Valleys and Waterways')
2. Lowland wetlands and mosslands (see Policy JP-G 4 'Lowland Wetlands and Mosslands')
3. Uplands (see Policy JP-G 5 'Uplands')
4. Trees and woodland (see Policy JP-G 7 'Trees and Woodland').

The protection and enhancement of these key strategic green infrastructure assets is complemented by a suite of policies to protect and enhance our network of green infrastructure, including protecting and enhancing sites of ecological value. This will enable our residents to access and maximise the benefits of green infrastructure on their health and wellbeing.

A Sustainable and Integrated Transport Network

- 4.80** The strength and future success of Greater Manchester as a whole and the strategically important locations identified in this Plan will depend partly on the quality of public transport connections. Such links are vital for enabling businesses to take advantage of the city region's huge labour market and skills base, and for residents from all parts of Greater Manchester, and particularly those living in deprived neighbourhoods, to access the large number of jobs, leisure opportunities, social infrastructure (such as education and health care) and other facilities, as this will help to reduce levels of poverty.

- 4.81** Improved public transport between Greater Manchester and other cities will help reduce long-distance car use, support business, and open-up a wider range of employment and leisure opportunities for residents. Proposals for HS2 and Northern Powerhouse Rail will consolidate the position of Greater Manchester as one of the most connected areas in the UK and will support existing businesses, inward investment and job creation. Together they will provide high speed rail connections to London via Birmingham and faster direct routes to Leeds, Sheffield and Liverpool.
- 4.82** Within Greater Manchester rapid transit routes, such as rail, Metrolink and Bus Rapid Transit, are especially important, as they provide the type of frequent, fast, high quality services that are a particularly attractive alternative to the car. Greater Manchester is already relatively well-served by rapid transit networks, but there is considerable scope for further expansion and enhancement including the development of orbital links. The focus of such routes is typically the City Centre - which is why there is an urgent need to increase the capacity of the network in the central area - but there are also important links between other centres and key social infrastructure facilities.
- 4.83** The significance of these rapid transit routes, and the costs involved in constructing and operating them, make it essential that their benefits are maximised. Delivering a significant increase in the number of residents that have easy access to such routes is therefore a central priority for this Plan, including optimising development densities and improving the network of cycling and walking routes within the urban area to enable as many people as possible to live close and/or to have easy access to sustainable travel options, thereby reducing the need to travel by car.
- 4.84** Almost 76% of public transport trips in Greater Manchester are by bus across a very broad network of services, which means there is also a strong imperative to improve and strengthen our bus network for existing passengers and to encourage new users. Greater Manchester is currently assessing options for integrated ticketing, reform of the bus market and whole route upgrades, which have the potential to bring significant benefits to the network.

4.85 Currently around half of the trips made by our residents are less than 2km in length with over 40% of these trips being made by car. There is therefore great potential for increasing cycling and walking across the Plan area, which will be fundamental in achieving the city region’s overall transport vision. High-quality new and improved walking and cycling routes and infrastructure will be needed, and the barriers that currently discourage people from walking and cycling will need to be removed. The Greater Manchester Cycling and Walking Investment Plan “Change a Region to Change a Nation” sets out our ambition to become the first city-region in the UK to have a fully joined up walking and cycling network.

Policy JP-Strat14: A Sustainable and Integrated Transport Network

The transport network will be improved so that half of all daily trips can be made by public transport, cycling and walking, especially those shorter journeys around neighbourhoods.

An ambitious programme of investment in our transport network will be crucial to ensure much greater access for people across the Plan area to high quality, high frequency, easy-to use, public transport services, and benefit from healthy and active streets. The local programme of investment needs to be complemented by significant national and regional projects such as HS2 and Northern Powerhouse Rail to ensure that connectivity is significantly improved to key locations outside of the conurbation, such as London, Liverpool, Leeds, Sheffield and Birmingham. Collectively this will ensure that our residents will have access to economic opportunities.

The creation of a much larger, integrated, rapid transit network – incorporating bus, Metrolink, tram/train and rail services – will be supported by policies that focus new development in locations close to existing and proposed public transport connections. And initiatives such as integrated smart ticketing, reform of the bus market, rail refranchising and increasing capacity at city centre bottlenecks will ensure all new routes function effectively as part of the overall network.

Higher densities will typically be appropriate in locations with good access to rapid transit connections.

New development will have a significant role in delivering our future sustainable and integrated transport network in order to reduce car dependency and increase levels of walking, cycling and public transport.

Blank Page

Sustainable and Resilient Places

Sustainable Development

- 5.1** (AM5.1) The purpose of the planning system as set out in legislation and the National Planning Policy Framework (~~2019~~2021) is to contribute to the achievement of sustainable development and to maintain a presumption in favour of such development as part of plan making and decision taking. At a very high level, the objective of sustainable development can be summarised as meeting the needs of the present without compromising the ability of future generations to meet their own needs.
- 5.2** Achieving sustainable development means that the planning system has three overarching objectives, which are interdependent and need to be pursued in mutually supportive ways (so that opportunities can be taken to secure net gains across each of the different objectives).
- 5.3** This idea of delivering economic, social and environmental benefits together, in a mutually reinforcing way rather than sacrificing some objectives to deliver others is at the heart of achieving the United Nations Sustainable Development Goals¹⁵ and central to this Plan and will contribute to Greater Manchester tackling climate change.
- 5.4** This Plan can contribute to achieving many of these objectives, as well as supporting the overarching goal of sustainable development. This is reflected in the overall strategy, the proposed scale and location of development, and the individual policies and allocations. It includes protecting and enhancing key environmental resources, following the waste hierarchy, reducing waste generation, using sustainable construction techniques, combating and adapting to climate change, reducing carbon emissions to meet Greater Manchester's 2038 carbon neutrality target date, supporting high levels of economic growth in a way that can benefit all residents, and delivering

¹⁵ <https://www.un.org/sustainabledevelopment/sustainable-development-goals/>

sustainable patterns of development that minimise the need to travel and reliance on the car.

Policy JP-S1: Sustainable Development (MM5.1)

To help tackle climate change, development should aim to maximise its economic, social and environmental benefits simultaneously, minimise its adverse impacts, utilise sustainable construction techniques and actively seek opportunities to secure net gains across each of the different objectives.

In preparing plans, Preference will be given to making as much use as possible of suitable using previously-developed (brownfield) land and vacant buildings to meet development needs.

In bringing forward previously developed sites for development, particular attention will be paid to tackling land contamination and stability issues, ensuring that appropriate mitigation and remediation is implemented to enable sites to be brought back into use effectively.

Addressing Climate Change

5.5 (AM5.2) Greater Manchester's Vision is to be at the forefront of action on climate change and to make its fair contribution to international commitments¹⁶ by becoming a carbon neutral city region by 2038. In acknowledgment of climate change, by 2020, all 10 districts and the Greater Manchester Combined Authority have declared a climate emergency. To support this vision a 5 Year Environment Plan¹⁷ was launched in 2019 to identify the urgent actions that are needed to ensure Greater Manchester can follow the required pathway for carbon neutrality.

5.6 To meet our carbon commitments we will need to:

- Be carbon neutral by 2038
- Hold cumulative carbon dioxide emissions to within our carbon budget
- Initiate a programme of mitigation to reduce emissions including by:

¹⁶ [A Greater Manchester carbon budget compliant with the Paris Agreement \(2019\) – Tyndall, Quantifying Paris for Manchester Report](#)

¹⁷ https://greatermanchester-ca.gov.uk/media/1986/5-year-plan-branded_3.pdf

- Significantly upscaling solar photovoltaic energy;
- Reducing heat demand in homes;
- Moving away from carbon intensive gas as the primary source of heat;
- Reducing heating and cooling demand for public and commercial buildings;
- Increasing biofuel use;
- Enable sustainable choices for travel and decarbonise transport;
- Significantly upscaling building retrofit; and
- Increase the delivery of nature-based solutions and biodiversity net gain.

5.7 (MM5.2) In supporting our ambitions, climate change is a key theme running throughout the plan, rather than being reduced to a single policy, and it is only through this combination of actions **that it can be properly addressed. In particular we set out:**

- Methods to de-carbonise the city region through new and existing development, effective land management and through the provision of infrastructure and new technologies Policy JP-S 2 'Carbon and Energy';
- The delivery of renewable and low carbon energy schemes Policy JP-S 3 'Heat and Energy Networks';
- ~~Measures that will be taken to future proof the city region to mitigate environmental challenges, including climate change Policy JP-S 4 'Resilience';~~
- Water based measures to adapt and reduce the impacts of climate change Policy JP-S 5 'Flood Risk and the Water Environment'; and
- Measures to help achieve a circular and zero-waste economy Policy JP-S 7 'Resource Efficiency'.

Carbon and Energy

5.8 The vast majority of the existing homes in Greater Manchester will still be in existence in 2050. Existing domestic buildings contribute 33% of Greater Manchester's carbon dioxide emissions whilst existing non-domestic

buildings contribute 35%.¹⁸ Retrofitting the existing building stock therefore presents a significant opportunity to help meet the 2038 carbon neutrality target. This can also contribute to the reduction of fuel poverty when targeted appropriately.

5.9 (AM5.2) Without any mitigation, new development is estimated to result in around a 3% increase in energy demand.⁴⁹ However, new development also enables carbon reduction through the delivery of sustainable patterns of growth²⁰, which can support new public transport investment, the establishment of new energy centres and decentralised heat infrastructure, and nature based solutions to sequester carbon, which also provide multi-benefits, as well as opportunities to deliver high standards of energy efficiency through good design. Clean growth is essential to meet future emission targets and to avoid costly retrofit programmes at a later date. Making this happen will require a co-ordinated approach towards carbon reductions through new and existing buildings and strategic energy infrastructure.

New Paragraph: (MM5.2)

Local Area Energy Plans have been developed by the PfE districts in collaboration with the GMCA and Energy Systems Catapult (ESC). The Local Area Energy Plans are being funded by BEIS and are consistent with Government policy.²¹ They will become a critical evidence base for Local Plans in setting out possible and cost-effective options whilst highlighting where investment is needed and will inform planning decisions. It is anticipated that Local Plans will further identify geographical locations for such energy assets, as considered necessary/appropriate within individual local planning authority areas.

¹⁸ Energy Systems Catapult (2016), Greater Manchester Spatial Energy Plan: [GM Spatial Energy Plan: Evidence Base Study](#)

⁴⁹ Energy Systems Catapult (2016), Greater Manchester Spatial Energy Plan: [GM Spatial Energy Plan: Evidence Base Study](#)

²⁰ <https://www.rtpi.org.uk/research/2018/may/settlement-patterns-urban-form-and-sustainability/>

²¹ <https://www.gov.uk/government/consultations/proposals-for-heat-network-zoning>

- 5.10** Meeting the 2038 carbon neutrality target will require a radical transformation across a range of sectors to drive carbon reduction. Within this, new development will have a critical role to play and all new homes and commercial/industrial buildings will need to achieve net zero carbon by 2028. The definition of net zero carbon development has been established by the UK Green Building Council.²² It is expected that development in the Plan area will apply a net zero carbon approach to operational emissions up until 2028, thereafter emissions in construction should be considered. Minimum carbon reduction targets will be set in line with the Future Homes Standard of 80% or until such a time this is superseded.
- 5.11** To provide further confidence in decision making, supporting research²³ was commissioned to outline how the pathway to 2028 can be achieved for ‘net zero in operation’²⁴ by setting out critical milestones and measures that would be expected when following the energy ‘hierarchy’ and adopting a fabric first approach. For overall carbon reduction targets it was recommended that these follow the trajectory as advised within the Future Homes Standard of 31% (2020) and 80% (2025)²⁵.
- 5.12** (AM5.2) As the electricity grid becomes more decarbonised the ability of renewable energy to offset carbon emissions minimises. However the contribution of such technologies to energy demand reduction and running costs become significant as services move to all electric solutions. The research has shown that in a low carbon context, the use of heat pumps alone could lead to higher running costs (as they consume energy, not generate), increasing the potential for more households being in fuel poverty, production of waste heat and an increased risk of creating local network capacity issues.

²² <https://ukgbc.org/wp-content/uploads/2019/04/Net-Zero-Carbon-Buildings-A-framework-definition.pdf>

²³ Currie and Brown/Centre for Sustainable Energy (2020), GMCA Energy and Carbon Implementation Study

²⁴ <https://ukgbc.org/wp-content/uploads/2019/04/Net-Zero-Carbon-Buildings-A-framework-definition.pdf>

²⁵ [Government response to Future Homes Standard consultation](#)

- 5.13** For Greater Manchester to meet its carbon neutrality commitments there has to be an increase in renewable energy generation. Community initiatives are likely to play an increasingly important role in the uptake of renewable energy and should be encouraged as a way of providing positive local benefits to wider society. The advantages of increasing renewable and low carbon energy capacity will need to be balanced against any potential impacts such as on residential amenity, local environment and landscape character, sites of conservation and heritage value, telecommunications and aviation equipment and air quality.
- 5.14** (MM5.2) Based on the evidence which has informed the 5 Year Environment Plan and achieving net zero carbon in new development, this has shown that there will need to be a significant increase in photovoltaic technology. Therefore in Greater Manchester the following targets will be sought in relation to reducing energy demand and onsite renewable energy generation [within residential developments](#).

Table 5.1 Targets For Reducing Energy Demand and Onsite Renewable Energy Generation within residential developments (MM5.2)

	Space Heat Demand ²⁶	Hot Water Energy Demand ²⁷	Renewable Energy Generation Targets
2021 - 2025	Houses (30kWh/m ²) Flats (25kWh/m ²)	20% energy demand reduction <u>in the total heat required for water heating</u> (compared to Part L 2013)	*Photovoltaic installation: 20% ground floorspace
2025 - onwards	Houses (20kWh/m ²) Flats (15kWh/m ²)	[^] 20% energy demand reduction <u>in the total heat required for water heating</u> (compared to Part L 2020)	*Photovoltaic installation: 40% ground floorspace
*Ground floorspace used as a proxy for available roof area.			
[^] will need to be reviewed with Future Homes Standard 2025 to determine if savings already embedded.			

5.15 ~~(MM5.2) Unregulated emissions (e.g. those associated with plug loads/appliances) are expected to be assessed as part of the requirement to meet ‘net zero carbon’ in operation from 2025 onwards. In calculating carbon emissions from 2025, ‘unregulated’ emissions (e.g.. those associated with cooking and small appliances) should be assessed, in addition to ‘regulated’ emissions.~~ The only way that this can be deliverable will be through the use of onsite electricity generation or through carbon offsetting (‘allowable

²⁶ As calculated within SAP 10.2 2012, Space Heating Requirement (Box989 or equivalent at later SAP versions). It does not take into account the efficiency of the space heating system. It is based on a fabric first approach (insulation and airtightness)

²⁷ Reduction in expected DHW grid energy demand compared to the Part L concurrent notional building. Takes into account the efficiency of the domestic hot water generating system, on-site energy generation and direct use, and any other passive hot water energy recovery systems installed, as shown in Calculation Reference 62 in SAP10.2.

solutions') as occupants' lifestyle choices are not pre-determined by energy efficiency measures associated with construction standards.

- 5.16** (MM5.2) By following the energy hierarchy, new development will need to achieve net zero carbon through the maximisation of on-site measures first. However, in circumstances where a development has demonstrated that the hierarchy has been followed and there are no reasonable alternatives to meet the minimum carbon reductions, then payment to offset remaining emissions will also be required. Such payments should be expected to fund other carbon saving programmes within Greater Manchester to help meet the 5 Year Environment Plan targets (such as energy efficiency retrofit and renewable energy installations). The Mayor of Greater Manchester ~~is~~ has developed ~~ed~~ ing an the Greater Manchester Environment Fund, which will provide a mechanism for carbon offset payments to be made. ~~Districts may also develop alternative approaches within Local Plans. Districts may also set up their own carbon off-setting schemes and set their own carbon price. District carbon off-set funds will need to be ring-fenced and used effectively to support local carbon reduction projects and programmes (such as retrofitting existing properties with energy efficiency measures).~~
- 5.17** When considering a whole life approach for any new building, embodied emissions from construction can account for up to half of the carbon impacts associated with its lifecycle.²⁸ In addition, other emissions can be attributed to the end-of-life stages such as demolition, repair or refurbishment.
- 5.18** (AM5.2) It is also important that post occupancy evaluation is considered as part of a monitoring programme to ensure buildings function as they are designed and mitigation measures can be identified to address any performance gap (where a buildings modelled energy and carbon performance does not equate to actual in-use operation). Various industry initiatives²⁹ are also beginning to address this issue so that this can be

²⁸ [Whole Life Carbon Assessment for the Built Environment](#)

²⁹ Such as BSRIA Soft Landings Framework, Better Buildings Partnership Design for Performance initiative and the Governments Soft Landings (GSL)

minimised ~~as part~~ early on as part of the design and build process. Supplementary planning guidance can also help developers and planning officers to identify the level of information required to meet these requirements as well as wider policy implementation.

- 5.19** (MM5.2) Greater Manchester seeks to promote investment in new zero-carbon technologies, to reduce the reliance on carbon-based fuels to accelerate the speed at which such new technologies become financially viable and/or technically feasible. ~~Work undertaken by the Tyndall Climate Change Research Centre³⁰ has shown that the continued extraction of fossil fuels will not be compliant with a carbon emissions reduction pathway that is aligned with international commitments within the ‘Paris Agreement’. It is therefore considered prudent to not exploit new sources of hydrocarbons and keep fossil fuels in the ground so at this point in time we will not support hydraulic fracturing (fracking).~~

(MM5.2) New Paragraphs:

Under amendments to the Building Regulations, the Government has introduced new requirements for installing electric vehicle charge points in new homes, new non-residential buildings, and when some buildings are renovated. New developments will need to meet the requirements set out in Part S of the Building Regulations, unless superseded by relevant Local Plan policies.

In considering the adequacy of provision of electric vehicle charging points in new development, other factors may also need to be taken into account, including:

- i. The type of development which will influence the EV user profiles, the vehicle dwell times and the charging behaviour all of which will

³⁰ ~~Report to inform Greater Manchester Spatial Framework – Carbon and Energy Policy, Tyndall (2019)~~

determine the type of points (fast or rapid or a mix of both) and the management arrangements required.

- ii. The physical location and design of EV charge points within a development to ensure that they are sensitively located and do not negatively affect the street scene, pedestrian and cyclist amenity or access, particularly for people with a disability. Design should also consider the needs of disabled EV drivers.
- iii. Potential for EV Car Club requirements which also relates to the type of development and its location; and
- iv. The management, operation and maintenance requirements of the charge points (private, workplace or publicly accessible charge points managed, operated and maintained by an EV charge point provider).

Policy JP-S2: Carbon and Energy (MM5.3)

The aim of delivering a carbon neutral Greater Manchester no later than 2038, with a dramatic reduction in greenhouse gas emissions, will be supported through a range of measures including:

1. Promoting the retrofitting of existing buildings with measures to improve energy efficiency and generate renewable and low carbon energy, heating and cooling;
2. Promoting the use of life cycle cost and carbon assessment tools to ensure the long-term impacts from development can be captured;
3. Taking a positive approach to renewable and low carbon energy schemes, particularly schemes that are led by, or meet the needs of local communities;
4. ~~Keeping fossil fuels in the ground;~~

5. ~~Planning for a balanced and smart electricity grid by identifying geographical locations which could support energy assets³⁴;~~
6. Increasing the range of nature-based solutions including carbon sequestration through the restoration of peat-based habitats, woodland management, tree-planting and natural flood management techniques;
7. ~~Development of Local Area Energy plans to develop cost effective pathways to achieve carbon targets;~~
8. An expectation that new development will, unless it can be demonstrated that it is not practicable or financially viable;
 - a. Be net zero carbon⁽³²⁾ ~~from 2028 by following the energy hierarchy (with any residual carbon emissions offset)~~, which applies:
 - from adoption – to regulated operational carbon emissions;
 - from 2028 - to all emissions ‘in construction’.

From 2025 development should also calculate and minimise carbon emissions from unregulated emissions alongside regulated emissions.

Development proposals should set out how this has been achieved in an energy statement in accordance with the energy hierarchy, which in order of importance seeks to:

- i. Minimise energy demand;
- ii. Maximise energy efficiency;
- iii. Utilise Use renewable energy;
- iv. Utilise Use low carbon energy; and

³⁴ ~~Such assets could be heating / cooling networks, electricity generation or storage infrastructure or a mixed hybrid approach subject to local demand and connectivity~~

³² ~~Applied to operational net zero carbon up to 2028 and considered net zero ‘in construction’ from 2028 onwards in line with UK GBC Framework (<https://www.ukgbc.org/ukgbc-work/net-zero-carbon-buildings-aframework-definition/>). Minimum carbon reduction target Target trajectory is expected to be in line with 2025 Future Homes Standard; of 80% net zero carbon is defined in the UK GBC Framework (<https://ukgbc.org/wp-content/uploads/2019/04/Net-Zero-Carbon-Buildings-A-framework-definition.pdf>).~~

- v. Utilise other energy sources.

From 2025 any residual carbon emissions that cannot be fully mitigated on-site should be offset, in agreement with the relevant local planning authority through a financial contribution to a carbon offset fund.

~~With an interim requirement that all new dwellings should seek a minimum 19% carbon reduction against Part L of the 2013 Building Regulations.³³~~

As an interim measure, development should be consistent with the 2022 Part L Building Regulations unless superseded by changes to building regulations and/or national or local planning policies.

- b. Incorporate adequate electric vehicle charging points, in line with Part S of the Building Regulations, unless superseded by relevant Local Plan policies, to future proof for the likely long-term demand, taking account of the potential maximum energy demand for the site;
- c. Where practicable, prioritise connection to a renewable energy/heating/cooling network in the first instance or a low carbon energy/heating/cooling network that is adaptable to non-fossil fuels at a later date;
- d. In residential developments, Achieve energy demand reductions for residential development in terms of space heat demand; hot water energy demand and the delivery of on-site renewable energy generation, in accordance with Table 5.1.

For renewable energy generation priority should be given to PV installation where technically feasible, alternative technologies will be appropriate where the equivalent generation is evidenced.

- e. For non-residential developments, achieve at least BREEAM excellent standard (or equivalent) for the 'Ene 01 – reduction of energy use and

³³~~Or until such time that this level is superseded by changes to national building regulations~~

carbon emissions' category rising to 'BREEAM outstanding' equivalent for ENE 01 from 2028.

- f. Include a detailed energy statement to demonstrate via site relevant evidence how the development has sought to maximize reductions in carbon emissions in line with relevant policy targets, including the minimisation of overheating risks and appropriate measures for post occupancy evaluation. Whole life cycle emissions should be considered where possible.

Districts ~~Local Plans~~ may set out specific carbon emission reduction and energy demand targets within Local Plans targets, particularly if carbon neutral targets have been set sooner than 2038 or promote other measures through which energy efficiency of buildings and renewable energy generation can be achieved.

Heat and Energy Networks

- 5.20** (MM5.4) Around two-thirds of Greater Manchester's carbon emissions come from domestic and commercial buildings. Government analysis³⁴ identifies heat/energy networks as a cost-effective solution to this issue within areas of high heat density, with modelling suggesting that heat networks could be an important part of the least-cost mix of technologies needed to achieve UK-wide decarbonisation targets by 2050. Figure 5.1 shows the broad 'Heat and Energy Network Opportunity Areas' across the nine districts and these areas will be further refined by the districts when more local evidence becomes available.
- 5.21** (AM5.3) Heat and energy networks have the potential to achieve significant emissions reductions and have significant potential for promoting regional growth in the Low Carbon sector.³⁵ The shift to a low carbon economy

³⁴ See <https://www.gov.uk/government/publications/the-future-of-heating-a-strategic-framework-for-low-carbon-heat> and <https://www.gov.uk/government/publications/the-future-of-heating-meeting-the-challenge>

³⁵ See <http://enworks.com/resources/ESTA%20Wedges%20Approach%20in%20Greater%20Manchester%20Final.pdf>

creates the emergence of new sectors and technologies, which in turn requires new occupations, skills and expertise to be developed in the labour market. This Plan seeks to ensure that its residents will be ready for these new opportunities.

5.22 (AM5.3) Further analysis³⁶ has identified heat networks as among the technologies/systems offering the highest technical potential to contribute to ~~carbon emissions~~ the reductions in carbon emissions. The dense urban nature of some parts of Greater Manchester and the scale of development proposed in the Plan allocations means that there are opportunities for significant growth of heat networks aligned with, and building out from, strategic development sites. Analysis by Government³⁷ suggests a threshold of around 26 kWh/m² /year above which heat networks are likely to be viable (noting that this figure is one of several factors that may affect viability and is commonly used to inform early-stage analysis only). National Heat Map data³⁸ suggests many of our urban areas are above this viability threshold.

5.23 (MM5.4) The UK Clean Growth Strategy (CGS)³⁹ sets out possible pathways to decarbonise the UK's economy by 2050 if the requirement of at least ~~an~~ 80-100% for the reduction in greenhouse gas emissions⁴⁰ is to be achieved.

(MM5.4) New paragraph.

To comply with policy JP-S3, heat and energy network assessments will be required as part of an energy statement to support planning applications for new developments within the identified "Heat and Energy Network Opportunity Areas" to demonstrate compliance with PfE energy policies. To ensure consistency of approach and to aid the decision-making process,

³⁶ See https://www.greatermanchester-ca.gov.uk/media/1363/spatial_energy_plan_exec_summary.pdf <https://www.greatermanchester-ca.gov.uk/media/1277/spatial-energy-plan-nov-2016.pdf>

³⁷ See [Estimating the cost-reduction impact of the Heat Network Investment Project on future heat networks](#) and [Assessment of the Costs, Performance, and Characteristics of UK Heat Networks](#)

³⁸ See <https://www.cse.org.uk/projects/view/1183>

³⁹ See <https://www.gov.uk/government/publications/clean-growth-strategy>

⁴⁰ Set out in the Climate Change Act (2008) - see <https://www.legislation.gov.uk/ukpga/2008/27/contents>

decentralised heat/energy network assessments are required to demonstrate consideration and analysis of:

- a. Identification of existing and proposed heat/energy loads;
- b. Identification of heat/energy supply sources;
- c. Identification of opportunities to utilise renewable and low carbon energy sources;
- d. Identification of opportunities to utilise waste and secondary heat sources;
- e. Impact of proposals and technology choices on local air quality;
- f. Design according to national best practice in relation to efficient heat network design (e.g. CIBSE CP1 Heat Networks: Code of Practice for the UK⁴¹, or equivalent); and
- g. Adopting appropriate consumer protection standards (e.g. Heat Trust⁴² or equivalent).

Policy JP-S3: Heat and Energy Networks (MM5.5)

The provision of decentralised energy infrastructure is critical to the delivery of our objectives for low carbon growth, carbon reductions and an increase in local energy generation. The following measures will help to achieve this:

1. Delivery of renewable and low carbon energy schemes will be supported with particular emphasis on the use of decentralised energy networks in areas identified as “Heat and Energy Network Opportunity Areas”. These ~~will be~~ have been identified where:

⁴¹ https://www.theade.co.uk/assets/docs/resources/Code_of_Practice_for_Heat_Networks_-_A_guide_for_owners_and_developers.pdf

⁴² <https://www.heattrust.org/>

- a. Existing heat/energy networks are operational or have been commissioned;
 - b. Proposals for new heat networks/energy networks are being progressed, or future opportunities have been identified in city-region master planning;
 - c. Sufficient density of existing heat demand occurs⁴³; and
 - d. Significant future development is proposed at the strategic development locations.
2. Within the identified “Heat and Energy Network Opportunity Areas”, unless it can be demonstrated that there are more effective alternatives for minimising carbon emissions or such connection is not practicable or financially viable, it is expected that there will be:
- a. ~~A requirement that n~~New residential developments that are '10 dwellings or more' or other developments over 1,000 m² floorspace shall should evaluate the viability of:
 - i. ~~Connecting~~ to an existing or planned heat/energy network or be designed to enable future connection (where within 500m of such a network) (where such a network has been identified within the Heat Network Opportunity Areas); and/or
 - ii. ~~Installing~~ a site-wide or communal heat/energy network solution.
 - b. ~~A requirement, where unviable to connect to an existing network or install a site-wide or communal heat/energy network, for new development to incorporate appropriate capability to enable future connection (e.g. adequate space in plant room for plate heat exchangers, capped-off flow/return connections);~~
 - c. ~~— A ‘presumption in favour⁴⁴ of network connection’ where new residential developments over 10 dwellings and other developments~~

⁴³ National Heat Map

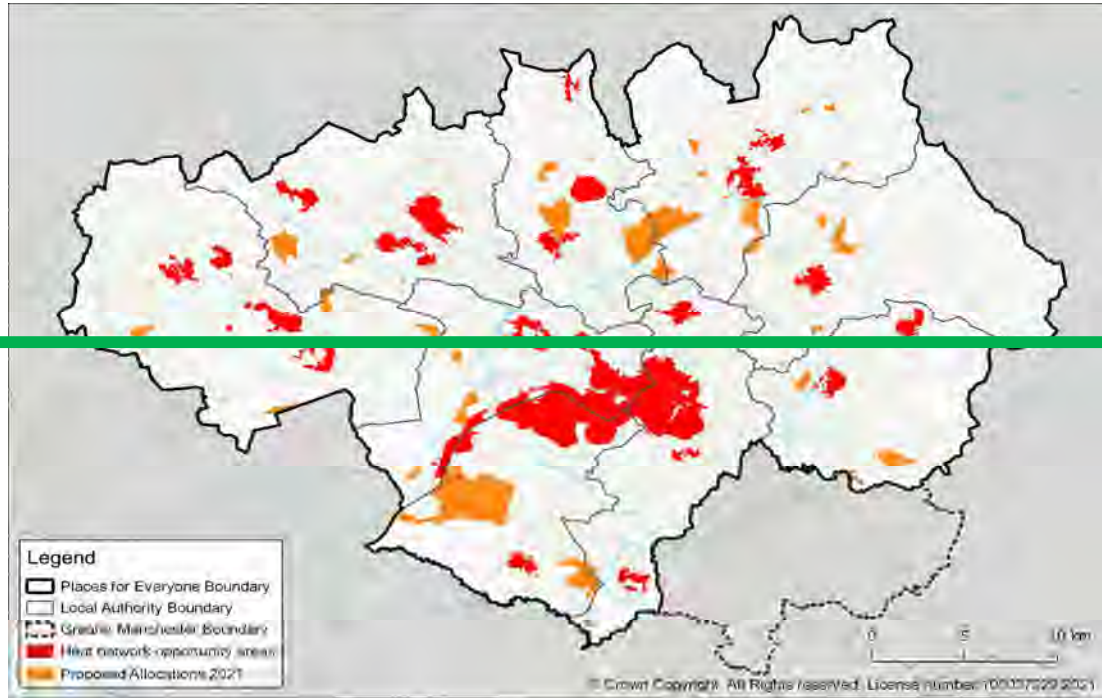

⁴⁴ Department for Communities and Local Government, National Planning Policy Framework, DCLG (2012), Paragraph 11

- ~~over 1,000 sqm floorspace are within 500m of an existing heat network, or where a network is being delivered;~~
- d. An expectation that new industrial development will demonstrate that opportunities for using waste heat locally have been fully examined, and included in proposals ~~unless proven to not be viable;~~
 - e. An expectation that where publicly-owned buildings and assets adjoin new major development sites, opportunities for these buildings and assets to connect to site-wide proposals will be considered; and
 - f. An expectation that any site-wide networks will be designed so as to enable future expansion to adjoining buildings or assets as appropriate.
3. ~~In support of the above, all decentralised heat/energy network viability assessments are required to demonstrate consideration and analysis of:~~
- a. ~~Identification of existing and proposed heat/energy loads;~~
 - b. ~~Identification of heat/energy supply sources;~~
 - c. ~~Identification of opportunities to utilise renewable and low carbon energy sources;~~
 - d. ~~Identification of opportunities to utilise waste and secondary heat sources;~~
 - e. ~~Impact of proposals and technology choices on local air quality;~~
 - f. ~~Design according to national best practice in relation to efficient heat network design (e.g. CIBSE CP1 Heat Networks: Code of Practice for the UK⁴⁵, or equivalent); and~~
 - g. ~~Adopting appropriate consumer protection standards (e.g. HeatTrust⁴⁶, or equivalent).~~

⁴⁵ ~~[Heat networks: Code of Practice for the UK](#)~~

Figure 5.1 Heat and eEnergy Nnetwork opportunitiesOpportunity Areas (MM5.6)

Resilience (MM5.7)

~~5.24 — Greater Manchester aims to be one of the most resilient places in the world.~~

~~5.25 — A key part of achieving sustainable development is ensuring resilience, making sure that our places maintain capacity to function, so that the people living and working here survive and thrive no matter what stresses or shocks they encounter. A significant challenge within this is the ability to respond to future impacts from climate change.~~

~~5.26 — Greater Manchester is part of the Rockefeller Foundation’s 100 Resilient Cities programme (100RC)⁴⁷, which aims to help cities become more resilient to potential challenges. Greater Manchester has produced a Resilience Strategy as part of this programme. The ten districts have also~~

⁴⁷ <https://www.rockefellerfoundation.org/100-resilient-cities/>

~~signed up to the United Nations' Making Cities Resilient Campaign, which aims to reduce disaster risk.~~

~~5.27 — The need to plan to reduce chronic stresses as well as minimise the impact of acute shocks means that planning for resilience has to be all-embracing, and so many elements of this plan have a role to play.~~

~~5.28 — The Greater Manchester Community Risk Register⁴⁸ and work under the 100RC programme identify that river and surface water flooding, hazardous materials accidents, terrorism, and disease outbreaks are some of the most significant resilience challenges faced. The way in which Greater Manchester develops will have a significant impact on future levels of risk and vulnerability, and the ability of people and places to recover from acute shocks.~~

~~**JP-S4: Resilience** (MM5.8)~~

~~Development will be managed so as to increase considerably the capacity of its citizens, communities, businesses and infrastructure to survive, adapt and grow in the face of physical, social, economic and environmental challenges, including climate change. Key measures will include:~~

- ~~1. — Ensuring that developments make appropriate provision for response and evacuation in the case of an emergency or disaster;~~
- ~~2. — Supporting the retrofitting of existing buildings, infrastructure and places to enhance their resilience;~~
- ~~3. — Locating critical infrastructure and vulnerable uses away from locations at a high risk of acute shocks;~~
- ~~4. — Providing adaptable buildings and places that can easily respond to changing needs, future climate impacts and new technologies;~~
- ~~5. — Designing out opportunities for crime, anti-social behaviour and terrorism;~~

⁴⁸ <https://www.gmemergencyplanning.org.uk/risks/how-we-assess-risk/community-risk-register/>

6. ~~Designing indoor and outdoor environments to provide a reduction and respite from more extreme temperatures and winds associated with climate change and greater urbanisation;~~
7. ~~Increasing the size, spread, quality and interconnectedness of the green infrastructure network, enabling the city region, its citizens and wildlife to adapt to changing conditions;~~
8. ~~Taking an integrated catchment-based approach to managing flood risk;~~
9. ~~Maintaining a very high level of economic diversity across Greater Manchester;~~
10. ~~Contributing to the delivery of at least 50,000 additional affordable homes up to 2037;~~
11. ~~Promoting significant enhancements in education, skills and knowledge;~~
12. ~~Supporting healthier lifestyles and minimising potential negative impacts on health including air pollution; and~~
13. ~~Carefully controlling the location of hazardous installations and new development that could be adversely affected by them.~~

Flood Risk and the Water Environment

5.29 Water is a precious resource that is essential for life. As well as meeting human needs for drinking, washing and cooking, it is also vital for the health of the natural environment, supports agriculture and fisheries, provides a resource for many businesses, and offers opportunities for transport and recreation. However, there are many pressures on the water environment that adversely impact on its ability to fulfil these functions.

5.30 Greater Manchester is located within a complex hydrological network that extends into surrounding districts and beyond. This means that individual areas cannot be viewed in isolation, as rainfall and activities in one place can have significant impacts on the water environment in other locations. The Irwell and Mersey catchments dominate Greater Manchester, covering around 78% of its total area, with the River Douglas and Glaze Brook being

the other fluvial catchments. All catchments except the River Douglas drain into the Manchester Ship canal, which therefore has a very important drainage and flood management function.

- 5.31** Approximately 60,500 properties in the Plan area have a 0.1% chance of flooding from rivers in any one year.⁴⁹ 36% of these properties are located in Salford, 22% in Manchester and 12% in Wigan, with the remainder distributed fairly evenly across the other districts. These high-risk areas include some of the most deprived communities as well as some of the most economically important locations and can be subject to a combination of risk sources (e.g. river, surface water and sewer flooding) which can impact separately and together.
- 5.32** Approximately 146,000 properties have a 0.1% chance of flooding from surface water in any one year in the Plan area.⁵⁰ There are also areas in which groundwater flooding can pose risks and where extensive canal and reservoir infrastructure generates flood risks, associated with potential overtopping and embankment breaches.
- 5.33** Climate change is expected to significantly increase peak river flows and surface water run-off as a result of more intense rain events, potentially placing many more properties at risk in the future unless flood defences, drainage and run-off management are improved. A coordinated catchment-wide approach to all types of flood risk will be required to address these challenges and minimise potential harm to people and property, including actions upstream of Greater Manchester.
- 5.34** The location of new development in this Plan has been informed by the application of Sequential Test and Exception Test, as required by national planning policy. The aim of the tests are to steer new development towards areas with the lowest risk of flooding first before considering higher risk

⁴⁹ Figures based on NAFRA Risk of Flooding from Rivers and Sea (March 2018) and National Receptor Database 2014.

⁵⁰ Figures based on National Receptor Database 2014 and NWSW Property Count Database (based on NRD 2011)

locations. If it is not possible for development to be located in zones with a lower risk of flooding, new development must provide wider benefits to the community and can be made safe from flooding for its lifetime.

- 5.35** The North West River Basin Management Plan provides a framework for protecting and enhancing the benefits provided by the water environment across Greater Manchester and beyond. It sets out legally binding objectives for the quality of water bodies, with the default being that they should be classified as ‘good’ overall based on their ecological status or potential and their chemical status. Very few water bodies in Greater Management currently reach the required standard.⁵¹
- 5.36** (MM5.9) Addressing this will require a wide range of measures, including naturalisation of watercourses, reductions in storm overflow sewage discharges, better land management, and improved management of surface water. Some of these actions will also assist in managing flood risk. For example, the use of natural flood management measures that work with natural processes can provide multiple benefits for people and wildlife, helping to restore habitats, improve water quality and reduce soil erosion, as well as lowering peak flows and flash flooding. Sustainable Drainage System (SuDS) schemes can provide appropriate solutions to addressing both flood risk and water quality issues and are mandatory for major development unless clear evidence indicates that they would be inappropriate.
- Development proposals should aim to get as close to greenfield run-off rates as possible, depending on site conditions. Alternative surface water discharge rates can be set out in district local plans to reflect local circumstances and evidence.
- 5.37** In addition to the general need to improve water quality, the Environment Agency has defined source protection zones for groundwater sources such

⁵¹ See <https://www.gov.uk/government/publications/north-west-river-basin-district-river-basin-management-plan>

as wells, boreholes and springs used for public drinking water supply.⁵² The control of potentially contaminating activities is particularly important in these locations.

- 5.38** (MM5.9) Climate change and population and economic growth can put increasing pressure on the available potable water supply for homes and businesses. It is important that water is conserved and efficiently used as much as possible to help build resilience to periods of drought; avoid over abstraction; reduce carbon emissions from water treatment and disposal; and protect river and wetland habitats from degradation. All new homes have to meet mandatory national standard set out in Building Regulations (of 125 litres/person/day). Where there is a clear local need, the government's Housing Optional Technical Standards paragraph 013 and 014 set out that local authorities may also consider tighter water efficiency requirements for new homes (110 litres a day) to help manage water demand. This will be determined through the preparation of district local plans.

Policy JP-S5: Flood Risk and the Water Environment (MM5.10)

An integrated catchment-based approach will be taken to protect the quantity and quality of water bodies with reference to the North West River Basin Management Plan and managing flood risk, by:

1. Returning rivers to a more natural state, where practicable; ~~in line with the North West River Basin Management Plan;~~
2. Working with natural processes and adopting a natural flood management approach to slow the speed of water drainage and intercept water pollutants;
3. Locating and designing development so as to minimise the impacts of current and future flood risk, including retrofitting or relocating existing developments, infrastructure and places to increase resilience to flooding;

⁵² See

https://mappinggm.org.uk/gmodin/?lyrs=ea_source_protection_zones#open_street_map/11/53.5069/-2.3201

4. Expecting developments to manage surface water runoff through sustainable drainage systems and as close to source as possible ~~(unless demonstrably inappropriate) so as to not exceed.~~ Development should aim to achieve greenfield run-off rates unless it is demonstrated to be impracticable. District local plans should consider setting more detailed surface water drainage policies to reflect local circumstances, including or alternative surface water discharge rates specified in district local plans, such as in areas those identified for areas with critical drainage issues;
5. Ensuring that sustainable drainage systems:
 - i. Are designed to provide multifunctional benefits wherever possible, including for water quality, nature conservation and recreation;
 - ii. Avoid adverse impacts on water quality and any possibility of discharging hazardous substances to ground;
 - iii. Are delivered in a holistic and integrated manner, including on larger sites split into different phases; and
 - iv. Are managed and maintained appropriately to ensure their proper functioning over the lifetime of the development.
6. Securing the remediation of contaminated land and the careful design of developments to minimise the potential for urban diffuse pollution to affect the water environment;
- ~~7. Securing further investment in wastewater treatment to reduce the frequency of intermittent discharges of storm sewage; and~~
8. ~~Conserving water and maximising water efficiency in new development. As a minimum, residential development should meet the mandatory water efficiency standard of 125 litres/person/day as set out in Building Regulations. District local plans may and should consider setting a tighter water efficiency standard of 110 litres/person/day where there is a clear local need with reference to national guidance on housing optional technical standards.~~

Clean Air

- 5.39** Air pollution has a significant effect on public health, and poor air quality is the largest environment risk to human health in the UK. Epidemiological studies have shown that long-term exposure to air pollution (over years or lifetimes) reduces life expectancy, mainly due to cardiovascular and respiratory diseases and lung cancer. Short-term exposure (over hours or days) to elevated levels of air pollution can also cause a range of health impacts, including effects on lung function, exacerbation of asthma, increases in respiratory and cardiovascular hospital admissions and mortality.⁵³ The youngest, older people and those with existing health conditions are most likely to be affected by exposure to air pollution. The exacerbation of respiratory conditions is particularly relevant in consideration of the COVID-19 pandemic.
- 5.40** Without action, it has been estimated that the health and social care costs of air pollution in England could reach £5.3 billion by 2035, primarily due to fine particulates⁵⁴ (PM2.5).⁵⁵ In Greater Manchester alone, exposure to fine particulates at current levels is estimated to contribute to around 1,200 deaths per annum.⁵⁶ In addition to the direct human impacts, air pollution also harms the natural environment, adversely impacting on biodiversity, crop yields and the quality of water bodies. As cities compete to attract skilled workers, clean air may become an increasingly important differentiating factor.
- 5.41** Air pollution can also have significant impact on ecology. Therefore there are not only benefits to the population of improving air quality but there will also be positive ecological effects of this action.
- 5.42** (AM5.4) A range of different types of pollutant negatively impact on air quality, including nitrogen oxides (NOx), small and fine particulate matter

⁵³ Public Health England (2018). Health Matters: Air Pollution. Available: [Health matters: air pollution](#)

⁵⁴ particles small enough to be inhaled into the deepest parts of the lung

⁵⁵ <https://www.gov.uk/government/news/new-tool-calculates-nhs-and-social-care-costs-of-air-pollution>

⁵⁶ Derived from Public Health Outcome Framework indicator 3.01 (2016 data) (on Fingertips) (2018), <https://fingertips.phe.org.uk/profile/public-health-outcomes-framework>

(PM10 and PM2.5), sulphur dioxide (SO₂), volatile organic compounds (NMVOCs) and ammonia (NH₃). Graph 5.2 'Change in emissions of air pollutants since 1970 (since 1980 for ammonia)' shows how emissions of most of these air pollutants have declined considerably at the national level over the last few decades.

Graph 5.2 Change in emissions of air pollutants since 1970 (since 1980 for ammonia)

5.43 Nevertheless, air quality targets are not consistently being met in some locations. Parts of the Plan area have been designated as an Air Quality Management Area (AQMA), based on modelled levels of nitrogen dioxide (NO₂). The largest concentration of poor air quality is around the City Centre, which is also a nationally important economic centre and the proposed location for a considerable proportion of the new housing and office floorspace proposed in this Plan.

5.44 (MM5.11) Greater Manchester has also signed up to achieve WHO 'BreatheLife City' status by 2030, which means achieving WHO targets for

PM (PM2.5 must not exceed ~~10~~ 5 µg/m³ annual mean) and other air pollutants by this date. Regardless of targets, there is no clear evidence of a safe level of exposure below which there is no risk of adverse health effects. As such, policy ambitions should always be to reduce air pollution to as low as possible as further reduction of PM or NO₂ concentrations below air quality targets/standards are likely to bring additional health benefits.

- 5.45** Within Greater Manchester, transport is the major source of air pollution, with roads accounting for 65% of nitrogen oxides (NO_x), 79% of larger particulates (PM₁₀) and 31% of carbon dioxide emissions across the city region.⁵⁷ Wood burning stoves and coal fires accounts for 43% of fine particulates (PM_{2.5}) and was the single largest contributor in in the UK for 2019. New legislation has been introduced on the 1st May 2021 to phase out the sales of coal and wet wood, also to regulate the quality of the stoves sold. Processes involving combustion, such as power stations, biomass and incineration, also contribute to air pollution, as do some industrial activities and agriculture practices.
- 5.46** The AQMA and associated Greater Manchester Air Quality Action Plan (AQAP) 2016-2021 (approved by the GMCA in 2016) set out measures to help reduce air pollution caused by NO_x while supporting the sustainable economic growth of the region. Since the AQAP was introduced, Government has directed GM authorities to take urgent action to address a specific air pollution problem: roadside concentrations of NO₂ that exceed legal Limit Values.

⁵⁷ GMCA and TfGM (December 2016) Greater Manchester Low-Emission Strategy, p.9.

Picture 5.2 Air Quality Management Area based on 35µg/m3 (2021)

5.47 Government estimates road transport contributes approximately 80% of NO_x concentrations at roadside, with diesel vehicles the largest source in these local areas of greatest concern.⁵⁸ Government has directed Greater Manchester authorities to produce a Clean Air Plan to tackle roadside nitrogen dioxide (NO₂) concentrations and bring them within Limit Values in the shortest possible time.

5.48 (MM5.11) Greater Manchester Authorities have been working collaboratively to produce a Clean Air Plan, that will bring about compliance with the legal limit for NO₂. ~~in the shortest possible time and in any case by 2024. The proposal to introduce a Clean Air Zone class C that will cover the whole of GM (500sq miles), where the most polluting commercial vehicles will be charged to move within and through the zone, was subject to public consultation in the autumn of 2020. The final plan is to be put before JAQU~~

⁵⁸ (Defra and DfT (2017) 'UK Plan for tackling roadside nitrogen dioxide concentrations. Detailed Plan, July 2017', London: Defra, pp: 5)

~~(Joint Air Quality Unit – Defra & DfT) for approval in the early summer 2021, with a view for implementation in spring 2022.~~

- 5.49** (MM5.11) It is clear that a wide range of actions will be required to improve air quality to appropriate levels, ~~in addition to the CAZ,~~ and support objectives relating to climate change, Greater Manchester's 2038 carbon neutrality target, population health and quality places. Many of these actions are beyond the scope of this plan, but the primary focus will need to be on transport given its primary contribution to air pollution. Significantly expanding the existing network of publicly accessible EV charging infrastructure will be important to encourage and expediate the transition from petrol and diesel engine vehicles to EVs. Therefore, opportunities to support proposals for commercial EV charging infrastructure should be supported where appropriate. Hence, ~~r~~Regard should also be had to transport-related policies elsewhere in this plan and in the Greater Manchester Transport Strategy 2040 refresh and Our Five Year Transport Delivery Plan. The most significant role which this Plan will play in this respect is to locate development in the most sustainable locations which reduce the need for car travel, for example by maximising residential densities around transport hubs.
- 5.50** Ideally, a higher proportion of general employment sites would be capable of being served by rail and/or water, but only a few such sites are available and hence within Greater Manchester there will need to be a stronger emphasis on the use of low-emission goods vehicles. Short-term high-pollution episodes can affect health as well as long-term exposure to lower levels⁵⁹, so it will be important to tackle both peaks and average levels of air pollution under relevant actions.

⁵⁹ Defra (2018) Clean Air Strategy 2018, p.4. See <https://consult.defra.gov.uk/environmental-quality/clean-air-strategy-consultation/>

- 5.51** The cumulative air quality impacts of the proposed scale and distribution of development in this plan on nationally designated nature conservation sites have been considered through a separate Habitats Regulations Assessment.

Policy JP-S6: Clean Air (MM5.12)

A comprehensive range of measures will be taken to support improvements in air quality, focusing particularly on locations where people live, where children learn and play, where there are impacts on the green infrastructure network and where air quality targets are not being met, including:

1. Locating and designing development, and focusing transport investment, so as to reduce reliance on forms of transport that generate air pollution;
2. Determining planning applications ~~in accordance with~~ having regard to the most recent development and planning control guidance published jointly by the Institute of Air Quality Management (IAQM) and Environmental Protection UK (EPUK), and the most recent IAQM Guidance on the Assessment of Dust from Demolition and Construction, or relevant successor guidance, including the requirement for developers to submit construction management plans as appropriate;
3. Requiring applications for developments that could have an adverse impact on air quality to submit relevant air pollution data so that adverse impacts on air quality can be fully assessed and development only permitted where they are acceptable and/or suitable mitigation can be provided; and, if approved, to make appropriate provision for future monitoring of air pollution
4. Restricting ~~and carefully regulating~~ developments that would generate significant point source pollution such as some types of industrial activity and energy generation;
5. Significantly expanding the existing commercial network of electric vehicle charging points, both for public and private use, including as part of new developments;
6. Implementing the ~~charging Clean Air Zone within the Plan area, as directed by~~ Government Clean Air Plan and associated measures;

7. Facilitating the more sustainable distribution of goods within the urban area, including through accommodating urban consolidation centres and urban distribution centres that use ultra-low-emission vehicles, and local delivery facilities to reduce repeat delivery attempts;
8. Designing streets to avoid trapping air pollution at ground level, including through the appropriate location and scale of buildings and trees;
9. Controlling traffic and parking within and around schools, ~~and~~ early years sites and other locations that are particularly sensitive to air quality;
10. Promoting actions that help remove pollutants from the air, such as enhancing the green infrastructure network and using innovative building materials that capture air pollutants; and
11. Development should be located in areas that maximise the use of sustainable travel modes and be designed to minimise exposure to high levels of air pollution, particularly for vulnerable users.

Resource Efficiency

Minerals

5.52 The Greater Manchester Joint Minerals Plan was adopted in April 2013⁶⁰ and includes a set of policies which assist in the consideration of minerals planning applications, safeguards minerals resources which are likely to be required in the future and identifies areas within which new or expanded minerals extraction is likely to be suitable. Annual monitoring of minerals extraction and changes in likely future needs will inform whether and when an update of the joint minerals plan is required, including as a result of the growth in development set out in this plan.

Waste

5.53 The Government's new strategy on waste and resources in England⁶¹ focuses on the creation of a circular economy in which waste is treated as a

⁶⁰ See https://www.greatermanchester-ca.gov.uk/media/1995/the_minerals_plan_april_2013_final.pdf

⁶¹ See <https://www.gov.uk/government/publications/resources-and-waste-strategy-for-england>

resource to be kept in use for as long as possible, extracting maximum value from it before being recovered and regenerated to form new products and materials. The aim of a circular economy is not only to reduce waste but to create a society in which waste is seen as a resource to be used again and again in order to reduce the environmental impacts of production and consumption.

- 5.54** As part of its ambition to be one of the leading green city regions in Europe, Greater Manchester will produce a Zero Waste Strategy. The objectives of the strategy will be cross cutting covering a number of key policy areas including planning. It will set out how we will move towards a circular and zero-waste economy in which we no longer see waste as something to dispose of but as a resource to be used in a different way. The move towards a circular economy will significantly reduce the amount of waste produced in Greater Manchester which in turn will enable delivery of higher recycling across all waste sectors, put more resources back into the economy and reduce our carbon footprint. Utilising sustainable design and construction techniques at all stages of a development's life cycle can help deliver this ambition.
- 5.55** A resource efficient society is key to people and businesses recognising that how we behave and how we live has a direct impact on the environment around us. The “Plastic-Free Greater Manchester” campaign is a bid to eliminate single use plastics across the region and to move towards renewable alternatives. So far 558 leading businesses and organisations in Greater Manchester have signed up to the campaign to be plastic free. This is the first key step in moving towards a resource efficient region and will be the spearhead for future initiatives including tackling food waste.
- 5.56** (AM5.5) The Greater Manchester Joint Waste Development Plan was adopted in April 2012.⁶² This includes a set of policies which assist in the

⁶² See

www.gmwastedpd.co.uk/doclib.htm#Adopted_Waste_Plan_Documentshttps://www.greatermanchester-ca.gov.uk/media/1994/greater_manchester_waste_plan_opt.pdf

consideration of waste planning applications and identifies suitable locations for potential new waste management facilities. Annual monitoring of waste facility capacity and changes in likely future needs will inform whether and when an update of the joint waste plan is required, including as a result of the growth in development set out in this plan.

Policy JP-S7: Resource Efficiency (MM5.13)

The achievement of a circular economy and a zero-waste economy will play a key role in meeting Greater Manchester's ambition of becoming a leading green city region by 2038. The following measures will help achieve this:

1. Development and implementation of the [Resource Zero Waste](#) Strategy for Greater Manchester which promotes overall reduction in the level of waste produced and supports resource efficiency within the Plan area in order to gain the maximum value from the things we produce;
- ~~2. Ensuring the design of all new development incorporates storage space to facilitate efficient recycling and where appropriate, processing of waste on site;~~
3. Recognition of the role of existing infrastructure in managing our waste and protecting such facilities to ensure adequate waste management capacity is maintained; and
4. Using sustainable design and construction techniques to reduce carbon emissions, adapt and future proof to the impact of climate change, reduce and recycle waste and minimise water use.

Places for Jobs

Supporting Long-Term Economic Growth

- 6.1** Economic growth is central to the overall strategy for Greater Manchester. It will be essential to raising incomes, improving health and quality of life, and providing the finances to deliver better infrastructure, services and facilities.
- 6.2** Greater Manchester has developed a Local Industrial Strategy⁶³ which sets out how the city region will build on its unique strengths and opportunities and capitalise on the creativity of its people to create a digital-enabled, green city region.
- 6.3** The Local Industrial Strategy has two key objectives:
- **Supporting our globally competitive strengths.** Building on our globally competitive research strengths and industrial opportunities in health innovation and advanced materials⁶⁴ and capitalising on the creativity and collaborative culture of our people, our digital and technology asset base and our emerging capabilities in green industries - will be essential if the city region is to continue to attract investment and create new businesses and jobs for the future. Through this we will be pioneering emerging sectors, creating significant global competence and additional value for our local economy as these new sectors grow and flourish.
 - **Strengthening the foundations of our economy.** Despite having concentrations of globally competitive, highly productive businesses, Greater Manchester's overall productivity is around 10% lower than the national average.⁶⁵ Tackling this is important because it holds back people's earning potential and makes our economy more vulnerable to economic shocks. Strengthening our people, infrastructure, business environment, innovation ecosystems and places will be important to enable all sectors and all places in Greater Manchester to be productive

⁶³ Greater Manchester Local Industrial Strategy June 2019 [GM Local Industrial Strategy](#)

⁶⁴ Greater Manchester and Cheshire East Science and Innovation Audit, November 2016

⁶⁵ GMCA: Deep Dives Phase 2: Productivity in Greater Manchester, February 2017

and prosperous. We need to grasp global opportunities emerging from changes to world markets and develop industries of the future, while also ensuring competitiveness and job quality in our high employment, low productivity sectors.

- 6.4** Two of Greater Manchester's key economic strengths are its size and diversity. Greater Manchester accounts for one-fifth of the population⁶⁶, jobs⁶⁷ and economic output in the North of England, and its economy is bigger than that of Wales and Northern Ireland. It is one of the most diverse economic areas in the UK⁶⁸ and is second only to London for attracting Foreign Direct Investment.⁶⁹ This helps to provide a broad range of opportunities for businesses and varied jobs for residents. It also means that it is well-placed to take advantage of new economic possibilities and should be more resilient to change. The inter-dependencies between our economic sectors mean that growth in one can support job creation in others.
- 6.5** Greater Manchester has a growing share of graduate level qualified residents, which, along with people skilled in technical occupations, skilled trades and service industries, forms part of a large and varied skills base.
- 6.6** Greater Manchester's transport network provides good connections to other major city regions, with further major improvements planned such as HS2 and Northern Powerhouse Rail, making it an attractive place to invest and providing close functional links to other areas.⁷⁰ Manchester Airport is the country's largest and best-connected airport outside London and the South East and the Manchester Ship Canal provides direct shipping connections to the post-panamax facilities at the Port of Liverpool. Piccadilly rail station is both a gateway and commercial centre but also has the potential to be the 'Hub of the North' serving the whole of the northern economy. Together, these

⁶⁷ ONS: Business Register and Employment Survey, accessed via nomis November 2018

⁶⁸ ONS Krugman Index see [Industrial Specialisation in major towns and cities](#)

⁶⁹ [Attractiveness surveys](#)

⁷⁰ See Greater Manchester's HS2 and Northern Powerhouse Rail Growth Strategy: "The Stops Are Just The Start" at [HS2 NPR Growth Strategy](#)

assets enable Greater Manchester to act as an international gateway for the North and the UK, providing access to global markets and supply chains.

- 6.7** Despite these strengths, for two decades, Greater Manchester's productivity has consistently remained at 90% of the UK level and in recent years the balance of employment has shifted towards lower productivity sectors and activities, as has been the case for the UK as a whole. The share of low productivity sectors in GM – those with lower than £30,000 GVA per worker, at 2013 prices – increased from 37.7% in 2005 to 41.8% in 2015. Wages have fallen by 6.6% in real terms between 2006 and 2016: the average worker in Greater Manchester still earns 81p an hour less in real terms than in 2006. The gross median annual wage for full time workers living in Greater Manchester was £26,800 in 2018, compared to £29,570 in the UK as a whole; and the gap in wages between GM and the national average has widened over the decade. This reflects the uneven economic geography of the UK and the dominance of London and the South East.
- 6.8** There are also significant economic disparities within our plan area, and baseline forecasts suggest that these could increase without intervention. For example, Manchester is forecast 74,600 additional jobs between 2018-38 with the central and southern districts forecast to add a further 60,000 jobs of which almost 47,000 are forecast to be in Salford and Trafford. Collectively they have the highest concentration of key assets and major growth areas in the sub-region. In contrast, the rest of Greater Manchester is only forecast to collectively add 10,800 net jobs with some districts (Oldham and Tameside) seeing a small decrease in total employment. Full-time jobs in the central and southern areas on average pay significantly more than full-time roles in the other districts⁷¹ which in turn also impacts commuting patterns and transport infrastructure congestion.
- 6.9** These problems have also been exacerbated by the adverse impacts of austerity and economic shocks, such as Brexit and Covid-19, on growth and reform. Furthermore, like in other places, employment and output growth

⁷¹ ONS: Annual Survey of Hours and Earnings 2018, accessed via nomis November 2018

since the recession have been characterised by low productivity growth and increasing share of jobs in lower value sectors with comparatively low paid, less secure employment.⁷² We are also not fully realising the possibilities of its key assets, for example the outstanding research base has much greater potential to support business activity and growth. Further improvements in transport connections and skills development are required to ensure that everyone can contribute to and share in the benefits of economic activity, helping to deliver genuinely inclusive growth.

- 6.10** The Northern Powerhouse Independent Economic Review⁷³ identified that through improvements in skills, innovation, and connectivity the North has the potential to create by 2050 an additional £97 billion of GVA (a measure of total economic output and income) and 850,000 extra jobs under a transformational scenario, compared to the ‘business as usual’ scenario. As part of Greater Manchester we are well-placed to play a leading role in delivering this additional growth, given its central location within the North of England and concentration of key growth assets.
- 6.11** We have the opportunity to increase the future prosperity of local residents through making a full contribution to rebalancing the national economy, helping to deliver a more successful North of England and UK. Hence, this plan supports high levels of economic growth and seeks to put in place the measures that will enable such growth to continue in the even longer-term. Economic growth provides a good opportunity for local residents to gain increased access to new jobs and training, which will help to reduce unemployment rates and economic inequalities and boost skill levels and personal fulfilment. Local job growth is therefore supported through seeking agreement with employers and developers to enter into local labour and training agreements, where appropriate. The key challenge will be to ensure that such growth benefits everyone and all of our places and happens in a sustainable way that respects the environment and local communities. Growth

⁷² GMCA - GM Labour Market and Skills Review 2017/18

⁷³ SQW and CE (24 June 2016) The Northern Powerhouse Independent Economic Review, p.16

today must not come at the expense of the ability to deliver sustained prosperity and quality of life.

- 6.12** However, delivering these high levels of growth, in terms of jobs and GVA, will become increasingly challenging. Beyond the slowdown in productivity growth seen across the UK economy, and increasing international competition for trade and capital, our economy also faces the challenges of accommodating rapid technological change, political risks and economic shocks – such as Brexit and Covid-19. The emergence of a global pandemic in March 2020 rightly resulted in the need to understand what, if any, actions should be taken in relation to the level of economic growth being proposed. Following an initial assessment of the potential impacts of Covid-19 on the economy in 2020, a further assessment was carried out to inform this plan. Both studies suggest that there is insufficient evidence (either at a national or local level) to change the assumptions behind our growth targets.
- 6.13** Whilst it is recognised that the country is in a state of flux, it is very clear that to delay the production of the plan further could have a negative effect on the proper planning of the boroughs and therefore its recovery. Instead it is considered appropriate to proceed, but to use the process of plan review to monitor the situation and if necessary, to undertake a formal review outside of statutory review timetable.
- 6.14** We will need to continue to invest in the sites and critical infrastructure that will make our boroughs even more attractive places for businesses to invest, bringing high-value, well paid jobs, to our area, and supporting the continued progress towards a low-carbon economy.
- 6.15** This Plan promotes prosperity for all residents and places in a sustainable way in a wide variety of ways, some of which are set out in this chapter but many of which will be delivered through other parts of the plan. Such measures include:
- Delivering sustainable places that can meet the needs of all sections of communities, both now and in the future
 - Achieving the high quality, inclusive design of places and developments

- Providing excellent transport networks that help all people to access employment opportunities across our boroughs, particularly by walking, cycling and public transport
- Encouraging the efficient reuse of previously-developed land and buildings as part of the coordinated regeneration of urban areas, particularly those with high levels of deprivation
- An expectation that all development will be net zero carbon by 2028
- Significantly increasing the supply of new housing that helps to meet the wide variety of needs across our boroughs at a price people can afford
- Enhancing the supply of employment opportunities at a variety of skill levels throughout our boroughs to achieve more inclusive growth
- Supporting improvements in education and research facilities
- Enabling all residents to lead healthier lives in safer places with good access to facilities that support health and well-being including good quality open space and green infrastructure
- Seeking a net enhancement to biodiversity across our boroughs

Policy JP-J1: Supporting Long-Term Economic Growth (MM6.1);
(AM6.1)

A thriving, inclusive and productive economy will be sought in all our boroughs. There will be an emphasis on:

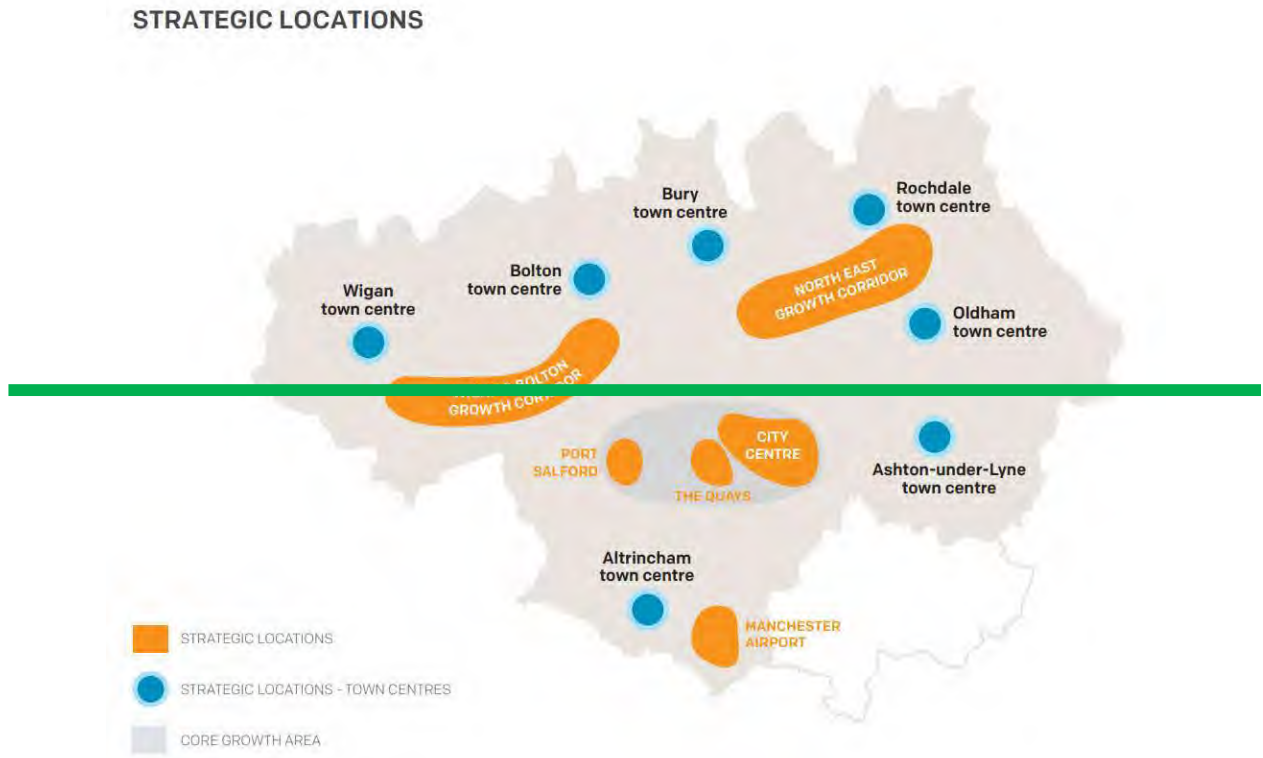

- A. Maintaining a very high level of economic diversity across our boroughs
- B. Facilitating the development of high value clusters in prime sectors key economic sectors such as:
 - i. Advanced manufacturing;
 - ii. Digital and cyber;
 - iii. Health innovation, including life sciences;
 - iv. Low carbon goods and services;
 - v. Business, financial and professional services;
 - vi. Logistics.

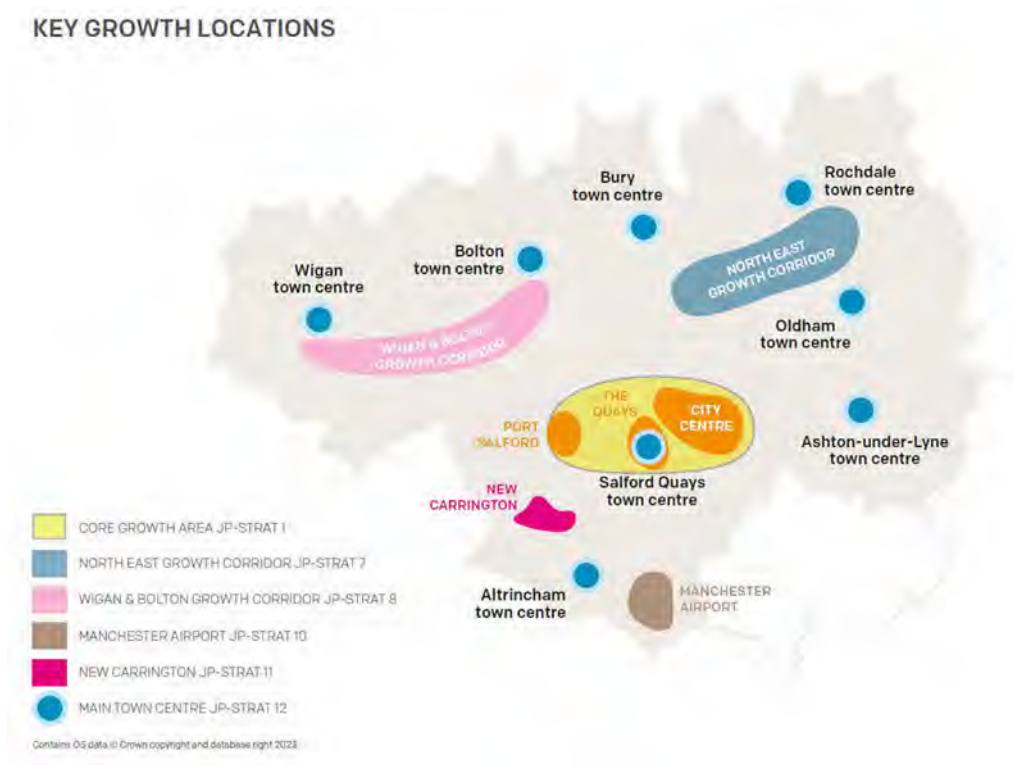

- C. Making the most of major assets of the sub-region, such as:
- i. The high concentration and range of research assets
 - ii. The large pool of graduates
 - iii. Highly productive businesses in every sector of our economy
 - iv. Existing transport infrastructure such as Manchester Airport, Manchester Ship Canal, public transport networks and the motorway network
 - v. Major proposed transport improvements such as HS2 and Northern Powerhouse Rail
- D. Grasping the economic opportunities from the global transition to a low carbon economy
- E. Providing the high-quality, sustainable living environments that will help to attract and retain skilled workers
- F. Supporting local job growth, by seeking agreement with employers and developers, including housebuilders, to enter into local labour and training agreements through planning obligations and other mechanisms where appropriate.
- G. Maximising the potential of the key growth locations set out in JP-Strat 1 to JP-Strat 12 ~~whilst also securing investment that raises the competitiveness of our northern boroughs~~ to deliver inclusive growth across the sub-region by ensuring that employment growth opportunities are well connected and accessible to all residents. ~~Key locations that will help to maximise economic growth in an inclusive way include:~~
- ~~i. The expanding City Centre, which will be further strengthened as the most significant economic location in the UK outside London, providing a high concentration of jobs that are highly accessible from across Greater Manchester and beyond. The city centre includes the Oxford Road corridor which will continue to develop as a world class innovation hub with a very high concentration of research activity and enhanced business connections~~

- ii. ~~The Quays, delivering sustained growth as a major business location including an internationally important digital and creative cluster~~
- iii. ~~The wider area of economic activity at the heart of Greater Manchester, stretching from the Etihad Campus in the east, through the City Centre and The Quays, to Trafford Park and the Trafford Centre, providing an enormous and extremely diverse range of businesses and jobs (currently accounting for around one-quarter of employment in Greater Manchester, with this proportion expected to grow), and with key clusters of growth sectors~~
- iv. ~~Manchester Airport Enterprise Zone, with the expansion of the airport as the UK's primary international gateway outside London and the South East providing easy business connectivity across the world, and increased employment activity around the airport, Wythenshawe Hospital/Medipark, and the proposed HS2 station~~
- v. ~~The seven main town centres (Altrincham, Ashton-under-Lyne, Bolton, Bury, Oldham, Rochdale and Wigan), providing a stronger focus for local economic activity, and exploiting important advantages such as the direct mainline rail links to London from Stockport and Wigan, HS2 and the university in Bolton~~
- vi. ~~Port Salford, providing sustainable freight connections by water and rail and acting as an international gateway via facilities at the Port of Liverpool that are capable of accommodating ships larger than those which can be accommodated by the Panama Canal – "Post-Panamax"~~
- vii. ~~Northern Gateway, with a massive expansion of the existing employment areas forming a major facility similar in size to Trafford Park, helping to deliver a better distribution of growth across Greater Manchester and boosting the economy of the northern part of the city-region~~
- viii. ~~M6 logistics hub in Wigan, extending into Warrington, St Helens and West Lancashire, providing a major cluster of warehousing and~~

distribution activity along the M6 corridor with easy access to the Port of Liverpool via the M58

Figure 6.1 Strategic Key Growth Locations (MM6.2)

Employment Sites and Premises

- 6.16** It will be important to ensure that there is an excellent supply of employment sites and premises across the Plan area, with sufficient variety in terms of quality, cost and location to maximise the ability to attract and retain jobs and investment. This will help to deliver high levels of economic growth and tackle inequalities by improving access to employment opportunities for existing and new residents.
- 6.17** (MM6.3) If economic growth is to be sustainable in the long-term then it will be necessary for the supply of employment sites and premises to adapt to changing circumstances, technological advancements, and new working practices. The need to be able to compete for investment is constantly increasing and will become even more imperative after Brexit. A lot of businesses are currently doing fantastic things from poor premises, and there is the potential to improve productivity and support growth with modern buildings in better locations. However, there will continue to be demand for cheaper accommodation from start-ups and businesses working on tight margins. A good combination of existing [strategic sites, such as Trafford Park](#) and new sites and premises will therefore be required.

Policy JP-J2: Employment Sites and Premises (MM6.4)

A diverse range of employment sites and accessible premises, both new and second-hand, will be made available across the Plan area in terms of location, scale, type and cost. This will offer opportunities for all kinds and sizes of businesses, including start-ups, firms seeking to expand, and large-scale inward investment, which will help to tackle inequalities.

A strong portfolio of prime investment opportunities for new floorspace will be brought forward in the key [growth](#) locations [identified in JP-Strat 1 to JP-Strat 12](#) ~~Policy JP-J 1 'Supporting Long-Term Economic Growth'~~ and in complementary locations, with many being particularly suitable for ~~prime-growth~~ [key economic](#) sectors and specialisms. This includes the selective removal of land from the Green Belt and other land previously safeguarded for development, [as identified in chapter 11 of this plan](#), to provide the quality of well-connected employment land supply necessary to deliver the required scale of long-term economic growth, as set out in Policy JP-J 3 'Office Development' and Policy JP-J 4 'Industry and Warehousing Development'. ~~We will work with Government and other stakeholders to increase the delivery of previously developed sites for employment use, and hence minimise the need for any further Green Belt release.~~

Existing employment areas that are important to maintaining a strong and diverse supply of sites and premises in our boroughs will be protected from redevelopment to other uses, nurtured to ensure they remain competitive and their accessibility improved where necessary. This will include local employment areas as well as [strategic-key growth](#) locations ~~such as the Tame Valley and the core of Trafford Park, and associated transport infrastructure such as the Trafford Park Freight Terminal.~~

Office Development

6.18 Greater Manchester is generally acknowledged as having one of the strongest office markets in the country. The scale and quality of the offer is vital to supporting strong and productive sectors such as digital/creative, and business, financial and professional services.

6.19 The City Centre is the pre-eminent office location outside London. It will be important to maintain this position, and improve accessibility to the associated

job opportunities, for the wider benefit of Greater Manchester, thereby helping to reduce inequalities, deprivation and poverty. The large number of sites available for office development within the City Centre, many of which are close to major public transport facilities and with the prospect of further improvements through HS2 and Northern Powerhouse Rail (NPR), provides an unrivalled combination of location, scale, quality of development opportunity and access to a large pool of skilled labour.

- 6.20** The other two primary office markets within Greater Manchester are The Quays and South Manchester, with the latter including the area around Manchester Airport as well as town and district centres in Trafford. These provide a complementary offer to the City Centre, with their own distinctive characteristics that are attractive to occupiers and have significant potential for further growth. Securing office growth in other parts of the Plan area, particularly the northern areas, will also be an important component of delivering inclusive growth and reducing deprivation and poverty in these areas. This will be focused primarily in the town centres, as these are the most accessible locations to surrounding residential areas and increasing office-based activity is a key component of the overall strategy for delivering more vibrant and economically prosperous town centres.
- 6.21** (AM6.2) Modelling based on past economic trends suggests that the supply of new office floorspace needs at least to match average development rates over recent years. To ensure the continued growth of our key economic sectors is not constrained by a shortage of supply of new floorspace it is important to maintain a strong supply in key growth locations such as the City Centre and The Quays.
- 6.22** (MM6.5) Existing office floorspace will continue to have an essential role in meeting the needs of our businesses, often providing a lower cost alternative to new premises, especially for start-ups and smaller businesses. ~~The conversion of offices to housing can be an important source of supply of new homes, but this must not be allowed to compromise our economic growth and diversity, and consequently there may need to be restrictions on the loss of office floorspace particularly in key locations.~~

Policy JP-J3: Office Development (MM6.6)

At least ~~1,900,000~~ 2,019,000 sqm of accessible new office floorspace will be provided in the Plan area over the period ~~2021-2037~~ 2022-2039, with a focus on:

1. The City Centre, accounting for more than half of all new office floorspace in the sub-region and taking advantage of existing and proposed public transport connectivity, including the proposed new HS2 and Northern Powerhouse Rail links which will further enhance its position as the premier office location outside London
2. The Quays, significantly expanding this distinctive office location and the continued growth of the nationally significant MediaCityUK
3. Manchester Airport Enterprise Zone and its environs, taking advantage of the extensive international connections, public transport accessibility, and proposed HS2 and Northern Powerhouse Rail links
4. Town centres, offering a strong local profile and lower cost options with excellent public transport connections and access to services, with opportunities being sought to significantly increase the supply of new office floorspace beyond that currently identified especially in the northern parts of Greater Manchester.

The refurbishment of existing office accommodation will be encouraged including improving standards of accessibility, in accordance with Part M (Volume 2) Building Regulations.

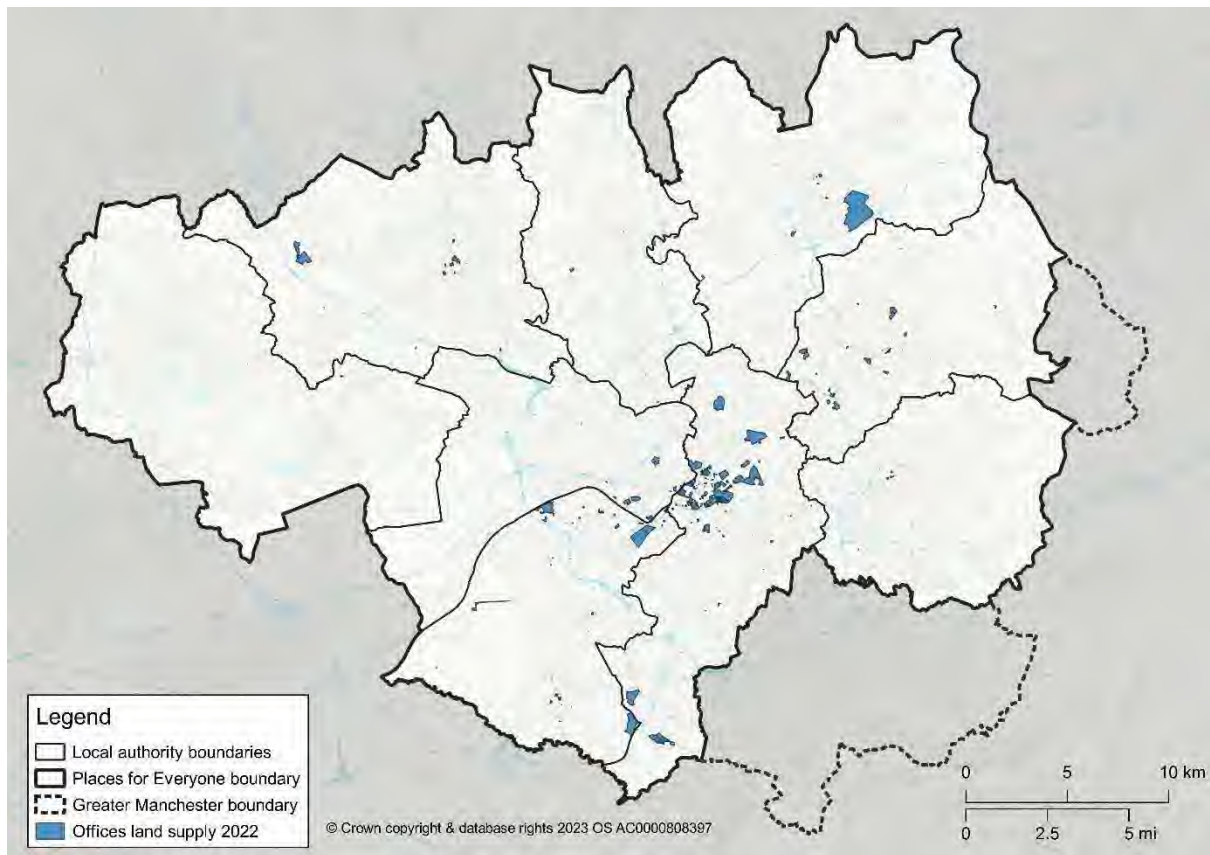

~~Individual districts through Local Plans or other mechanism(s) may restrict the changes of use of existing office space to non-employment uses such as housing where this could compromise the continued supply of a diverse range of office floorspace.~~

6.23 (MM6.7) A wide range of office development opportunities have been identified by districts through their strategic employment land availability assessments, capable of accommodating just ~~over~~ under ~~3,275,000~~ 2,815,650 sqm of floorspace. This will help to ensure that there is a diverse range of opportunities, providing choice and flexibility in the market. The vast

majority of these are in the key [growth](#) locations identified in Policy JP-J 3 'Office Development' and are on previously-developed land.

Figure 6.2 Existing supply of office sites identified in strategic employment land availability assessments [2020-2037](#)[2022-2039](#) (MM6.8)

- 6.24** (MM6.9) Although this supply is sufficient in numerical terms to meet the minimum office floorspace requirement up to [2037](#) [2039](#), it is considered that the very limited release of some existing Green Belt land within the Manchester Airport [Enterprise Zone](#) key [growth](#) location is required to maximise the competitive advantages of Greater Manchester.
- 6.25** (MM6.9) Table 6.1 'Office land supply [2020-2037](#) [2022-2039](#)' summarises the sources of office land supply up to [2037](#) [2039](#).

Table 6.1 Office land supply 2020-2037 2022-2039 (MM6.9)

District	Existing supply 2020-2037: Brownfield (sqm floorspace)	Existing supply 2020-2037: Greenfield (sqm floorspace)	Existing supply 2020-2037: Mixed (sqm floorspace)	Places for Everyone Allocations 2020-2037 (sqm floorspace) ⁷⁴	Total 2020-2037	Estimated Completions 2020-21	Total 2021-37

Industry and Warehousing

- 6.26 (AM6.3) Industrial and warehousing accommodation is essential to a wide range of businesses across many economic sectors. It is particularly important to the key economic sectors of advanced manufacturing and logistics but is also crucial to supporting other parts of the economy and its continued provision will help to reduce inequalities.
- 6.27 Although there have been continued reductions in the numbers employed in manufacturing over many decades, it continues to be a very important sector for Greater Manchester, delivering high levels of productivity and income. Advanced manufacturing is a particular strength, supported by the city-region's high concentration of research assets. Greater Manchester is recognised as an internationally important test-bed for new products and services, renowned for its ability to drive adoption of approved innovations at pace and scale. Enabling the success of this sector will be important for the wider prosperity of the North of England.
- 6.28 Logistics is a sector that is becoming increasingly central to the economy, enabling the efficient functioning of other sectors such as manufacturing and retail, and supporting changes in consumer behaviour. Greater Manchester's central position in the North of England, its large business and customer market and its excellent international freight connections via Manchester Airport, the Manchester Ship Canal and the nearby Port of Liverpool, as well as its motorway network, notably the M6, together provide opportunities to significantly increase logistics activity within the sub-region. This not only has the potential to promote higher levels of economic growth, but also to support environmental objectives by reducing the number of HGV journeys from the ports and distribution parks across England.
- 6.29 There is already a varied range of industrial and warehousing locations, ranging from major areas with strong brand recognition such as Trafford Park to numerous smaller employment areas that are an important source of local

employment and business opportunities. However, our long-term economic success will partly depend on the ability to continually renew and enhance the supply of accessible industrial and warehousing premises, responding to changing business practices and demands. Rising levels of automation and digitisation, increased customisation, greater integration of product services, and demands for more functionally and energy efficient premises are all leading to the need to increase the supply of new high quality floorspace, often with larger floorplates. At the same time, there will continue to be a demand for smaller and/or cheaper accommodation to support local businesses and start-ups that may often be working on narrow margins but make an important contribution to our economy. All of this points to the need for a diverse portfolio of sites and premises, both retaining existing premises and providing new ones of varying size and location. Promoting and supporting access to the sites and premises by sustainable modes of transport will help to ensure that they will be accessible from both our existing and new communities.

- 6.30** There is evidence that past industrial and warehousing completions have been constrained by a lack of suitable sites within Greater Manchester, resulting in the city-region being unable to compete for some major occupiers. When combined with the need to secure a significant increase in the quality of accommodation available to respond to evolving business requirements and increasing global competition, this means that a considerable uplift on past development rates is needed.

Policy JP-J4: Industry and Warehousing Development (MM6.10)

At least ~~3,330,000~~ 3,513,000 sqm of new, accessible, industrial and warehousing floorspace will be provided in the Plan area over the period ~~2021-2037~~ 2022-2039.

To achieve this, a high level of choice and flexibility will be provided in the supply of sites for new industrial and warehousing floorspace, ~~with a focus on:~~

- ~~1. Offering a range of opportunities~~
- ~~2. Making the most of the key locations identified in Policy JP-J 1 'Supporting Long-Term Economic Growth'~~

~~3. Significantly increasing the supply of high quality sites across the northern parts of Greater Manchester to help increase the competitiveness of that area, including a major strategic opportunity at Northern Gateway~~

~~Individual sites providing more than 100,000 sqm of industrial and warehousing floorspace should, where there is likely to be demand and it is appropriate to the location, incorporate:~~

~~A. Opportunities for manufacturing businesses, particularly advanced manufacturing;~~

~~B. Units capable of accommodating small and medium sized enterprises;~~

~~C. Overnight parking for heavy goods vehicles; and~~

~~D. Promote and support access by sustainable modes of transport.~~

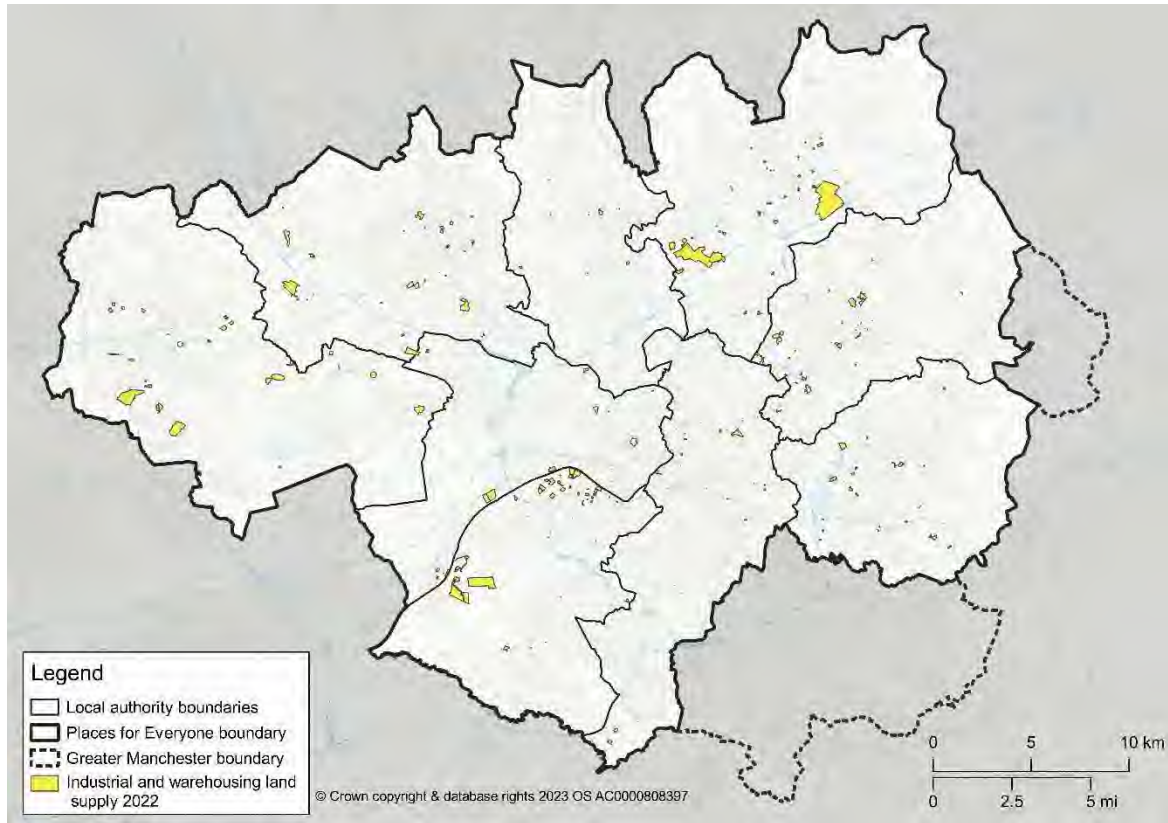

6.31 The need to provide the level of industrial and warehousing land within the Plan reflects the need for Greater Manchester to compete internationally for investment and provide sufficient choice and flexibility to respond to the varied needs of different businesses. This will help Greater Manchester to maximise its ability to attract and retain businesses and hence support its long-term economic growth prospects and the availability of local jobs. The new sites will be important in enabling the relocation and expansion of existing businesses, which will free up some poorer quality current employment sites for redevelopment for uses such as housing, as well as attracting new investment into the sub-region. The large amount of flexibility in the supply is also necessary because some existing employment areas may be utilised for employment-generating uses other than industrial and warehousing floorspace, which, whilst making an important contribution to economic growth, may mean they are no longer available for industry and/or warehousing purposes.

6.32 (MM6.11) A range of industry and warehousing development opportunities have been identified by districts through their strategic employment land

availability assessments, capable of accommodating just over ~~1,900,000~~ 2,070,000 sqm of floorspace.

Figure 6.3 Existing supply of industry and warehousing sites identified in strategic employment land availability assessments ~~2020-2037~~ 2022-2039 (MM6.12)

6.33 The existing supply of potential industrial and warehousing sites identified in the districts' strategic employment land availability assessments are insufficient to meet the overall identified need. Many of the sites they contain are also likely to be attractive primarily to a relatively local market and/or smaller businesses, due to their location, size and surroundings. Consequently, if Greater Manchester is to meet its future development requirements and increase the supply of high quality sites that can compete regionally, nationally and even internationally for investment, including from businesses requiring large modern premises, then there is a need to identify additional sites across the city-region. The only realistic option for doing so is to remove some land from the Green Belt.

6.34 (MM6.13); (AM6.4) Table 6.2 'Industry and warehousing land supply ~~2020-2037~~ 2022-2039' summarises the sources of industry and warehousing land supply up to ~~2037~~ 2039. Although all of the sites could potentially be developed in full during the plan period. In practice, the high level of land supply, the size of some individual sites and infrastructure requirements mean that some of the Green Belt sites may come forward in part after ~~2037~~2039. This will help to ensure that there is a diverse range of opportunities, providing choice and flexibility in the market. Additionally given the scale of some of the opportunities, ~~almost~~ a further ~~480,000~~ 368,400 sqm has been identified which is likely to be delivered after ~~2037~~ 2039.

Table 6.2 Industry and warehousing land supply 2020-2037 (MM6.13)

District	Existing supply 2020-2037: Brownfield (sqm floorspace)	Existing supply 2020-2037: Greenfield (sqm floorspace)	Existing supply 2020-2037: Mixed (sqm floorspace)	Places for Everyone Allocations 2020-2037 (sqm floorspace) ⁷⁶	Total 2020-2037	Estimated Completions 2021-21	Total 2021-37

⁷⁷ Excluding floorspace identified in baseline supply or anticipated to be delivered post-2039.

Note for Table 6.2:

1. The floorspace arising at Policy JP Allocation 1.1 'Heywood / Pilsworth (Northern Gateway), has been split between Bury and Rochdale based on illustrative plans and may be subject to change following comprehensive masterplanning.
2. The floorspace arising at Policy JP Allocation 2 'Stakehill', has been split between Oldham and Rochdale based on illustrative plans and may be subject to change following comprehensive masterplanning.

6.35 New industrial and warehousing development has an important role to play in addressing the economic disparities across Greater Manchester, and in particular to boost the competitiveness of northern areas. It can help to deliver more balanced growth across the sub-region and tackle deprivation.

Consequently, the release of Green Belt for employment use is focused primarily in the northern parts of Greater Manchester, with a string of high quality opportunities of varying sizes focused particularly around the key motorway corridors. Overall, this will result in around two-thirds of the supply being in the districts of Wigan, Bolton, Bury, Rochdale, Oldham and Tameside, whereas just over one-half of the supply in land availability assessments is in those six districts. The strategic location of Northern Gateway will alone account for about one-fifth of the Greater Manchester supply.

6.36 (MM6.13); (AM6.4) It will still be important to ensure that there is a good supply of industrial and warehousing in other parts of Greater Manchester, and so there is also some Green Belt release in the central and southern areas. The Green Belt sites have been selected in order to make the most of key assets and locations, with a focus on realising the potential of transport infrastructure ~~such as the motorway network, the Manchester Ship Canal and Manchester Airport~~. The lowest level of ~~new~~ supply in the northern districts is in Tameside, where there will also be a greater reliance on existing sites and premises, such as in the strategically important Tame Valley, which will need to be protected accordingly.

Places for Homes

- 7.1** We have a diverse range of housing and residential neighbourhoods, capable of accommodating a wide variety of needs. We have seen high levels of new housing constructed in recent years, particularly with the growth in high-density apartments in the City Centre and The Quays, drawing in people and investment from across the world. At the same time, our suburban locations have remained popular with residents and developers alike, providing homes for people of all ages.
- 7.2** Despite these positive characteristics, we are facing a housing crisis. It is adversely affected by the broken housing market that afflicts the country as a whole. The increase in rough sleeping over recent years has been the most visible manifestation of this but lying behind it is a much more extensive problem of many people being unable to access suitable housing at an affordable price and with certainty of tenure. Over 70,000⁷⁸ people are on our local authority housing waiting lists with almost 27,000 "reasonable preference". A lack of appropriate housing options prevents some people from forming their own households, particularly younger adults, whilst those who can, may have to cope with substandard or expensive accommodation. These problems are not universal, with the majority of people having access to good housing, but they are far too widespread in a modern city such as Greater Manchester and must be addressed. This Plan is one of the tools that we have to address these issues.
- 7.3** We consider a decent home as a fundamental human right, but too often the housing market is not delivering this. Its ability to do so has been further compromised over the last few years by an increasing tendency for new dwellings to be seen as investments rather than homes, further raising the financial pressures on households. Private sector housing undoubtedly has a vital role to play in meeting housing needs, but the challenges can only be

⁷⁸ Source: Local Authority Housing Statistics Data Return 2019/20
Places for Everyone Composite Plan – Modifications Version 2023

truly met through a more diverse range of new provision including a major boost in the supply of affordable housing.

Housing Need

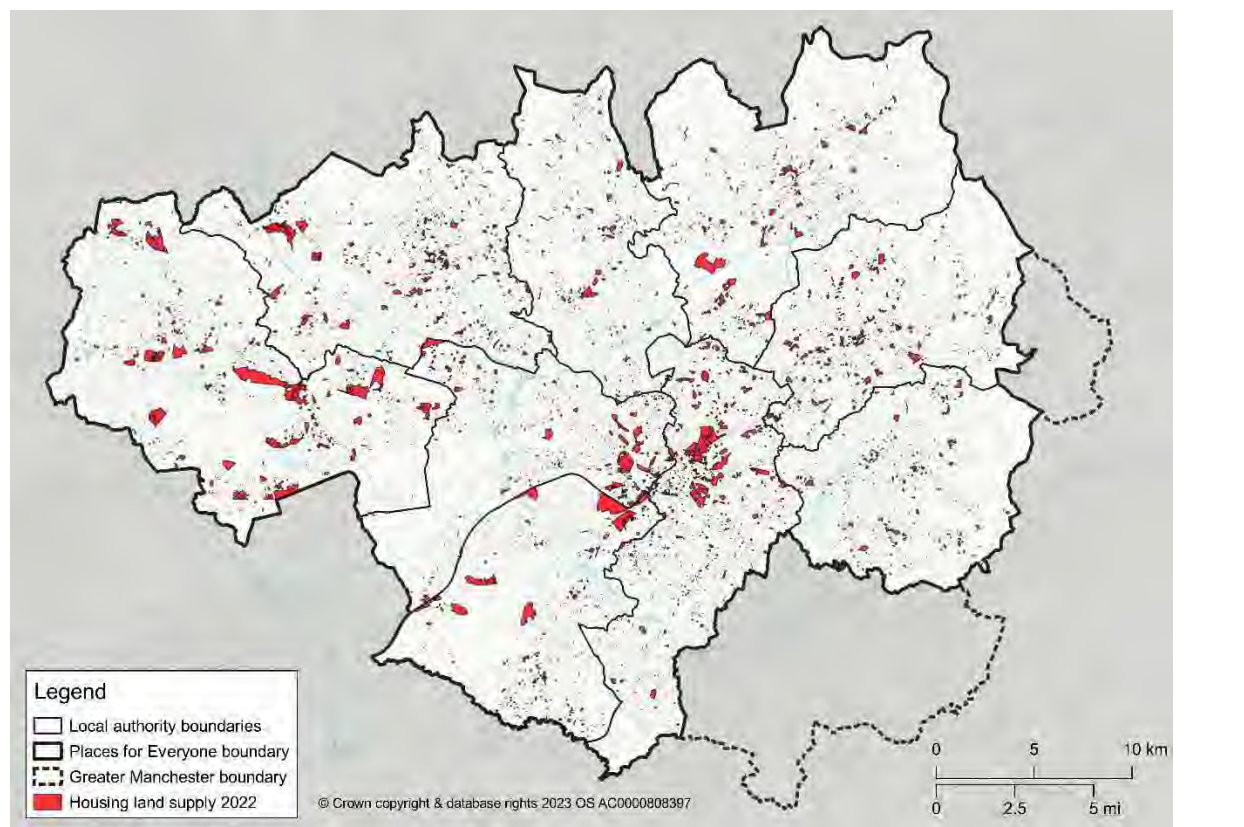

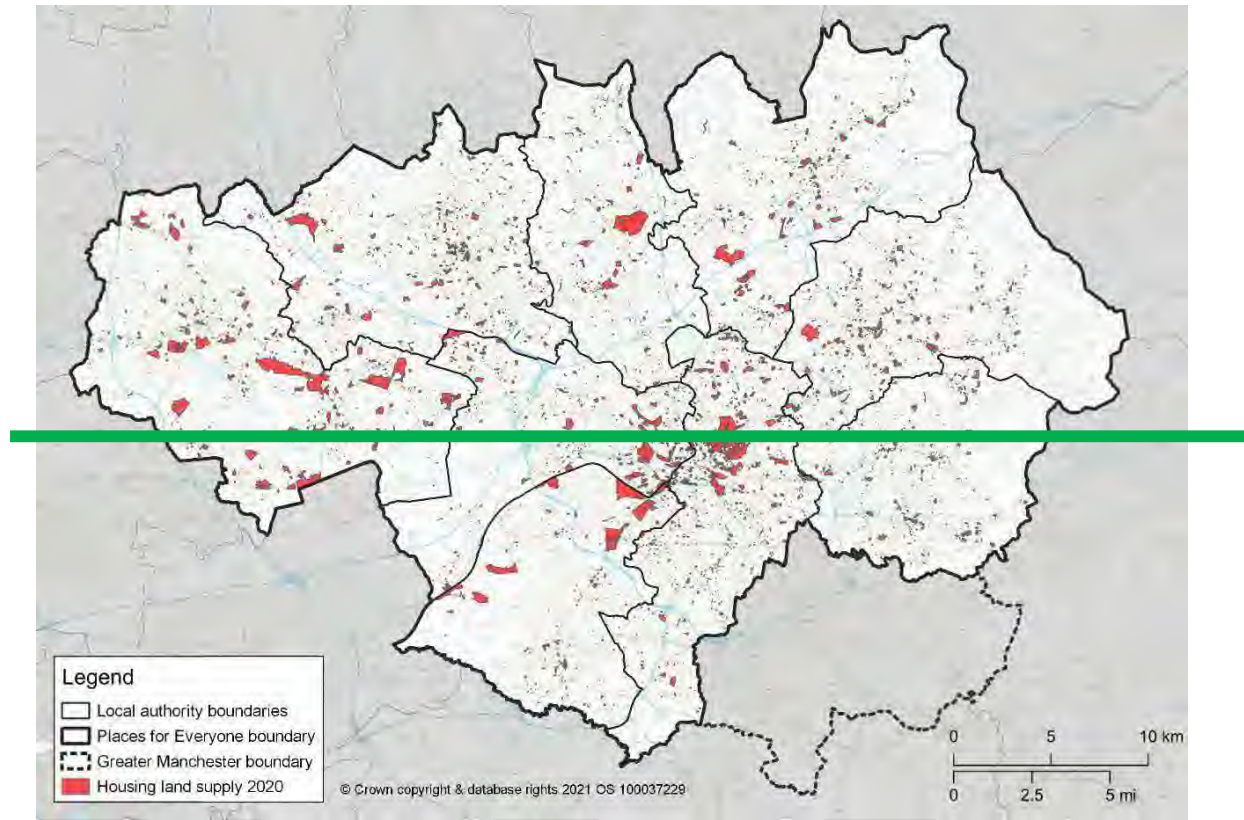

- 7.4** As expected by NPPF, the housing need set out in this plan has been derived using the standard methodology provided in the NPPG for calculating the Local Housing Need (LHN). The calculation of housing need makes an adjustment to take account of affordability. If insufficient new homes are provided to meet this need, then there is a risk that affordability levels will worsen and people will not have access to suitable accommodation that meets their needs. The construction of new housing is also an important part of the economy, providing large numbers of jobs and often securing the redevelopment of derelict and underused sites.
- 7.5** The economic opportunities and quality of life that Greater Manchester can offer make it an attractive place for people to move to. This not only includes younger adults drawn by the universities, graduate jobs and lifestyle offer but also families attracted by the long-term prospects for their children, and older people wanting to take advantage of the wide range of cultural and leisure facilities.
- 7.6** The emergence of a global pandemic in March 2020 caused by the Covid-19 virus rightly resulted in the need to understand what, if any, action should be taken in relation to the level of housing growth being proposed. Following an initial assessment of the potential impacts of Covid-19 on the housing market, in 2020, a further assessment was carried out to inform this plan. Both studies suggest that it became clear that there is insufficient evidence (either at a national or local level) to suggest that we should not be seeking to meet our overall housing need (as calculated by the standard LHN methodology) as a result of Covid-19. That said it is considered that a cautious approach to predicting delivery rates should be followed in the early years of the plan.
- 7.7** (AM7.1) Therefore, whilst it is recognised that the country was in a state of flux, it is very clear that to delay the production of the plan further could have a negative effect on the proper planning of the conurbation and therefore its

recovery. Instead it is considered appropriate to proceed on the basis that we should seek to meet our LHN up to [2037](#) [2039](#) but to use the process of local plan review to monitor the situation and if necessary, to undertake a formal review outside of the statutory timetable.

Housing Land Supply

- 7.8** There is a strong focus in this Plan on directing new housing towards previously-developed sites within the existing urban area. This will help to address existing dereliction and poorly used sites, as well as reducing the need to release greenfield and Green Belt land for development. Previously-developed sites are often in relatively sustainable locations, close to facilities and served by existing infrastructure, and hence their reuse for housing can support wider objectives. Policy JP-H 4 'Density of New Housing' will ensure that the most is made of such sites, particularly in more accessible locations, further reducing the need for additional land release.
- 7.9** A large number of previously-developed sites suitable for housing have been identified by districts in their Brownfield Registers, Strategic Housing Land Availability Assessments and Local Plans. Not all previously-developed sites will be appropriate for housing development, as there will be a continued need to accommodate other uses such as employment. The large amount of land identified in the Plan for new industrial and warehousing development may free up some existing employment sites and areas including where there are issues of viability and/or market demand for residential redevelopment in addition to those already identified, but this potential supply is too uncertain to be assumed to make a significant contribution to new housing during the plan period.

Figure 7.1 Existing supply of sites identified in strategic housing land availability assessments [2020-2037](#) [2022-2039](#) (MM7.1)

- 7.10** A further source of housing land supply will be small sites, which are typically not identified comprehensively in brownfield registers and strategic housing land availability assessments. It has been assumed that the supply of new dwellings on small sites will continue at the same rate in each district as has been seen over the last five years.
- 7.11** It will be important to make the most of the existing housing stock. The proportion of dwellings that are vacant has halved since 2008 and is now slightly below the England average.⁷⁹ Efforts will be made to further reduce long-term vacancies, including by seeking Government funding and working with property owners, but any significant further reduction in vacancies could begin to make it more difficult for people to move home. Consequently, it has not been assumed that a reduction in vacancies will help to meet the overall housing requirement. In any event, Government guidance is clear that empty properties brought back into use can only be counted as contributing to housing supply and completions if they have not already been counted as part of the existing stock.
- 7.12** (MM7.2) Table 7.1 illustrates that, in numerical terms, the existing supply of potential housing sites identified in the districts' strategic housing land availability assessments and small sites is adequate to meet the overall identified need, and demonstrates that brownfield land will be the predominant source of land over the plan period. However, meeting the numerical needs alone, is not enough. We must be able to demonstrate that its land supply has sufficient flexibility within it to demonstrate that it represents a deliverable, viable and robust land supply and will deliver a balanced and inclusive growth, thereby achieving the overall spatial strategy. In light of this and the need to ensure the Green Belt boundary can endure beyond the plan period it has been necessary to identify additional new sites across the city-region, over and above those in the existing land supply. Having considered a number of spatial options, it has been concluded that in order to achieve this, it has

⁷⁹ Source based on ONS live tables 125 and 615

been necessary to remove some land from the Green Belt and to allocate this land within this Plan for residential development.

7.13 (MM7.2) The table below summarises the sources of housing land supply up to ~~2037~~ 2039.

Table 7.1-Sources of housing land supply 2020-2037-(MM7.2)

District	Strategic Housing Land Availability Assessment: Brownfield land	Strategic Housing Land Availability Assessment: Greenfield land	Strategic Housing Land Availability Assessment: Mix brownfield land and greenfield land	Allowances ⁸⁰	Places for Everyone Allocations ⁸¹	Total 2020-37	Estimated Completions 2020-21 ⁸²	Estimated Land Supply 2021-2037
Bolton	10,686	2,469	0	2,021	0	15,176	-504	14,672
Bury	3,056	424	362	261	4,700	8,803	-187	8,616
Manchester	49,455	2,591	9,676	805	0	62,527	-2,951	59,576
Oldham	7,712	1,276	1,410	557	2,176	13,134	-330	12,804
Rochdale	5,518	2,836	426	-783	4,006	12,003	-569	11,434
Salford	30,634	2,137	1,473	1,959	1,500	37,703	-1,680	36,023
Tameside	5,017	755	575	576	1,558	8,481	-281	8,200
Trafford	12,293	2,568	824	777	4,827	21,289	-591	20,698
Wigan	10,769	6,403	68	756	1,600	19,596	-864	18,732
Places for Everyone	135,140	21,459	14,814	6,929	20,367	198,709	-7,957	190,752

⁸⁰ Allowances are a combination of small sites windfall allowances and demolitions/clearances for four of the districts (Bolton, Manchester, Oldham and Rochdale). Rochdale has a negative allowance figure because the number of dwellings expected to be lost to demolition/clearances is expected to outnumber the number of new dwellings expected to be built on small sites.

⁸¹ Excluding homes identified in existing land supply

⁸² Estimated completions 2020-2021 have been deducted from the total supply based on the target for 2020-2021 as presented in the GMSF October 2020

Table 7.1 Sources of housing land supply 2022-2039 (MM7.2)

District	Strategic Housing Land Availability Assessment			Allowances ⁸³	Places for Everyone Allocations ⁸⁴	2022-2039 Land Supply
	Brownfield land	Greenfield land	Mix brownfield land and greenfield land			
<u>Bolton</u>	<u>9,786</u>	<u>2,729</u>	<u>=</u>	<u>1,396</u>	<u>=</u>	<u>13,911</u>
<u>Bury</u>	<u>3,486</u>	<u>566</u>	<u>360</u>	<u>348</u>	<u>4,900</u>	<u>9,660</u>

⁸³ Allowances are a combination of small sites windfall allowances and demolitions/clearances for four of the districts (Bolton, Manchester, Oldham and Rochdale). Rochdale has a negative allowance figure because the number of dwellings expected to be lost to demolition/clearances is expected to outnumber the number of new dwellings expected to be built on small sites.

⁸⁴ Excluding homes identified in existing land supply [and homes anticipated to be delivered post-2039](#).

Distribution of New Housing

7.14 (AM7.1) The population of the PfE plan area is projected to increase in population by ~~158,194 (6.2%) from 2021 to 2037~~ 165,600 (6.4%) from 2022 to 2039⁸⁵. The highest levels of population growth across Greater Manchester are projected to be in the two cities Manchester (~~32,700~~ 34,000 increase in residents) and Salford (~~31,000~~ 31,700). The next largest increases are projected to be in Rochdale (~~19,100~~ 19,800) and Oldham (~~16,700~~ 17,600). In contrast the projected population growth in the other northern districts across the conurbation is lower. Overall though, projected demographic changes across Greater Manchester still broadly mirror recent economic forecast changes. If these trends continue unchecked then inequalities across Greater Manchester could widen further, with prosperity increasingly focused in the centre and the south of the conurbation. Northern areas lacking the scale and quality of housing investment to support their regeneration fully enough for them to make a greater contribution to the economic success of Greater Manchester.

7.15 In order to help address these issues, higher levels of housing growth will be focused in the central and northern districts of Greater Manchester. Manchester and Salford will continue to be an appropriate location for the highest levels of new housing due to their central location, good public transport connections, proximity to the main concentrations of employment and leisure opportunities, and ability to deliver very high density developments. Supporting higher levels of new housing in the northern districts will assist in achieving a more balanced pattern of growth across Greater Manchester and a better distribution of skilled workers to support local economies, helping to reduce disparities. The proposed distribution of housing development also reflects the availability of suitable sites in each of the districts.

⁸⁵ [ONS 2018-based subnational population projections.](#)

Phasing of New Housing

7.16 (AM7.1) The average annual housing requirement of 10,305 net additional dwellings per annum was achieved in 2018/19 for the first time since the peak of the housing market in 2006/07, 2007/08, and this achievement also continued in 2019/20 with 12,443 net completions. It has therefore been demonstrated that this level of residential development can be achieved. However, it is also true to say that following shocks like the financial crisis of 2008, completions can see significant drops. Therefore we need to identify a phasing trajectory which it considers is realistic and which will result in housing being delivered as planned over the life of the plan. Until March 2020 there would have been little reason to suspect that recent delivery trends would not continue, however in March 2020 there was a major health induced economic event, caused by the Covid-19 pandemic. Although this pandemic caused an initial shock to the construction industry, which might have an impact on delivery rates in the early years of the plan, there is no robust evidence to suggest that it could have such long term impacts to warrant reducing the overall housing land target from that derived from the standard methodology. Instead, this plan recognises the uncertainty that the pandemic may have on the housing sector in the short-term by ensuring that there is a significant buffer flexibility allowance on the housing land supply to meet the proposed phasing. This will enable sufficient flexibility, which in turn gives confidence in the delivery rates in the early years of the plan period.

7.17 Ensuring sufficient flexibility in the supply in the first years of the plan will not be sufficient on its own to ensure housing delivery happens as planned. A significant proportion of the land supply in the early years of the plan is made up from sites within the urban area, the majority of which are on previously developed land. Many of these sites therefore face challenges which will need assistance to kick-start their delivery. As part of Greater Manchester we have been lobbying central Government for many years to secure funding to enable it to achieve the common goal of delivering as many homes on brownfield land as possible and keeping to a minimum the need to release Green Belt land. A number of key schemes within Greater Manchester have successfully

been awarded funding through the Housing Infrastructure Fund and Greater Manchester has also recently been awarded funding through the Brownfield Housing Fund. This type of funding, together with proactive work in relation to housing delivery by each of the local planning authorities will help to ensure that delivery will keep apace as anticipated in this Plan.

- 7.18** It is not the impact of Covid-19 alone that means that we need to be realistic in terms of delivery rates over the early years of the plan period. The masterplanning and infrastructure investments required to support the development of some sites, including many of the allocations in the Plan, means that they may only produce large numbers of new dwellings in the latter phases of the plan period. In some parts of the conurbation it will be necessary to develop new markets for housing, which is vital to delivering the overall strategy for Greater Manchester but may take some time to achieve.
- 7.19** (MM7.2) Taking all of these factors into account, it is anticipated that there will be around ~~8,732~~ 9,063 housing completions on average up until March 2025, increasing to an average of around 10,305 net additional dwellings per annum up to March 2030 and accelerating to around ~~11,200~~ 10,719 per annum up to March ~~2037~~ 2039. This trajectory is shown below. ~~Whilst the trajectory in this plan is considered to be realistic, given the relatively unknown impacts of Covid-19 at this point in time, it is possible that delivery could in fact be different to that currently anticipated. Therefore, in such an eventuality the surplus or shortfall will be distributed over the remaining years of the plan. In this way, any over delivery within a local planning authority area will not result in that authority being adversely affected when it comes to calculating their five-year housing land supply.~~
- 7.20** The work of each of the local planning authorities in terms of housing delivery will be key to ensuring that these step changes in delivery rates are achieved and these will be reviewed regularly as part of the housing delivery test process.

Policy JP-H1: Scale, Distribution and Phasing of New Housing Development (MM7.3)

A minimum of ~~164,880~~ 175,185 net additional dwellings will be delivered over the period ~~2021-37~~ 2022-2039, or an annual average of around 10,305.

~~Table 7.1, defines the land supply, demonstrating that brownfield land will be the predominant source of land over the plan period.~~

The new homes will be of good quality and design, adaptable, supported by the necessary infrastructure and amenities and their distribution (as set out in Table 7.2) will support the Plan's overall strategy which enables people to reduce the need to travel when taking advantage of our key assets.

The delivery rates in Table 7.2 are the minimum number of net additional dwellings each district is expected to identify a sufficient supply of sites for, through their local plans.

The phasing of development is set out in Table 7.2. Each local planning authority will be required to identify and update annually a supply of specific deliverable sites in their district to provide a minimum of five years' worth of housing against the minimum delivery rates for the district set out in Table 7.2, irrespective of any shortfalls or surpluses in other districts and in the Plan area overall.

Each local authority will monitor delivery rates within their area and will take action as necessary to ensure that delivery rates are maintained as anticipated in this plan. If this regular monitoring reveals significant deviation from the phasing in this plan, the factors resulting in these changes will be determined and consideration will be given to what action would be appropriate, including development management action and review of the policies in this plan. ~~Any shortfall or surplus will be distributed over the remainder of the full plan period when calculating five-year supply.~~ This work would feed into the regular reviews of this plan, although individual authorities may wish to take specific local action outside the formal review process to ensure that they can maintain delivery rates.

Table 7.2 Distribution and Phasing of new dwellings 2021-2037 2022-2039

District	Annual average 2021-2037	2021-2025 (annual)	2025-2030 (annual)	2030-2037 (annual)	Total 2021-2037

Affordability of New Housing

7.21 A key challenge and priority for Greater Manchester is to ensure that new housing comes forward at a price that potential occupiers can afford. Overall, Greater Manchester is a relatively affordable place to live on average compared to some other parts of the UK, particularly London and the South. This is an important aspect of the competitiveness of Greater Manchester that will need to be maintained if high levels of economic growth are to be delivered, and all residents are to share in its benefits.

7.22 However, affordability has been worsening in recent years, and there are a significant number of households who are unable to find suitable homes at an affordable cost. The cost of housing is a challenge to different cohorts within the housing system - including those needing access to social rent or trying to maintain a tenancy as welfare rules are squeezed; private renters sharing; those saving as prospective First Time Buyers looking for routes into home ownership; people in unstable employment in any tenure; older owner-occupiers without the resources to maintain a decaying property, or people living in overcrowded properties because they cannot afford or access a home large enough to meet their needs. As a result, some people are living in inadequate accommodation and/or spending an unacceptably large proportion of their income on housing, which in turn increases levels of poverty. The official definition of affordable housing does not adequately address the diverse range of need within our boroughs, nor does it reflect the impact of welfare reform and other factors on households' ability to meet their housing costs. Through its housing strategy, Greater Manchester⁸⁶ sets out its approach to tackle the housing crisis, to ensure our housing solutions address the needs and aspirations of current and future citizens. Importantly our housing crisis will not be fixed by the planning system alone, although it will play a key role in this work.

7.23 (MM7.4); (AM7.2) There are ~~around 72,000~~ over 70,000 households on the local authority registers, with ~~over 26,000~~ almost 27,000 of these identified as being in reasonable preference for housing.⁸⁷ It is estimated that around 38% of newly forming households are unable to afford to buy or rent a home at lower quartile prices.⁸⁸ New build is just one of the ways to meet this need. The Greater Manchester Housing Strategy sets out our aim to deliver at least 50,000 additional affordable homes across Greater Manchester as a whole (including Stockport) by 2037. It is important to note that not all affordable housing will be delivered through planning policy requirements and Section

⁸⁶ [Greater Manchester Housing Strategy](#)

⁸⁷ 'reasonable preference' is defined in the 1996 Housing Act (Part 6)

⁸⁸ The lower quartile is the point at which one-quarter of properties are cheaper to buy/rent, and three-quarters are more expensive, representing a typical entry point property for new households prices.

106 Agreements. Local Plans will set targets for the provision of affordable housing for sale and rent as part of market-led residential development schemes. A high proportion of affordable housing is delivered by Local Authorities, Registered Providers and through the use of Government funding. This is likely to continue to be the case.

- 7.24** Consequently, increasing the delivery of affordable housing across the Plan area is a very high priority, and it will be essential that new residential developments play a full role in supporting this. There are a variety of ways of delivering affordable housing and the emphasis in some parts of our area may be on increasing the supply of social rented and affordable rented properties, reflecting the low incomes of many households in need. In other parts, alternative types of affordable housing may also be suitable, such as shared ownership, affordable market rent, and discount market sales.
- 7.25** In doing this it will be important to ensure that a diverse mix of values and tenures of new housing comes forward so that all households can meet their needs and aspirations, helping to ensure that Greater Manchester can attract and retain skilled workers, bring more money into local economies and deliver more mixed and inclusive communities.

Policy JP-H2: Affordability of New Housing (MM7.5)

Substantial improvements will be sought in the ability of people to access housing at a price they can afford, including through:

1. Significantly increasing the supply of new housing, in accordance with Policy JP-H 1 'Scale, Distribution and Phasing of New Housing Development', thereby reducing the potential for a shortfall to lead to large house price and rent increases
2. ~~Aiming to deliver our share of at least 50,000 additional affordable homes across Greater Manchester up to 2037, with at least 60% being for social rent or affordable rent—~~Maximising the delivery of additional affordable homes, including through local

plans setting targets for the provision of affordable housing for sale and rent as part of market-led developments based on evidence relating to need and viability⁸⁹

3. Support provision of affordable housing, ~~either on or off-site~~, as part of new developments (avoiding where possible clusters of tenure to deliver mixed communities), ~~with locally appropriate requirements being set by each local authority~~
4. Working with Government to maximise the amount of public funding being directed towards the provision of new affordable housing
5. Increasing the supply of low-cost market housing, to complement the provision of affordable homes and diversify options for low income households.

Type, Size and Design of New Housing

- 7.26** Increasing the supply of affordable homes is an essential component of the overall strategy, but it will be important to ensure that a diverse mix of values and tenures of new housing comes forward so that all households can meet their needs and aspirations.
- 7.27** Greater Manchester is in competition with cities across the world to attract and retain the skilled workers that will be critical to delivering high and sustained levels of economic growth. It already has some particularly attractive residential neighbourhoods, several of which can command very high house prices, both within the high-density areas of the City Centre and The Quays, and in some of the lower density suburbs. Many of the higher value suburban neighbourhoods are located in the south of the conurbation, forming part of a much larger high-value area extending into north Cheshire, although there are smaller and more dispersed prosperous housing areas elsewhere in the sub-region.
- 7.28** A key aim of this Plan is to boost the supply of well designed, adaptable new homes with appropriate access to private space. In some areas this will help to diversify local housing markets that are often dominated by low-cost housing, bring more money into local economies, and deliver more mixed and

⁸⁹ A definition of the different forms of affordable housing is given in Annex 2: Glossary (page 64) of the NPPF - see [National planning policy framework](#)

inclusive communities. It will also help to increase the options for skilled workers looking to move into or within our area. Focusing a significant proportion of housing growth in the northern areas will assist in this, supported by selectively releasing Green Belt sites to deliver a diverse mix of values and tenures that includes affordable homes as well as some higher value housing, (relative to prevailing values in the local area), within a high quality environment. This will help to achieve a better spread of higher value housing and prosperity across the plan area, whilst also delivering greater diversity within individual areas.

7.29 (AM7.3) A diverse range of housing will be required to meet our population and household growth. Just ~~over~~ under 70% of the population increase ~~2021-2037~~ 2022-2039 is projected to be in those aged 65 and over. In contrast the population of those aged under 18 is projected to decrease by ~~more than 42,000~~ almost 10,000.⁹⁰ Indeed, those aged 65 and over are projected to account for large proportions of the growth in each district and ranging from ~~34~~ 33% of the growth in Salford to ~~145~~ 140% in Wigan and ~~166~~ 154% in Bolton (and those under 65 in Bolton decreasing by ~~5,000~~ 4,400 and those under 65 in Wigan decreasing by ~~6,100~~ 5,700).

7.30 A key part of the overall strategy is to maximise the amount of development on brownfield sites in the most accessible locations and minimise the loss of greenfield and Green Belt land as far as possible. In order to deliver the necessary densities, an increasing proportion of new dwellings will be in the form of apartments and town houses, continuing recent trends.

7.31 (MM7.6) Smaller households are forecast to account for over half of the growth in households.⁹¹ It is anticipated that this will further strengthen the demand in apartments, particularly given cost pressures and the increased reliance on private rented accommodation. However, some single and couple households will want or need to live in larger dwellings, for example to facilitate home-working or accommodate visiting relatives. There is scope to

⁹⁰ ONS 2018-based subnational population projections

⁹¹ ONS Household Projections

increase the number of families living in apartments, especially if higher density neighbourhoods can be made more inclusive for all age groups. ~~The land supply that has been identified responds to these needs as demonstrated by the table below.~~

~~Table 7.3 Residential Land Supply – Split of Houses and Apartments~~

District	% Houses 2020 – 2037	% Apartments 2020 – 2037
Bolton	60	40
Bury	78	22
Manchester	16	84
Oldham	65	35
Rochdale	83	17
Salford	19	81
Tameside	60	40
Trafford	36	64
Wigan	89	11
Places for Everyone	41	59

7.32 The ageing population will necessitate a renewed emphasis on ensuring that a diverse range of housing is available to meet the needs of older people and households. This will require new dwellings to be more adaptable, and designed with potential care needs in mind, so that older people can remain in their homes if they wish as their circumstances change. There also need to be much better options for those who would like to move, perhaps to a dwelling of a more appropriate size in a location that enables them to easily access local services and facilities, and this could help to release some existing houses for families with dependent children.

7.33 The UK has the smallest average new-build dwellings in Europe⁹² and cost considerations for both developers and households are placing further downward pressure on dwelling size. This potentially creates a number of problems, resulting in less adaptable dwellings that are unable to respond to the changing needs of households, poor health resulting from cramped conditions and overcrowding, and overall a lower quality of life. The lack of space can also inhibit home-working, which will be increasingly important in helping to minimise the need to travel and enabling us to take advantage of digital-based business opportunities. It is therefore essential that new housing achieves minimum standards that will help to ensure that it is able to meet identified needs and contributes to rather than detracts from the relative attractiveness of Greater Manchester as a place to live. The provision of appropriate outdoor private amenity space will also be vital in delivering high quality homes that support good health.

Policy JP-H3: Type, Size and Design of New Housing (MM7.7)

Development across the plan area should seek to incorporate a range of dwelling types and sizes including for self-build and community led building projects to meet local needs and deliver more inclusive neighbourhoods. Where appropriate, this should include incorporating specialist housing for older households and vulnerable people.

~~The precise mix of dwelling types and sizes will be determined through district local plans, masterplans and other guidance, in order to reflect local circumstances and deliver an appropriate mix of dwellings across the plan area as a whole. Residential developments should provide an appropriate mix of dwelling types and sizes reflecting local plan policies, and having regard to masterplans, guidance and relevant local evidence.~~

Housing provision to accommodate specific groups, such as students and travelling people, will be addressed through district local plans.

All new dwellings must:

⁹² Malcolm Morgan and Heather Cruickshank (2014) Quantifying the extent of space shortages, Vol. 42, Issue 6, 2014

1. Comply with the nationally described space standards; and
2. Be built to the 'accessible and adaptable' standard in Part M4(2) of the Building Regulations unless specific site conditions make this impracticable.

Innovation in housing development will be supported where it is consistent with the principles of good design and contributes to local distinctiveness, including the use of modern methods of manufacturing that can help to improve the speed of delivery and increase building standards.

Housing Densities

7.34 Increasing the average density of new housing developments in the most accessible locations is an important part of our overall strategy, providing a number of benefits. It will reduce the amount of land that needs to be used for development, thereby assisting the protection of greenfield and Green Belt land. It will help to minimise the need to travel, enabling more people to live close to shops and services, and increasing the local population necessary to support local facilities and support regeneration. It will also maximise the number of people living in the most accessible places, helping to increase the proportion of trips made by walking, cycling and public transport, and reducing the demand for car-based travel. The approach to housing densities directly supports the objectives of the Mayor's Town Centre Challenge.

(MM7.8) New paragraph:

The following definitions and interpretation apply to Policy JP-H4:

- Where more than one density applies to the same part of the site, the highest density should be used. Different densities may apply to different parts of a site.
- Distances should be measured from the boundary of the designated centre or GMAL area.⁹³

⁹³ GMAL is an abbreviation of Greater Manchester Accessibility Level, which measures the accessibility of locations across Greater Manchester by walking and public transport. Areas are scored on a scale of 1-8, with 8 being the most accessible. GMAL scores are published online at data.gov.uk.

- All distances are measured in a straight line. The designated centres are as defined in district local plans.

Policy JP-H4: Density of New Housing (MM7.9)

New housing development should be delivered at a density appropriate to the location, reflecting the relative accessibility of the site by walking, cycling and public transport and the need to achieve efficient use of land and high quality design. ~~in accordance with~~ Regard should be had to the minimum densities set out below.

Location (use highest density that applies when a site falls within more than one location)	Minimum net residential density (dwellings per hectare): Within the location	Minimum net residential density (dwellings per hectare): Within 400 metres	Minimum net residential density (dwellings per hectare): Within 800 metres
Designated centres:			
City Centre	200	120	70
Designated town centres	120	70	50
Other designated centres	70	50	35
Public transport stops:			
Main rail stations and Metrolink stops in the City Centre	N/A	200	120
Other rail stations and Metrolink stops in large, designated centres	N/A	120	70

Other rail stations with a frequent service and all other Metrolink stops	N/A	70	50
Leigh Guided Busway stops	N/A	50	35
Areas within GMAL 6 and above or its equivalent	50	35	35
All other locations: minimum net residential density of 35 dwellings per hectare			

Lower densities may be acceptable where they can be clearly justified by:

1. Local housing market issues, such as a demonstrable need for a particular type of housing that cannot be delivered at a higher density; or
2. Site-specific issues, such as the design context and any potential impact on the wider landscape or townscape including heritage assets and green infrastructure

~~And where it would not compromise the overall delivery of new homes in the district.~~

In order to achieve an appropriate mix of housing across the plan area, ~~the densities above should typically be delivered as follows~~ developments should include the provision of houses and/or apartments having regard to the following and the need to achieve high quality design:

- A. 35-70 dwellings per hectare: primarily houses
- B. 70-120 dwellings per hectare: mix of houses and apartments

- C. 120+ dwellings per hectare: primarily apartments, incorporating houses and/or ground-floor duplexes where practicable

Definitions and interpretation

- ~~Where more than one density applies to the same part of the site, the highest density should be used. Different densities may apply to different parts of a site.~~
- ~~Distances should be measured from the boundary of the designated centre or GMAL area.⁹⁴~~
- ~~All distances are measured in a straight line. The designated centres are as defined in district local plans.~~

⁹⁴ ~~GMAL is an abbreviation of Greater Manchester Accessibility Layer, which measures the accessibility of locations across Greater Manchester by walking and public transport. Areas are scored on a scale of 1-8, with 8 being the most accessible. GMAL scores are published online at data.gov.uk.~~

Blank Page

Greener Places

8.1 Our many and varied green spaces and features are used in many different ways and afforded many different values by the people who live, work in or visit the city-region. The GMCA is committed to the Government's approach as set out in the 25 Year Environment Plan (25YEP)⁹⁵ to deliver a better natural environment for people and wildlife and ensuring that it is accessible for everyone to connect to and benefit from.

8.2 This Plan supports the important role of our natural assets by:

- Valuing the special qualities and key sensitivities of our **landscapes** (recognising importance of an area's appearance to the sense of place held by those who live in or visit it);
- Seeking to protect and enhance **green and blue infrastructure** (the wider network of green (and blue) features which make a huge contribution to quality of life, promote good mental and physical health, create liveable places and support economic growth);
- Seeking an overall **enhancement of biodiversity and geodiversity** (the living organisms and ground beneath our feet which underpin the value of the natural environment and its ability to provide a wide range of important benefits, including supporting human health and quality of life);
- Seeking to maintain a **Green Belt** (which plays an important role in restricting unplanned development in a conurbation with a complex urban form, ensuring that its cities, towns and smaller settlements retain their identity).

~~Valuing Important Landscapes~~ Landscape Character (MM8.1)

8.3 A Greater Manchester Landscape Character and Sensitivity Assessment (GMLCSA) has been prepared for Greater Manchester.⁹⁶ This assesses the quality and sensitivity of different landscapes and considers cross-boundary relationships (including with the Peak District National Park).

⁹⁵ [25 Year Environment Plan](#)

⁹⁶ [Places for Everyone](#)

8.4 The GMLCSA identifies 10 different landscape character types which make up Greater Manchester's predominantly unbuilt areas and sets out evidence of their characteristics and sensitivities:

- Broad Urban Fringe Valleys;
- Historic Parks and Wooded Estate Farmland;
- Incised Urban Fringe Valleys;
- Mosslands and Lowland Farmland;
- Pennine Foothills (West-South Pennines);
- Pennine Foothills (Dark Peak);
- Reclaimed Land / Wetlands;
- Unenclosed Uplands and Fringes (West-South Pennines);
- Unenclosed Uplands and Fringes (Dark Peak); and
- Urban Fringe Farmland

8.5 The sensitivities of our landscapes vary according to the issues and pressures they face and can be significantly influenced by the green infrastructure features they contain (see Our Green Infrastructure Network).

Policy JP-G1: Valuing Important Landscapes Landscape Character
(MM8.2)

Development within a Landscape Character Type, as shown on Figure 8.1, should reflect and respond to the special qualities and sensitivities of the key landscape characteristics of its location, including having regard to:

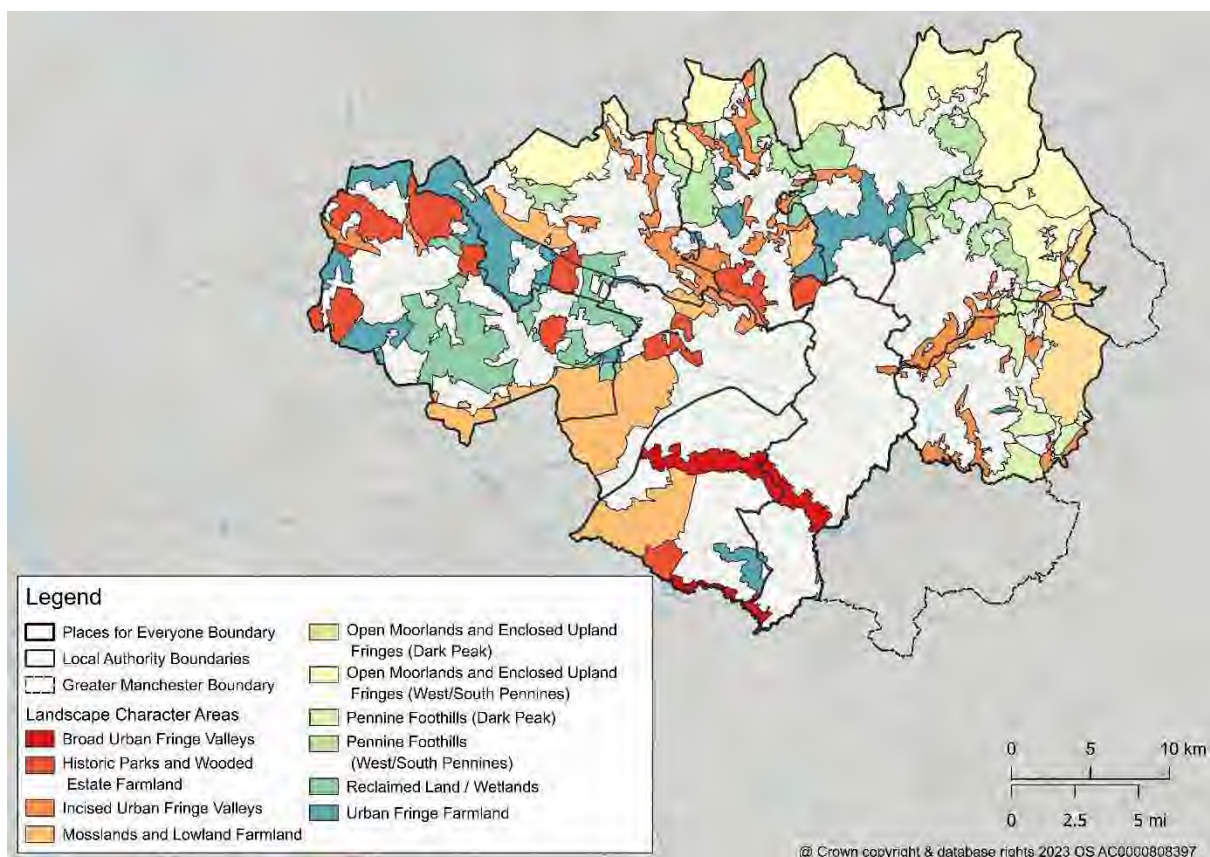

- Topography, geology and drainage;
- Land use and field patterns;
- Semi-natural habitats and woodland cover;
- Archaeology and cultural heritage;
- Settlement, road pattern and rights of way; and
- Views and perceptual qualities.

The interface of new development with the surrounding countryside/landscape is of particular importance. These transitional areas require ~~Transitional areas around new development and the interface of new development with the surrounding countryside/landscape are also of particular importance, requiring~~ well-considered

and sensitive treatment. In particular, opportunities to improve the intactness and condition of the landscape should be taken, especially in conjunction with seeking a net enhancement of biodiversity/geodiversity resources under Policy JP-G 9 'A Net Enhancement of Biodiversity and Geodiversity'.

In implementing this strategic policy, regard will be had to the Greater Manchester Landscape Character and Sensitivity Assessment (GMLCSA), in particular its guidance on future development and landscape management/enhancement within areas covered by each landscape character type.

Figure 8.1 Landscape Character Types

Our Green Infrastructure Network

8.6 Green infrastructure⁹⁷ is a natural capital asset that provides multiple benefits, at a range of scales. For communities, these benefits can include enhanced wellbeing, outdoor recreation and access, enhanced biodiversity

⁹⁷ See: [Natural Environment Guidance](#)

and landscapes, food and energy production, urban cooling, and the management of flood risk. These benefits are also known as ecosystem services.

- 8.7** Our green infrastructure network is enormously diverse, both in terms of its character and functions. Each type of green infrastructure is important in its own right, adding to the distinctiveness of the local area and Greater Manchester as a whole. However, it is the combination of and interrelationships between them that is particularly significant.
- 8.8** Ensuring that there is a high-quality network of green infrastructure is therefore vital to our long-term success, sustainability and resilience. Such a network should be:
- Extensive, maximising the size and spread of green infrastructure in a way that is compatible with meeting development requirements, with a particular need to increase the quantity of green infrastructure in the denser urban areas;
 - Integrated, maximising connections between the different components including into areas surrounding Greater Manchester and, importantly, into and through new development;
 - Multifunctional, providing multiple eco-system services whilst not detracting from important primary functions;
 - High quality, ensuring it is able to perform successfully its various functions; and
 - Accessible, enabling residents from across Greater Manchester and other visitors to appreciate its benefits in a way that does not lead to its degradation.
- 8.9** However, green infrastructure assets can come under pressure due to continued growth in the population, economic activity and number of visitors, as well as from higher temperatures and more extreme weather events which will result from climate change. Our challenge is to find a way of accommodating the necessary scale of development to deliver inclusive

growth and prosperity, whilst delivering overall improvements to the green infrastructure network.

- 8.10** Our existing valued landscapes and protected sites and areas constitute our best (priority) areas for green infrastructure and these sites and areas provide many social and economic benefits. But we also have to look beyond these areas and take action to extend and link these sites to form a Nature Recovery Network (NRN) for Greater Manchester.
- 8.11** (AM8.1) On 14 August 2020, Greater Manchester was selected by the government to help kick-start nature recovery on a countrywide scale. The pilots will enable local authorities to set out their local priorities for restoring and linking up habitats so species can thrive, and agree the best places to help nature recover, plant trees, restore peatland, mitigate flood and fire risk, and create green spaces for local people to enjoy. GMCA ~~is piloting and developing~~ has piloted the development of a Local Nature Recovery Strategy (LNRS), these ~~will have~~ become mandatory ~~and a statutory document under the Environment Bill~~ and will identify priority actions for biodiversity and nature recovery across Greater Manchester, including the development of an NRN.
- 8.12** The map of biodiversity strategic priorities and opportunities which will underpin the Greater Manchester LNRS and the NRN will be developed as a first iteration, prior to engaging wider stakeholders in its further development. This has been provided for inclusion within this Plan at this stage as part of the national pilot and will inform the process to be undertaken in developing LNRSs and LNRs across the country and as such is following a stepped process and timeline designed by Defra.
- 8.13** The map will provide for each habitat type an overview of priority activities required to support nature recovery across the whole of Greater Manchester and beyond the administrative boundary. It will include all areas, including urban areas, to identify key activities for habitat and green infrastructure creation and restoration needs for wildlife and the benefits they can provide for people through Natural Capital benefits. As part of the development

process for a LNRS, GMCA, working with Natural England, GMEU and wider Natural Capital Group partners, will be engaging wider stakeholders, sectors and interest groups in the development of the Strategy, the identification of priorities and the mechanisms for delivering these priority actions.

8.14 ~~(AM8.1) The Environment Bill being considered by Parliament goes even further—requiring all areas in England to establish LNRSs. This will help bring a broad range of groups together—from farmers to businesses to local communities—to deliver priorities for nature recovery at a local and national level. The pilots will also help kick-start the creation of over a million acres of habitats for wildlife.~~

8.15 As the overall green infrastructure network evolves, it will be identified in the most relevant information source, including green infrastructure plans, LNRSs and Mapping GM.

(MM8.3) New Paragraphs:

The following opportunity areas (as broadly illustrated on Figure 8.3 'Green Infrastructure Opportunity Areas') are identified as having particular potential for delivering improvements to our Green Infrastructure Network:

- a. Great Manchester Wetlands Nature Improvement Area (Salford and Wigan with connections to Warrington);
- b. Croal-Irwell Valley (Bolton, Bury, Manchester and Salford with connections to Blackburn-with-Darwen and Rossendale);
- c. South Pennine Moors (Oldham, Rochdale and Tameside with connections to Calderdale, Kirklees and High Peak);
- d. West Pennine Moors (Bolton and Bury with connections to Blackburn-with-Darwen and Chorley);
- e. Mersey Valley (Manchester and Trafford with connections to Stockport, High Peak and Cheshire East);
- f. Red Moss and Middle Brook Valley (Bolton);
- g. Hulton Park (Bolton);
- h. Cutacre Country Park (Bolton, Salford and Wigan);
- i. Lower Medlock Valley (Manchester);

- j. Moston Brook Corridor (Manchester and Oldham);
- k. Roch Valley (Rochdale);
- l. Hollingworth Lake and Surrounds (Rochdale); and
- m. Carrington (Trafford)

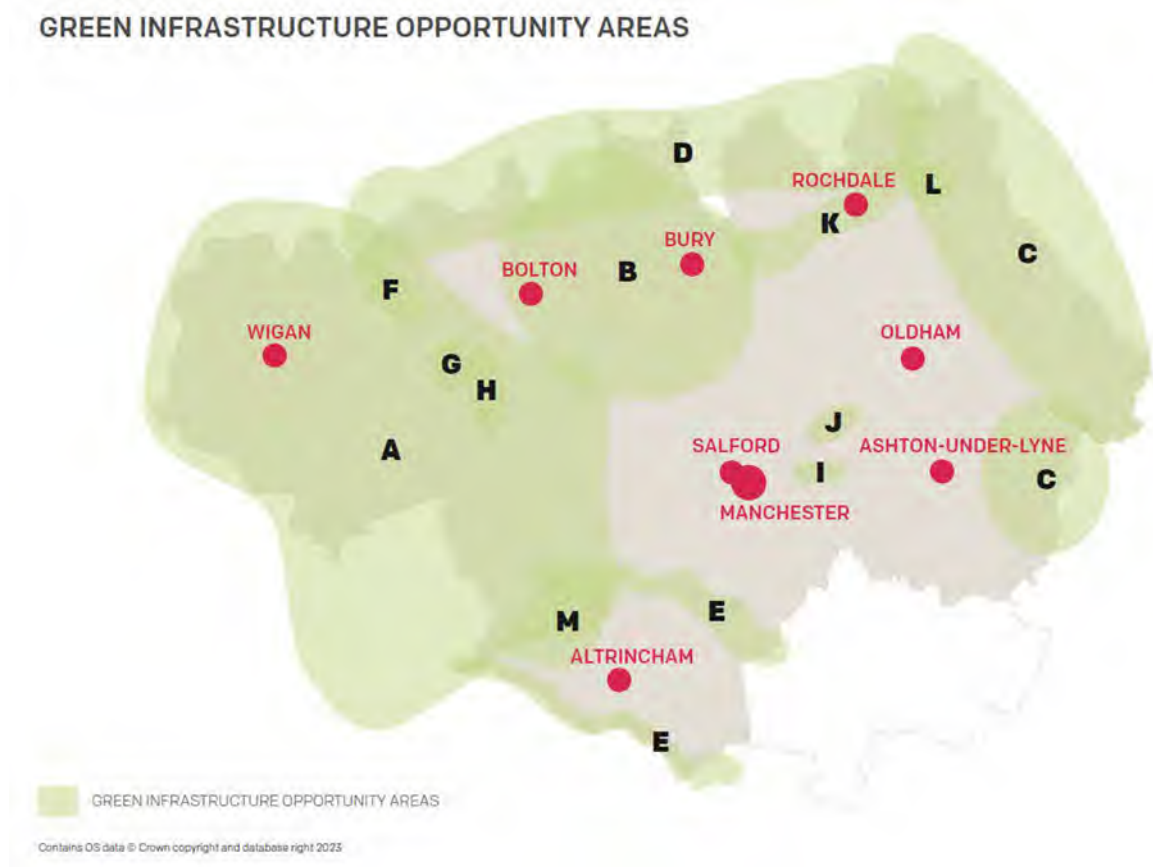

Figure 8.3 Green Infrastructure Opportunity Areas (MM8.5)

(MM8.3) These Green Infrastructure Opportunity Areas have been chosen because they are of a strategic scale and capable of strategic-scale improvements to the delivery of ecosystem services for large areas of Greater Manchester. The areas are not constraints on development and the development of grey infrastructure and built development within opportunity areas may facilitate the delivery of improvements in some areas.

(MM8.3) Where these Green Infrastructure Opportunity Areas overlap or are in close proximity to development allocations in this plan, appropriate

measures to achieve the delivery of major green infrastructure improvements within and around the Green Infrastructure Network have been included within Policy JP-G2 and the delivery of green infrastructure improvements in accordance with the policy should also have regard to these opportunity areas.

(MM8.3) The use of defined standards can help to ensure that there is sufficient quantity and quality of green infrastructure to meet the needs of residents and to deliver the overall green infrastructure network. A variety of standards have been developed by different organisations. We are committed to developing our own standards to supplement the Green Infrastructure Network and in doing so will have regard to whichever of these are most relevant and will provide appropriate supporting guidance as they develop.

(MM8.3) The GMCA will develop standards in relation to access to natural green space which seek to maximise the overall proportion of people in our boroughs who have access to natural green space, using the Accessible Natural Greenspace Standards (ANGSt) published by Natural England as a principal starting point as their focus on ensuring good accessibility to different sizes of green space for all residents. More detailed standards regarding specific habitats, designations, quality or functions of green space may be set out in district local plans, taking account of local circumstances and opportunities.

(MM8.3) The GMCA will also develop standards in relation to a “Green Factor” which sets out the level of on-site green infrastructure that new developments are expected to provide so as to meet their occupants’ needs and contribute to the extent and interconnectedness of the wider network. The Green Factor will provide a baseline expectation based on the proportion of the site that is covered by different types of green infrastructure features.

(MM8.3) Development has a major role in helping to achieve such standards and delivering improvements to the Green Infrastructure Network, both

through on-site provision of green infrastructure and the creation or improvement of off-site green infrastructure. The site allocations in this Plan provide opportunities to incorporate major areas of new accessible green infrastructure, delivering overall net gains in green infrastructure value to the benefit of local communities even if the quantity in that particular location may reduce. The way in which existing built areas have developed over time means that it will not be realistically possible to meet all of the standards in all parts of the plan area but they are an important aspiration to work towards wherever possible.

(MM8.3) Development proposals that involve the removal of land from the Green Belt and are required to contribute towards enhancements to the environmental quality and accessibility of remaining Green Belt land should consider the outcomes of the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the GM Green Belt (2020) when drawing up proposals. This study identifies potential projects to enhance the environmental quality and accessibility of the remaining Green Belt in relation to individual development allocations and should be a starting point for discussions with the relevant Local Authority.

Policy JP-G2 Green Infrastructure Network (MM8.4)

A strategic approach will be taken to the protection, management and enhancement of our Green Infrastructure in order to protect and enhance the ecosystem services which the Green Infrastructure Network provides, including flood management, climate change mitigation and adaptation. Alongside this primary function an enhanced Green Infrastructure network will support wider public health benefits, including promotion of active travel, food growing and recreational opportunities.

The protection, management and enhancement of Green Infrastructure will contribute to the development of a Local Nature Recovery Network Strategy for Greater Manchester. This Strategy will feed into the development of a Nature Recovery Network locally and nationally.

The following opportunity areas (as broadly illustrated on Figure 8.3 'Green Infrastructure Opportunity Areas') are identified as having particular potential for delivering improvements to our Green Infrastructure Network:

- a. ~~Great Manchester Wetlands Nature Improvement Area (Salford and Wigan with connections to Warrington);~~
- b. ~~Groal-Irwell Valley (Bolton, Bury, Manchester and Salford with connections to Blackburn with Darwen and Rossendale);~~
- c. ~~South Pennine Moors (Oldham, Rochdale and Tameside with connections to Calderdale, Kirklees and High Peak);~~
- d. ~~West Pennine Moors (Bolton and Bury with connections to Blackburn with Darwen and Chorley);~~
- e. ~~Mersey Valley (Manchester and Trafford with connections to Stockport, High Peak and Cheshire East);~~
- f. ~~Red Moss and Middle Brook Valley (Bolton);~~
- g. ~~Hulton Park (Bolton);~~
- h. ~~Cutacre Country Park (Bolton, Salford and Wigan);~~
- i. ~~Lower Medlock Valley (Manchester);~~
- j. ~~Moston Brook Corridor (Manchester and Oldham);~~
- k. ~~Roch Valley (Rochdale);~~
- l. ~~Hollingworth Lake and Surrounds (Rochdale); and~~
- m. ~~Garrington (Trafford)~~

Development within and around the Green Infrastructure Network should be consistent with delivering major green infrastructure improvements within them and should contribute to improvements. ~~Where Green Infrastructure Opportunity Areas overlap or are in close proximity to development allocations proposed in this plan appropriate measures to achieve this have been included. Further opportunities for delivering strategic green infrastructure enhancements and additional opportunities will be identified in the appropriate source(s) over time as the overall green infrastructure network evolves.~~

New Paragraph:

Development which involves the removal of land from the Green Belt (including allocations proposed in this plan) will be required to offset the impact of removing

land from the Green Belt through identifying and delivering compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site. Details of specific sites and projects will be established in discussion with the relevant Local Authority.

Wherever practicable, opportunities to integrate new and existing green infrastructure into new development will be taken to protect, enhance and expand the green infrastructure network ~~in accordance with the above priorities~~. Where new or improved green infrastructure is delivered as part of a development, the developer should make appropriate provision for its long-term management and maintenance.

Figure 8.2 Green Infrastructure Network

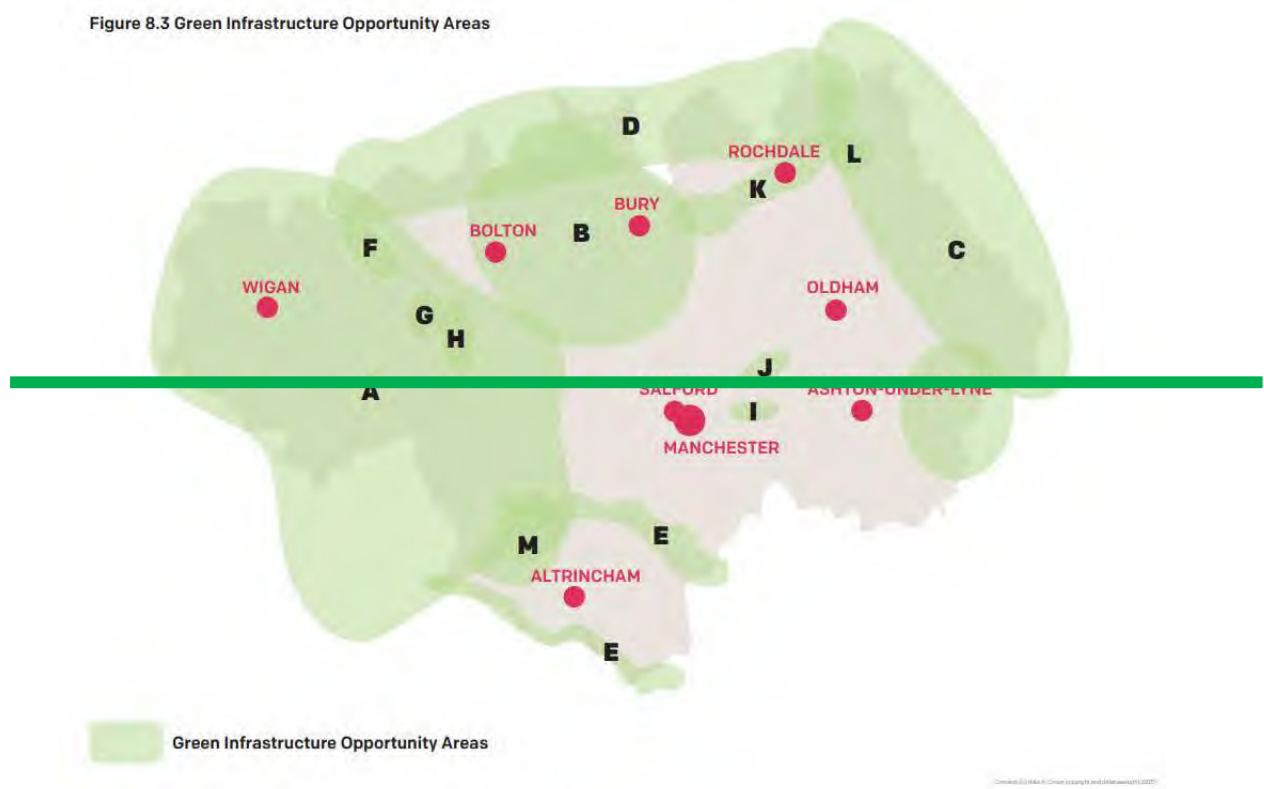

Figure 8.3 Green Infrastructure Opportunity Areas (MM8.5)

Key Elements of the Green Infrastructure Network

8.16 Our Green Infrastructure Network is enormously diverse, both in terms of the type and character of features and the various functions that they perform. At a broad level, the priority green infrastructure can be split into different character areas, although these are not completely discrete and there is some overlap between them:

- River valleys and waterways
- Lowland wetlands and mosslands
- Uplands
- Urban green spaces

8.17 Trees and woodland are further vital elements of the green infrastructure network, permeating through these broad areas and often appearing as key features within them.

8.18 Each type of green infrastructure is important in its own right, adding to the distinctiveness of the local area and Greater Manchester as a whole.

However, it is the combination of, and interrelationships between, them that is particularly significant. Views between the various elements are a key part of the character of the area, and collectively they enable the movement of species throughout the sub-region and beyond. Although this categorisation helps to understand the overall network, it should also be recognised that there are considerable differences within as well as between them. These broad areas are complemented by other green infrastructure features especially within urban areas, such as gardens, ponds, green roofs and verges.

River Valleys and Waterways

- 8.19** There are over 2400 km⁹⁸ of river valleys within Greater Manchester, in addition to over 150 km of canals, which form a central component of the landscape, making a major contribution to biodiversity, geodiversity, wider green infrastructure, local identity, the sense of place and heritage.
- 8.20** In urban centres they have a significant role for generating and sustaining economic growth as well as providing a unique opportunity to contribute to the quality of the local natural environment. They also provide critical ecosystem services in reducing the urban heat island effect and mitigating air pollution, particularly when reinforced by planting.
- 8.21** River valleys and canals are vital components of the wider network of habitats, transport routes and recreation/tourism opportunities, and their long-term management is essential to provide benefits to flood risk, water quality, climate change adaptation, wildlife and creating attractive healthy environments for people to live. They provide important corridors of semi-natural habitats and natural green space, with open grassland, woodland and wetland, linking urban centres with open countryside and connecting other strategically important areas such as the uplands and lowlands. As such, river valleys and canals will form an important part of our Nature Recovery Network.

⁹⁸ Source: Environment Agency

- 8.22** Our river valleys are a complex network and cover a number of catchments including the Mersey, Irwell, Roch, Tame and Bollin. These flow from the Pennine moors to the East and North, and the Peak District to the South-East, across the conurbation and into the lower-lying areas of the South and West. The Douglas also covers the West of Greater Manchester and flows North into the Ribble Estuary (Lancashire).
- 8.23** New development must be designed to ensure river corridors and their associated habitats are integrated within development and enhanced wherever possible, ensuring they are managed sustainably in the long term and opportunities to address Water Framework Directive failures are considered. This in turn will provide high quality and attractive environments, achieve additional economic benefits (through multifunctional ecosystem services and land value capture) whilst ensuring there is increased resilience to future climate change pressures and an overall improvement in biodiversity.
- 8.24** The North West River Basin Management Plan⁹⁹, required under the Water Framework Directive¹⁰⁰, and implemented through UK legislation¹⁰¹, provides the statutory framework for protecting and enhancing the benefits provided by the water environment. Catchment Partnerships are also responsible for preparing catchment plans to help achieve a coordinated approach to Water Framework Directive delivery and embedding the catchment-based approach.

⁹⁹ [River Basin Management Plans 2015](#)

¹⁰⁰ [EU Water Framework Directive](#)

¹⁰¹ [The Water Environment Regulations 2017](#)

Figure 8.4 Greater Manchester's river and canal networks

8.25 Greater Manchester Combined Authority is also a key partner on the EU Life Integrated Project known as 'Natural Course'.¹⁰² This covers the North West River Basin Management Catchment and has a primary focus on the Irwell Catchment. Natural Course is seeking to develop a collaborative approach to integrated water management and the enhancement of the many benefits that our rivers provide. A key objective of Natural Course is to identify and innovative and cost-effective solutions to a range of water management issues and where possible use a natural capital approach to help deliver multiple objectives. A recent study of the ecosystem benefits from the natural environment alongside the Irwell's rivers has an existing natural capital value of £418 million per year.¹⁰³ This Plan has an important role as part of this to ensure that any future development has a positive impact on the water environment and these ecosystem services are enhanced where possible.

Places for Everyone Composite Plan – Modifications Version 2023

Policy JP-G3: River Valleys and Waterways (MM8.6)

River valleys and waterways will be protected and improved as central components of our Green Infrastructure Network and a vital part of a Nature Recovery Network, making a major contribution to local identity, quality of life and the natural environment.

In making planning decisions and carrying out other associated activities, we will seek to deliver the following priorities:

1. Retain the remaining open character of the river valleys, avoiding their fragmentation and prominent development on valley edges;
2. Promote public enjoyment of the river valleys, including as key features connecting urban areas to the countryside, providing opportunities for active travel, and enhance their high recreational value as green fingers through densely populated areas;
3. Protect and enhance the mosaic of semi-natural habitats, including: riparian (waterside), clough, broadleaved and ancient woodland; wet and semi-natural grassland; meadow; and lakes and ponds;
4. Retain existing pockets of relatively tranquillity and seclusion, especially within the more tightly enclosed and wooded valleys;
5. Reduce flood risk, through Natural Flood Management (NFM), including careful land management and a catchment-wide approach;
6. Improve water quality, including through land decontamination and the management of diffuse pollution from industry and agriculture;
7. Return rivers to a more natural state where practicable, including through deculverting and the re-naturalisation of riverbanks and flood plains;
8. Where compatible with the requirements of commercial and freight use, increase the use of canals and watercourses for active travel, with improved and extended rights of way alongside the water providing walking and cycling routes for both recreation and commuting, thereby increasing access to natural green space; and

9. Ensure that development relates positively to nearby rivers and other waterways, taking advantage of opportunities to integrate green infrastructure through:
 - a. High quality frontages to the water; and
 - b. Public realm alongside the water for both recreation use and maintenance access.

Lowland Wetlands and Mosslands

- 8.26** Lowland wetlands and mosslands cover substantial areas within Wigan, west Salford and south-west Trafford, where they form part of the Great Manchester Wetlands Nature Improvement Area which extends into Warrington and measures around 40,000 hectares in total. There are also smaller lowland wetland and mossland areas in other parts of the sub-region, including Clifton Moss in Salford, Red Moss in Bolton, Unsworth Moss in Bury, and Ashton Moss in Tameside. All of these areas have significant green infrastructure functionality and are significant in terms of their biodiversity and geodiversity resources.
- 8.27** The area includes a range of internationally, nationally and locally designated nature conservation sites and is covered by the Great Manchester Wetlands Nature Improvement Area which aims to create an essential network of wildlife corridors, linking biodiversity across the landscape and allowing wetland habitats to thrive and survive.¹⁰⁴ The area will form an important part of the Nature Recovery Network for Greater Manchester. Although it has a rich variety of habitats, existing conservation sites are often poorly connected, and there are large parts of the area where the landscape is degraded. Habitat enhancement and reinstatement could deliver considerable ecological benefits, as well as providing a large-scale recreation resource that could make a significant contribution to the health and quality of life of residents. Landscape enhancements would also support

¹⁰⁴ [Greater Manchester Wetlands](#)

other objectives such as improving water quality, mitigating flood risk and reducing soil erosion.

- 8.28** The mosslands were originally typified by lowland raised bog, which supports a unique range of wildlife. Peat cutting and agriculture have left only small areas of undamaged peat deposits, and lowland raised bog is now one of Western Europe’s rarest and most threatened habitats. Several restoration projects are underway within the Plan area, which will not only have major nature conservation benefits, but could also make a considerable contribution to carbon targets, reducing a significant source of emissions and locking in additional carbon. Within Wigan in particular, extensive valuable wetland habitats have formed on many former industrial sites where undermining has resulted in the formation of subsidence flashes and ponds. A mixture of pasture and arable cultivation is found in farmed areas surrounding the wetlands and active mossland, taking advantage of the productive peaty soils.
- 8.29** The restored industrial landscapes of the wetlands, such as the flashes in Wigan, provide an important recreational resource. There is also a network of public footpaths and long-distance walking and cycling routes, but access to large parts of the landscape is very limited. The Heritage Lottery funded Carbon Landscape project, which also extends through Warrington to incorporate the Mersey Wetlands Corridor, is seeking to reconnect people to the landscapes and raise awareness within local communities of these amazing wild oases on their doorstep, including through a Carbon Trail that will link them together.¹⁰⁵
- 8.30** The importance of the habitats and wider landscape means that there is a strong emphasis in the Plan on their retention and improvement, and the majority of these areas will see little or no development. Some sections of undeveloped mossland, however, are considered appropriate for future development as they are well-located to make a notable contribution to delivering more balanced and inclusive growth. Such areas will only be

¹⁰⁵ [Carbon Landscape](#)

developed where they are shown to be of limited ecological value and the development can be delivered without compromising the green infrastructure role of the wider area.

Policy JP-G4: Lowland Wetlands and Mosslands (MM8.7)

The distinctive flat, open landscape and network of habitats of ecologically valuable lowland wetlands and mosslands, [as identified by the Mosslands and Lowland Farmland Landscape Character Type in Figure 8.1](#), will be protected, enhanced and restored, with a strong emphasis on reconnecting local communities to the natural and historic environments.

In making planning decisions and carrying out other associated activities, we will seek to deliver the following priorities:

1. Maintain and enhance the extensive and varied mosaic of semi-natural habitats including brooks, ditches, open water bodies, bog, fen, swamp, flashes, ponds, wet and broadleaved woodland, and grassland;
2. Manage and restore the remnant pockets of lowland raised bog, including through restoration from farmland, significantly expanding and connecting the areas of active bog to contribute to important functions such as flood risk management and carbon sequestration;
3. Positively manage land adjacent to lowland raised bog and other sensitive wetland habitats in a complementary and coordinated manner, ensuring that their hydrology is not adversely affected and the water table is restored;
4. Increase features that act as steppingstones for wildlife moving through the area, such as field ponds, hedgerows and trees, and minimise barriers to movement;
5. Removal of derelict structures and the remediation of land where it is beneficial to green infrastructure provision and there is no historic value in their retention; and
6. Expand public access across the area considerably, including through the creation of new circular routes, and enhance recreation and active travel opportunities.

Uplands

- 8.31** Greater Manchester's uplands extend around the northern and eastern edges of the conurbation, through Bolton, Bury, Rochdale, Oldham, Tameside and Stockport. The area includes parts of the West and Southern Pennines and the Dark Peak and sits within a much larger moorland landscape stretching eastwards into the Peak District National Park and northwards into Lancashire. As a result, cross-boundary working with neighbouring local authorities including Stockport as well as those outside of Greater Manchester is required to address the issues affecting the uplands.
- 8.32** The uplands and features within them are widely visible from across Greater Manchester, providing a strong sense of place and orientation. The intense rural character and sense of isolation of the uplands, particularly on the unenclosed moorland, contrasts with the extensive urban area below, of which there are spectacular panoramic views. This is complemented by the industrial architecture and archaeology throughout the uplands, including mill ponds, narrow winding lanes, disused quarries and coal-mining relics. Gritstone is a distinctive unifying feature of the dry-stone walls and limited built development.
- 8.33** The importance of the mosaic of moorland habitats is reflected in a range of international, national and local designations, including parts of the large South Pennine Moors Special Area of Conservation and Special Protection Area. These habitats support important breeding bird populations.

(MM8.8) **New Paragraphs:**

The HRA indicates that in the first instance new development should be avoided within 400m of the SAC and SPAs boundaries to limit the risk of urban edge effects which include: fly tipping, dumping of garden waste and resultant introduction of invasive/ alien plants; off-road vehicles leading to track erosion; disturbance to grazing livestock; increased incidence of wildfire; and predation from domestic pets and urban scavengers.

Within 2.5km of the SPAs boundary new development should avoid and/or mitigate loss or disturbance to foraging habitats. Qualifying bird species of the SPAs can travel as far as 2.5km from the SPAs to forage.

On average, people travel no more than 7km to the South Pennine Moors for dog walking. The number of people living within 7km of the SAC and SPAs will increase as a result of the PfE which will place further pressure on these designated habitats from more trips to the moors for recreation, including dog walking. Therefore, within 7km of the SAC and SPAs new development should provide or contribute towards the provision of greenspace as an alternative to visiting the South Pennine Moors and contribute towards the implementation of a Strategic Access, Monitoring and Management Strategy.

These distances from the South Pennine Moors SAC/SPAs fall within the districts of Rochdale, Oldham and Tameside and an SPD will provide further guidance on how criterion 7 of Policy JP-G5 will be implemented, including:

- the cumulative and/or overlapping nature of the geographical requirements;
- the exceptions in which development would be permitted within 400m of the SAC/SPAs;
- how land should be assessed for functionally linked habitats within 2.5km of the SPAs, including guidance on avoidance and mitigation;
and
- a framework for the provision of Suitable Alternative Natural Greenspace (SANG) and the implementation of a Strategic Access, Monitoring and Management Strategy (SAMMS), including the mechanism for the calculation of the financial contributions, by reference to development types, the level of predicted recreational impact on the SAC and SPAs, and the measures upon which such contributions will be spent.

The peat soils of the uplands store significant volumes of carbon, but extensive areas are degraded. Habitat restoration, particularly of blanket bog, but also other wetland habitats and woodland, will be important for

addressing multiple green infrastructure priorities such as sequestering carbon from the atmosphere, minimising flood risk, reducing soil erosion, improving water quality, combating the heat island effect of Greater Manchester and enhancing biodiversity. However, such restoration may have future land use implications, for example by requiring the re-wetting of moorland and/or the blocking of drainage ditches.

- 8.34** The uplands provide a sense of inspiration and escapism, offering important opportunities for outdoor recreation which can make a considerable contribution to health and wellbeing. There are large areas of Open Access Land, several long-distance trails, and reservoirs that form popular visitor destinations. Enabling more people to enjoy the distinctive character of the uplands will help to increase the attractiveness of Greater Manchester as a place to live and visit, and generate local economic benefits, but this will need to be balanced with the pressures that increased access brings.
- 8.35** The distinctive character, sensitivity and visual prominence of the uplands mean that any development will need to be of a small scale and carefully located and designed. Consequently, it has been assumed that very little development will take place within the area, and the uplands will make a negligible contribution to future housing and employment land supply during the plan period. In particular, no land is proposed to be removed from the Green Belt for development within the uplands.

Policy JP-G5: Uplands (MM8.9)

Our upland areas, [as identified by the Open Moorlands and Enclosed Upland Fringes Landscape Character Types in Figure 8.1](#), contain important component parts of the green infrastructure network, including significant areas of blanket bog priority habitat, Sites of Biological Importance (SBIs), Sites of Special Scientific Interest (SSSIs), Special Areas of Conservation (SACs), Special Protection Areas (SPAs), woodlands and habitats vulnerable to climate change. In making planning decisions and carrying out other associated activities, we will seek to:

1. Integrate any new development into the landscape by utilising existing tree/woodland cover and dips in the landform, and adopting the unifying gritstone vernacular where possible;
2. Enhance the full range of upland habitats as part of an ecologically connected network, including heather moorland, blanket bog, meadows, acid grassland, native woods, and healthy watercourses;
3. Significantly extend the area of active blanket bog, both through the protection of existing sites and the positive restoration of degraded areas to contribute to important functions such as flood risk management and carbon sequestration;
4. Protect and naturally regenerate clough woodland, providing a natural connection between the uplands, foothills and lowlands;
5. Increase the role of the area in water storage, flood risk management (through Natural Flood Management) and water quality improvements, as part of a catchment-based approach; and
6. Enable more people to enjoy the distinctive character of the uplands in sustainable ways which balance the pressures that increased access brings with the physical and mental health benefits that this landscape offers.

(MM8.9) New Criteria:

7. Ensure that new development does not have an adverse impact on protected habitats of the South Pennine Moors SAC, the Peak District Moors SPA and the South Pennine Moors Phase 2 SPA from urban edge effects, loss of and/or disturbance to functionally linked habitats and recreation disturbances. This will be implemented by:
 - (a) Within 400m of the SAC and SPAs boundaries, no development will be permitted, unless, as an exception, the development and/or its use would not have an adverse effect on the integrity of the SAC or SPAs;
 - (b) Within 2.5km of the SAC and SPAs boundaries, applications for new development should be accompanied by an assessment to determine if the development site provides foraging habitats for the qualifying bird species of the

SPAs. If foraging habitats are found on site, appropriate avoidance and/or mitigation measures will be required;

(c) Within 7km of the SAC and SPAs boundaries, new residential development will be required to mitigate recreation disturbance impacts on the SAC and SPAs through:

- (i) the provision of on-site suitable alternative natural greenspace or financially contribute to off-site provision of such greenspace; and
- (ii) A financial contribution to the implementation of a Strategic Access, Monitoring and Management Strategy for the SAC and SPAs.

With regards to allocations within this Plan, Criterion 7 (c) applies to the PfE allocations listed below:

- Policy JP Allocation 12 'Beal Valley'
- Policy JP Allocation 14 'Broadbent Moss'
- Policy JP Allocation 15 'Chew Brook Vale'
- Policy JP Allocation 16 'Cowlshaw'
- Policy JP Allocation 22 'Land North of Smithy Bridge'
- Policy JP Allocation 23 'Newhey Quarry'
- Policy JP Allocation 24 'Roch Valley'
- Policy JP Allocation 31 'Godley Green Garden Village'.

Urban Green Space

- 8.36** Whilst our extensive areas of open countryside are enormously important, the conurbation's urban green spaces are of greater significance to many residents on a day-to-day basis and are the areas with which they have greatest contact. These places have most value to people at a local level. Whilst always functioning as green infrastructure, urban green spaces are not always natural, often containing formal or informal recreational facilities such as playgrounds and sports pitches. These are covered in more detail in Policy JP-P 7 'Sport and Recreation'.
- 8.37** Urban green infrastructure includes parks, playing fields and other sports and recreation facilities, but they also include nature reserves, woodlands, allotments, cemeteries, former rail corridors, and other undeveloped land.

Urban green spaces can therefore have widely differing characteristics and values placed upon them. In addition to these valuable green spaces, other types of green infrastructure are also found within the urban area, such as residential gardens, street trees and green roofs.

- 8.38** Urban green spaces are essential to the liveability of urban areas, making a vital contribution to mental and physical health, and more generally to the overall quality of life. They can offer a moment of tranquillity within a busy area, and provide people with opportunities for recreation, social interaction, and to connect with nature. They often form part of the network of green transport routes, supporting more walking and cycling and less car use.
- 8.39** Significantly, they will become increasingly important as a result of climate change, helping to cool overheating urban areas, manage flood risk and enable wildlife to adapt. Other important environmental functions include the ability to mitigate air pollution and help manage water quality. They can be particularly vital for children, providing places to play and opportunities for outdoor learning. They can also help bring communities together, providing places for events and opportunities for community food-growing projects. Urban green space is therefore essential for environmental and social wellbeing, but it also makes a major contribution to economic growth and securing investment. Urban green infrastructure will form a vital part of a Nature Recovery Network for Greater Manchester.
- 8.40** Urban green spaces are often a key part of the character and history of the local area. Some are important heritage assets in their own right, recognised by national or local designations, or provide the setting for them. They are a central element in understanding the story of a place, and several have wider historical and social significance.
- 8.41** The national Monitor of Engagement with the Natural Environment survey suggests that two-thirds of all visits to the natural environment in England are within 2 miles of home, and two-fifths are within 1 mile.¹⁰⁶ Access to these smaller green spaces at short distances is therefore important to

¹⁰⁶ March 2015 to February 2016 - [Monitor of Engagement with the Natural Environment](#)

deliver the health, wellbeing and other benefits that result from visiting the natural environment. However, less than half of Greater Manchester residents currently live within 300 metres of an accessible natural green space of at least 2 hectares in area. The places of greatest deficiency tend to be the more densely developed urban areas. Part of the overall strategy is to make best use of previously-developed land in order to reduce the need for developing greenfield (not previously-developed) sites but this can only result in quality places if it is accompanied by considerable improvements in the accessibility, quality and functionality of green space, particularly in higher density urban locations.

Policy JP-G6: Urban Green Space (MM8.10)

To ensure there is an appropriate scale, type, quality and distribution of accessible urban green space that can support a high quality of life and other important green infrastructure functions:

- existing urban green space will be protected and enhanced in balance with other considerations; and
- we will work with developers and other stakeholders to deliver new high quality urban green spaces ~~which meet accessibility standards~~.

Development should be designed to support the positive use of nearby green spaces, such as by offering a high-quality setting, providing natural surveillance, and facilitating easy access by walking and cycling.

Trees and Woodland

8.42 Trees and woodland are extremely important components of our Green Infrastructure Network, fulfilling a very wide range of functions including sequestering and storing carbon, enhancing biodiversity, providing access to nature, managing water, air, soil and noise pollution, reducing flood risk, stabilising land, reducing soil erosion, strengthening landscape character, and providing shade and cooling to combat high temperatures. For example, woodlands can slow the flow of water, increase infiltration, stabilise riverbeds and banks, and intercept pollutants, all of which will help to achieve North West River Basin Management Plan objectives. Trees in the urban

environment can soften otherwise harsh environments, filter wind and humanise the scale of tall buildings, creating pleasant public spaces at street level. Trees also play a major role within the urban environment, softening otherwise harsh environments, filtering wind and providing contrast to the scale of tall buildings, creating pleasant public spaces at street level.

- 8.43** Our woodlands vary in character, from upland oak woods to wet woodland, and from ancient broadleaved woodland to plantation and young woodland. Many of our important woodlands have been designated for their nature conservation interest. Trees and woodland are often important features within areas of priority green infrastructure (see Policy JP-G 2 'Green Infrastructure Network') and within the other key parts of the green infrastructure network specifically identified within the GMSF (see Policy JP-G 3 'River Valleys and Waterways', Policy JP-G 4 'Lowland Wetlands and Mosslands' and Policy JP-G 5 'Uplands').
- 8.44** (MM8.11) Impressive efforts have been made over the past three decades to increase tree cover and the results of this are starting to take effect, ~~and~~ ~~these efforts are now being~~ have been brought together under the Greater Manchester Tree and Woodland Strategy, ~~being~~ prepared on behalf of Greater Manchester by the City of Trees initiative, ~~with the intention of being formally adopted as guidance which can inform planning decisions. This guidance provides an overarching strategy for individual districts to develop local tree strategies, greenspace plans or similar related strategies.~~ Maturing woodlands provide significant areas of Greater Manchester with a character that now appears greener and much less grey than in the past, but there is considerable scope to secure further improvements across a much wider area. Currently around 15.7% of Greater Manchester is beneath tree canopy.¹⁰⁷ The City of Trees initiative identifies a target to plant one tree for every resident in Greater Manchester with the aspiration of raising Greater Manchester's level of tree cover to at least the national average and this would have major environmental, social and economic benefits that would support implementation of this Plan. It would also contribute to the broader

¹⁰⁷ See [Manchester City of Trees News](#)

Northern Forest project stretching from Liverpool to Hull, which aims to address the North's low level of woodland cover and support an increase in tourism by planting 50 million trees over the next 25 years.

- 8.45** Whilst new planting will be essential, it will also be important to protect and enhance existing trees and woodland, especially within or close to urban areas where they make a major contribution to quality of life. Expanding and connecting areas of woodland would help to make them more resilient to external threats such as climate change and will be essential in the development of a Nature Recovery Network.
- 8.46** The following policy incorporates the Woodland Trust's woodland access standards which provide a target for improving public access to woodland. There will be some parts of our area where fully achieving the standards will not be possible, for example due to existing land uses or the presence of other priority habitats, but the standards provide a relevant guide and aim.

Policy JP-G7: Trees and Woodland (MM8.12); (AM8.2)

~~In making planning decisions and carrying out other associated activities,~~ We will work to deliver the aims and objectives of the Greater Manchester Tree and Woodland Strategy, aiming to significantly increase tree cover, protect and enhance woodland, and connect people to the trees and woodland around them, ~~including~~ **by:**

This will be done through local planning and associated activities such as:

1. Protecting and expanding the mosaic of woodland habitats, linking fragmented areas of woodland, in particular wooded cloughs and pockets of ancient and riverside (riparian) woodland;
2. Encouraging habitat diversity through conserving and managing existing woodland and trees that are of heritage, cultural and/or aesthetic value, including ancient woodland and veteran trees;
3. Aiming to plant a tree for every resident in the plan area over the next 25 years as part of the City of Trees initiative;

4. Targeting tree-planting at the areas of greatest need where the green infrastructure benefits can be maximised, whilst avoiding the loss of, or harm to, other priority habitats, including encouraging woodland planting schemes on areas of low-grade agricultural land and land in need of remediation;
5. Establishing a new City Forest Park in Salford, Bolton and Bury, which will provide a vast urban forest close to the City Centre;
6. Considerably increasing the provision of street trees within urban areas;
7. Promoting the provision of community orchards to increase fruit consumption;
8. Promoting the opportunity for woodland conservation to raise awareness for the sustainable use of timber;
9. Securing a diversification of broadleaved species, in order to increase biodiversity and disease resilience;
10. Improving public access to woodland and trees particularly by sustainable travel models to capture the health and wellbeing benefits whilst managing the associated pressures;
11. Encouraging the positive management of woodland to bring it into a more productive state, improve habitat diversity, and more effectively contribute to important green infrastructure functions such as flood risk management, urban cooling and carbon storage/sequestration;

And through development as follows:

12. Where development would result in the loss of existing trees, requiring replacement on the basis of two new trees for each tree lost, or other measures that would also result in a net enhancement in the character and quality of the treescape and biodiversity value in the local area, with a preference for on-site provision; and
13. Protecting trees and woodland during the construction phase of development.

~~Standards for Greener Places~~ (MM8.13)

~~8.47~~—The use of defined standards can help to ensure that there is sufficient quantity and quality of green infrastructure to meet the needs of residents and to deliver the overall green infrastructure network described in Policy JP-G 2 'Green Infrastructure Network'. A variety of standards have been developed by different organisations. We are committed to developing our own standards and in doing so will have regard to whichever of these are most relevant and will provide appropriate supporting guidance as they develop.

~~Policy JP-G8: Standards for Greener Places~~ (MM8.14)

We will develop standards in relation to:

- ~~Access to natural green space~~, which seek to maximise the overall proportion of people in our boroughs who have access to natural green space. The Accessible Natural Greenspace Standards (ANGSt) published by Natural England will provide the principal starting point as their focus on ensuring good accessibility to different sizes of green space for all residents make them an appropriate approach at a sub-regional level. More detailed standards regarding specific habitats, designations, quality or functions of green space may be set out in district local plans, taking account of local circumstances and opportunities.
- ~~A "Green Factor"~~, which sets out the level of on-site green infrastructure that new developments are expected to provide so as to meet their occupants' needs and contribute to the extent and interconnectedness of the wider network. The Green Factor will provide a baseline expectation based on the proportion of the site that is covered by different types of green infrastructure features.

~~Development has a major role in helping to achieve such standards, both through on-site provision of green infrastructure and the creation or improvement of off-site green infrastructure. The site allocations in this Plan provide opportunities to incorporate major areas of new accessible green infrastructure, delivering overall net~~

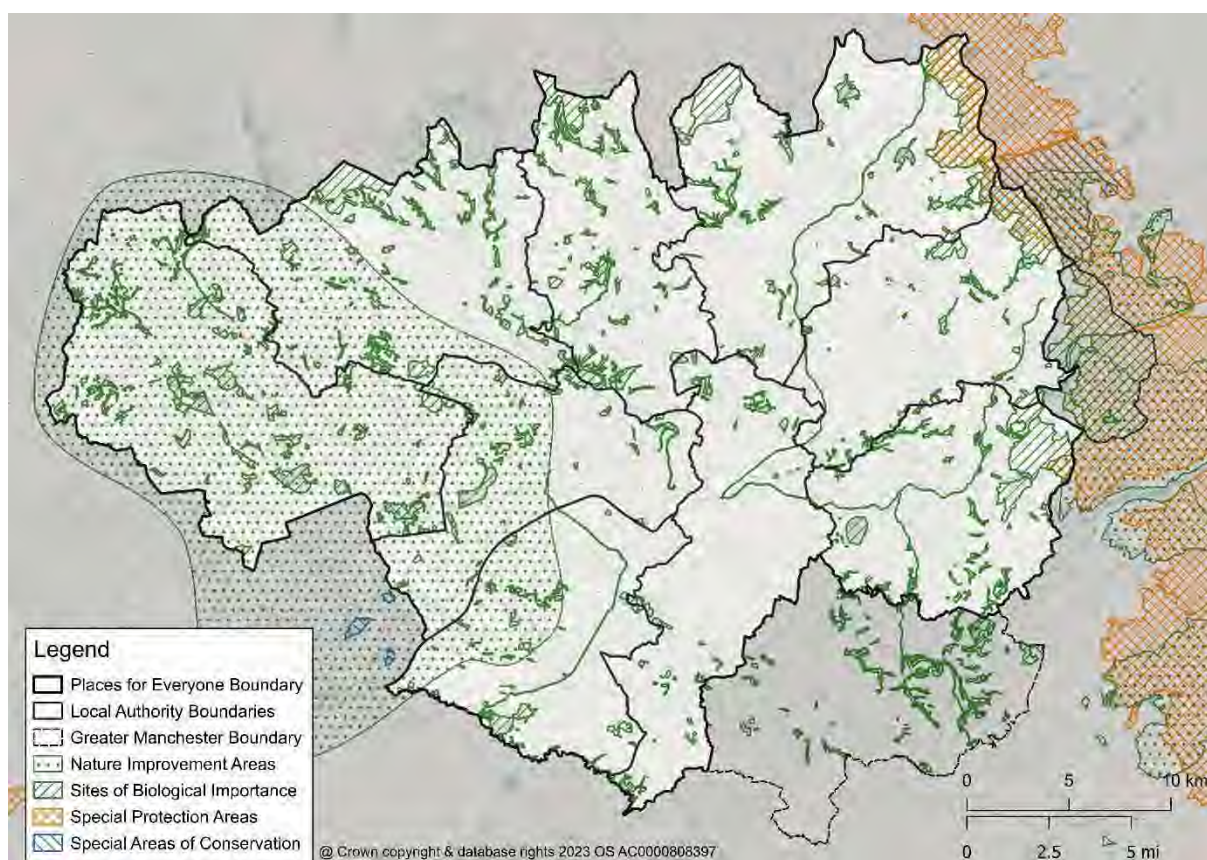

~~gains in green infrastructure value to the benefit of local communities even if the quantity in that particular location may reduce. The way in which existing built areas have developed over time means that it will not be realistically possible to meet all of the standards in all parts of the plan area but they are an important aspiration to work towards wherever possible.~~

Biodiversity and Geodiversity

- 8.48** Biodiversity (the variety of living organisms) and geodiversity (the range of rocks, minerals, fossils, soils and landforms) underpin the value of the natural environment and its ability to provide a wide range of important benefits, including supporting human health and quality of life. Achieving a major net enhancement of biodiversity value and improving access to nature are key priorities for this Plan and central components of the wider approach to green infrastructure and the natural environment.
- 8.49** The Plan area contains a wide range of important sites designated for their high nature conservation value, including the internationally designated South Pennine Moors, Rochdale Canal and the Manchester Mosses, 22 nationally designated Sites of Special Scientific Interest, and approximately 470 locally designated Sites of Biological Importance and Regionally Important Geological Sites.
- 8.50** The effective conservation of biodiversity will require more than simply the protection of existing designated sites and priority habitats, particularly given the scale of development proposed in this Plan. A wider strategy for Nature Recovery is needed, including habitat restoration and creation, and the transformation of broad landscape areas into a diverse Nature Recovery Network.
- 8.51** A large area in the west of the sub-region extending into Warrington has been designated as the Great Manchester Wetlands Nature Improvement Area (NIA). This area is dominated by the lowland wetlands (see Policy JP-G 4 'Lowland Wetlands and Mosslands') and seeks to take a landscape-scale approach to ecological enhancement. The NIA will be integrated into a wider Nature Recovery Network for Greater Manchester.

- 8.52** (MM8.15) If our overall aims of a major net enhancement of biodiversity value and improved access to nature are to be achieved then all new development will have to play its part, each delivering a net gain in biodiversity. This could involve the protection and improvement of existing habitats, the creation of new ones, and/or the strengthening of connections between them. [The Defra metric \(DEFRA 3.0 or later\)](#) ~~Recognised metrics~~ will be applied to new development proposals to calculate and demonstrate a measurable net gain in biodiversity of no less than 10%.

Figure 8.5 Designated wildlife sites in Greater Manchester

- 8.53** (MM8.15) Agricultural land is also of significance in the safeguarding of soil resources, with 'best and most versatile' land¹⁰⁸ safeguarded because of its long-term potential for delivering both food and non-food crops. Soils in Greater Manchester are, however, significant for more than their agricultural value with extensive uplands and lowland areas characterised by deep peaty

¹⁰⁸ Grades 1, 2 and 3a within the Agricultural Land Classification, see [Natural England](#)

soils, which have a high environmental value and are identified as a priority in the Government's 25-year environment plan.¹⁰⁹ Over half of the UK's soil carbon store is contained in peat soils.¹¹⁰ Development will ordinarily be directed away from valuable soils, unless robust evidence in accordance with relevant government and other guidance indicates otherwise, and the Plan's strong preference for brownfield development will assist in this. However, given the overall scale of development that needs to be accommodated, a limited amount of development on high grade agricultural land is necessary as it is critical to the delivery of wider development proposals.

(MM8.15) New Paragraph:

In line with the outcomes of the HRA, where appropriate, new development should: mitigate air pollution impacts on the Manchester Mosses SAC with reference to Policy JP-C7; mitigate urban edge, functionally linked land and recreation disturbance impacts on the South Pennine Moors SAC/SPAs with reference to Policy JP-G5; and assess and potentially mitigate boat movement, water pollution, and light spillage and shading impacts on the Rochdale Canal SAC with reference to policies JPA-2, JPA-20 and JPA-22.

Policy JP-G9: A Net Enhancement of Biodiversity and Geodiversity

(MM8.16)

~~Across the plan as a whole, a~~ Through local planning and associated activities a net enhancement of biodiversity resources will be sought, including, where relevant, by:

1. Increasing the quality, quantity, extent and diversity of habitats, particularly priority habitats identified in national or local biodiversity action plans and those that support priority species;
2. Improving connections between habitats, to protect and enhance the provision of corridors, ecological networks (including Nature Recovery Networks) and

¹⁰⁹ HM Government (2018), see [25 Year Environment Plan](#)

¹¹⁰ Defra (2009) Safeguarding our Soils, see [Safeguarding Our Soils A Strategy for England](#)

steppingstones that enable the movement of species, especially as the climate changes;

3. Enhancing the management of existing habitats, including through habitat restoration, avoiding habitat fragmentation and combating invasive species;
4. Protecting sites designated for their nature conservation and/or geological importance, with the highest level of protection given to international and then national designations ~~in accordance with legislation and national policy~~;
5. Facilitating greater access to nature, particularly within urban areas;
6. Supporting the development and implementation of the Great Manchester Wetlands Nature Recovery Network; and
7. Safeguarding, restoring and sustainably managing our most valuable soil resources, tackling soil degradation/erosion and recovering soil fertility, particularly to ensure protection of peat-based soils and safeguard 'best and most versatile' agricultural land.

Development will be expected to:

- a. Follow the mitigation hierarchy of:
 - i. Avoiding significant harm to biodiversity, particularly where it is irreplaceable, ~~and including through~~ consideration of alternative sites with less harmful impacts where appropriate, then
 - ii. Adequately Mitigating ~~(within the local area)~~ any harm to biodiversity, then
 - iii. Adequately Compensating ~~(within the local area)~~ for any remaining harm to biodiversity
- b. Avoid fragmenting or severing connectivity between habitats;
- c. Achieve a measurable net gain in biodiversity of no less than 10%
- d. Make appropriate provision for long-term management of habitats and geological features connected to the development; ~~and~~
- e. ~~Provide robust evidence in accordance with relevant government and other guidance, including field surveys wherever development of 'best and most versatile' agricultural land is proposed or to establish the status of the land within the Agricultural Land Classification.~~

New criterion after criterion d:

Where appropriate, development should: mitigate air pollution impacts on Manchester Mosses SAC; mitigate urban edge, functionally linked land and recreation disturbance impacts on the South Pennine Moors SAC/SPAs; and assess and potentially mitigate boat movement, water pollution, and light spillage and shading impacts on the Rochdale Canal SAC; and

New criterion after criterion d:

Development proposals should be informed by the findings and recommendations of the appropriate biodiversity/ecological assessment(s) in the PfE evidence base and/or any updated or appropriate biodiversity/ecological assessments submitted as part of the planning application process.

~~Whilst off-site habitat enhancement and creation required as part of the mitigation hierarchy (or to achieve a measurable net gain in biodiversity of no less than 10%) should be local to the site regard should be had to supporting strategic biodiversity priorities and initiatives.~~

The Green Belt

8.54 (MM8.17) Our Green Belt was originally designated in full in 1984 as part of the Greater Manchester Green Belt. ~~It has since seen~~ There have been a series of ~~minor~~ amendments through individual district plans and Places for Everyone; ~~currently it totals 53,753 hectares in size, equating to approximately 46.7% of the total land area covered by this Plan. The scale of development that needs to be accommodated within the Plan area up to 2037 means that some changes to the Green Belt boundaries are necessary, but these have been minimised as far as possible, having regard in particular to the need to promote sustainable patterns of development. This will result in a net reduction in t~~ The Plan area's designated Green Belt of 1,754 totals 51,539.02 hectares (3.3%), ensuring that approximately 45.2% of the Plan area will still be Green Belt.

8.55 (MM8.17) The Green Belt makes up a considerable proportion of land in the Plan area, and it is therefore vital that its various parts play a beneficial role that supports the environmental, social and economic wellbeing of the city-region's residents. We will plan, in particular, for the enhancement of its green infrastructure functions, such as improved public access and habitat restoration, helping to deliver environmental and social benefits for our residents and providing the high-quality green spaces that will support economic growth. In particular it assists in protecting and enabling the positive use and enhancement of land which has essential natural environment and green infrastructure functions supported by other policies in the Plan, such as:

- Landscape, see Policy JP-G 1 '~~Valuing Important Landscapes~~Landscape Character';
- Recreation, see Policy JP-P 7 'Sport and Recreation';
- Biodiversity and Geodiversity, see Policy JP-G 9 'A Net Enhancement of Biodiversity and Geodiversity'; and
- Sustainable flood management, see Policy JP-S 5 'Flood Risk and the Water Environment'.

8.56 The Green Belt also plays an important role in restricting unplanned development in a city-region with a complex urban form, ensuring that its cities, towns and smaller settlements retain their identity.

8.57 (MM8.17) To deliver the inclusive and prosperous future outlined in the Greater Manchester Strategy, we have sought to make as much use as possible ~~maximise the use of~~ land outside of the Green Belt, ~~giving the highest priority to brownfield land~~. Development of suitable brownfield sites and optimising the density of development are key drivers for the overall strategy, leading to a significant focus on the existing urban area.

8.58 The majority of the development required to deliver the Plan's spatial strategy will be within the existing urban area. This approach alone is not, however, sufficient to meet our full development needs.

- 8.59** Discussions have taken place with neighbouring local authorities to determine whether it would be appropriate for them to meet some of our development needs, but it has been agreed that this would not be appropriate as it would require them to release parts of their own Green Belt and would be likely to lead to less sustainable commuting patterns. In order to address this shortfall, a process of site selection was undertaken, to identify sites. It first gave consideration to previously-developed land and/or that well-served by public transport. Following that it identified sufficient sites to meet the identified needs in this plan which fitted our overall Vision, Strategic Objectives and the sustainability principles of the plan.
- 8.60** The need to deliver the positive long-term outcomes of the Greater Manchester Strategy is considered to amount to exceptional circumstances which justify altering the boundaries of the Green Belt. Therefore in some locations land previously in the Green Belt has had that designation removed to enable development to take place as detailed in the allocations in Chapter 11 'Allocations', additionally these areas are identified on the Policies Map.
- 8.61** In other locations land which was not previously in the Green Belt has now been designated as such because it is assessed to meet one or more of the five purposes, for example to prevent settlements merging, and necessary to keep it permanently open. The locations of proposed additions to the Green Belt are detailed in Appendix B 'Additions to the Green Belt'. These areas form part of the designated Green Belt as defined on the Policies Map in Appendix C 'Places for Everyone Policies Map'.
- 8.62** (AM8.3) In amending the Green Belt boundary, through ~~the allocations in~~ this Plan, opportunities have been identified to improve/enhance Green Infrastructure within the land to remain within the Green Belt. Additionally opportunities have been identified to mitigate harm to the retained Green Belt caused by these amendments.

Policy JP-G10: The Green Belt (MM8.19); (AM8.4)

The Green Belt ~~is as~~ defined on the Policies Map ~~and illustrated on Figure 8.6 will be afforded strong protection in accordance with the National Planning Policy~~

~~Framework. The Green Belt as shown in Figure 8.6 'The Green Belt 2021', will continue to be managed positively to serves~~ the five purposes set out in national policy:

- to check the unrestricted sprawl of large built-up areas;
- to prevent neighbouring towns merging into one another;
- to assist in safeguarding the countryside from encroachment;
- to preserve the setting and special character of historic towns; and
- to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

~~Positive and The~~ beneficial use of the Green Belt will be ~~supported~~ enhanced where this ~~this~~ can be achieved without harm to its openness, permanence or ability to serve its five purposes. In particular, the enhancement of its green infrastructure functions will be encouraged, such as improved public access and habitat restoration, helping to deliver environmental and social benefits for our residents and providing the high quality green spaces that will support economic growth.

~~Within the allocations identified on the Policies Map, Green Belt policies will be strictly applied to the development areas removed from the Green Belt by this plan except in the case of planning applications complying with the relevant allocations policies (see 11 'Allocations').~~

Figure 8.6 The Green Belt 2021(MM8.20)

Safeguarded Land (MM8.21)

- 8.63**— National policy states that Green Belt boundaries in development plans should be altered only exceptionally and should not normally be needed to be altered at the end of the plan period. National guidance details that safeguarded land can be identified in order to meet long term development needs stretching well beyond the plan period.
- 8.64**— Safeguarded Land helps to protect the Green Belt by providing a reserve of land to meet development needs in the longer term without having to encroach on Green Belt. It is land that sits between a settlement edge and the Green Belt that could be identified in a development plan to meet future development needs if required. Identifying land in this way means that Green Belt boundaries do not need to be altered every time a development plan is reviewed and therefore enables Green Belt boundaries to endure into the future.
- 8.65**— The Plan allocates a number of sites for development, both for new homes and employment. A number of these sites have capacity for development beyond the plan period, therefore helping to ensure that the Green Belt boundaries in this Plan endure into the future.
- 8.66**— To supplement the capacity in these sites, the plan also identifies a small number of sites as safeguarded land. This land will help to meet longer term development needs which cannot be met within the urban areas or on previously developed land and will further safeguard the Green Belt boundaries identified in this plan in that area.
- 8.67**— It is important that protected open land is not released for development unless the need to do so can be justified, that the site is in a sustainable location, taking account of the Spatial Strategy, for the intended use and that it does not harm important landscapes, green features or local residential amenity.

Policy JP-G11: Safeguarded Land (MM8.22)

The following area of open land, outside the urban area and not in the Green Belt, is identified on the Policies Map and protected from development:

- Land adjacent to the proposed HS2 Manchester Airport Station

Development on this land will only be permitted where it would:

- Be acceptable were it in the Green Belt; and
- Not prejudice the future use of the land.

Safeguarded Land will only be released for development where the following apply:

- There is evidence that the development is needed and that 'urban' brownfield and greenfield sites are not available to meet those needs;
- The proposed development is sustainable and is in accordance with the overall Spatial Strategy;
- The proposed development is supported by a comprehensive scheme for its delivery, including the provision of necessary infrastructure and measures to positively mitigate environmental impacts; and
- The proposed development is supported by an appraisal of the landscape and visual impacts and incorporates appropriate positive mitigation.

Where the release of safeguarded land can be justified, this will be done through a review of this Plan or through the preparation of a local planning authority's local plan.

Blank Page

Places for People

Promoting Inclusion

- 9.1** Delivering a more inclusive Greater Manchester is at the heart of everything that the Greater Manchester Strategy is trying to achieve. The ultimate measure of the plan's success will be whether it has helped to enhance the lives of all residents within our plan area. The last few decades have seen increasing inequalities across the country. Although Greater Manchester has an excellent range of employment, housing and leisure opportunities, the ability of people to access them can vary considerably. Some neighbourhoods have not shared in the benefits of recent economic growth and there are places in Greater Manchester where a significant proportion of the population suffer from deprivation with low levels of educational attainment, poor health and life expectancy. Many people are unable to find a suitable home at a cost they can afford.
- 9.2** This Plan has an important role in helping to address these inequalities and disadvantages. A key aim must be to enable the full potential of every person and every place to be realised, with them being able to both contribute to, and benefit from, the successes of Greater Manchester. The positive impacts of development and investment must be spread as widely as possible. It will also be important to respond to the diverse needs and identities of different people and communities, with everyone being able to flourish wherever they live. Residents should be able to actively contribute to decisions about places that will affect them, increasing empowerment and a feeling of ownership about the way in which Greater Manchester evolves.
- 9.3** Supporting these social improvements is clearly of fundamental importance in its own right but will also help to deliver more sustained economic growth in the long-term. Delivering them will require a collaborative approach between the GMCA, local authorities, residents, developers and other organisations.

9.4 (AM9.1) This Plan promotes greater inclusion in a wide variety of ways, some of which are set out in this chapter but many of which will be delivered through other parts of the plan. Such measures include:

- Delivering sustainable places that can meet the needs of all sections of communities, both now and in the future;
- Achieving the high quality, inclusive design of places and developments;
- Encouraging the efficient reuse of previously-developed land and buildings as part of the coordinated regeneration of urban areas, particularly those with high levels of deprivation;
- Significantly increasing the supply of new housing that helps to meet the wide variety of needs at a price people can afford;
- Enhancing the supply of employment opportunities at a variety of skill levels to achieve more inclusive growth;
- Supporting improvements in education and research facilities;
- Enabling all residents to lead healthier lives in safer places with good access to facilities that support health and well-being;
- Providing excellent transport networks that help people to access opportunities across Greater Manchester, particularly by walking, cycling and public transport;
- Increasing the range and accessibility of cultural, leisure and sporting opportunities;
- Improving access for all neighbourhoods to green space and nature; and
- Supporting greater inclusion through the design and implementation of individual development proposals.

Sustainable Places

9.5 Greater Manchester consists of a varied network of places, both urban and rural, many with strong and proud identities. If this Plan is to have a positive impact, then a key aim must be to raise the quality of all places in a way that is sustainable in the long-term. This will help to enhance wellbeing for residents, as well as making Greater Manchester more attractive to potential visitors and investors.

- 9.6** Every place in Greater Manchester is unique, having carved out its own specific role within the sub-region. The mix of uses, types of business and demographic profile of residents varies from place to place. This diversity is a major strength of Greater Manchester, allowing people to find the type of location that they require or desire.
- 9.7** The Greater Manchester Strategy sets out the ambition that all parts of Greater Manchester will be neighbourhoods of choice, with good quality affordable homes in safe and attractive communities, well served by public transport, so that the people that live in them are connected to jobs and opportunity and have access to excellent local amenities, green spaces and a high quality cultural and leisure offer. One of its ten priorities is for Greater Manchester to be an age-friendly city region. If Greater Manchester is to be genuinely inclusive then each of its places must be open to everyone, providing the type of area where people can start well, live well and age well. This will enable people to remain within or near their favoured neighbourhood, close to family and friends, as their requirements change.
- 9.8** High levels of development are proposed over the plan period, and much of this will be accommodated within places that already have a strong identity. A key challenge will be to ensure that this development is fully integrated into that place, making a positive contribution rather than detracting from its coherence and character. All places will need to evolve and adapt to changes in society and technology, but it will be important that this supports improvements in their overall quality. Local distinctiveness and identity will need to be enhanced, avoiding the pitfalls of expansion seen in many other cities that have become a continuous urban area where one place is hard to distinguish from another. The unique character of its constituent towns and neighbourhoods is a key strength of Greater Manchester that must be retained.
- 9.9** If quality of life is to be enhanced then it will be vital to maximise the opportunities that our places offer and limit the constraints that they place on how people live. All neighbourhoods must be designed to enable residents to live healthier, happier and more fulfilling lives, with the barriers to doing so

minimised as far as possible. This must include recognising and responding to the difficulties that people may face due to age, disability, illness or financial circumstances. Achieving all of this will help to ensure that all places are characterised by empowered and informed residents, workers and visitors, with a sense of ownership and high levels of societal participation and social interaction.

(MM9.1) New Paragraphs

Greater Manchester aims to be one of the most resilient places in the world.

A key part of achieving sustainable development is ensuring resilience, making sure that our places maintain capacity to function, so that the people living and working here survive and thrive no matter what stresses or shocks they encounter. A significant challenge within this is the ability to respond to future impacts from climate change.

Greater Manchester is part of the Rockefeller Foundation's 100 Resilient Cities programme (100RC)¹¹¹, which aims to help cities become more resilient to potential challenges. Greater Manchester has produced a Resilience Strategy as part of this programme. The ten districts have also signed up to the United Nations' Making Cities Resilient Campaign, which aims to reduce disaster risk.

The need to plan to reduce chronic stresses as well as minimise the impact of acute shocks means that planning for resilience has to be all-embracing, and so many elements of this plan have a role to play.

The Greater Manchester Community Risk Register¹¹² and work under the 100RC programme identify that river and surface water flooding, hazardous materials accidents, terrorism, and disease outbreaks are some of the most significant resilience challenges faced. The way in which Greater Manchester develops will have a significant impact on future levels of risk

¹¹¹ See <https://www.rockefellerfoundation.org/100-resilient-cities/>

¹¹² See <https://www.gmemergencyplanning.org.uk/risks/how-we-assess-risk/community-risk-register/>

and vulnerability, and the ability of people and places to recover from acute shocks.

9.10 High quality design will be fundamental to achieving all of this, helping to ensure that Greater Manchester can deliver the attractive places that will enable it to compete successfully with other major cities across the world. Good design need not result in additional costs, and indeed can lead to significant savings in the long-term, both for occupiers and society more generally. It can also help to increase the acceptability of development to existing residents and enhance the reputation of the developer. Relatively small design changes can make a considerable difference to the overall quality of a development, and the contribution that it makes to the success of a place. A high level of care is therefore required from developers throughout the design process. All development should achieve a high design quality, consistent with the ten characteristics set out in the National Design Guide.¹¹³

Policy JP-P1 Sustainable Places (MM9.2); (AM9.2)

We aim to become one of the most liveable city regions in the world, consisting of a series of beautiful, healthy and varied places, each having the following key attributes that all development, wherever appropriate, should be consistent with:

1. Distinctive, with a clear identity that:
 - A. ~~Responds to~~ Conserves and enhances the natural environment, landscape features, historic environment and local history and culture;
 - B. Enables a clear understanding of how the place has developed; and
 - C. Respects and acknowledges the character and identity identify of the locality in terms of design, siting, size, scale and materials used

¹¹³ Ministry of Housing Communities & Local Government (2019) National Design Guide
Places for Everyone Composite Plan – Modifications Version 2023

2. Visually stimulating, creating interesting and imaginative environments which raise the human spirit through the use of green space, public art and quality design
3. Socially inclusive:
 - A. Responding to the needs of all parts of society;
 - B. Enabling everyone to participate equally and independently;
 - C. Providing opportunities for social contact and support; and
 - D. Promoting a sense of community
4. Resilient, capable of dealing with major environmental ~~and economic~~ events
5. Adaptable, able to respond easily to varied and changing needs and technologies
6. Durable, being built to last and using robust materials that reflect local character, weather well and are easily maintained
7. Resource-efficient with:
 - A. A low carbon footprint;
 - B. Efficient use of land;
 - C. Minimised use of new materials;
 - D. High levels of recycling
8. Safe, including by designing out crime and terrorism, ~~and~~ reducing opportunities for anti-social behaviour and by ensuring that developments make appropriate provision for response and evacuation in the case of an emergency or disaster.
9. Supported by critical infrastructure, such as energy, water and drainage and green spaces
10. Functional and convenient, enabling people and uses to act efficiently with minimal effort, and responding to needs relating to servicing, recycling facilities, refuse collection and storage

11. Incorporating **accessibility inclusive** design **standards** within all spaces with support for tackling inequality and poverty to form part of creating sustainable places
12. Legible, being easy to understand and navigate, with the protection and enhancement of key views and new development well-integrated into the place
13. Easy to move around for those of all mobility levels, particularly by walking and cycling, with enjoyable routes free from obstacles and disorienting stimuli, and with places to rest
14. Well-connected to other places, particularly by public transport and digital infrastructure enabling everyone to take advantage of the employment, cultural and leisure opportunities across Greater Manchester and beyond
15. Comfortable and inviting, with indoor and outdoor environments:
 - A. Offering a high level of amenity that minimises exposure to pollution; and
 - B. Addressing microclimate issues such as sunlight, indoor air quality, overheating, shade, wind and shelter
16. Incorporating high quality and well managed green infrastructure and quality public realm, with:
 - A. Opportunities for recreation and outdoor play for children, and interaction between the generations;
 - B. Public and private spaces clearly distinguished;
 - C. Development clearly defining, and promoting activity within, public spaces;
 - D. High quality landscaping with schemes
17. Well-served by local shops, services and amenities, including education and health facilities

Heritage

- 9.11** (AM9.3) Greater Manchester has a uniquely diverse cultural heritage represented by its rich and extensive historic and built environment, including designated and non-designated heritage assets. Its development has evolved over a period of more than 5,000 years, gradually changing from a heavily wooded landscape populated by hunter gatherers and upland camp sites, to become an overwhelmingly cleared rural landscape dotted with farmsteads. Many towns and villages of Greater Manchester can trace their origin to Saxon or Viking settlers, with their place names, often reflecting distinctive landscape features or farmsteads. Today's principal towns established market and borough status from the 13th century, but it was the impact of the industrial revolution of the late 18th and 19th centuries that would transform the character, appearance and economic fortunes of Greater Manchester. This growth was based on the textile industry, particularly cotton, and facilitated by natural resources such as water and coal, technological advancement, plentiful labour and improved communications linking it to a national and global market. All of this has left a huge imprint on the landscape and contributes to our local identity and sense of place. There is a great opportunity to retain and find uses for the best of this heritage and ensure the unique urban and industrial character of Greater Manchester continues to play a part in its future growth and development.
- 9.12** (AM9.3) The conservation and enhancement of the historic environment will start with the preparation and implementation of up-to-date evidence of the historic environment which will be used to help shape and inform the implementation of planning policies at a strategic and local plan level. Key sources of information include the National Heritage List for England, the Greater Manchester Historic Environment Record, Places for Everyone Heritage Topic Paper, national and local Heritage at Risk surveys, the Greater Manchester Historic Landscape Characterisation project, the Greater Manchester Textile Mills Survey, conservation area appraisals and management plans and site-specific assessments.

Policy JP-P2: Heritage (MM9.3); (AM9.4)

~~Through this Plan we~~ We will proactively manage and work with partners to positively conserve, sustain and enhance ~~its~~ our historic environment and heritage assets and their settings. Opportunities will be pursued to aid the promotion, enjoyment, understanding and interpretation of heritage assets, as a means of maximising wider public benefits and reinforcing Greater Manchester's distinct character, identity and sense of place.

Local Plans will set out the key elements which contribute to the district's identity, character and distinctiveness and which should be the priority for safeguarding conserving and enhancing in the future and demonstrate a clear understanding of the historic environment and the heritage values of sites, buildings or areas and their relationship with their surroundings. This knowledge should be used to inform the positive management and integration of our heritage by:

1. Setting out a clear vision that recognises and embeds the role of heritage in place-making;
2. ~~Utilising~~ Ensuring that the heritage significance of a site or area is considered in accordance with national planning policy in the planning and design process, ~~providing and~~ opportunities for interpretation and local engagement are optimised;
3. Integrating the conservation and enhancement of heritage assets and their settings, with creative contextual architectural responses that contribute to their significance and sense of place;
4. Delivering positive benefits that sustain and enhance the historic environment, as well as contributing to the economic viability, accessibility and environmental quality of a place, and to social wellbeing; and
5. Exploring opportunities to reduce greenhouse gas emissions that restoration of historic buildings offer.

Particular consideration will be given to ensure that the significance of key elements of the historic environment which contribute to Greater Manchester's distinctive identity and sense of place are protected from harm. These include historic town centres, places of worship, historic transport routes including the canal network,

industrial buildings and structures including textile mills, farmsteads and other sites, buildings, and areas of identified archaeological, architectural, artistic and / or historic value.

~~Development proposals affecting a designated heritage asset (or an archaeological site of national importance) and a conservation area should conserve those elements which contribute to its significance including those identified in any conservation area appraisal as making a positive contribution to the area. Harm to such elements will only be permitted where this is clearly justified and outweighed by the public benefits of the proposal.~~

~~Development proposals should identify assets of archaeological interest and use this information to avoid harm or minimise it through design and appropriate mitigation. Where applicable, development should make provision for the protection of significant archaeological assets and landscapes. The protection of undesignated heritage assets of archaeological interest equivalent to a scheduled monument should be given equivalent weight to designated heritage assets. Development proposals affecting designated and non-designated heritage assets and/or their settings will be considered having regard to national planning policy.~~

Where heritage assets have been identified as being at risk, Local Plans should identify specific opportunities for them to contribute to regeneration and place-making, and they should set out strategies for their repair and re-use. Development proposals which will help safeguard the significance of and secure a sustainable future for Greater Manchester’s heritage at risk will be supported in principle, provided they are not contrary to national policy or other policies in the development plan.

Proposals should be informed, as necessary, by the findings and recommendations of the appropriate heritage assessment(s) in the development plan evidence base and/or any updated heritage assessment submitted as part of the planning application process.

Culture

- 9.13** The industrial revolution provided fertile conditions for the creation of Greater Manchester as the birthplace of revolutionary ideas that have had profound

impact on lives all around the world. The Co-operative movement was founded in Rochdale, the Suffragette Movement was born in Manchester and Salford Museum and Art Gallery was the UK's first free public library and museum. The Greater Manchester Culture Strategy highlights the importance of a diverse mix of creative and independent businesses to the vibrancy, prosperity and distinctiveness of our places. We are rightly proud of our rich cultural heritage and thriving cultural sector, from grass-roots community and heritage groups to internationally significant cultural organisations and cutting-edge digital festivals. Greater Manchester has a diverse and distinctive offer which preserve and tell our stories, to ensure that Greater Manchester remains exciting, forward thinking and relevant.

- 9.14** In Greater Manchester alone, the Visitor Economy is worth £2.6bn GVA per year and supports 105,000 jobs and the Creative Industries are worth £4.4bn GVA per year and support 78,500 jobs. These sectors also play a vital role in our international reputation and contribute to the overall wellbeing of communities and the quality of life of our residents. Our city region is home to a diverse range of venues and organisations who bring life to our high streets and town and city centres and attract visitors from all around the world.
- 9.15** (MM9.4) The continued enhancement of cultural opportunities is central to place-making across Greater Manchester. The importance of culture [and the night time economy](#) will need to be reflected in the way in which our cities, towns and neighbourhoods develop, with individual developments contributing towards this. [Creative Improvement Districts form part of Greater Manchester's cultural and economic response to the pandemic, as set out in the GM Culture Recovery Plan, to support the recovery of high streets across Greater Manchester's town centres. They will be delivered as part of culture, night time economy and creative-led regeneration programmes.](#)
- 9.16** Many of Greater Manchester's cultural assets are located in mixed use areas with sensitive uses in close proximity, including existing and proposed residential development. The 'agent of change' principle will be crucial to the

ongoing viability of some of our cultural assets and will help to ensure that mixed-use areas function successfully.

Policy JP-P3: Cultural Facilities (MM9.5); (AM9.5)

~~Through this Plan we~~ We will proactively develop and support cultural businesses and attractions in our cities and towns through a range of measures, where appropriate, including:

1. Protecting existing heritage, cultural and community venues, facilities and uses;
2. Supporting the development of new cultural venues in town centres and places with good public transport connectivity;
3. Promoting new, or ~~enhanced~~ enhancing existing, locally-distinct clusters of cultural facilities, especially where they can provide an anchor for local regeneration and town centre renewal;
4. Identifying, protecting and enhancing strategic clusters of cultural attractions;
5. Considering the use of vacant properties and land for pop-ups or meanwhile uses for cultural and creative activities during the day and at night-time to stimulate vibrancy and viability and promote diversity in town centres;
6. Maximising opportunities for redundant heritage assets and the role they can play in economic and social well-being;
7. Considering the ~~designation~~ identification of 'Creative Improvement Districts' where there is evidence that the ~~designation~~ identification will enhance the local economy and provide facilities and workspace for the creative industries; and
8. Supporting a mix of uses which derive mutual benefits from, and do not compromise, the creative industries and cultural facilities in the Creative Improvement District in line with the Agent of Change principle. If development would potentially result in conflict between a cultural activity and another use, especially in terms of noise, then the development responsible for the change must secure the implementation of appropriate mitigation before it is completed.

Retail and Leisure

- 9.17** Varied and high-quality retail, leisure and cultural facilities are vital to providing the quality of life that will help to attract people to live in Greater Manchester and in contributing to inclusive places. Such facilities are also a key part of the overall tourism function of Greater Manchester, drawing visitors to the area. A diverse range of town centres and local centres of varying sizes and character provide more local facilities, with some having quite extensive catchments extending into surrounding districts whilst others serve a very local market but are nevertheless essential for residents.
- 9.18** Our town centres are at the heart of our communities. They are some of our most well-connected places and have been a focus for walking, cycling and public transport investment over many years. But they are facing serious challenges. The growth of internet shopping and large out-of-town retailers has squeezed many town centres. The UK has the highest level of internet shopping in the world¹¹⁴, with 18.0% of all retail sales now taking place online.¹¹⁵ There has been a 19.9% growth in online retailing in just 12 months.¹¹⁶ The implications of the Covid 19 pandemic may accelerate these trends.
- 9.19** We must help our town centres adapt to changing markets and build on their strengths. In this context, despite the significant increase in the resident, working and visiting populations set out in this plan, it is anticipated that most of the demand for new retail and leisure floorspace can be accommodated within existing centres.
- 9.20** In accordance with national planning policy, it is appropriate for retail and leisure facilities to be directed towards designated centres wherever possible. This will help to maintain the vitality and viability of those centres, and their continued ability to meet the needs of residents. Although they are significant in terms of their size and function, the Trafford Centre and

¹¹⁴ [Global online retail spending statistics and trends](#)

¹¹⁶ Office for National Statistics (June 2018) Retail sales, Great Britain: May 2018

Middlebrook Retail and Leisure Park are not designated centres and will continue to be treated as out-of-centre locations.

Policy JP-P4: New Retail and Leisure Uses in Town Centres (MM9.6)

The ~~existing upper levels of the~~ hierarchy of centres for retail and leisure uses will be maintained and enhanced. The ~~se upper levels of the hierarchy of centres~~ are:

A. City Centre (within Manchester and Salford)

B. Main town centres:

1. Altrincham (Trafford)
2. Ashton-under-Lyne (Tameside)
3. Bolton (Bolton)
4. Bury (Bury)
5. Oldham (Oldham)
6. Rochdale (Rochdale)
- 7 Salford Quays (Salford)
- ~~7~~8. Wigan (Wigan)

~~The boundaries of the centres and detail of other centres at lower levels of the hierarchy are defined in district local plans. Appropriate large-scale retail and leisure development will be accommodated within the centres in the upper levels of the hierarchy. The need for the expansion of any existing centres, or the provision of new centres, will be identified in district local plans.~~

~~A new town centre is proposed for designation at Salford Quays in the Publication Draft Salford Local Plan: Development Management Policies and Designations. Should this designation become part of the Salford Local Plan, Salford Quays will be classed as a Main Town Centre for the purposes of this policy.~~

~~**9.21** The boundaries of the centres and detail of other centres at lower levels of the hierarchy are defined in district local plans. Appropriate large-scale retail and leisure development will be accommodated within the centres in the upper levels of the hierarchy. The need for the expansion of any existing~~

~~centres, or the provision of new centres, will be identified in district local plans.~~

Education, Skills and Knowledge

- 9.22** Economic growth and the success of cities are increasingly reliant on the creation and application of knowledge. It is the places with an excellent supply and broad range of skills that will be best-placed to attract investment and jobs, and which will be most able to cope with the long-term challenges of growing automation and globalisation and thereby reduce levels of deprivation.
- 9.23** Knowledge is a fundamental component of personal freedom and social inclusion, enabling people to take advantage of opportunities and expanding the choices available to them. The aim of ensuring that everyone can contribute to, and benefit from, economic growth can only be achieved if residents have the necessary skills. As technological advances accelerate, learning throughout life will become even more important.
- 9.24** Greater Manchester has a proud history of being a forward-thinking city region, having been at the global forefront of technological and transport innovations during the industrial revolution, leading the development of computing through the work of Alan Turing, and more recently discovering and identifying multiple applications for the ground-breaking two-dimensional material graphene. This work continues, but many residents find it difficult to access the opportunities available within Greater Manchester due to poor levels of educational attainment and skills training. Widening access to knowledge for all residents is therefore vital and will need to respond to the training needs associated with new technological advances.
- 9.25** The huge extent of university activity is one of the greatest strengths of Greater Manchester, helping to differentiate it from many of its international competitors. With over 100,000 students attending its universities, Greater Manchester has one of the largest concentrations of students in Europe, and an enormous supply of new graduates across a wide range of subjects each year who can help to drive future economic growth. The largest

concentration of research activity is within Corridor Manchester in the City Centre, which has the largest single-site clinical-academic campus in Europe. The universities will be a vital component of developing Greater Manchester as a globally important city region.

- 9.26** (AM9.6) Until 2010, Greater Manchester was seeing a reduction in the number of school-age children, and this trend is set to continue with a projected decrease of 5% up to 2039. ~~but since then the number has grown and a 7% increase in those aged 5-14 is projected over the period up to 2037. The spatial pattern of this recent growth has been very mixed, with much of the increase focused in the inner parts of the conurbation surrounding the City Centre.~~ The future pattern of change will be influenced by the type and location of new housing as well as the relative attractiveness of existing neighbourhoods to families with children. Ensuring that there are sufficient school places in the right locations and at the right times to meet the needs of existing and new residents will be a key challenge and priority.
- 9.27** (AM9.6) Other policies in this Plan contribute to the development and application of the sub-region's knowledge base, including by:
- Increasing the supply of high-quality housing in a more diverse range of locations to attract and retain greater numbers of skilled workers;
 - Improving transport links to locations across the North of England in order to maximise the ability to draw on skills from outside Greater Manchester;
 - Providing a wide range of sites and premises capable of attracting knowledge-intensive businesses;
 - Promoting training opportunities through new developments; and
 - Facilitating the delivery of high quality digital and other infrastructure, thereby enabling residents and businesses to access knowledge and opportunities.

Policy JP-P5: Education, Skills and Knowledge

Significant enhancements in education, skills and knowledge to benefit existing and new residents will be promoted, including by:

1. Enabling the delivery of new and improved accessible facilities for all ages, such as early years, schools, further and higher education, and adult training to ensure our workforce is ready to benefit from new employment opportunities;
2. Ensuring the delivery of sufficient school places to respond to the demands from new housing, such as through:
 - a. Working with education providers to forecast likely changes in the demand for school places; and
 - b. Where appropriate, requiring housing developments to make a financial contribution to the provision of additional school places and/or set aside land for a new school, proportionate to the additional demand that they would generate;
3. Supporting the continued growth and success of the university sector, such as through:
 - a. Enhancing the existing campuses and developing new ones;
 - b. Strengthening the world-leading research capabilities and promoting opportunities for business spin-offs; and
 - c. Continuing to help develop Greater Manchester as the UK's best destination for students.

Health

9.28 Good health is one of the key determinants of quality of life. As well as being of great importance in its own right, it also has a significant impact on the ability of people to enjoy the immense range of opportunities across Greater Manchester and to make a positive economic contribution.

9.29 Healthy life expectancy in Greater Manchester is currently three to four years below the national average for men and women. There are considerable inequalities of health outcomes within Greater Manchester, with average life expectancy in the least deprived areas being more than a decade longer than in the most deprived areas. The high prevalence of long-term

conditions, such as cardiovascular and respiratory disease, means that Greater Manchester residents can expect to experience poor health at a younger age than in other parts of the country. Obesity, smoking and alcohol are all significant issues. An increase in the proportion of older people will be expected to exacerbate health pressures, although this is less of an issue than in many other parts of the UK.

- 9.30** In April 2016, Greater Manchester became the first region in the country to take control of its combined health and social care budgets, a sum of more than £6 billion. Additionally, in 2017 Greater Manchester took on public health responsibilities alongside the ten local authorities.¹¹⁷ The Health and Social Care Act 2012 has given local authorities a core responsibility for public health, joining up local health policy with all other areas of work. As part of this, a key aim is to better integrate health and social care services including wider community health services.
- 9.31** Greater Manchester has a wide range of attributes and enormous potential, but its long-term prospects will be contingent on delivering major improvements in public health. It cannot be considered a success unless existing health inequalities are addressed. The Greater Manchester Population Health Plan (2017-21) sets out Greater Manchester Health and Social Care Partnerships approach to delivering a radical upgrade in population health across the city region.
- 9.32** (MM9.7); (AM9.7) This will require a diverse range of coordinated measures, many of which lie outside the scope of this plan, but it will be vital that the positive contribution of this Plan is maximised as far as possible. As a result, the overall strategy and many of the policies and proposals in other parts of the plan will support improvements in health and wellbeing, and reductions in health inequalities, such as by:
- Promoting a successful economy for Greater Manchester, where everyone is able to share in the benefits of growth, given that household income is a key determinant of good health;

¹¹⁷ The Greater Manchester Combined Authority (Public Health Functions) Order 2017
Places for Everyone Composite Plan – Modifications Version 2023

- Increasing the supply of high quality and affordable homes that meet minimum size and 'accessible and adaptable' accessibility standards, as set out in Part M4 (2) of the Building Regulations for new housing, helping to ensure that everyone has a decent place to live;
- Enabling people to adopt healthier lifestyles, including through the development of a high-quality green infrastructure network throughout Greater Manchester, encouraging the provision of a wide range of recreation and sports facilities, including food growing opportunities, and supporting an increase in the proportion of trips that are made by walking and cycling; and
- Reducing the risks to human health, including through taking an integrated catchment-based approach to addressing flood risk, reducing levels of air pollution, providing cooling and shading to combat high temperatures, promoting high levels of fire safety, and designing places to minimise opportunities for crime, terrorism and anti-social behaviour.

9.33 (MM9.7) The submission of Health Impact Assessments for development proposals will help ensure that the effects of development on both health and wellbeing are considered and responded to during the planning process. Health Impact Assessments should aim to enhance the potential positive aspects of a proposal while avoiding or minimising any negative impacts, with particular emphasis on disadvantaged sections of communities that may be affected. ~~It is expected that Health Impact Assessments are undertaken in support of all developments which require an Environmental Impact Assessment, and other proposals which, due to their location, nature or proximity to sensitive receptors, are likely to have a notable impact on health and wellbeing.~~

Policy JP-P6: Health (MM9.8)

To help tackle health inequality new development will be required, as far as practicable, to:

- A. Maximise its positive contribution to health and wellbeing, whilst avoiding any potential negative impacts of new development;

- B. Support healthy lifestyles, including through the use of active design principles making physical activity an easy, practical and attractive choice; and
- C. Be supported by a Health Impact Assessment for all developments which require to be screened for an Environmental Impact Assessment, and other proposals ~~where the local planning authority considers it appropriate~~ which, due to their location, nature or proximity to sensitive receptors, are likely to have a notable impact on health and wellbeing.

Improvements in health facilities will be supported, responding to the changing needs and demands of both existing and new residents, including through:

1. Requiring, where appropriate, the provision of new or improved health facilities as part of new developments ~~that would significantly increase demand~~ proportionate to the additional demand that they would generate;
2. Enabling the continued enhancement and successful operation of our hospitals; and
3. Facilitating greater integration of health and social care, and the provision of integrated wellness hubs, including the co-location of health, community and wellness services.

Sport and Recreation

9.34 Our goal is to positively change the lives of people across Greater Manchester through physical activity and sports. Greater Manchester has an international reputation for sporting excellence. Manchester's global name recognition is perhaps seen most prominently in terms of its two major football clubs, Manchester United and Manchester City, but the sporting significance of Greater Manchester is far broader than this, being the home of numerous professional clubs, the hugely successful British Cycling, and the National Football Museum, and it has hosted a wide range of international sporting events from the 2002 Commonwealth Games to the Rugby League World Cup Final.

9.35 Sports participation in Greater Manchester is slightly lower than the national average. 72.9% of adults in Greater Manchester (16+) were 'active' or fairly

'active' as of May 2018. This represents an increase of 0.5 percentage points compared to May 2017 but is 1.9 percentage points below the England average. Nationally, there is a major problem of inactivity amongst younger people, with only 32% of 5–15-year-olds being defined as active, and just 9% of 2–4-year-olds.¹¹⁸

- 9.36** The Greater Manchester Strategy highlights that an active life can reduce anxiety, lift mood, reduce stress, promote clearer thinking and a greater sense of calm, increase self-esteem, and reduce the risk of depression. More generally, sport and recreation can be a major contributor to quality of life, and hence access to such opportunities is an important element of social inclusion.
- 9.37** (AM9.8) Through the [Greater Manchester moving programme](#) we are helping people of all ages to be more active and to live well. The availability of sport and recreation opportunities is strongly linked to the provision of green infrastructure and urban green space. However, the good design of places more generally can enable recreation to be integrated more easily into everyday life, particularly for children. One of the ambitions of the Greater Manchester Strategy is that the sub-region will be at the leading edge of providing our children with excellent places to play, develop and learn.¹¹⁹ Play is essential to children's development, enabling them to learn, socialise, gain independence and make sense of the world, and has long-term benefits for health through to old age.
- 9.38** (MM9.9); (AM9.8) Ensuring the continued availability of, and easy access to, a high-quality range of sport and recreation facilities, ~~meeting accessibility standards~~, would therefore help to achieve key objectives such as improving the health of residents, and making Greater Manchester a more attractive place to live and visit. The appropriate level of provision will often depend on local circumstances such as the type and scale of demand, and the availability of suitable land. Consequently, ~~where appropriate~~, standards for access to some recreation facilities such as parks, ~~sports pitches~~ and

¹¹⁸ Health Survey for England, 2015

¹¹⁹ GMCA (October 2017) Our people our place: The Greater Manchester Strategy, p.21

allotments will be set by individual local authorities and set out in Local Plans. The provision of sports facilities will be determined by individual local authorities through an evidence based rather than standards based approach.

- 9.39** An important component for the overall strategy for green infrastructure, and to key locations such as the uplands, lowland wetlands, and river valleys and canals, is to improve public access to good recreational opportunities, including food growing opportunities, in a manner compatible with other green infrastructure functions. This will help to reconnect people to nature as well as improving health and wellbeing.

Policy JP-P7: Sport and Recreation (MM9.10); (AM9.9)

A network of high quality and accessible sports and recreation facilities will be protected and enhanced, supporting greater levels of activity for all ages, including by:

1. Creating a public realm that provides frequent opportunities for play and that all ages can enjoy together;
- ~~2. Developing a common standard for the provision of designated play areas to meet the needs of the population~~
3. Where appropriate setting out more comprehensive and detailed recreational standards and standards for provision for designated play areas in district local plans, having regard to existing and future needs;
4. Requiring new development to ~~support the achievement of strategic and local plan standards by providing~~ provide new and/or ~~improving~~ improved existing facilities commensurate with the demand they would generate, ~~ensuring that they meet accessibility standards.~~ The provision of sports facilities will be determined by individual local authorities through an evidence based approach;
5. Locating and designing recreation facilities in relation to housing so as to ensure that they are accessible but also minimise the potential for complaints due to disturbance to residential amenity from recreational activity;

6. Protecting and enhancing the public rights of way network, including to:
 - a. Provide safe and attractive routes to sports and recreation facilities;
 - b. Improve access to, and connections between different parts of, the green infrastructure network across Greater Manchester and beyond;
 - c. Expand the network of strategic recreation routes offering longer distance opportunities for walking, cycling and horse-riding;
 - d. Provide everyday options for green travel;
7. Encouraging the incorporation of a sports facilities mix in all education settings, that meet both curriculum and local community sport needs as identified by an up to date Local Authority Sports Needs Assessment, and made available for community use where possible, ~~ensuring they meet accessibility standards.~~
8. Enabling the continued development of major sports facilities and events, which can further enhance Greater Manchester's international sporting reputation.

Blank Page

Connected Places

An Integrated Network

- 10.1** One of the Greater Manchester Strategy's ten priorities is to deliver an integrated network with world-class connectivity that keeps Greater Manchester moving and that drives prosperity whilst protecting the environment, improving air quality and transitioning to a zero carbon future.
- 10.2** Good connections permeate all aspects of life in the Plan area. Businesses need to connect with skilled workers, suppliers and markets. Residents need to be connected with jobs, products, services and their friends, families and communities. Tourists need to be able to reach our city-region from all around the world and to be able to visit our attractions. Strong, integrated connections are therefore needed at all levels: neighbourhood, city-wide, regionally, nationally and internationally.
- 10.3** Historically, connectivity has been primarily about transport, but increasingly digital connectivity is fundamental to our lives, enabling us to connect with people irrespective of location, and to access an unparalleled range of learning, employment and retail opportunities.
- 10.4** As part of Greater Manchester, our boroughs are already highly connected places. At the international level, Manchester Airport offers direct flights to over 200 destinations worldwide, and the Manchester Ship Canal and M58/M62 provide freight connections to the deep-water facilities at the Port of Liverpool. Nationally, London is just two hours away by train (with journey times set to improve following the introduction of High Speed 2) and Greater Manchester is at the heart of the national motorway network. More locally, Greater Manchester has extensive local rail connections complemented by Metrolink, the largest light rail network - in terms of route KMs - in the UK, which is continuing to be expanded.¹²⁰

¹²⁰ Department for Transport (2018) Statistical data set: Light rail and tram statistics - LRT0203
Places for Everyone Composite Plan – Modifications Version 2023

- 10.5** However, there are significant barriers as well. As with the rest of the UK, Greater Manchester’s high-speed broadband coverage has fallen behind international competitors: only 4% of Greater Manchester has full fibre to the premises (FFTP) connectivity.¹²¹ Traffic congestion affects many key highways and, in 'A Congestion Deal for Greater Manchester', it is estimated to cost city-region businesses £1.3bn each year.¹²²
- 10.6** Public transport suffers from a lack of capacity on key routes and with poor reliability. Although many parts of the Plan area have good public transport, there remain areas that are poorly served and others that are not connected at all. Despite a few exemplar schemes, the quality and extent of cycling infrastructure is limited, which means relatively few people choose to travel by bike.
- 10.7** In July 2019 the Greater Manchester Combined Authority (GMCA) declared a climate emergency. As part of this declaration, GMCA noted the findings of the International Panel on Climate Change (IPCC) report “Global warming of 1.5⁰C”, in particular:
- That human activities are estimated to have already caused approximately 1.0⁰C of global warming.
 - That if we continue at the current rate, we are likely to surpass the Paris Agreement target of 1.5⁰C as early as 2030; and
 - That at the current level of commitments, the world is on course for 3⁰C of warming with irreversible and catastrophic consequences for humans and the natural world.
- 10.8** Achieving Greater Manchester’s carbon targets will require substantial reductions in carbon emissions from transport which this Plan supports. The Greater Manchester Strategy sets out a future for Greater Manchester as a place where people live healthy lives, and a place that is at the forefront of

¹²¹ Greater Manchester Combined Authority (2018) The Greater Manchester Digital Strategy 2018-2020, paragraph 7.1

¹²² Mayor of Greater Manchester, GMCA and Transport for Greater Manchester (March 2018) A Congestion Deal for Greater Manchester, p.3

action on climate change. Building on this, the 5-year Environment Plan for Greater Manchester sets an ambitious target to be carbon neutral by 2038. Although these targets are in the future, action must be taken now if we are to make them a reality, and significant reductions in carbon emissions from transport are vital in achieving these ambitions.

- 10.9** Whilst other sectors have achieved significant carbon reductions, surface transport emissions (i.e. not including aviation) have barely fallen in the UK. In 2017, transport emissions had reduced by just 3% on 1990 levels (road transport emissions have in fact increased 6%). In 2017, transport overtook energy as the sector emitting the largest amount of CO₂. Overall, transport now accounts for 27% of UK greenhouse gas emissions, with the vast majority deriving from petrol- or diesel-fuelled road transport. We know, from 2018 UK Greenhouse Gas Emissions Final Figures, that Greater Manchester's CO₂ emissions have broadly reflected the national trend described above.¹²³
- 10.10** The GM 5-year Environment Plan sets out five specific decarbonisation priorities for transport that will contribute most significantly to reducing carbon emissions and which align with the Greater Manchester Transport Strategy 2040 refresh. These are:
- Increasing use of public transport and active travel modes;
 - Phasing out fossil-fuelled private vehicles and replacing with zero emission alternatives;
 - Tackling the most polluting vehicles on our roads;
 - Establishing a zero-emission bus fleet; and
 - Decarbonising road freight and shifting more freight movement to rail and water.
- 10.11** Resilience is another key issue across the transport network. The network frequently suffers disproportionately from relatively small failures, such as when a delayed train causes disruption across the rail network, or when a

¹²³ BEIS, 2018 UK Greenhouse Gas Emissions, Final Figures p.12, p.14

single traffic accident causes congestion across the city-region's motorways. The long-term threat from climate change on transport infrastructure is also an issue, with extreme temperatures causing maintenance problems and other extreme weather – such as flooding, ice and snow – causing major disruption and dangerous travel conditions.

- 10.12** Traffic is a major contributor to poor air quality. It is estimated that approximately 5% of deaths each year in Greater Manchester are attributable to particulate air pollution, equating to approximately 1,200 early deaths each year due to illnesses linked to air pollution.¹²⁴ Poor air quality can have long term health impacts on all and immediate effects on the most vulnerable in our society; the youngest, the oldest, those living in areas of deprivation and those with existing respiratory or cardiovascular disease are the most likely to develop symptoms due to exposure to air pollution. Air pollution also makes our towns and cities less pleasant places to live. The Greater Manchester Low Emissions Strategy states that road transport contributes to over 65% of emissions of nitrogen oxides and 79% of fine particulates at the roadside in the city-region¹²⁵, severely reducing air quality around many major roads.
- 10.13** In 2016 the 10 GM authorities declared a single Air Quality Management Area, based on a precautionary level of 35µg/m³ rather than the legal limit of 40µg/m³.
- 10.14** (MM10.1) The 10 GM authorities are currently developing a Clean Air Plan, to accelerate compliance with the legal limit for Nitrogen dioxide and to protect and promote the health of its population and the environment. ~~This will see the introduction of a Clean Air Zone covering the whole of the GM conurbation, to tackle the most polluting vehicles on the road network, alongside further supporting measures.~~

¹²⁴ Public Health England, Public Health Outcome Framework, 2016

¹²⁵ Greater Manchester Combined Authority and Transport for Greater Manchester (December 2016) Greater Manchester Low-Emission Strategy, page 9, 2014 EMIGMA data.

Picture 10.2 Exposure to Environmental Noise Major Roads DEFRA 2017

10.15 The areas with the highest levels of noise pollution are heavily concentrated around transport infrastructure, particularly the motorway network. The amount of noise created is affected by speed, type of vehicle, in addition to tyre and road composition.

10.16 Although road casualties in Greater Manchester have reduced by around 75% in the past 20 years, DSD Report 1911: 'Reported Road Casualty Statistics Greater Manchester' shows that there are still over 650 people killed or seriously injured on the city-region's roads each year, half of them pedestrians or cyclists.¹²⁶

10.17 Analysis by Transport for Greater Manchester, in 'A Congestion Deal for Greater Manchester', suggests that population growth could lead to over 800,000 extra residential trips each day on Greater Manchester's transport

¹²⁶ Transport for Greater Manchester (2017) DSD Report 1911: Reported Road Casualty Statistics Greater Manchester 2016: District Tabulations

networks¹²⁷, and there will be an increase in trips into Greater Manchester from growth in neighbouring areas.

- 10.18** In recent years, there has been a significant reduction in inbound car trips to the city centre in the morning peak, from 32,000 in 2002 to 22,600 in 2019¹²⁸, reflecting, among other factors: the rapid expansion of the Metrolink system, a doubling of rail patronage, the success of the LSM Busway, and reductions in capacity on radial routes to provide additional bus, cycle and pedestrian priority.
- 10.19** The GM Travel Diary Survey (GM TRADS (2017-2019)) shows that, in the Plan area, around 32% of households do not own or have access to a car. However, the proportion of households with two or more cars is now at its highest ever at 23.7%. Car use is highest in Tameside (71%) and lowest in Manchester (38%), as a percentage of all journeys (as either driver or passenger).¹²⁹
- 10.20** There is evidence that younger adults (17-29 year olds) are driving less now than in the early 1990s, with this change being driven by factors such as increased city centre living, cultural changes, lower employment rates, less disposable income and a decline in home ownership. One report that suggests a return to previous levels of car use is not expected is entitled 'Young People's Travel - What's Changed and Why? Review and Analysis'.¹³⁰ This may be accentuated in the future by an increasing 'sharing economy', as seen in initiatives such as car clubs, ridesharing, and bike hire schemes.

¹²⁸ Transport for Greater Manchester (2020) Highways Forecasting and Analytical Services: SRAD Report 2024 Transport Statistics Manchester 2018-19

¹²⁹ Transport for Greater Manchester, TRADS (2015-2017), not published

¹³⁰ Centre for Transport and Society (UWE, Bristol) and Transport Studies Unit (University of Oxford) (January 2018) Young People's Travel – What's Changed and Why? Review and Analysis

Picture 10.3 National Travel Survey 2018, Table NTS0205

10.21 In contrast, the rapid rise in digital demand seems likely to continue, with more services being delivered digitally and ever-increasing data transfers requiring faster, higher-capacity broadband and mobile connections. As the Plan area becomes ‘smarter’ – utilising data to deliver services more swiftly and efficiently and adopting innovation such as connected and autonomous vehicles, artificial intelligence and the Internet of Things (where an increasing range of everyday devices are connected, monitored and operated via the internet) – travel patterns will change and digital will increase in importance. As stated in Our People, Our Place: The Greater Manchester Strategy, it is ultimately our ambition for the city-region to be the UK’s leading digital city and one of Europe’s top five.¹³¹

10.22 Our challenge is therefore to provide outstanding connectivity that supports low carbon economic growth and greater levels of social inclusion. It must

¹³¹ Greater Manchester Combined Authority (October 2017) Our people our place: The Greater Manchester Strategy, paragraphs 2.2, 7.1, and 7.13

also accommodate the forecast increase in demand for travel, while minimising the adverse environmental and quality of life impacts.

10.23 A fundamental aspect of this will be minimising the need to travel, which will help reduce the pressure on transport systems. This will be achieved by creating local neighbourhoods where people can live, work and access services and shops, alongside behavioural change, such as mode shift, flexible and home working.

10.24 A massive change in people’s travel behaviour is needed so that walking and cycling become the natural choice for short journeys and public transport for longer trips. This will help to support more active lifestyles, which in turn will promote good health. It will also address some of the negative impacts of a high-level of car use, such as traffic congestion, air pollution, greenhouse gas emissions, noise pollution and poorer quality places.

Picture 10.4 ~~Change in daily trips, now-2040~~ Change in daily trips (2017 to 2040) (MM10.2)

10.25 The vision for 2040 is for half of all daily trips in Greater Manchester to be made by public transport, cycling and walking. This will mean a million more trips each day using sustainable and active modes of travel. Our analysis suggests that achieving this will enable us to deliver our economic growth ambitions without increasing overall motor-vehicle traffic in Greater Manchester.

10.26 The Greater Manchester Transport Strategy 2040 refresh¹³² outlines how significant investment in sustainable modes of transport will be essential to achieving this vision. The Strategy is supported by Our Five Year Transport Delivery Plan¹³³ that sets out the immediate and longer term programme for transport interventions needed to support sustainable growth. Our Five Year Transport Delivery Plan will also be used to incorporate the strategic transport interventions needed for the PfE allocations into Greater Manchester's wider programme and funding requirements. Our Five Year Transport Delivery Plan is the framework for transport investment, across

¹³² GMCA (2017) Greater Manchester Transport Strategy 2040

¹³³ Visit <http://www.tfgm.com/2040> for the latest version of the Greater Manchester Transport Strategy 2040 Delivery Plan

Greater Manchester, required to support growth throughout the Plan period and as such should be read alongside this chapter.

10.27 (MM10.3) We will continue to invest in a wide range of initiatives intended to ensure that the transport system as a whole works more effectively, to reduce carbon and create cleaner air as well as to eliminate barriers to travel and proactively respond to changing transport innovations, including:

- The Clean Air Plan, a package of interventions that are reasonably expected to reduce NO2 concentrations to legal levels and have wider air quality benefits;
- Carbon Reduction measures that support the 5 Year Environment Plan and the long-term environmental ambition for carbon neutrality by 2038;
- The roll-out and mainstreaming of innovation and future mobility technologies;
- Further phases of Greater Manchester’s smart ticketing initiative;
- Targeted behaviour change activities through established programmes; ~~and~~
- Safety and security measures and programmes to make the transport network safe and secure for all users; and
- Enabling the prioritisation of more sustainable modes of transport to encourage use and put more vulnerable transport users first - informed by the hierarchy contained in the 2016 NACTO Global Street Design Guide adopted by GMCA in 2017.

10.28 Central Government funding and support from developers, will be essential for the delivery of some of these transport interventions. New developments will also help generate the demand for transport services that will make new investment viable.

Policy JP-C1: An Integrated Network (MM10.4)

In order to help deliver an accessible, low carbon Greater Manchester with world-class connectivity, we will support a range of measures, including:

1. Delivering a pattern of development that minimises both the need to travel and the distance travelled by unsustainable modes to jobs, housing and other key services, including healthcare, education, retail, recreation and leisure facilities, green space and green infrastructure;
2. Enabling the provision of high quality digital infrastructure;
3. Locating and designing development, to deliver a significant increase in the proportion of trips that can be made by walking, cycling and public transport;
4. Transforming transport infrastructure and services by securing investment in new and improved transport infrastructure and services that will:
 - promote social inclusion, support economic growth, reduce carbon emissions and protect our environment and air quality;
 - meets customers' needs by being integrated, reliable, resilient, safe and secure, well-maintained, environmentally responsible, attractive and healthy; and
 - provide access to jobs and other key services, including healthcare, education, retail, recreation and leisure facilities, greenspace and green infrastructure.
5. Ensuring that development and transport investment fully considers the needs of all people and those modes which make most efficient and sustainable use of limited road space, by following the [Global Street Design Guide](#)¹³⁴ hierarchy [set out below](#) (highest priority first):
 - a. Pedestrians (and people using mobility aids);
 - b. Cyclists, powered two-wheelers, and public transport users;
 - c. People doing business or providing services (such as taxis/private hire, deliveries or waste collection)
 - d. People in personal motorised vehicles

¹³⁴ [Global Street Design Guide](#)

6. Developing local transport industry skills and education to ensure the right skills are available into the future.

Digital Connectivity

- 10.29** Digital connections are increasingly important to every aspect of our lives, from socialising and shopping to learning, business and accessing essential services. They enable us to connect to people on the other side of the world as easily as on the same street. As these connections open up a range of opportunities it is important everyone can access them so that they can fully participate in society and our economy.
- 10.30** Any truly global city will need to have widespread, affordable, reliable, secure and future-proofed digital infrastructure that provides a competitive edge for businesses and supports high-levels of social inclusion. This will be essential to capitalise on new innovations, such as artificial intelligence, the Internet of Things and connected and autonomous vehicles. Big data will also enable the city-region to be managed more effectively. By facilitating more home-working, good digital infrastructure can also help reduce the need for travel and therefore help reduce carbon emissions, traffic congestion and air pollution.
- 10.31** Digital connections will be imperative to the design, development and delivery of future services in the context of an expanding global city. Such services may include heat, energy, utilities and mobility.
- 10.32** (AM10.1) In order to achieve its ambition to be the UK's leading digital city and in the top five in Europe¹³⁵ it is fundamental for all parts of the city-region to have access to world-class digital connections at an affordable price. The Plan area already has a vibrant digital economy, with particular strengths in high-value key economic sectors such as the creative industries, health innovation, and advanced manufacturing and materials. However, the area suffers from similar problems to many other parts of the country in terms of limited roll-out of full fibre broadband, uneven access to affordable digital

¹³⁵ GMCA (October 2017) Our people our place: The Greater Manchester Strategy, paragraph 7.13
Places for Everyone Composite Plan – Modifications Version 2023

connections, and limited access to mobile networks, especially in rural areas. The Plan area is covered by Greater Manchester's current strategy for becoming a Digital city-region as set out in the Greater Manchester Digital Strategy 2018-2020.

- 10.33** Improving digital infrastructure and ensuring that new development is connected to it is therefore a high priority. The development industry has a significant role in enabling this priority, as well as benefiting from it. It will be important to accelerate the delivery of full fibre gigabit-capable networks and to be at the forefront of the roll-out of next generation mobile technology. Recent decades have shown the speed with which digital technology evolves, with a new generation of mobile technology being introduced around every ten years. The digital infrastructure will therefore need to adapt and evolve throughout the Plan period.

Policy JP-C2: Digital Connectivity (MM10.5)

We support the provision of affordable, high quality, digital infrastructure. ~~Developers are expected to work and share costs with telecoms operators as appropriate to maximise coverage and enable consumers to make informed choices. It is expected that internet connections will work immediately when residents move into new properties.~~

In making decisions we will support a range of measures, including:

1. Enabling the roll-out of latest generation mobile technology and full fibre to the premises connectivity, in a way that maximises coverage whilst protecting townscape quality and ensuring an ability to respond to updated/changing technology;
2. Requiring all new development to have full fibre to premises connections, unless technically infeasible and/or unviable, and to incorporate multiple-ducting compliant with telecoms standards, to facilitate future-proof gigabit-capable network connections; It is expected that internet connections will be operational and immediately accessible to network providers when occupiers move into new properties and

3. Facilitating the provision of free, secure, high speed public wi-fi connections, particularly in the most frequented areas.

Public Transport

- 10.34** If Greater Manchester's overall vision is to be achieved then there will have to be an increase in the use of public transport, particularly for medium and longer-distance trips.
- 10.35** One of the main factors supporting a growth in public transport services and usage is population density. The more people that live in an area the greater the potential for more frequent, affordable and accessible public transport. As such, the policies elsewhere in the Plan encourage concentrated regeneration and development that have the potential to increase the attraction and availability of public transport.
- 10.36** It will be vital to deliver a comprehensive and integrated public transport network, which enables people to change between different services and make a much wider range of trips than just those to and from Manchester city centre. This will be important if the public transport system is to respond to the needs and complexities of people's travel demands and provide a genuine alternative to the car. It will also be vital that the public transport network is fully integrated with the walking and cycling network, so that people can easily access it without driving.
- 10.37** The public transport network plays a vital role in tackling congestion and providing access to work, leisure and other destinations. Increasing usage of public transport is key to achieving our right mix objectives of zero net growth in motor vehicle traffic. An ambitious programme of investment to improve and extend the reach of public transport is set out in Our Five Year Transport Delivery Plan. This includes interventions that are committed for delivery in the next five years, and interventions that currently require further development in the next five years and beyond.
- 10.38** We aim to invest in the bus and highway network to reverse the decline in bus patronage and increase bus use by measures including:

- Development of Quality Bus Transit Corridors through whole-route upgrades of key bus routes and Bus Corridor Upgrades focused on delivering improvements to bus journey time and reliability;
- Development of Bus Rapid Transit (BRT) links for longer and middle-distance journeys;
- New multi-modal interchanges;
- Development of new bus services; and
- Enhancement of our Ring and Ride offer.

10.39 We plan to build on the success of Metrolink through measures to improve reliability, capacity and customer experience including:

- New stops / travel hubs on the Metrolink network;
- New Metrolink connections, including exploring the feasibility of Tram-Train;
- Renewing the Metrolink fleet assets providing more trams and expanding Tram Management Systems to increase capacity and resilience; and
- A City Centre Metro Tunnel.

10.40 Working with rail industry partners, we plan to deliver a number of key priorities and continue work on long term, large scale projects that will improve the reliability, capacity and customer experience of rail travel, including:

- Central Manchester / Castlefield Corridor capacity expansion;
- A programme of rail improvements on key rail corridors including further electrification to address capacity issues and reduce the carbon footprint and air quality impact of rail operations;
- Station enhancements including access for all and platform lengthening;
- New stations; and
- HS2 / NPR (Northern Powerhouse Rail) including growth strategies at Piccadilly, the Airport and Wigan.

10.41 (AM10.2) Additionally, we will work with our rail partners to help to ensure that sufficient stabling and depot facilities are available to improve network

resilience. Where appropriate we will work with adjacent local authorities to improve rail connectivity into/within Greater Manchester where schemes will have benefits for GM residents, for example the proposed rail link at Skelmersdale, west of Wigan.

- 10.42** Improved access to Metrolink, Bus Rapid Transit stops and Rail stations through the provision of Travel Hubs that expand the catchment of rapid transit (by facilitating the “first and last mile” of a trip) and Park and Ride facilities, may also be required to enable those more distant from public transport to access the network. Shared services (such as car clubs and bike hire), demand-responsive services such as Local Link and taxis, and electrification of both private and shared vehicles with appropriate Ultra Low Emission Vehicle (ULEV) charging infrastructure, are also likely to play an important role.
- 10.43** This will all require an enormous amount of additional investment in infrastructure and services, and in supporting initiatives such as integrated smart ticketing, reform of the bus market and rail franchising. Careful prioritisation of investment will be needed to ensure that maximum benefit is delivered from the available public and private funding. Even with a major increase in investment, there will still be some locations that are not particularly well-served by public transport. It will be important to ensure that options are available that enable people to make the trips that they need to without, owning or having access to a car.
- 10.44** The complexity of the public transport network, coupled with the scale of investment needed, means that it is not possible at this stage to identify all the interventions needed. Further work will be required throughout the Plan period to identify and deliver new routes and services that function effectively as part of the overall network. The new routes and services will be influenced by development and, as they are delivered, they will influence new development in turn.
- 10.45** (AM10.2) The scale and lead-in times for the more significant public transport infrastructure, such as a potential city centre tunnel, will mean that

construction may only begin towards the end of the plan period and completion may be beyond 2037⁹.

High Speed Rail 2 (HS2) and Northern Powerhouse Rail (NPR)

- 10.46** Improved public transport between Greater Manchester and other cities will help reduce long-distance car use, support business, and open-up a wider range of employment and leisure opportunities for residents. Delivery of HS2 and Northern Powerhouse Rail will put Manchester Piccadilly, Manchester Airport and Wigan at the heart of a new high-quality rail network with high-speed connections to London and Birmingham, and faster direct routes to Leeds, Sheffield and Liverpool. Additionally, although not in the Plan area, the HS2 connection to, and solving capacity issues for local services moving through, the Stockport area, will be important for residents in the PFE Plan area.
- 10.47** The first northern phase of HS2 will create a high-speed line to Crewe and allow classic compatible services to run to Stockport and Manchester Piccadilly.
- 10.48** New High Speed 2 (HS2) railway lines are planned to be operational within the City Region by 2033. As currently proposed, there will be two HS2 lines running through the City Region, having split in two just south of the conurbation. One leg travels to a transformed Manchester Piccadilly station via a new station to the west of Manchester Airport; the second leg runs through western Trafford to join the West-Coast Mainline south of Wigan with Wigan North Western also being served by HS2.
- 10.49** HS2 is one of the most significant transport infrastructure projects in the UK over recent decades and will bring significant benefits to the city region, particularly when coupled with the introduction of Northern Powerhouse Rail (NPR). Together they will provide high speed rail connections to London via Birmingham and between the cities of the north.

- 10.50** Proposals for HS2 and NPR will consolidate the position of Greater Manchester as one of the most connected areas in the UK and will support existing businesses, inward investment and job creation. We support the economic benefits of HS2, but we will seek to ensure that any negative impacts on our communities and natural environment are kept to a minimum.
- 10.51** ~~(AM10.2) On 6 June 2019 Secretary of State issued revised safeguarding directions for HS2 Phase 2b Western Leg (Crewe to Manchester) and Eastern Leg (West Midlands to Leeds), with connections onto the existing network which replace all previous versions. Additional Safeguarding Directions were issued 15 April 2020 independently of the June 2019 Directions, which continue to apply.~~ Safeguarding Directions require local planning authorities to consult HS2 Ltd on all relevant planning applications within the safeguarded area as set out in the Directions in order that the proposals can be assessed for any conflict with plans for the railway. The aim of safeguarding is not therefore necessarily to prevent development on the land that may be needed to build and operate the railway, but to ensure that no conflict is created.
- 10.52** It should be noted that Government has made it clear that Safeguarding Directions¹³⁶ will be kept under review and updated as the project evolves and as the level of engineering detail facilitates a greater understanding of the actual land required.

Policy JP-C3: Public Transport (MM10.6)

~~Major improvements to the public transport network are at various stages of development and an ambitious programme for delivering public transport interventions is set out within Our Five Year Transport Delivery Plan.~~ In order to help deliver major improvements to public transport, we will support a range of measures, including:

1. Enhanced connections to other major cities, delivering a hub of high-speed rail connection to London and Northern Powerhouse Rail;

¹³⁶ [Safeguarding information and maps for HS2](#)

2. Increased capacity at the bottlenecks in Manchester city centre on both light and heavy rail networks to enable improvements to reliability, resilience and capacity across the whole of Greater Manchester;
 3. Improved public transport routes and services to the City Centre and wider Core Growth Area;
 4. Improved public transport routes and services to Manchester Airport;
 5. Better integration of services and between public transport modes and enhanced connections between other town centres, key locations, major allocations and public transport interchanges, and the upgrading of key sections of the strategic public transport network;
 6. More and higher quality public transport stations and interchanges with suitable capacity and better integration of different public transport modes and services;
 7. Improved access to rapid transit routes including first/last mile solutions.
- 10.53** Further information on the strategic approach to public transport is set out in the Greater Manchester Transport Strategy 2040 refresh and Our Five Year Transport Delivery Plan provides further detail on the public transport interventions currently proposed.

~~Our Streets~~ (AM10.3)

The Strategic Road Network

- 10.54** (MM10.7); (AM10.4) The Strategic Road Network will be required to perform the function of facilitating the safe and efficient movement of people and goods. Ongoing collaboration between National Highways, TfGM and the Local Authorities will be essential in ensuring that the SRN in Greater Manchester operates in an effective and efficient manner; and best contributes to sustainable economic growth. Greater Manchester benefits from a strategic location on the national motorway network, but some stretches of the city-region's motorways and trunk roads (known as the Strategic Road Network) are among the most congested and unreliable in

the country. Major investment is already coming forward through the [National Highways England](#) Roads Investment Strategy (RIS) to address some of these issues, for example through progression of the Smart Motorway programme for the M56, M62 and M6 and the Simister Island interchange improvements.

- 10.55** [\(AM10.4\)](#) We continue to work in partnership with Department for Transport, [National Highways England](#) and Transport for the North to address other SRN issues through major studies such as the Manchester M60 North West Quadrant Study, which is looking at the operation of the M60 between Junctions 8 and 18, and the Trans-Pennine Tunnel Study, which is exploring options to improve highway connectivity between the Greater Manchester and Sheffield City Regions. The recommendations of these and other studies could have major implications, both in terms of improving connectivity and network reliability and the physical impacts of new infrastructure. In the southern part of Greater Manchester, the study at the Airport around the M56 and the proposed study of the M60 corridor in the south-east will also be key. However, the scale and lead-in time for some of the infrastructure proposals and the five-year planning/investment periods for RIS may mean that they are only completed towards the end of the Plan period or beyond.

[\(MM10.8\)](#) **New Policy**

Policy JP-CX: The Strategic Road Network

We will work with Department for Transport, National Highways, Transport for the North and TfGM to ensure a co-ordinated approach to the planning and delivery of potential interventions on the SRN and at interfaces with the local street network, as Local Plans, site Masterplans and planning applications come forward in accordance with Department for Transport, National Highways, and other UK Government policy and guidance as applicable.

Streets for All

- 10.56** Streets for All is Greater Manchester's integrated approach to taking decisions about all streets in our city-region in a way that helps to balance the complex demands of everyone who uses, lives and works alongside our streets. The significant economic and population growth in Greater Manchester, over the past 20 years, has also led to rapid growth in demand for travel and traffic across the conurbation. In parallel, the city-region has also seen a growth in communities living in and around our urban centres and the City Centre. This has led to a range of pressures on streets, in local neighbourhoods, town and city centres and on major corridors, such as excess traffic, parked vehicles and local air pollution.
- 10.57** Streets for All provides a new way of managing streets to help achieve the ambition for 50% of all journeys in Greater Manchester to be made by walking, cycling and public transport by 2040.
- 10.58** Central to this is enabling people to switch more of the short journeys – that are currently made by car – to walking or cycling. Half of all journeys will continue to be made by car and we will continue to support those journeys, but if we want more people to spend more time on streets, travelling sustainably, we need a people-centred approach to the decisions we make about how streets are designed and managed. This will be essential for delivering a high quality of life, meeting environmental objectives, supporting social inclusion, and enabling us to compete with cities across the world for residents, skilled workers and tourists.
- 10.59** Recognising that streets vary greatly is at the heart of the Streets for All approach. Each street is unique, and many of them change in character throughout the day, across the week and along their length. Streets for All entails nurturing the distinct character of each street, based on a good understanding of what both local communities and people travelling want from different streets.

10.60 There will remain some places where streets act as vital social spaces, supporting community cohesion and local businesses, while others function mainly as routes for the movement of goods and people. Understanding this balance between functions will enable us to address a range of issues including:

- Poor air quality and high carbon emissions from road transport;
- Congestion caused by increased use of private vehicles;
- Low levels of physical activity as people make fewer journeys on foot or by bike;
- Too many road traffic injuries and deaths;
- Communities divided by major roads;
- Declining use of buses;
- Fewer children playing in our streets;
- Increased isolation, particularly for older or mobility impaired people, and those without access to a car; and
- Limited community cohesion and social interaction influenced by poor quality of place and hostile environments.

10.61 Streets for All allows all these issues to be addressed through a single, coherent approach. Whilst the emphasis will be on sustainable travel, there will still be a need for targeted improvements to the highway network so that people and goods can move around the city-region efficiently. It will, however, be essential that any highways investment is part of a comprehensive multi-modal strategy that supports the overall aim of increasing walking, cycling and public transport, to avoid generating a higher proportion of car journeys.

10.62 There is great potential to increase walking, cycling and public transport to and from the city centre, in our town centres and in local neighbourhoods. The ambition is to better support these types of journeys through a combination of good urban planning and making streets safer and more welcoming. This means:

- People will benefit from an attractive and inclusive walking environment;
- Streets will provide a safe and connected cycling experience;
- Goods will reach their destinations on time, with minimal impact on local communities;
- Streets will facilitate a reliable, integrated and accessible public transport network;
- Streets will feel like welcoming and healthy places to spend time;
- They will enable us to harness future mobility innovations; and
- On our streets, we will make best use of existing assets.

Policy JP-C4: Streets for All (MM10.9); (AM10.5)

Streets will be designed and managed to make a significant positive contribution to the quality of place and support high levels of walking, cycling and public transport. Targeted improvements to the highway network will be supported through studies and scheme development, where they complement the aim of securing a significant increase in the proportion of trips made by walking, cycling and public transport (as set out in Policy JP-C 5 'Walking and Cycling' and Policy JP-C 3 'Public Transport').

We will ~~work with Department of Transport, Highways England, Transport for the North and TfGM~~ seek to ensure:

1. The design and management of streets will follow a Streets s for All approach, including by:
 - a. Understanding the 'movement and place function' of streets as the starting point for improvement;
 - b. Ensuring that streets are welcoming for all, and respond to the needs of those with reduced mobility;
 - c. Delivering new and improved walking and cycling routes and facilities as part of the delivery of ~~the "Bee Network"~~ an integrated sustainable transport network;
 - d. Maximising the ability of pedestrians and cyclists to navigate easily, safely and without delay, and minimising barriers and obstacles to their movement;

- e. Providing frequent opportunities for people to rest, linger and socialise, and for children to play, particularly in streets with a high 'place function';
 - f. Setting aside space for cycle parking (including for bike-sharing schemes where appropriate), high-quality public transport waiting areas, and other facilities that will support sustainable modes of travel;
 - g. Incorporating increased levels of greenery including trees where possible;
 - h. Offering shelter from wind and rain, and shade from the sun;
 - i. Delivering priority for public transport and facilities for public transport users;
 - j. Providing appropriate places and routes for servicing, deliveries and 'drop-off';
 - k. Mitigating the impacts of air and noise pollution and carbon emissions from road transport;
 - l. Ensuring the efficient movement of people and goods on streets with a high 'movement function' and;
 - m. Harnessing new mobility innovations such as traffic signals technology and ULEV charging infrastructure.
2. Improvements to the highways network are part of a multi-modal strategy to increase public transport, cycling and walking and improve access for all;
 3. Any new infrastructure minimises the negative effects of vehicle traffic; and
 4. New infrastructure includes provision for utilities and digital infrastructure where required.

10.63 Further information on Streets for All and the strategic approach to highway infrastructure improvements is set out in the Greater Manchester Transport Strategy 2040 refresh and Our Five Year Transport Delivery Plan provides further detail on the highway infrastructure interventions currently proposed.

Walking and Cycling

- 10.64** Currently around half of the trips made by our residents are less than 2km in length with 40% of these trips being made by car. There is therefore great potential for increasing cycling and walking in the Plan area which will be fundamental in achieving the city region's overall transport vision.
- 10.65** Both walking and cycling have minimal costs and are open to people of all ages. So encouraging more people to walk and cycle will support greater social inclusion and independence. The increased physical exercise they bring, particularly in comparison to driving, will also help benefit peoples' health and wellbeing. By encouraging fewer people to drive for shorter journeys we will help reduce carbon emissions, congestion, air and noise pollution and the other negative impacts of vehicle traffic.
- 10.66** If walking and cycling are to become the natural choice for shorter journeys, then a dramatic improvement in the quality and extent of our walking and cycling infrastructure will be required. New and improved routes will be needed, and the barriers that currently discourage people from walking and cycling will need to be removed. High-quality walking and cycling infrastructure will also be vital in increasing the use of public transport, and so will need to be integrated with the public transport network.
- 10.67** Central to all of this will be the delivery of the Greater Manchester Cycling and Walking Infrastructure Proposal (Bee Network), which is a vision for Greater Manchester to become the first city-region in the UK to have a fully joined up walking and cycling network.¹³⁷ Greater Manchester's Cycling and Walking Investment Plan (Change a Region to Change a Nation) sets out our ambition to connect every neighbourhood and community in Greater Manchester, covering over 1,800 miles of route. The network will have a single identity across Greater Manchester, using the symbol of the worker bee, which will represent a promise of route quality: that all such routes will be easily useable by a competent 12 year old on a bike, or by a parent

¹³⁷ Mayor of Greater Manchester, GMCA and TfGM (2018) Greater Manchester's cycling and walking infrastructure proposal

pushing a double buggy. A broad range of improvements will be required, varying from route to route, including easy crossing points of major roads, innovative junction designs, 'active' neighbourhoods with through motor traffic removed, and the creation of fully segregated cycleways on major corridors.

Policy JP-C5: Walking and Cycling (MM10.10); (AM10.6)

In order to help deliver a higher proportion of journeys made by walking and cycling, we will support a range of measures, including:

1. Creating safe, attractive and integrated walking and cycling infrastructure, connecting every neighbourhood and community ~~using with reference to~~ national and locally adopted design guidance;
2. Ensuring routes are direct, easily navigable and integrated with the street and public transport network;
3. Creating active neighbourhoods and street networks which are more permeable to walking and cycling than to the private car, creating an **active** incentive to walk and cycle;
4. Creating, where needed, dedicated separate space for people walking and cycling, with pedestrians and cyclists given priority at junctions and crossings ~~which form part of the Bee Network~~;
5. Increasing the capacity and quality of walking and cycling infrastructure in locations where significant growth in the number of short journeys is anticipated, and where quality of place improvements are proposed;
6. Utilising and enhancing green infrastructure, including canals, parks and recreation grounds, to create opportunities for walking and cycling; and
- ~~7. Ensuring that new developments are planned and constructed with walking and cycling as the primary means of local access, and fully integrated into the existing walking and cycling infrastructure in accordance with JP-C7.~~

10.68 Further information on the strategic approach to walking and cycling is set out in the Greater Manchester Transport Strategy 2040 refresh. Our Five

Year Transport Delivery Plan and Greater Manchester's Walking and Cycling Investment Plan (Change a Region to Change a Nation) provide further detail on the walking and cycling interventions currently proposed.

Freight and Logistics

- 10.69** Freight is essential for both our economy and productivity. It supports a broad range of sectors, including manufacturing, retail and waste management. Logistics is also an important sector in its own right, with significant growth potential within the Plan area. The PfE Plan identifies a strong portfolio of employment sites, many of which will be suitable for logistics, including regional and national distribution centres. Logistics is also becoming even more important to everyday life, with the increase in internet shopping and demands for same or next day deliveries.
- 10.70** Ideally, more freight should be moved by rail and water, particularly over longer distances, to reduce highway congestion, greenhouse gas emissions and air pollution. The Plan area benefits from having a large rail freight terminal at Trafford Park, which provides daily services to/from the major ports of Felixstowe, Southampton and London Gateway. Sustainable freight will be further enhanced by the completion of Port Salford, which will provide rail connections via the main Manchester-Liverpool line, shipping links along the Manchester Ship Canal to the deep-water facilities at the Port of Liverpool, and a new on-site container terminal. It will be important to make the most of these facilities as additional opportunities for new rail and water-served sites elsewhere in the Plan area are limited.
- 10.71** Many logistics sites in the Plan area will be reliant on road-based freight, taking advantage of the strategic location within the national motorway network. This reinforces the importance of delivering the strategic highway improvements identified above. The Plan area also benefits from outstanding air freight connections at Manchester Airport and its World Freight Terminal.

(MM10.11) [New Paragraph](#)

It is recognised that on certain parts of the SRN and at certain times a shortage of parking facilities for HGVs can make it difficult for drivers to find safe space to stop and adhere to requirements for mandatory breaks and rests. The provision of new and improved facilities would improve driver welfare and help avoid inappropriate HGV parking on local roads. To alleviate the shortage, the expansion and improvement of existing facilities, or creation of new facilities, will be supported where it is appropriate to do so.

- 10.72** The growth in on-line retailing and ‘just in time’ approaches to manufacturing and other businesses is increasing the number of smaller scale deliveries, contributing to congestion and pollution particularly in urban areas. Higher population and employment densities in locations such as the city centre will exacerbate these pressures. It will therefore be important to manage such deliveries in a way that minimises their adverse impacts, such as through centres where deliveries can be consolidated, the use of low- and zero-emission vehicles including electric vehicles, cargo bikes and E-cargo bikes, changing procurement practices, and avoiding the need for repeat delivery attempts. This could require shared facilities where different operators can consolidate their deliveries.

Policy JP-C6: Freight and Logistics (MM10.12)

We will support the more efficient and sustainable movement of freight, including by:

1. Protecting existing rail- and water-served sites and associated infrastructure.
2. Completing the tri-modal Port Salford, including a rail spur from the Manchester-Liverpool line, canal berths on the Manchester Ship Canal, and a container terminal.
3. Accommodating the expansion of air freight activities at Manchester Airport.
4. Enabling the provision of consolidated distribution centres and the use of low- and zero-emission vehicles including electric vehicles, cargo bikes and E-cargo bikes for local and last mile deliveries.

New Criterion

Enabling the provision of overnight parking and rest areas, with appropriate facilities, for heavy goods vehicle drivers, where there is likely to be demand, and it is appropriate to the location.

5. Ensuring that new development makes appropriate provision for deliveries and servicing in terms of road safety, traffic congestion and environmental impacts, in accordance with Policy JP-C7.

Transport Requirements of New Development

- 10.73** The location, design and density of development is fundamental, as it influences how far people need to travel and their ability to make these journeys by sustainable modes as well as equality of opportunity for all. Good access to local facilities and amenities is critical to encouraging sustainable journeys by providing opportunities to work, learn, shop, play and socialise locally. To be sustainable, developments need to be located close to existing facilities or be mixed use developments that provide community facilities such as schools, healthcare centres, shops, parks and play areas. Higher density developments help to make the provision of these community facilities and public transport economically viable.
- 10.74** The design of new development will be critical in encouraging more people to walk, cycle and use public transport. It will also help minimise the negative effects of car dependency, such as traffic congestion, greenhouse gas emissions, air and noise pollution and poorer quality places. Given the importance of these issues, and the related objectives in improving health and quality of life, it is critical that we get this right.
- 10.75** Increased traffic is often one of the biggest concerns for existing residents when faced with new development, however there is potential for growth to provide new opportunities for improved public transport, cycling and walking that can benefit both new and existing communities.
- 10.76** Although the focus is on increasing walking, cycling and public transport, it must be recognised that there is a need to accommodate other forms of transport. New development will be designed to make these journeys as

sustainably as possible, for example by supporting the use of low- or zero-emission vehicles by providing the appropriate ULEV charging infrastructure for both private and shared vehicles. Improvements to the public transport network are planned, but it will be impossible to provide every area with good public transport access at all times. Flexible on-demand and shared services such as car clubs, Local Link and taxis, will have an important role to play in filling the gaps in public transport routes and services, and so it will be important that new developments are designed to accommodate them where appropriate.

(MM10.13) New Paragraphs

Policies within JP-C7 seek to enable a reduction in the need to travel by private car and prioritise sustainable transport opportunities ahead of capacity enhancements on the highway network. Where a transport assessment is required, this should start with a vision of what the development/allocation is seeking to achieve and then test a set of scenarios to determine the optimum design and transport infrastructure to realise this vision.

In the first instance, new development should give priority to walking, wheeling and cycle movements and facilitate access to high-quality public transport where possible. Appendix D sets out the indicative transport mitigation that has been identified in relation to the Plan allocations (through the Locality Assessment process and the SRN Future Work Programme Technical Report) in a single strategic “worst-case” scenario. Detailed scenarios, underpinned by local traffic counts, will need to be assessed and developers will need to develop effective detailed mitigation for the site which demonstrates that the mitigation will deliver the vision identified.

The interventions in Appendix D to support walking, wheeling and cycle movements and to facilitate access to high-quality public transport should be considered as a starting point for developers to mitigate the impacts of allocations.

The highway interventions in Appendix D should be considered by developers to mitigate the impact of allocations only once alternative options to manage down the traffic impacts of planned development have been considered as a first preference.

The existing evidence suggests that the “necessary” mitigation would be required to deliver the allocations in the scenario tested, and “supporting” mitigation are complementary measures that could further improve the accessibility and/or transport sustainability of the allocation. As a starting point, it would be beneficial to consider both necessary and supporting interventions through the Transport Assessment scenario testing.

In order to assess the cumulative impacts of growth, when undertaking a Transport Assessment for development proposals that are consistent with the Plan, developers will need to consider committed development, including relevant local plan allocations, where there is a reasonable degree of certainty they will proceed within the next 3 years. In consultation with local highways authorities, developers should agree the committed developments /allocations and potential transport interventions (which may come forward in the next 3 years) that should be considered in the assessment. Where development proposals are not consistent with an up-to-date plan or strategy, the Transport Assessment should include all relevant development that is consented or allocated over the entirety of the plan period.

Developers will be expected to contribute to the funding and delivery of required new infrastructure or services.

Policy JP-C7: Transport Requirements of New Development

(MM10.14); (AM10.7)

~~Planning applications will be accompanied by a Transport Assessment/Transport Statement and Travel Plan where appropriate.~~ We will require new development to be located and designed to enable and encourage walking, cycling and public transport use, to reduce the negative effects of car dependency, and help deliver high quality, attractive, liveable and sustainable environments.

We will do this by:

Connectivity and Permeability

1. Prioritising safe and convenient access to the site and buildings for all users in accordance with the user hierarchy in Policy JP-C 1 'An Integrated Network', including;
 - Prioritising new and enhanced walking, cycling and public transport routes and stops, through and around the site. These routes should:
 - be direct, safe and convenient;
 - connect to nearby facilities, employment areas, public transport stops; and
 - improve the coverage, quality and integration of the wider walking and cycling infrastructure and public transport provision;
 - ~~Ensuring that new developments are planned and constructed with walking and cycling as the primary means of local access, and fully integrated into the existing walking and cycling infrastructure~~ Ensuring that the layout, design and landscaping of development prioritises the provision of safe, secure and attractive access to local services and facilities for pedestrians, cyclists and people with a disability; and
 - Ensuring that new development is connected visually and physically; within the site and to the surrounding built environment;
2. Ensure appropriate connectivity to the existing highway network.

Design

3. Reducing the need to travel by ensuring that community facilities, services and amenities are provided within the site or within walking distance of new development;
4. Incorporating highway design at a human scale using street-based prescriptions such as those within Manual for Streets and/or any locally adopted design guidance, to ensure that highways do not dominate the development;

Public Transport

5. Ensuring (through funding improvements where appropriate) that the nearest public transport stops (both within and adjacent to the development site) are attractive to users in terms of seating, shelters, information and easy step-free access;
6. Subsidising new or amended public transport services where the development would otherwise have inadequate public transport access;

Parking Infrastructure

7. ~~Complying with any parking standards set out in local plans including making adequate parking provision for disabled car drivers and passengers;~~ Making adequate car parking provision, including for disabled drivers and passengers;
8. Ensuring that car parking provision is well integrated and unobtrusive, so it supports the street scene; and where appropriate parking provision is flexible and can be adapted over time to reflect demand;
9. Incorporating enough secure and covered cycle parking to meet long-term demand from occupiers and visitors in a convenient location that helps to maximise its use, and for workplaces, where appropriate providing:
 - i. Showers, changing facilities and lockers for cyclists and walkers
 - ii. Pool or hire bikes for use by occupiers
 - iii. Information in advance about facilities to visitors;
10. Promoting alternatives to car ownership, such as the use of ULEV car clubs rather than the provision of private car parking spaces;
11. Promoting the increased provision of ULEV charging infrastructure including meeting any standards set by local plans.

New Criterion

Providing for overnight parking and rest areas, with appropriate facilities, for heavy goods vehicle drivers, where the development is likely to generate demand, and it is appropriate to the location.

Access and Servicing

12. Providing designated pick-up/drop-off points for taxis and other demand-responsive transport services where appropriate, taking into account the potential increase in demand if car ownership falls;
13. Making appropriate provision for deliveries and servicing (including requiring Delivery and Servicing Plans for appropriate developments), in a way that:
 - meets road safety requirements,
 - reduces transport emissions and other environmental impacts,
 - reduces traffic congestion, the number of vehicle movements and the need for repeat deliveries;

Construction Management

14. Ensuring Construction Management Plans are produced for developments, where appropriate, to mitigate construction logistics and environmental impacts including air quality and noise on the surrounding area and encourage sustainable deliveries.

Transport Assessments

New Criterion

Planning applications will be accompanied by a Transport Assessment / Transport Statement and Travel Plan where appropriate, in order to assess impacts and determine the most appropriate mitigation on the SRN and local transport network. Where a Transport Assessment is required, this should start with a vision of what the development/allocation is seeking to achieve and then test a set of scenarios to determine the optimum design and transport infrastructure to realise this vision. Consultation should be undertaken, at pre-application stage, with the relevant local highway authorities to agree which committed developments / allocations and which potential transport interventions should be considered, with reference to Appendix D, as appropriate.

New Criterion

Planning applications which are required to be accompanied by a Transport Assessment will need to consider air quality impacts on Holcroft Moss, within the Manchester Mosses Special Area of Conservation (SAC). Any proposals that would result in increased traffic flows on the M62 past Holcroft Moss of more than 100 vehicles per day or 20 Heavy Goods Vehicles (HGVs) per day must devise a scheme-specific range of measures to reduce reliance on cars, reduce trip generation and promote ultra-low emission vehicles and provide a contribution towards restoration measures in accordance with the Holcroft Moss Habitat Mitigation Plan.

~~District Local Plans may set out mechanisms through which new development will be required to make a proportionate financial contribution to the delivery of new transport infrastructure and/or services, necessary to support its successful functioning in accordance with relevant national policy, guidance and regulations.~~

Blank Page

Allocations

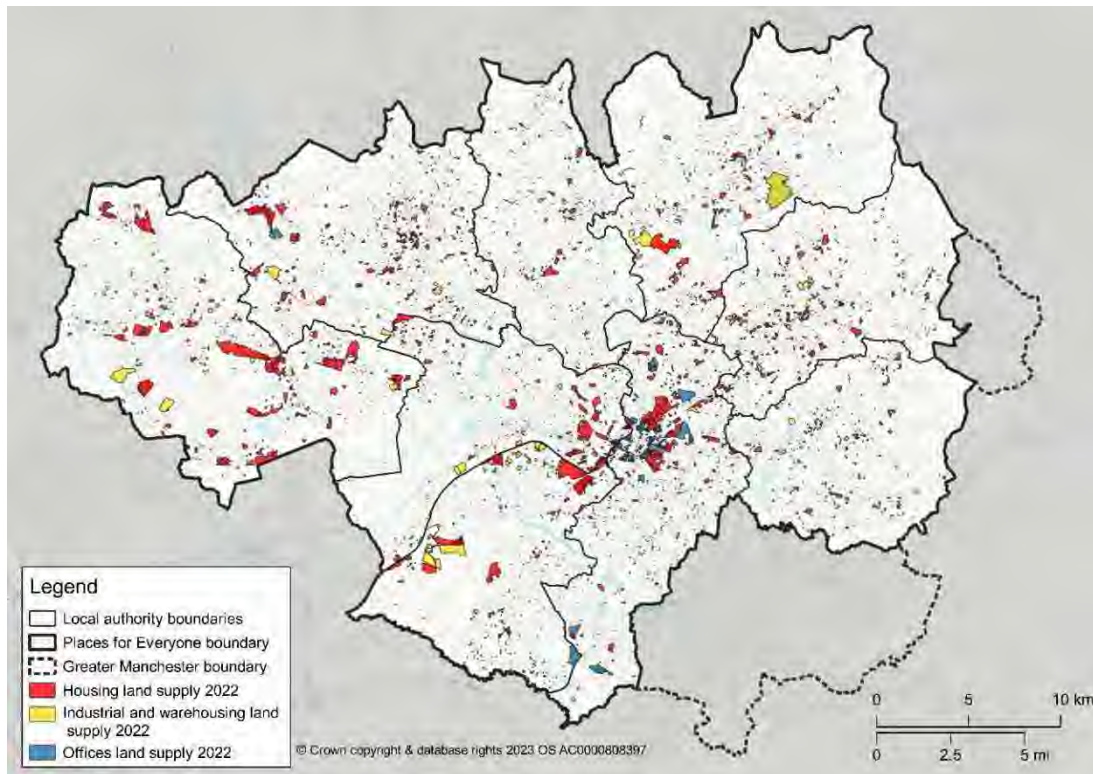

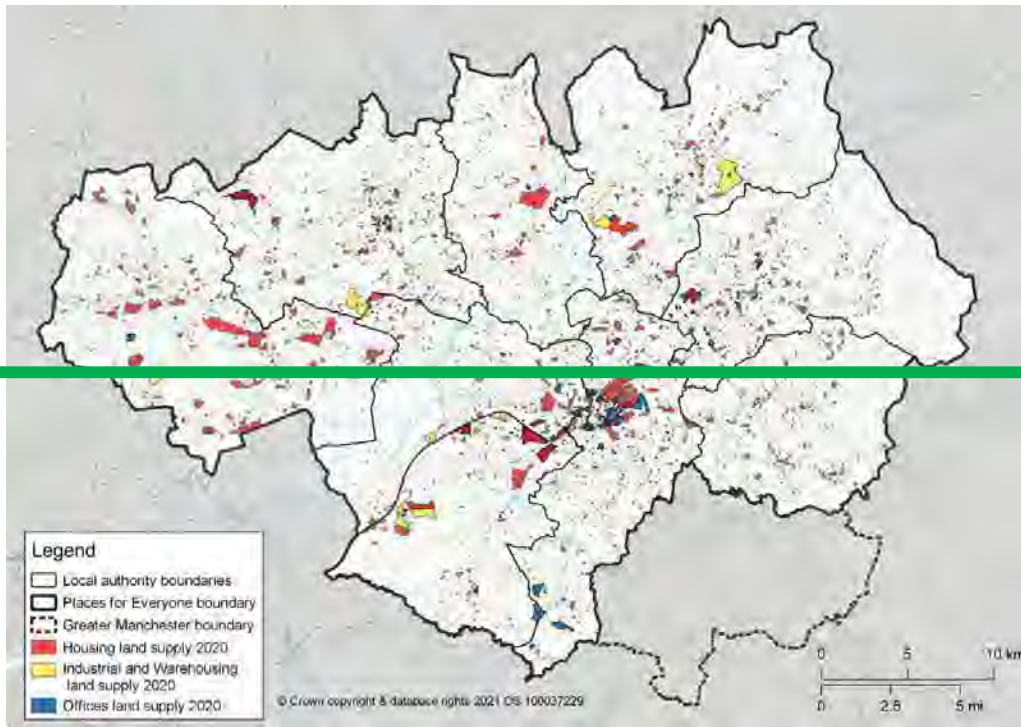

Strategic Allocations

- 11.1 To deliver the inclusive and prosperous future outlined in the Greater Manchester Strategy, we have sought to maximise the use of land outside of the Green Belt, giving the highest priority to brownfield land.
- 11.2 (MM11.1) The majority of the development required to deliver this Plan's spatial strategy will be within the existing urban area. Figure 11.1 'Existing land identified for office, industrial/warehousing and housing development ~~2020-2022~~' shows the existing land identified for office, industrial and housing development through our land availability assessments. This land supply is updated annually and includes the identification of suitable brownfield sites and where appropriate the optimisation of density ratios, in line with the overall strategy. ~~As appropriate, district Local Plans will allocate sites from this supply.~~

New paragraph

(MM11.1) As appropriate, district Local Plans will allocate sites from this supply reflecting the distribution set out in tables 6.1, 6.2 and 7.2, to ensure that the spatial strategy can be met. In the event that it proves necessary to look to land beyond the existing supply, as updated, national planning policy would apply including in the case of the Green Belt the requirement for exceptional circumstances.

Figure 11.1 Existing land identified for office, industrial/warehousing and housing development 2020⁹²(MM11.2)

- 11.3** As set out in both Chapter 6 ‘Places for Jobs’ and Chapter 7 ‘Places for Homes’, insufficient land has been identified within these assessments to meet our development needs.
- 11.4** Discussions have taken place with neighbouring local authorities to determine whether it would be appropriate for them to meet some of our development needs, but it has been agreed that this would not be appropriate as it would require them to release parts of their own Green Belt and would be likely to lead to less sustainable commuting patterns.
- 11.5** Some additional development sites, outside the urban area, are therefore required to deliver our inclusive growth needs. The role of this Plan is to identify these sites, provide the policy context for their development and make the associated changes to the Green Belt. Combined with the existing land supply these sites will enable us to meet our overall objectives.
- 11.6** The sites identified reflect the overall spatial approach set out in Chapter 4 ‘Strategy’ with the aim of making the most of existing locations and assets whilst providing opportunities across the Plan area that help address current disparities. The identification of the sites within this section will help to achieve the sustained economic growth in the Core and our southern parts of the conurbation whilst significantly boosting the economic competitiveness of the northern districts in Greater Manchester. This is not only linked to the provision of new jobs and opportunities but also the choice and quality of housing, the infrastructure required to support the new development and the delivery of high quality places.
- 11.7** The strategic employment allocations have been selected based on their location and the opportunity they provide to address some of the economic disparities evident within the conurbation. Some of these sites straddle local authority boundaries and are of a scale that are nationally and, in some cases, globally significant in terms of attracting new businesses and investment.

- 11.8** The strategic housing allocations provide an opportunity to widen housing choice within districts. This will include the provision of affordable housing as well as larger and higher value homes in those areas which there is currently a lack of such housing. This will create a more inclusive housing offer across our boroughs and improve the overall housing offer within individual districts and improve their ability to attract and retain residents.
- 11.9** To ensure that these strategic allocations deliver scale and quality of development required the use of masterplans, where appropriate, will be an important component in ensuring a comprehensive approach to development which is aligned with the delivery of associated infrastructure. This approach will help to deliver high quality, sustainable places which maximises the benefits of the land release for development.
- 11.10** If successful places are to be created then it will be vital that developments deliver the infrastructure and facilities necessary to support them. The specific type and scale of infrastructure required to support this new development is set out within the policies. This includes infrastructure relating to accessibility, public transport, social infrastructure (such as schools, health and community facilities) and green infrastructure (including open spaces and biodiversity resources). More general requirements that would be applied to all development are set out in the broader thematic policies set out in earlier sections of the plan.
- 11.11** Where this plan releases sites from the Green Belt, as set out in 'The Green Belt' Section, Green Belt policies will be strictly applied except in the case of planning applications complying with the relevant allocation policies in this section.
- 11.12** Picture 11.2 'Places for Everyone Allocations 2021' shows all the sites allocated within this Plan. These are defined on the Policies Map and a detailed policy framework for each allocation is set out in this Chapter.

Cross-Boundary Strategic Allocations

Northern Gateway

Picture 11.3 JPA 1 Northern Gateway (MMCB1)

The Northern Gateway is an extensive area located around Junction 18 of the M60 motorway extending east to Junction 19 of the M62 and north to Junction 3 of the M66. It comprises two key sites within the wider North-East Growth Corridor:

- Heywood / Pilsworth (Bury and Rochdale) (see Policy JP Allocation 1.1 'Heywood / Pilsworth (Northern Gateway)'); and
- Simister and Bowlee (Bury and Rochdale) (see Policy JP Allocation 1.2 'Simister and Bowlee (Northern Gateway)')

11.13 (AMCB1) The Northern Gateway straddles the districts of Bury and Rochdale and is positioned at a strategically important intersection around the M60, M62 and M66 motorways. As such, it represents a highly accessible opportunity for growth in Greater Manchester with wider benefits on a regional and national level. The central theme of the spatial strategy for the joint plan is to deliver inclusive growth across the city region complemented by a key aim to boost the competitiveness of the northern parts of Greater Manchester. The Northern Gateway is one of the key [growth](#) locations that will help to deliver these fundamental objectives.

- 11.14** This strategic allocation will enable the delivery of a large, nationally-significant employment opportunity to attract high quality business and investment, with a complementary housing offer on the M62 corridor, where there is strong evidence of market demand.
- 11.15** The allocation at Heywood/Pilsworth provides an opportunity for a substantial and high-quality employment-led development. The scale and location of this allocation will help to rebalance the Greater Manchester economy, ensure the joint plan plays its part in driving growth within the north of England and enable Greater Manchester to be competitive both nationally and internationally.
- 11.16** This will be supported by new communities as part of the Heywood/Pilsworth allocation as well as at Simister/Bowlee which have transformational potential in enabling new housing, community facilities and new transport infrastructure to come forward in what is currently an area with significant pockets of high deprivation, low skills and worklessness.
- 11.17** To be successful and sustainable, the employment and housing opportunities need to be accessible by a range of transport modes and be linked directly to existing and new communities in the surrounding area via new recreational routes and corridors of green infrastructure which in turn provide an attractive setting for development. Outside of the motorway network, much of the area proposed for development is currently served by an inadequate transport network and this will require substantial investment to improve connectivity, potentially including investment in rapid transit. The prospective residents will require new community facilities and these will be provided in accessible locations within walking distance of homes.
- 11.18** The opportunities at Heywood/Pilsworth and Simister/Bowlee will need to incorporate extensive supporting infrastructure. The full delivery of the allocation at Heywood/Pilsworth is likely to extend beyond the plan period.

Policy JP Allocation 1.1: Heywood / Pilsworth (Northern Gateway)

Picture 11.4 JPA 1.1 Heywood / Pilsworth (Northern Gateway)

Policy (MMCB2)

~~Any proposals for this allocation must be in accordance with a comprehensive masterplan relating to the area to come forward in the plan period that has been previously approved by the LPA(s). It shall include a clear phasing strategy as part of an integrated approach to the delivery of infrastructure to support the scale of the whole development in line with Policy JP-D 1 'Infrastructure Implementation'. This should include the delivery of highways infrastructure, surface water drainage, grey infrastructure including utilities provision, green and blue infrastructure, broadband and electric vehicle charging points, recreation provision and social infrastructure and ensure coordination between phases of development.~~

Development at this allocation will be required to:

New criterion - Be in accordance with a comprehensive masterplan, design code and infrastructure phasing and delivery strategy, in line with Policy JP-D 1 'Infrastructure Implementation', that has been agreed with the local planning authorities;

1. Be of sufficient scale and quality to enable a significant rebalance in economic growth within the sub-region by boosting the competitiveness of the north of the conurbation and should;
 - i. Deliver a total of around 1,200,000 sqm of industrial and warehousing space (with around ~~700,000~~ 935,000 sqm being delivered within the plan period). This should comprise a mix of high quality employment premises in an attractive business park setting in order to appeal to a wide range of business sectors including the development of an Advanced Manufacturing Park;
 - ii. Deliver around 1,000 additional homes along with a new primary school in the eastern part of the allocation to support the early delivery of the infrastructure and provide a buffer between existing housing and the new employment development;
 - iii. Deliver around 200 new homes, which includes an appropriate mix of house types and sizes and the provision of plots for custom and self-build housing (subject to local demand, having regard to Bury's self-build register and other relevant evidence), in the west of the allocation off Castle Road ensuring that an appropriate buffer is incorporated to separate this part of the allocation from the wider employment area and that appropriate highways measures are in place to prevent the use of residential roads by traffic associated with the wider employment area; and
 - iv. Deliver An appropriate range of supporting and ancillary services and facilities, such as a new local centre, hotel, leisure and conference facilities. These should be in accessible locations and of a genuinely ancillary scale that is appropriate to the main employment use of the allocation.
2. Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with Policy JP-C7;

~~Make provision for significant new and improved highways infrastructure to enable the proposed level of development to be accommodated, including:~~

- ~~i. — Improvements to Junction 3 of the M66;~~
 - ~~ii. — Improved links between Junction 3 of the M66 and Junction 19 of the M62;~~
 - ~~iii. — Other off-site highway works where these are necessary to ensure acceptable traffic movement, including a contribution towards the mitigation proposed at Croft Lane, Hollins Lane/Hollins Brow~~
- ~~3. — Support the delivery of improved public transport infrastructure through the site allocation (including Bus Rapid Transit corridors) and close to the allocation (including potential tram-train on the East Lancashire rail line between Bury and Rochdale) to enhance sustainable connectivity to the wider sub-region and adjoining districts and neighbourhoods;~~
 - ~~4. — Deliver a network of safe and convenient cycling and walking routes through the allocation designed to national and GM standards of design and construction and local planning requirements;~~
 5. Make provision for affordable housing in accordance with local planning policy requirements;
 6. Provide Make financial contributions for offsite additional primary and secondary school provision to meet needs generated by the development in accordance with policy JP-P5;
 - ~~7. — Make provision for other necessary infrastructure such as utilities, broadband and electric vehicle charging points in accordance with relevant joint plan or local planning policies;~~
 8. Ensure the design and layout allows for effective integration with surrounding communities, including active travel links and connections to local services, employment opportunities and over the M62 to proposed new development at Simister/Bowlee (JPA1.2);

9. Retain and enhance existing recreation facilities (including Castlebrook High School playing fields and Pike Fold Golf Course) or, where necessary, make provision for replacement facilities that are equivalent or better in terms of quantity and quality and in a suitable location; Retain, enhance and replace existing recreation facilities, where required, and make provision for new recreation facilities to meet the needs of the prospective residents in accordance with local planning policy requirements;
10. Make provision for new, high quality, publicly accessible multi-functional green and blue infrastructure ~~to provide health benefits to workers and residents as well as creating a visually attractive environment and providing linkages to the site's wider drainage strategy in accordance with Policy JP-G 2 'Green Infrastructure Network' and Policy JP-G 8 'Standards for Greener Places'. This should include including~~ the integration and enhancement of existing features such as ~~Hollins Brook/Brightly Brook, SBI and Whittle Brook~~ and Castle Brook;
- New criterion - Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with Policy JP-G2;
- New criterion - Strengthen the boundary of the Green Belt to the north of the site around Pilsworth Cottages, Brightly Brook and Pilsworth Fisheries such that they will comprise physical features that are readily recognisable and likely to be permanent;
- ~~11. Minimise impacts on and provide net gains for biodiversity assets within the allocation in accordance with Policy JP-G 9 'A Net Enhancement of Biodiversity and Geodiversity';~~
12. Ensure that any development is safe from and mitigates for potential flood risk from all sources including Whittle Brook, Castle Brook and Brightley Brook and does not increase the flood risk elsewhere. The delivery of the allocation should be guided by an appropriate flood risk and drainage strategy which ensures co-ordination between phases of development;

- ~~13. Ensure that sustainable drainage systems are fully incorporated into the development to manage surface water and control the rate of surface water run-off, discharging in accordance with the hierarchy of drainage options. Where possible, natural SuDS techniques should be utilised, prioritising the use of ponds, swales and other infrastructure which mimic natural drainage and be designed as multi-functional green infrastructure connecting to the wider green and blue infrastructure network in accordance with Policy JP-S 5 'Flood Risk and the Water Environment' and nationally recognised SuDS design standards. Proposals to discharge to the public sewer will need to submit clear evidence demonstrating why alternative options are not available;~~
- ~~14. Make appropriate provision for the long term management and maintenance of areas of green infrastructure, biodiversity features and other areas of open space and sustainable drainage features;~~
- ~~15. Carry out a project specific Habitats Regulation Assessment for planning applications of 1,000 sqm / 50 dwellings or more;~~
16. Provide an appropriate buffer between the development and the motorway/local road network where required to serve multiple functions including air quality, noise, visual mitigation and high-quality landscaping;
17. Take appropriate account of relevant heritage assets, and their settings, including ~~Protect and, where appropriate, enhance heritage assets and their setting within the allocation, including the Grade II Listed buildings Brick Farmhouse and Lower Whittle Farmhouse~~ Grade II Listed Buildings in accordance with Policy JP-P2; ~~and the wider historic character of the surrounding setting in accordance with the findings and recommendations of the assessment of heritage assets that forms part of the Plan's evidence base and any updated assessment submitted as part of the planning application process; and~~
18. Carry out a detailed assessment and evaluation of known and potential archaeological sites including Meadow Croft Farm, historic landscape features

and built heritage assets, to establish specific requirements for the protection and enhancement of significant heritage assets; and

New criterion - Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

New criterion - Undertake hydrological and ground investigations to determine the extent and quality of any peat identified in the south-western part of the site to inform the potential for restoration and the comprehensive masterplanning of the site which should ensure that the loss or deterioration of any irreplaceable habitat is avoided.

Reasoned Justification (MMCB3) (AMCB2)

- 11.19** This allocation has been identified as a large, nationally significant location for new employment-led development within the Northern Gateway opportunity area between Bury and Rochdale. The scale of the opportunity will help to deliver a significant jobs boost to wider northern and eastern parts of the conurbation, increasing the economic output from this area and helping to rebalance the Greater Manchester economy. It also includes the potential to deliver a significant amount of new housing as well as an appropriate range of supporting and ancillary services and facilities.
- 11.20** Planning permission has been granted for a scheme to deliver around 135,000 sqm of employment floorspace, 1,000 homes and a new primary school on the eastern part of the allocation at South Heywood and this land is included in the allocation ~~for removal from the Green Belt~~. As well as delivering an early phase of the employment development this proposal will help to create a more mixed-use urban extension. The new school will not only provide space to accommodate children from the new development but will also help tackle a shortage of local school places. The residential development along with secured public funding is a key element to delivering improved linkages from Junction 19 of the M62. The employment floorspace

and homes covered by this planning application are included in the current baseline supply.

- 11.21** Although the allocation has the capacity to deliver a total of around 1,200,000 sqm of new employment floorspace, it is anticipated that around ~~700,000~~ 935,000 sqm of this will be delivered within the plan period (~~in addition to~~ including the 135,000 sqm that has an extant planning permission at South Heywood). Nevertheless, it is considered necessary to release the site in full at this stage given that the scale of the proposed development means that it will need to be supported by significant strategic infrastructure and this level of investment needs the certainty that the remaining development and associated economic benefits will still be able to come forward beyond the plan period.
- 11.22** This allocation benefits from being in close proximity to existing regionally renowned employment sites at Heywood Distribution Park and Pilsworth and the development of this site will complement other opportunities in the Northern Gateway as well as other key sites in the north of the sub-region such as Logistics North.
- 11.23** Whilst the location of this allocation along the key M62 corridor will be particularly attractive to the logistics sector, it is important that it provides high quality business premises for a range of other sectors including advanced manufacturing and higher value, knowledge-based businesses. This variety will not only provide a better range of good quality jobs but has the potential to provide premises for new and growing sectors, thus diversifying both the local and sub-regional economy.
- 11.24** The size of the proposal would also support the provision of an appropriate range of supporting services and facilities, such as a new local centre, hotel, leisure and conference facilities. However, it is important that these are of a scale that is appropriate to the main employment use of the allocation.
- 11.25** The delivery of such an allocation will require significant investment in infrastructure if it is to be successful and sustainable. The allocation clearly

has excellent access to the motorway network but will benefit from improved linkages between Junction 19 of the M62 and Junction 3 of the M66. The local authorities will continue to explore opportunities for a new junction at Birch which could provide additional accessibility and be of benefit to the allocation in the longer term. Furthermore, in conjunction with the development of the allocation, there will be an expectation that opportunities are fully explored to deliver a rail freight spur exploiting the existing heavy rail connections from the East Lancashire Railway line which adjoins the allocation to the north and Calder Valley line to the east.

- 11.26** The allocation will also need to be served by a wide range of public transport and significant interventions will be required in order to promote sustainable travel and make the allocation more accessible to the local labour pool. This could potentially include rapid transit linking the expanded Heywood employment area with surrounding neighbourhoods and key [growth](#) locations helping to maximise the public transport accessibility of the employment opportunities and to better integrate existing and new communities with the rest of Greater Manchester. The potential tram-train on the East Lancashire rail line between Bury and Rochdale should be explored and the allocation will also need to be supported by safe and attractive walking and cycling routes to promote healthier and more sustainable journeys to work.
- 11.27** It should be noted that the existing Birch Industrial Estate is located within the allocation. This is a successful estate that has benefited from recent investment and would be retained as part of any development. This allocation will also share the benefits of the improved accessibility of the area.
- 11.28** The area also includes an existing golf club and school playing field. Whilst the intention is for these to be retained, they could potentially be incorporated into the wider development if they were to subsequently become available.

- 11.29** In addition to the 1,000 homes with planning permission at South Heywood, the allocation is also considered to have the potential to accommodate around 200 further dwellings on land accessed via Castle Road in Unsworth. However, it is important that an appropriate buffer is incorporated into the development to create separation from the wider employment development and that appropriate highways measures are in place to prevent the inappropriate use of residential roads by vehicular traffic associated with the wider employment area.
- 11.30** Any housing development within the allocation will be required to make provision for affordable housing and recreation to meet the needs of the prospective residents in line with Local Plan policy requirements.
- 11.31** The land is relatively undulating and the contours offer opportunities to create an attractive and interesting setting for the development as well as providing some natural screening. This should be complimented by the creation of a good quality green and blue infrastructure network which will provide publicly accessible open spaces to provide recreational opportunities to workers and residents in the wider area. Such a network should seek to maximise the value of existing features and areas of nature conservation value. There are some existing recreation facilities, ponds, reservoirs and brooks within and adjacent to the allocation and any development should seek to retain and enhance such features, where appropriate. Other opportunities for new blue infrastructure may exist to further enhance visual amenity, provide SUDS and widen local biodiversity. A management plan will be required to demonstrate how the retention and improvement of green and blue infrastructure and nature conservation assets will continue to be managed.

[New paragraph - Where land is to be removed from the Green Belt, national guidance seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt](#)

Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

New paragraph - Remaining Green Belt boundaries to the south and west of the site are clearly defined by the M62 and M66 motorways. However, at present, the boundary of the Green Belt to the north of the site around Pilsworth Cottages, Brightly Brook and Pilsworth Fisheries is less clearly defined and the development should incorporate measures to strengthen this to ensure that it comprises physical features that are readily recognisable and likely to be permanent.

11.32 Delivery of the allocation should be guided by an appropriate flood risk and drainage strategy in accordance with Policy JP-S5 which ensures co-ordination between phases of development. Measures such as rainwater recycling, green roofs, water butts and permeable driveway surfaces should be considered to mitigate the impact of potential flood risk both within and beyond the site boundaries. As a green and blue infrastructure network will provide more sustainable options to discharge surface water, only foul flows should connect with the public sewer.

~~**11.33** Traffic to and from the site is likely to include travel on the M62 which passes close to designated European sites and, as such, a project specific Habitats Regulation Assessment will be required for planning applications involving 1,000 or more sqm or 50 or more residential units.~~

11.34 Given that the site is located adjacent to the M62 and M66 motorways, there will be a need to incorporate a buffer between the allocation and the motorway to serve multiple functions including air and noise mitigation and high-quality landscaping. Mitigation through tree planting could be undertaken in conjunction with proposals for the Northern Forest.

11.35 There are two Grade II Listed buildings within the allocation boundary and known significant archaeological sites, notably at Meadow Croft Fold. In addition, there are a number of potentially significant archaeological sites, locally listed buildings and structures throughout and adjacent to the

allocation. Any development would need to consider the impact on their setting through the completion of a Heritage Impact Statement. There will be a need to undertake detailed archaeological work including field walking and evaluation trenching, leading to further investigations and recording and, if necessary, preserving features in situ.

New paragraph - The allocation is identified as containing Mineral Safeguarding Areas for sandstone (3.9% of the site); sand and gravel (10.2%); surface coal (99.4%); and brickclay (99.4%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

New paragraph - The Natural England/Defra 'Peaty Soils Location (England)' layer is published on the Natural England website with the intention of identifying the extent of peaty soils and this shows a potential area of peat in the south-western part of the site to the north of the M60 Junction 18 Simister Island Interchange. There is very limited site-specific information from Natural England/Defra on the quality of the peat within the proposed allocation. As such, there will be a need to undertake hydrological and ground investigations to fully understand the extent and quality of any peaty soils in this area of the site to inform the potential for restoration and identify any areas of irreplaceable habitat where loss or deterioration should be avoided, subsequently helping to shape the comprehensive masterplanning of the site.

Policy JP Allocation 1.2 Simister and Bowlee (Northern Gateway)

Picture 11.5 JPA 1.2 Simister and Bowlee (Northern Gateway) (MMCB4)

Policy (MMCB5)

~~Any proposals for this allocation must be in accordance with a comprehensive masterplan that has been previously approved by the LPA(s). It shall include a clear phasing strategy as part of an integrated approach to the delivery of infrastructure to support the scale of the whole development in line with Policy JP-D 1 'Infrastructure Implementation'. This should include the delivery of highways infrastructure, surface water drainage, grey infrastructure including utilities provision, green and blue infrastructure, broadband, electric vehicle charging points, recreation provision and social infrastructure and ensure coordination between phases of development.~~

Development at this allocation will be required to:

New criterion - Be in accordance with a comprehensive masterplan, design code and infrastructure phasing and delivery strategy, in line with Policy JP-D 1 'Infrastructure Implementation', that has been agreed with the local planning authorities;

1. Deliver a broad mix of around 1,550 homes to diversify the type of accommodation across the Simister, Bowlee and Birch and Langley areas. This should include an appropriate mix of house types and sizes, accommodation for older people, plots for custom and self-build (subject to local demand having regard to the Councils' self-build registers and other relevant evidence) and a mix of housing densities with higher densities in areas of good accessibility and potential for improved public transport connectivity and lower densities adjacent to existing villages where development will require sensitive design to respond to its context;

New criterion - Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with Policy JP-C7;

2. ~~Facilitate the required supporting transport services and infrastructure including~~
 - i. ~~An upgrade of the local highways network~~

- ii. Make provision for traffic restrictions on Simister Lane to prevent this route from being a form of access/egress to and from the allocation except by public transport;
 - ~~iii. Improved public transport provision through the allocation (including Bus Rapid Transit corridors) and close to the allocation (including potential Bus Rapid Transit or Metrolink extension to Middleton) in order to serve the development; and~~
 - ~~iv. Other off-site highway works where these are necessary to ensure acceptable traffic movement.~~
- ~~3. Deliver a network of safe and convenient cycling and walking routes through the allocation designed in accordance with national and GM standards of design and construction and local planning policy requirements;~~
 4. Make provision for affordable housing in accordance with local planning policy requirements;
 5. Make provision for a new two-form entry primary school and make financial contributions for off-site additional secondary school provision to meet needs generated by the development, in accordance with policy JP-P5;
 - ~~6. Make financial contribution towards off-site secondary school provision to meet the needs generated by development;~~
 7. Make provision for a new local centre in an accessible location which includes a range of appropriate retail, health and community facilities and ensure it is integrated with existing communities;
 - ~~8. Make provision for other necessary infrastructure such as utilities, broadband and electric charging points in accordance with relevant joint plan or local planning policies;~~
 9. Ensure the design and layout allows for effective integration with surrounding communities, including active travel links and connections to local services and the new areas of employment at Heywood/Pilsworth (JPA1.1);

New criterion - Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with Policy JP-G2;

New criterion - Strengthen the boundary of the Green Belt to the north-west of the site such that it will comprise physical features that are readily recognisable and likely to be permanent;

- ~~10. Retain, enhance and replace existing recreation facilities where required and make provision for new recreation facilities to meet the needs of the prospective residents in accordance with local planning policy requirements;~~
- ~~11. Make provision for new, high quality, publicly accessible, multi-functional green and blue infrastructure within the allocation to provide health benefits to residents as well as creating a visually attractive environment and providing linkages to the sites wider drainage strategy in accordance with Policy JP-G 2 'Green Infrastructure Network' and Policy JP-G 8 'Standards for Greener Places'. This should include enhancement of existing watercourses throughout the allocation;~~
12. Make provision for biodiversity, including taking appropriate account of
~~Minimise impacts on and provide net gains for biodiversity assets within the allocation, including the~~ Bradley Hall Farm SBI, in accordance with Policy JP-G9 'A Net Enhancement of Biodiversity and Geodiversity';
- ~~13. Ensure that any development is safe from and mitigates for potential flood risk from all sources including Whittle Brook, Castle Brook and Brightley Brook and does not increase the flood risk elsewhere. The delivery of the allocation should be guided by an appropriate flood risk and drainage strategy which ensures co-ordination between phases of development;~~
- ~~14. Ensure that sustainable drainage systems are fully incorporated into the development to manage surface water and control the rate of surface water run-off, discharging in accordance with the hierarchy of drainage options. Where possible, natural SuDS techniques should be utilised, prioritising the use of ponds, swales and other infrastructure which mimic natural drainage~~

~~and be designed as multi-functional green infrastructure connecting to the wider green and blue infrastructure network in accordance with Policy JP-S 5 'Flood Risk and the Water Environment' and nationally recognised SuDS design standards. Proposals to discharge to the public sewer will need to submit clear evidence demonstrating why alternative options are not available;~~

- ~~15. Make appropriate provision for the long term management and maintenance of areas of green infrastructure, biodiversity features, other areas of open space and sustainable drainage features;~~
- ~~16. Carry out a project specific Habitats Regulation Assessment for planning applications of 1,000 sqm / 50 dwellings or more;~~
17. Incorporate appropriate noise and air quality mitigation measures and high-quality landscaping along the M60 motorway corridors and local road network if required within the allocation;
18. Incorporate necessary remediation measures in areas affected by contamination and previously worked for landfill purposes;
19. Take appropriate account of relevant heritage assets, and their settings, including Heaton Park, in accordance with Policy JP-P2; and ~~Protect and enhance the heritage and archaeological assets within the vicinity of the allocation and their setting in accordance with the findings and recommendations of the assessment of heritage assets that forms part of the Plan's evidence base and any updated assessment submitted as part of the planning application process.~~

New criterion - Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMCB6); (AMCB3)

- 11.36** The delivery of this urban extension has transformational potential in enabling new housing development of 1,550 units, community facilities and new transport infrastructure to come forward in what is currently an area that contains significant pockets of high deprivation. Any housing development within the allocation will be required to make provision for recreation and affordable housing to meet the needs of the prospective residents in line with Local Plan policy requirements, across a range of housing types, sizes and tenures.
- 11.37** The delivery of such a major opportunity will require significant investment in infrastructure if it is to be successful and sustainable. In particular, the allocation will need to benefit from a wide range of public transport improvements in order to promote sustainable travel and improve linkages to new employment opportunities at JPA1.1 Heywood/Pilsworth. This could potentially include Bus Rapid Transit linking Manchester City Centre to the Northern Gateway allocation. The allocation may also benefit from a potential Bus Rapid Transit or Metrolink extension to Middleton. Higher density development close to these corridors will help support the viability of new services. These public transport improvements will also need to be supported by safe and attractive walking and cycling routes to promote healthier and more sustainable shorter journeys to work.
- 11.38** The development of a large-scale community such as this will require new facilities for residents such as shops, health facilities, community facilities and recreational areas. These will be provided in accessible locations within walking distance of homes. In addition, demand on school places will also increase and therefore investment in new facilities for primary and secondary education will be required.
- 11.39** The semi-rural nature of this part of Greater Manchester and the character and setting of small villages such as Simister and Bowlee will be respected and will inform the layout, density and built form of development in these locations. Areas of open land and green infrastructure will be incorporated to maintain the identities of these places, including the retention of historic field

boundaries, routeways and woodlands where practical. The allocation also includes existing areas of biodiversity value, notably the streams and flushes at Bradley Hall Farm which form a Site of Biological Importance in the eastern part of the allocation. This SBI and other areas of identified biodiversity value should be taken fully into account in the masterplanning of the site.

New paragraph - Where land is to be removed from the Green Belt, national guidance seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

New paragraph - Remaining Green Belt boundaries are clearly defined by the M60 motorway to the south-west of the site. However, at present, the boundary of the Green Belt to the north-west of the site is less clearly defined and the development should incorporate measures to strengthen this to ensure that it comprises physical features that are readily recognisable and likely to be permanent.

11.40 Delivery of the allocation should be guided by an appropriate flood risk and drainage strategy in accordance with Policy JP-S5 which ensures co-ordination between phases of development. Measures such as rainwater recycling, green roofs, water butts and permeable driveway surfaces should be considered to mitigate the impact of potential flood risk both within and beyond the site boundaries. As a green and blue infrastructure network will provide more sustainable options discharge surface water, only foul flows should connect with the public sewer.

~~11.41 Traffic to and from the site is likely to include travel on the M62 which passes close to designated European sites and, as such, a project specific Habitats Regulation Assessment will be required for planning applications involving 1,000 or more sqm or 50 or more residential units.~~

- 11.42** Given that the site is located adjacent to the M62 motorway, there may be a need to incorporate a buffer between the allocation and the motorway to serve multiple functions including air and noise mitigation and high-quality landscaping. Mitigation through tree planting could be undertaken in conjunction with proposals for the Northern Forest.
- 11.43** There are a number of assets of historical significance in proximity to the allocation, and whilst outside the allocation boundary, any development would need to consider the impact on their setting through the completion of a Heritage Impact Assessment.

New paragraph - The allocation is identified as containing Mineral Safeguarding Areas for sand and gravel (2.9%); surface coal (63.9%); and brickclay (63.9%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 2 Stakehill

Picture 11.6 JPA 2 Stakehill

Policy (MMCB7)

Development at this site will be required to:

1. Deliver around 150,000 sqm of high quality, adaptable, employment industrial and warehousing floorspace within a 'green' employment park setting, with a focus on suitable provision for advanced manufacturing and/or other key growth economic sectors, taking advantage of its accessible location and proximity to Junction 20 of the M62, and complementing the other opportunities within the North-East Growth Corridor;
2. Provide around 1,680 high quality homes, including larger, higher value properties, to support the new jobs created within the North-East Growth Corridor and create a sustainable and high-quality extension to the urban

- area. This includes making provision for affordable housing in accordance with relevant local plan requirements;
3. Achieve excellent design and sustainability through masterplanning and the use of design codes for the whole site to ensure comprehensive development. This will include the need for an infrastructure phasing and delivery strategy in accordance with policy JP-D1. The scale of the residential development on the northern part of the allocation provides an opportunity to adopt a 'garden village' approach to create a locally distinctive residential offer;
 4. ~~Ensure that the design of the scheme preserves or enhances the setting of~~ Take appropriate account of relevant heritage assets, and their settings, including the listed St John's Church and war memorial in accordance with policy JP-P2 in line with the findings and recommendations of the Historic Environment Assessment (2020) in the Plan's evidence base and any updated assessment submitted as part of the planning application process;
 5. Protect and enhance archaeological features and where appropriate carry out archaeological evaluation in the form of geophysics, field walking and trial trenching for areas specified in the Stakehill Historic Environment Assessment 2020 to understand where especially significant archaeology must be preserved in situ;
 6. Have regard to views from Tandle Hill Country Park to the east which lies within Pennine Foothills (West /South Pennines) landscape character type. This should reflect and respond to the special qualities and sensitivities of the key characteristics of this landscape character type in accordance with policy JP-G1 in terms of the design, landscaping and boundary treatment in order to minimise the visual impact as much as possible;
 7. Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt within and in the vicinity of the site in accordance with policy JP-G2. This should include improvements to the retained areas of Green Belt ~~Retain a strategic area of Green Belt~~ between the A627(M) spur and Thornham Lane and in the south of the site to maintain separation between the urban areas of Rochdale and Middleton;

New criterion: Define and/or strengthen the boundaries of the Green Belt around/within the site such that they will comprise physical features that are readily recognizable and likely to be permanent, in particular separating the development area and land to be retained as Green Belt to the south;

8. Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7. Support the delivery of improved public transport to and within the area to promote more sustainable travel and improve linkages to the employment opportunities from surrounding residential areas;
9. ~~Contribute to the proposed new railway station at Slattocks which is currently being investigated by TfGM and ensure that new development is designed in a way to maximise the benefits of the new rail station through the creation of high quality walking and cycling routes;~~
10. ~~Provide good quality walking and cycling routes to connect to new and existing residential areas and local transport hubs in order to encourage sustainable short journeys to work and promote healthier lifestyles;~~
11. ~~Provide appropriate access to electric vehicle charging infrastructure and cycle storage;~~
12. ~~Provide financial contributions to mitigate impacts on the highway network identified through a transport assessment;~~
13. Improve access arrangements in and around Stakehill Industrial Estate to assist in the separation of residential and employment traffic as much as possible and to make appropriate provision for lorry parking;
14. Ensure that the existing settlements and pockets of housing are taken fully into account through the masterplanning of the area;
15. Deliver high quality landscaping and green and blue infrastructure within the site both to enhance the attractiveness of the scheme and provide opportunities for recreation to both residents and people working in the area. This should include making provision for biodiversity, including taking

appropriate account of the Rochdale Canal Site of Special Scientific Interest, along with the existing brooks and ponds within the site, in accordance with policy JP-G9. This should include good quality boundary treatment, particularly on the boundary separating the development area and land to be retained as Green Belt to the south to provide an attractive defensible Green Belt boundary;

16. ~~Retain and where possible enhance areas of biodiversity within the area, notably the Rochdale Canal Site of Special Scientific Interest, along with the existing brooks and ponds within the site;~~
17. Carry out a project specific Habitats Regulation Assessment in relation to the Rochdale Canal for planning applications of 1,000 sqm / 50 dwellings or more;
18. Development of the residential element of the site will be expected to make financial contributions for offsite additional primary and secondary school provision to meet needs generated by the development in accordance with policy JP-P5. Contribute and make provision for additional primary and secondary school places to serve the development. In addition, the This will include provision of land ~~and financial contributions~~ to deliver the expansion of Thornham St John's Primary School located within the allocation will also be required;
19. ~~Given the scale of the new housing provision it will be necessary for the proposal to deliver social infrastructure to ensure that the needs of new and existing communities are properly met; and~~
20. Incorporate appropriate noise and air quality mitigation taking account of the M62 and A627(M) motorway corridors; and
 New criterion: Consider the extraction of any viable mineral resources within Minerals Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMCB8)

- 11.44** Stakehill provides a significant opportunity for both Oldham and Rochdale to contribute to the future economic growth of Greater Manchester, capitalising on its proximity and connectivity to the motorway and rail network. It has the potential to provide a significant contribution to the sub-regional requirement for employment floorspace within key growtheconomic sectors and attract additional investment and economic activity to the area. The scheme will also generate a range of benefits for the local and wider economy. It would involve the loss of Green Belt, however, it offers an excellent location, as part of the North-East Growth Corridor and Northern Powerhouse with connections through to Liverpool and Leeds. The level of housing provided will contribute towards the delivery of our housing need, diversifying our housing stock and supporting the proposed employment opportunities across the North-East Growth Corridor and elsewhere.
- 11.45** The location of the housing and employment development within the allocation takes account of existing land uses and the potential to separate out residential and industrial traffic. The residential development will be focused to the north of Thornham Lane and to the south of the A627(M) spur. The employment development will be located to the south and east of the existing industrial estate.
- 11.46** Stakehill Industrial Estate has a strong reputation as an employment location and has excellent access to the motorway network. Public transport on the western edge of the site is good but public transport access, particularly from Oldham borough, requires improvement. This existing successful business park can provide a focus for a significantly expanded employment offer in this area which will complement the other opportunity areas within the North-East Growth Corridor gateway providing different types of premises and appeal to a wide range of uses and sectors.
- 11.47** As well as the expansion of the employment offer, an opportunity exists to deliver a significant amount of housing that will both support the new employment development and boost the supply of housing in this part of the sub-region. The site lies between the successful and attractive

neighbourhoods of Chadderton and Slattocks. This area is characterised by generally good accessibility, a number of popular schools and proximity to a range of retail facilities and other services.

New paragraph: It is important that the whole site is subject to masterplanning and design codes in order to deliver a comprehensive scheme. Given the size of the allocation, a single masterplan or design code may not be necessary. However, where more than one masterplan or design code is produced these should demonstrate how they relate to masterplans/design codes for adjoining areas in order to deliver a high-quality development across the whole site.

- 11.48** There will need to be significant public transport improvement to and within the site as a whole. The site lies between Castleton and Mills Hill railway stations, and walking and cycling connections to these two stations should be improved as part of the development. While the edges of the site nearest to these stations are potentially within walking distance it is unlikely that such trips will be made without additional supporting bus services that link these modes of transport. A new southerly link to Mills Hill station could form part of any expansion of the industrial estate. The scale of development proposed does offer the opportunity to deliver significant public transport improvements that will improve sustainable travel options to both existing and future residents and workers within the site. This includes the potential to deliver a new rail station at Slattocks on the Calder Valley line along with an associated Park & Ride facility. This opportunity is currently being investigated further by TfGM and a contribution from the proposed development would assist in the delivery of this new station. Investment in public transport infrastructure or services will also be needed to provide access to the site's employment opportunities for Oldham residents, which needs to be investigated further by TfGM. Investment in public transport and associated infrastructure should be complemented by a high-quality pedestrian and cycling network that links the new development to surrounding neighbourhoods and key services/facilities.

11.49 The development would involve the loss of an area of Green Belt but an area of Green Belt is to be retained between the A627(M) spur and Thornham Lane to provide some separation between the urban areas of Rochdale and Middleton. A proportion of the site to the south is also to be retained as Green Belt. Much of the allocation is contained by permanent, physical boundaries. However, all the Green Belt boundaries, particularly the southern boundary, should utilise existing landscape features and incorporate high quality boundary treatment to provide an attractive defensible Green Belt boundary.

Where land is to be removed from the Green Belt, national guidance seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Therefore, the retained areas of Green Belt within the allocation also provide an opportunity to provide compensatory improvements to the environmental quality and accessibility of retained Green Belt land. Further potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020). The area of Green belt retained in the south also allows for the incorporation of sustainable drainage systems integrated as part of the multi-functional green infrastructure network reflecting its ‘green’ employment park setting.

Whilst the development does not encroach into the areas around Tandle Hill Country Park, which lies within Pennine Foothills (West /South Pennines) landscape character area, the relative proximity of some development to the park means it is vital that development provides high quality landscaping and open spaces to create an attractive environment and increase opportunities for links between the site for both informal and formal recreation. The impact of the development on views from Tandle Hill Country Park should be given particular consideration. As well as landscaping, any development should demonstrate how the design and materials used within the development can help mitigate against any visual impact. The site does include areas of biodiversity in the form of Sites of Biological Importance, including ponds and

brooks. These and other nature conservation features should be retained and, where possible, enhanced.

~~11.50 A proportion of the site to the south is also to be retained as Green Belt, providing an opportunity to significantly enhance the biodiversity value of the site and for the incorporation of sustainable drainage systems integrated as part of the multi-functional green infrastructure network reflecting its 'green' employment park setting.~~

11.51 As the development site forms part of the setting of the Church of St John, a Grade II listed building, the masterplan must seek to retain key views to and from the designated heritage, specifically those from the footpath on Church Avenue. The masterplan will also consider these sensitivities in terms of design, density and provision of green space to preserve the tranquillity of the Church. Similarly, where practical, historic field boundaries as highlighted by the Historic Environment Assessment 2020 should be retained and incorporated into the masterplan to help retain the rural character of the site. These areas and assets identified by the Stakehill Historic Environment Assessment 2020 will require a programme of archaeological investigation. These sites will be considered through the detailed masterplanning of this site and any subsequent planning application.

~~11.52 It is considered that by 2040 these developments may lead to traffic increases on the M62 motorway because of their size and relative proximity to the motorway. The M62 passes close to designated National and European sites known to be susceptible to traffic pollution, particularly nitrate deposition. The Rochdale Canal Special Area of Conservation (SAC) lies adjacent to the site. Protected habitats in the canal can be affected by changes in light, shading, leaf fall and water quality. As such, a project specific Habitats Regulation Assessment will be required for planning applications involving 1,000 or more sqm or 50 or more residential units. to ensure that development close to the canal is designed sensitively to the protected habitat.~~

- 11.53** The wider opportunity area is adjacent to and includes areas existing development. Any proposed scheme should have full regard to these areas and consider them through the detailed masterplanning of the area.
- 11.54** The scale of residential development means that significant community, leisure and recreational infrastructure will have to be provided as part of a comprehensive scheme. This will include the provision of additional school places as well as flexible community and medical facilities, facilities for sport and recreation and possibly a small local centre.
- 11.55** In terms of primary school provision, St John's CE Thornham Primary School is located within the site on the northern side of Thornham Lane. There is an opportunity to expand this small, village school to assist in meeting demand for primary school places generated from the proposed development and provide a highly accessible school for new residents.

New paragraph: The allocation is identified as containing Mineral Safeguarding Areas for brickclay (99.6% of the site); sand and gravel (97.5%); and surface coal (99.6%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Medipark/Timperley Wedge

Picture 11.7 JPA 3 Medipark/Timperley Wedge (MMCB9)

11.56 Development of this area will take advantage of its well-connected location to create a new living and working experience providing new homes, jobs and training opportunities to the benefit of both new and surrounding communities through two allocations: Medipark (See Policy JP Allocation 3.1 'Medipark') Timperley Wedge (See Policy JP Allocation 3.2 'Timperley Wedge')

11.57 Together, Medipark and Timperley Wedge is one of the very best opportunities for a strategic location in the UK, offering outstanding potential to help the City Region to achieve its ambition. The allocation is already a well-connected location adjoining Manchester Airport and the M56 Motorway, on the edge of one of the UK's major growing and thriving cities, and close to the countryside of Cheshire.

11.58 In the future the Location will also benefit from HS2 which is one of the most significant transport infrastructure projects in the UK over recent decades and together with Northern Powerhouse Rail (NPR) will provide high speed rail connections to London via Birmingham and between the cities of the north. The economic benefits of HS2 and NPR will support existing businesses, inward investment and job creation and the advantages this gives to new development in this location are hugely significant.

11.59 (MMCB10) Strategically situated between Manchester University NHS Foundation Trust, Wythenshawe Hospital, Manchester Airport and Airport City, these allocations form part of the Manchester Airport Strategic Location (Policy JP-Strat 10 'Manchester Airport'). The significance of these locations collectively, as regards delivering in an integrated manner development which meets the Joint Plan area's needs, is considerable. ~~The Global Logistics (Policy JP Allocation 10 'Global Logistics') allocation for B2/B8 will meet a different but complementary need to. The development at Medipark, with more will accommodate specialist knowledge-based businesses, while and the Timperley Wedge allocation will provide serve with office employment land. the B1 Employment.~~

11.60 Significant transport improvements are required and will need to be subject to further more detailed traffic assessment and masterplanning for each of the allocations.

11.61 There is significant potential to provide strong green infrastructure connections between the two allocations, especially along new walking and cycling routes and across and along in particular Fairywell Brook both north into Manchester and south towards Manchester Airport and into the wider countryside south of Timperley Wedge into Cheshire and north along Timperley Brook towards Altrincham.

Policy JP Allocation 3.1 Medipark

Picture 11.8 JPA 3.1 Medipark

Policy (MMCB11)

Development on this site will be required to:

1. Deliver about 86,000 sqm **B4 Class E (g)**-focused floorspace;
2. Development should be configured to take advantage of transport infrastructure in the area including **the need to accommodate and contribute to the delivery of** the proposed Metrolink Manchester Airport Line Western Leg extension;
3. Deliver a new spine road through the site with connections to the existing road network **and JP3.2 Timperley Wedge**;

New Criteria: Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;

~~4. Facilitate improvements to the surrounding Strategic, Primary and Local Road Networks, including entry / egress and links to the strategic highway network, to enable safe access to and from the area;~~

~~5. Improve access to the site by providing links to local cycling and walking networks where appropriate;~~

6 Complement the wider Roundthorn Medipark development and the development proposed in Timperley Wedge;

~~7. Ensure development within the site should not impact the listed buildings of Newall Green or the adjacent playing field;~~

New Criteria: Take appropriate account of relevant heritage assets, and their settings, including the listed buildings of Newall Green, in accordance with policy JP-P2

New Criteria: Take appropriate account of the adjacent playing field in accordance with policy JP-P7;

8. ~~Incorporate suitable site mitigation to account for~~ Take appropriate account of the historic landscape features within the site; ~~and~~

9. ~~Reflect the sequential approach to~~ Provide a flood risk management strategy, focusing more sensitive development furthest from Fairywell Brook. High quality natural landscaping, including the provision of native species, should be delivered adjoining the brook to help mitigate flood risk and promote biodiversity and green infrastructure.; ~~and~~

New Criteria: Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in accordance with policy JP-G2.

Reasoned Justification (AMCB4)

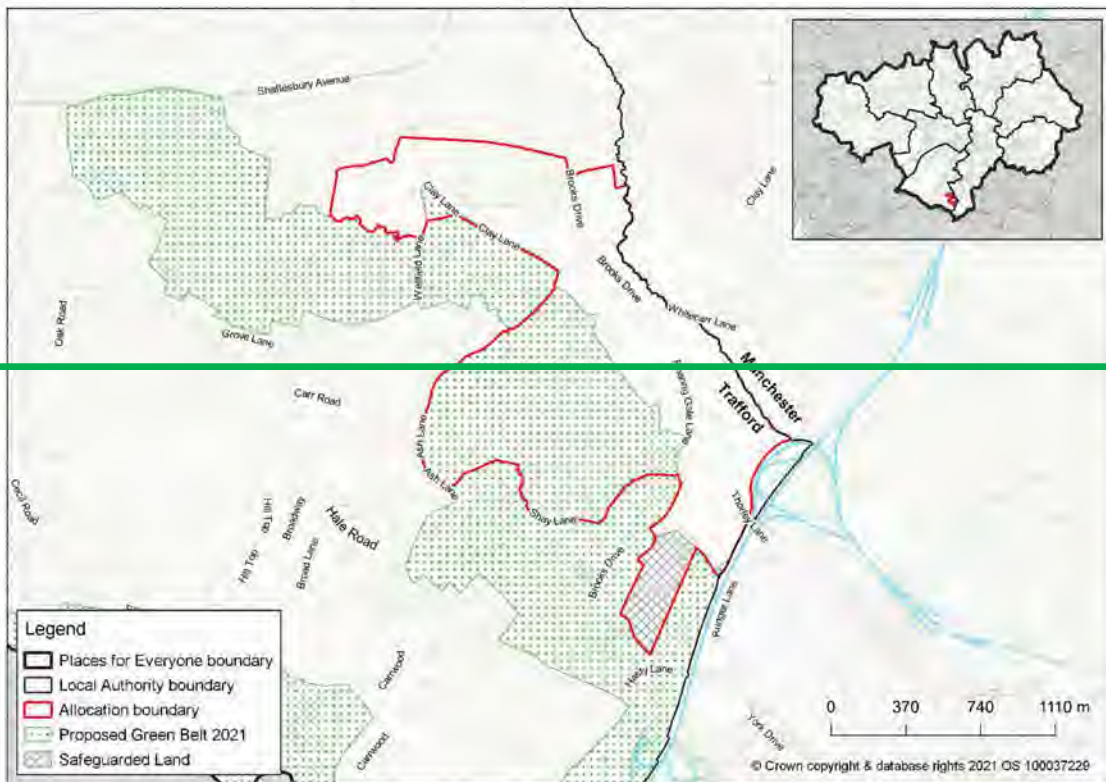

11.62 The opportunity that this area offers because of its proximity to Manchester University NHS Foundation Trust (Wythenshawe Hospital) and the wider Roundthorn Medipark **Enterprise Zone** development is significant. By attracting investment from

knowledge-based industries to a high-quality development, this area can provide a major boost to the economy of the city and the wider region. This is a singular location close to a major hospital and with improvements to local transport infrastructure, including Metrolink, it can play its full part in maximising future economic growth. The proposed arrival of HS2, including the airport station a short distance to the south, will provide a further stimulus to economic activity in this area.

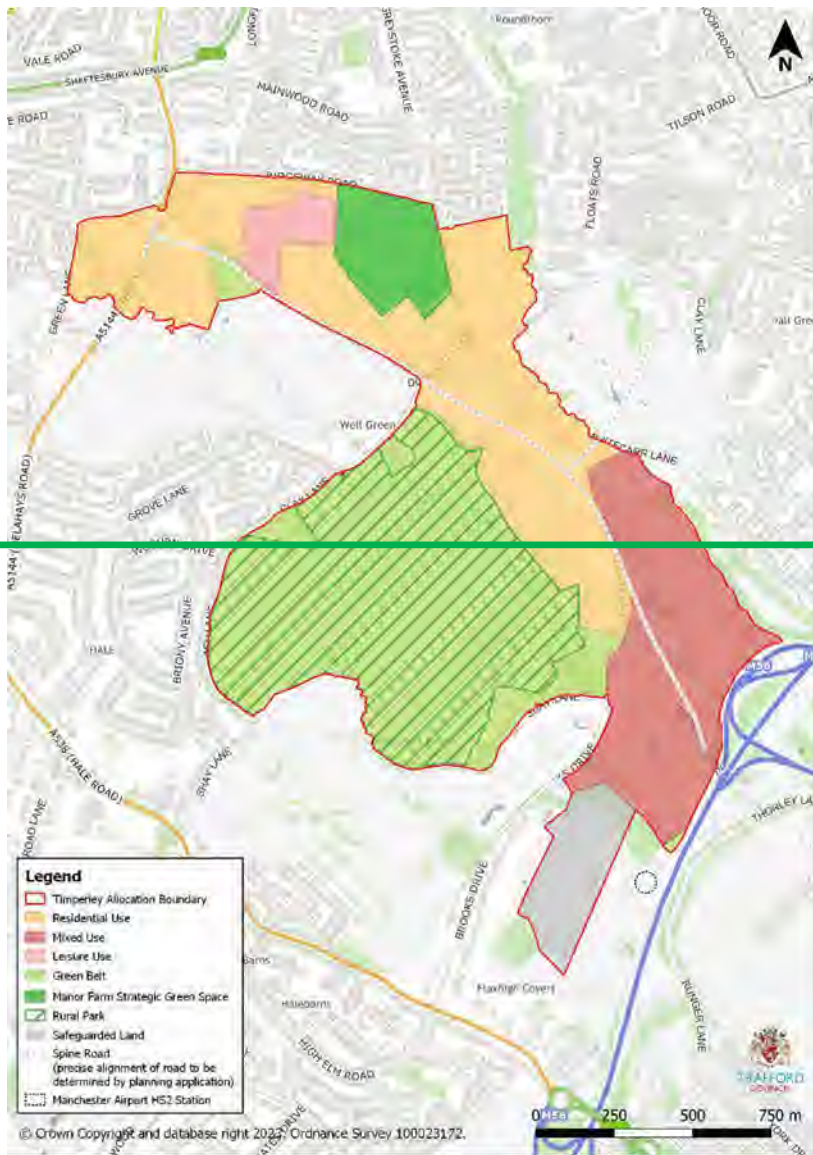

11.63 The area's location within open countryside and adjoining Fairywell Brook means that a high quality and forward-looking design will be needed. Future flood risk management from the brook should be considered from the outset to minimise risk to the new development, as well as affording opportunities to improve amenity and biodiversity, helping to conserve and enhance elements of the natural environment. Attractive green corridors through the development will encourage active travel through the site, as well as creating a positive environment for wildlife. Moreover, development can be planned to provide mitigation that takes account of the site's historic landscape elements.

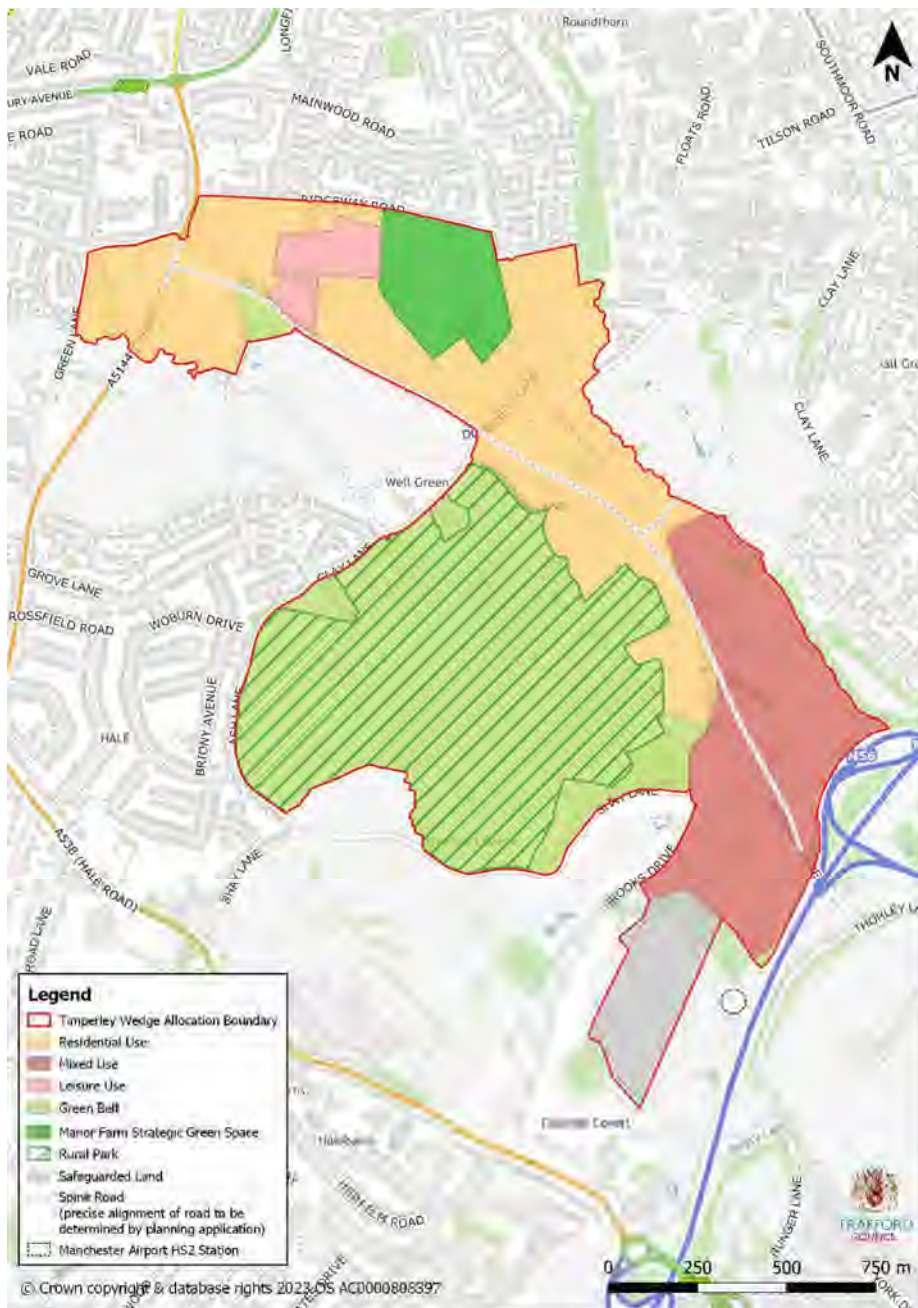

Policy JP Allocation 3.2 Timperley Wedge

Picture 11.9 JPA 3.2 Timperley Wedge: (MMCB12)

Picture 11.10 Timperley Wedge Indicative Allocation Policy Plan (MMCB13)

Policy (MMCB14)

Development of the site will be required to:

1. Be in accordance with a Masterplan or SPD that has been developed in consultation with the local community and other stakeholders, and approved agreed by the Local Planning Authority. The Masterplan must include a robust phasing and delivery strategy, as required by policy JP-D1. This will be prepared in partnership with key stakeholders and to ensure the whole allocation site is planned and delivered in a coordinated and

comprehensive manner with proportionate contributions to fund necessary infrastructure;

Residential Development

2. Deliver around 2,500 homes of which 1,7800 will be in the plan period as set out ~~in~~ the Indicative Allocation Policy Plan (Picture 11.10);
3. Deliver high quality residential units which are accessible, integrated with the existing community and well designed to create a genuine sense of place;
- ~~4. Deliver a range of house types, sizes, layouts and tenures through a place-led approach;~~
5. Deliver residential development at an average density of 35 dph in the northern part of the allocation area, reflecting the existing urban area. Higher density development at an average of 70 dph will be appropriate close to the new local centre, Davenport Green Metrolink stop and the HS2 / NPR Manchester Airport station;
6. Provide a minimum of 45% affordable housing throughout the site;
7. Make specific appropriate provision for self-build custom build plots, subject to local demand as set out in the Council's self-build register;

Employment Development

8. Deliver around 60,000 sqm E (g(i))-B1 office employment land within a mixed employment residential area set out in the Indicative Allocation Policy Plan (picture 11.10); of which 1530,000 sqm will be in the Plan period;
- ~~9. Create legible streets and space within the employment area with attractive buildings that respond positively to the landscape and provide accessible linkages to residential areas and the local centre;~~
- ~~10. Create employment and training opportunities for local people, in particular through the construction phase, to be set out in a Local Labour Agreement in accordance with Local Plan policies;~~

- ~~11. Co-ordinate the phasing of development with the delivery of infrastructure on the site, ensuring sustainable growth at this location;~~
- ~~12. Make a proportionate contribution, by means of an equalisation mechanism, to infrastructure delivery. Detailed requirements will be set out in the masterplan/SPD;~~

Transport Integration and Accessibility

13. ~~Deliver accessible streets which prioritise cycling, walking and public transport over the private car; Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7:~~
14. Deliver a network of new safe cycling and walking routes through the allocation, including enhancements of Brooks Drive and creating new/enhancing existing Public Rights of Way;
15. Accommodate ~~and contribute to~~ the delivery of the Manchester Airport Metrolink Line Western Leg extension including Metrolink stop(s);
16. Deliver a new spine road through the site with connections to the existing road network and local access to development sites, incorporating separate pedestrian and cycling space as well as and provision for future bus-priority infrastructure rapid transit to improve east west connections between Altrincham and Manchester Airport;
- ~~17. Make the necessary improvements to the Strategic, Primary and Local Road Networks to enable the proposed level of development, and mitigate the impact of increased vehicle numbers, including:~~
- ~~i. Road Widening at Dobbinetts Lane~~
 - ~~ii. Junction improvement to Thorley Lane/Runger Lane~~
 - ~~iii. New roundabout junction at Thorley Lane/Green Lane/Clay Lane~~
 - ~~iv. Contributions to improvements at M56 Junction 3 and Terminal 2 roundabout~~

Community Facilities

18. Provide a ~~new~~ local centre comprising a range of shops and services to meet local needs with convenience shopping facilities as a hub for local services in the region of 3,000 sqm of retail floorspace close to the Davenport Green stop of the Metrolink Western Leg extension;
19. ~~Provide additional primary school places, including a new primary school and contribute to the provision of secondary school places; Make financial contributions for offsite additional primary and/or secondary school provision to meet needs generated by the development (where appropriate) and make provision for a new primary school, located close to the local centre, in accordance with JP-P5;~~
- ~~20. Provide and contribute to new health facilities to support the new community;~~

Green Belt

21. ~~Create defensible~~ Define and/or strengthen the boundaries of the Green Belt around/within the site such that they will comprise physical features that are readily recognisable and likely to be permanent; utilising, where appropriate, existing landscape features;
22. ~~Mitigate any impact on and improve the environmental quality and accessibility of remaining Green Belt land; Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt within and in the vicinity of the site in accordance with policy JP-G2;~~

Green Infrastructure

23. Provide a significant area of enhanced and publicly accessible green infrastructure (including new public rights of way) within a rural park to remain in the Green Belt identified on the Indicative Allocation Policy Plan (picture 11.10), ensuring protection of heritage assets in this area;
24. Create wildlife corridors and steppingstone habitats within the development areas to support nature recovery networks, provide ecosystem services and

publicly accessible green infrastructure. Including the following green links which will be defined through the Masterplan and Trafford Local Plan:

- i. From Clay Lane through to Brooks Drive and Fairywell Brook
 - ii. Through Davenport Green Ponds SBI to Medipark
25. Provide a range of types and sizes of open space within the allocation boundary in accordance with the Council's open space standards policies, including local parks and gardens; natural and semi-natural greenspace, equipped and informal play areas; outdoor sports pitches and allotment plots, ensuring arrangements for their long-term maintenance;
26. Protect Manor Farm identified in the Indicative Allocation Policy Plan (picture 11.10) and promote its enhance its sports facilities to meet local needs use for future sports provision including, where appropriate, new access and car parking;
27. Promote improvements to Accommodate land for leisure facilities (Use Class E(d) and F2 (c)) at Hale Country Club as identified on the Indicative Allocation Plan (picture 11.10);

New criterion: Seek to relocate Bowdon Rugby Club either within or in close proximity to the allocation and redevelop the existing Rugby Club site for residential use as shown on the Indicative Allocation Plan (picture 11.10)

Natural Environment

28. Protect and enhance natural environment assets within the site and surrounding areas including SBIs, woodland and hedgerows; Make provision for biodiversity, including taking appropriate account of the Ponds at Davenport Green and Davenport Green Wood SBIs, in accordance with Policy JP-G9;
29. Deliver a clear and measurable net gain in biodiversity, including provision for long-term management of habitats and geological features which may include

~~SUDs systems of high biodiversity value created as part of the overall flood risk and drainage strategy;~~

30. Protect and enhance the habitats and corridors along Fairywell Brook and Timperley Brook to improve the existing water quality and seek to achieve 'good' status ~~as required under~~ having regard to the North West River Basin management plan (2019);

Landscape

31. Retain important landscape views and landscape features such as ponds, woodland and hedgerows and use these features to develop a distinct sense of place;
32. Provide appropriate landscape buffers across the site, including a substantial landscape buffer along the Green Belt boundary to mitigate the impact on the rural landscape to the south west of the allocation area;

Design

33. Ensure new development is place-led, ~~creative and contextual in its response,~~ respecting the local character, heritage and positive local design features of the area;
- ~~34. Be in accordance with the Council's adopted Design Guide embracing strategic design principles, including creating connected communities, redefining streets, delivering inclusive characterful design and responding to heritage;~~
35. Respect the urban/rural fringe setting in the design of the development, in terms of its height, scale and siting and demonstrate high standards of urban design;

Historic Environment

36. ~~Conserve and enhance the historic environment in line with the findings and recommendations of the Historic Environment Assessment (2020 in the Plan's evidence base and any updated (HIA) submitted as part of the planning application process;~~ Take appropriate account of relevant heritage assets and

their settings, including the Deer Park, listed buildings and areas of high archaeological potential in the south west of the site, in accordance with Policy JP-P2;

- ~~37. Protect and enhance archaeological features and, where appropriate, carry out archaeological evaluation in the form of geophysics, field walking and trail trenching for areas specified in the Timperley Wedge Heritage Assessment 2020 to understand where especially significant archaeology must be preserved in situ;~~

Utilities, Environmental Protection and Climate Change

- ~~38. Mitigate the impacts of climate change and utilise the most energy and water efficient technologies to achieve zero carbon by 2028;~~
- ~~39. Explore and deliver the most appropriate solutions to providing decentralised low carbon heat and energy as part of new residential and employment development. This will include exploring the potential for the development of district heat, cooling and energy networks, energy centres, the implementation of renewable and low carbon heat and energy technologies in design and the co-location of potential heat and energy customers and suppliers~~
- ~~40. Ensure new development maximizes on-site renewable energy measures in line with the energy hierarchy, for example, via solar PV and other low carbon technologies, linked to the provision of and supply to electric vehicle charging infrastructure;~~
- ~~41. Make provision for other necessary infrastructure such as utilities, full fibre broadband and electric vehicle charging points in accordance with relevant Places for Everyone or Local Plan policies;~~
42. Mitigate flood risk and surface water management issues including provision of SUDS through the design and layout of development in accordance with an allocation wide flood risk, foul and surface water management strategy, which forms part of the Masterplan/delivery strategy (Criterion 1) ~~The allocation wide drainage strategy should be prepared after having fully assessed site topography, flood risk, existing water features and naturally occurring flow~~

~~paths to identify where water will naturally accumulate. The strategy will demonstrate how each phase interacts with other phases of development and further detail will be set out in the Masterplan / SPD~~

- ~~43. Incorporate on-site measures to deal with surface water and control the rate of surface water runoff. Planning applications will be expected to apply the full surface hierarchy and ensure water is managed close to where it falls by mimicking the natural drainage solution;~~
- ~~44. Demonstrate that development proposals will not adversely affect existing water supply infrastructure that passes through the site. This will include consideration of any changes in ground levels and management of the construction process;~~
- ~~45. Seek to actively reduce the impact of potential flood risk both within and beyond the site;~~
46. Incorporate appropriate noise and air quality mitigation, such as woodland buffers, particularly along the M56 motorway, the Metrolink and HS2/NPR corridor ~~in line with Environmental (Noise) Regulations;~~

Safeguarded Land - HS2 Growth Area

47. The land identified to the south and west of the proposed HS2 Airport station as shown on the Indicative Allocation Policy Plan, although removed from the Green Belt, it is safeguarded and is not allocated for development at the present time;
- ~~48. The land is safeguarded in accordance with Policy JP-G-11 "Safeguarded Land"; Permanent development of this land will only be permitted following an update to a plan that proposes its development; and~~
49. Any future allocation should have regard ~~is subject to an assessment that the land directly contributes~~ to the Greater Manchester HS2 / NPR Growth Strategy (as maybe updated and/or superseded) as part of a plan review. ~~and it should only be developed after completion of development set out in the Timperley Wedge masterplan and following the delivery of HS2 Airport station; and~~

~~50. Should a HS2 Airport station not be developed, the land will return to Green Belt following a Plan review.~~

Reasoned Justification (MMCB15)

11.64 Development of the site will require a coordinated approach between all landowners and developers and Trafford Council is committed to working with stakeholders to bring forward a detailed Masterplan/~~SPD~~ which provides a framework for the sustainable delivery of a new community at Timperley Wedge.

New paragraph: All areas of development will be expected to make a proportionate contribution to necessary infrastructure, including transport, social and green infrastructure. Further details on supporting infrastructure requirements will be set out in the masterplan and delivery strategy together with information on trigger points for when infrastructure such as road and junction improvements, a new school and the spine road will be required, which will be linked to the development trajectory.

New paragraph: Approximately 700 new residential units and 30,000 sqm of employment land have been phased for delivery beyond the plan period as the development is proposed on land located within the HS2 construction boundary and therefore is expected to be unavailable for a temporary period whilst the HS2 route, Airport Station and southern tunnel portal are under construction. It is therefore anticipated that this area will come forward following the completion of HS2 Airport Station and the build-out is very likely to extend beyond the Places for Everyone plan period. The timescales for development in this area are, in part, dependent on the HS2 timescales. The area of land required for construction may be altered if changes are made to the overall HS2 construction programme. However, delivery of development is not dependent on HS2/NPR and in the unlikely event a rail scheme did not come forward, an alternative option for delivery of development in this area has been considered and is achievable.

Residential development

- 11.65** The Timperley Wedge allocation will deliver around 1,7800 homes in the plan period and around 2,500 in total. In the northern areas of the allocation site, development will deliver medium density housing to be in keeping with the existing character of the area. Lower density is not considered to be appropriate as this would not be an efficient use of land. Higher density housing, including apartments, will be appropriate close to the local centre, within the mixed housing and employment area to the south east of the allocation between the Local Centre and the HS2/NPR Airport Station. The density of areas closest to Green Belt and areas of ecological or historic importance may need to be lower subject to detailed design.
- 11.66** The site is expected to deliver affordable housing across all parts of the site at a minimum of 45% in line with the requirements identified in the Housing Needs Assessment 2019. The site offers an opportunity to deliver affordable housing on a greenfield site and make an important contribution to addressing the acute affordable housing need in Trafford.
- 11.67** There are a number of existing pockets of residential development across the site some of which contain locally distinctive design features. New development should therefore be designed so that it is sensitively integrated into these areas.

Employment development

- 11.68** Employment development will deliver around 1530,000 sqm in the plan period and 60,000 sqm in total. This will be located in the south eastern area of the site at Davenport Green as a mixed-use area with some higher density residential units. It will support the expansion of Manchester Airport and Manchester University NHS Foundation Trust, Wythenshawe Hospital. This land is already allocated for high quality office use.

- 11.69** The area is close to areas of deprivation, including Wythenshawe in Manchester and Broomwood in Trafford and it will also be accessible by bus and tram to other areas of deprivation in Trafford. ~~Targets for the training and employment of local people could, therefore, be agreed between the developers, the local colleges and the Local Authority to ensure a realistic number of local people benefit from training and new jobs as a result of the development.~~
- ~~**11.70** All areas of development will be expected to make a proportionate contribution to necessary infrastructure, including transport, social and green infrastructure. Further details on supporting infrastructure requirements will be set out in the masterplan and delivery strategy together with information on trigger points for when infrastructure such as road and junction improvements, a new school and the spine road will be required to be linked to the development trajectory.~~
- 11.71** ~~Approximately 700 new residential units and 30,000 sqm of employment land have been phased for delivery beyond the plan period as the development is proposed on land located within the HS2 construction boundary and therefore will be unavailable for a temporary period whilst the HS2 route, Airport Station and southern tunnel portal are under construction. It is therefore anticipated that this area will come forward following the completion of HS2 Airport Station and the build-out is very likely to extend beyond the Places for Everyone plan period. The timescales for development in this area are, in part, dependent on the HS2 timescales. The area of land required for construction may therefore be altered if changes are made to the overall HS2 construction programme. However, delivery of development is not dependent on HS2/NPR and in the unlikely event a rail scheme did not come forward, an alternative option for delivery of development in this area has been considered and is achievable.~~

Transport integration and accessibility

- 11.72** The delivery of new and improved public transport and active travel infrastructure is integral to the success of the Timperley Wedge allocation

enabling modal shift from car travel to sustainable travel modes. The Western Leg Metrolink extension will provide links to Manchester Airport, as well as to employment areas in Trafford Park and other main employment areas in the borough and GM. This will benefit both existing and new residents providing improved access to jobs and services. A proportionate contribution towards the Metrolink extension infrastructure is, therefore, appropriate and will need to be agreed with TfGM.

- 11.73** The road network currently consists of country lanes which are unable to support the proposed development but which will be enhanced to provide ~~promote them as~~ cycling and walking routes and thereby promoting healthier lifestyles. These, together with new routes, will provide links through the allocation and to Medipark, Hale Barns, Timperley and beyond. A new spine road will provide safe capacity for car use and link to the surrounding road network. The route identified is indicative at this stage and further work on the most appropriate alignment will be required as part of future masterplanning / planning applications. It is envisaged the spine road will be delivered incrementally by the development as and when it requires access from it. The spine road will have a safe route for walking, cycling and bus priority infrastructure ~~rapid transit~~ and will contribute to improving east/west connectivity between Altrincham and the Airport, as well as the wider southern Greater Manchester area. ~~The Timperley Wedge/Medipark Transport Locality Assessment has determined the key necessary transport interventions and supporting interventions needed to mitigate the impact of the development. These include interventions specific to each allocation but also shared interventions between the allocations.~~

- 11.74** An appropriate proportioning of contributions between the allocations and individual development plots together with more local interventions will need to be determined by further masterplanning, detailed design and a Transport Assessment.

Community Facilities

- 11.75** A new local centre close to the proposed Metrolink stop will be a hub for community infrastructure and will service the needs of the community. The site will be an attractive location for families, and it is anticipated that this will generate the need for a new primary school located close to the local centre. Secondary schools within the area can accommodate the new pupils but will require a contribution per pupil place. Small high street shops and community facilities including health facilities and a local supermarket would also be appropriate within the local centre.

Green Belt

- 11.76** The development will involve the removal of some land from the Green Belt, however, a considerable area of Green Belt within the allocation boundary will remain. This area of retained Green Belt will maintain the separation of Timperley and Hale, and will be enhanced to improve green infrastructure functionality, creating new accessible recreation areas particularly along the Timperley Brook and the large SBI areas.
- 11.77** Opportunities exist to enhance areas of SBI, existing woodland and hedgerows throughout the allocation. The incorporation of ‘old’ (19th century or earlier origins) hedgerows within development areas will help to enhance the sense of place of the local landscape. These will also contribute to the green setting of development.

New paragraph: The new Green Belt boundary is defined by existing features, where possible, and there is also a requirement to strengthen the boundary as part of the development. The majority of the boundary is defined by existing roads and hedgerows. There is a particular need to strengthen the boundary which borders the rural park and also the safeguarded land boundary. The western boundary of the safeguarded land area will be defined by the woodland planting proposed by HS2 and the eastern boundary by the HS2 Airport Station and associated infrastructure. It is therefore not currently identified by existing features.

Green Infrastructure

- 11.78** Where green spaces remain in the part of the allocation area that is to be removed from the Green Belt, there is a need to provide the highest level of protection in line with policies in Trafford's Local Plan.
- 11.79** The allocation contains Bowdon Rugby Club along Clay Lane, which is identified as suitable for residential development. As part of the development proposals, the club is intending to relocate and improve its facilities within the Timperley Wedge area and it may be appropriate to look at opportunities to relocate the facilities within the wider allocation area. Such proposals will be considered as part of future detailed masterplanning work.
- 11.80** Manor Farm sports fields along Ridgeway Road are an existing valued community resource and will be protected in line with policies in Trafford's Local Plan. The facilities have the potential to be enhanced and more widely used with a new access created from Clay Lane.
- 11.81** Hale Country Club is looking to make improvements to its leisure facilities (Use Class E(d) and F2(c)) creating job opportunities and providing a higher quality of leisure experience for local communities.

Natural Environment

- 11.82** The development will need to have regard to existing ecological features and should seek to enhance these as part of the development. This includes the habitats and green corridors along Fairywell Brook and Timperley Brook.

Landscape

- 11.83** An area of open land will remain alongside the allocation and development will therefore be required to consider the landscape setting and enhance the

transition between the urban edge and the open countryside having regard to views / vistas into and out of the site.

Design

- 11.84** Development will need to set a new high quality design standard for this area and should draw upon the guidance in [the Council's relevant adopted Design Guides and code](#). Specific parameters for the development of the site will be set out in the Masterplan ~~/SPD~~.

Historic Environment

- 11.85** The Timperley Wedge Historic Environment Assessment 2020 considered the characterisation of the land in respect to the known archaeological, built heritage and historic landscape within the allocation. It assessed the potential for the development to affect designated and non-designated heritage assets, their settings and important views, and this has been taken into account in considering appropriate quantum of development for the site. The area of highest archaeological potential is within the south-western portion of the site. Although this particular area remains in the Green Belt there is potential for enhancement as part of development proposals.
- 11.86** Areas of particular sensitivity are the Deer Park and listed structures including Davenport Green Farmhouse, Hall and Barn. The Assessment makes recommendations for mitigation and identifies opportunities for enhancement. Further archaeological investigation and a Heritage Impact Assessment will be required as part of future planning applications to understand the heritage significance of these areas. A suitable mitigation strategy should be developed which also identifies opportunities to enhance the heritage assets.

Utilities, environmental protection and climate change

- 11.87** Opportunities will be explored to maximise the potential of the Timperley Brook and Fairywell Brook in terms of urban flood management. ~~The Brooks currently have a rating of 'moderate' under the North West River Basin Management Plan (2019), the development should seek opportunities to improve this to 'good'.~~
- 11.88** A high-quality coordinated drainage strategy will be required which is integrated with the green and blue environment and which is a key component of the new high quality design standard for this area.
- 11.89** Landowners and developers will be expected to work together in the interest of sustainable drainage. Where necessary, the strategy must be updated and agreed with the local planning authority to reflect any changing circumstances between each phase of development.
- ~~**11.90** The incorporation of a swale adjacent to the spine road has the potential to reduce surface water runoff.~~
- ~~**11.91** Downstream from this allocation there is an area with an existing risk of flooding and as such the development of this site has the potential to take a strategic approach to flood risk management and provide additional opportunities for upstream storage. Further investigation is needed into this as open areas of water in this location are a risk for bird strike due to the close proximity of Manchester Airport.~~
- 11.92** Noise mitigation such as fencing and bunds will ensure areas like the M56, Metrolink line and HS2 are not seen to be bad neighbours to development

Safeguarded Land - HS2 Growth Area

- 11.93** The Greater Manchester HS2/NPR Growth Strategy identifies the opportunities of this strategically important and well-connected location adjacent to the proposed HS2 Airport station. The exceptional circumstances for taking ~~this~~ the safeguarded land out of the Green Belt are directly related to the potential this land has to capitalise directly on the economic benefit brought by HS2. The south eastern area of the allocation, adjacent to the

HS2 station, has therefore been removed from the Green Belt to support the delivery of the wider Greater Manchester HS2 Growth Strategy ambitions.

- 11.94** In the longer term this area may also benefit from Northern Powerhouse Rail (NPR) (or an equivalent project) which will deliver fast east west rail connections across the north, further enhancing public transport connections to the station.
- 11.95** The area around the [proposed](#) Manchester Airport HS2 Station has been removed from the Green Belt but will only be considered a sustainable location after delivery of HS2 Airport Station. It is likely much of this land will be utilised to support HS2 during construction but after the delivery of HS2, land adjacent to the station could be available for potential housing and employment development that will benefit from this sustainable, well connected location.
- 11.96** As part of the delivery of HS2 a substantial landscaped screen / buffer will form a boundary to this land and housing on Brooks Drive and will form the new Green Belt boundary.

Blank Page

Strategic Allocations in Bolton

Picture 11.11 Bolton District Overview (MMBo1)

Policy JP Allocation 4: Bewshill Farm

Picture 11.12 JPA 4 Bewshill Farm (AMBo1)

Policy (MMBo2)

Development at this site will be required to:

1. Provide a location for around 21,000 sqm of industrial and warehousing floorspace to compliment the adjacent development at Logistics North;
2. Take access from the Logistics North site;
3. ~~Contribute to the existing Logistics North local link demand responsive transport service~~ Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7; and
4. Provide high quality landscaping especially along its prominent frontage with the A6;

New criterion: Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with policy JP-G2; and

New criterion: Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMBo3); (AMBo2)

11.97 The Logistics North site at Over Hulton is currently experiencing considerable pressure for development and is almost completely committed. it is expected that it will be completely committed by the early 2020s. This site provides the opportunity for a modest extension to Logistics North. Development would be for industrial and warehousing uses to reflect the uses at Logistics North.

New paragraph: Where land is to be removed from the Green Belt, national guidance seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

New paragraph: The allocation is identified as containing Mineral Safeguarding Areas for sandstone (98.8% of the site); surface coal (98.8%); and brickclay (98.8%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 5: Chequerbent North

Picture 11.13 JPA 5 Chequerbent North

Policy (MMBo4)

Development at this site will be required to:

1. Provide a location for around 25,000 sqm of industrial and warehousing floorspace in the Wigan to Bolton Growth Corridor;
2. Be accessed from the A6, with a potential access via Snyderdale Way, subject to detailed highway design considerations;
3. Provide good quality access to the site by motor vehicle, public transport, walking and cycling Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;

4. ~~Provide financial contribution to mitigate~~ Mitigate impacts on the ~~Local Road Network~~ Highway Network including any necessary improvements to Chequerbent roundabout and/or other improvements identified through a transport assessment;
5. ~~Require~~ Provide high quality landscaping particularly to the west along Snyderdale Way and to the north along the M61; trees and hedgerows along the eastern boundary should be retained for screening;

New criterion: Take appropriate account of relevant heritage assets, and their settings, including Chequerbent Embankment Ancient Monument, in accordance with policy JP-P2;

New criterion: Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with policy JP-G2; and

New criterion: Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMBo5); (AMBo3)

- 11.98 The Wigan to Bolton growth corridor is an excellent location for logistics and industrial uses. Strong demand for employment uses in the M61 corridor is evidenced by the success of other developments, including Logistics North.
- 11.99 There are no obstacles to the construction of the site and it could come forward within 5 years, ~~subject to release from the Green Belt~~. Other developments in the vicinity may change the layout of the Chequerbent roundabout before the development of this site, and the requirements of this site to contribute to improving the roundabout will be considered at the time of any planning application.

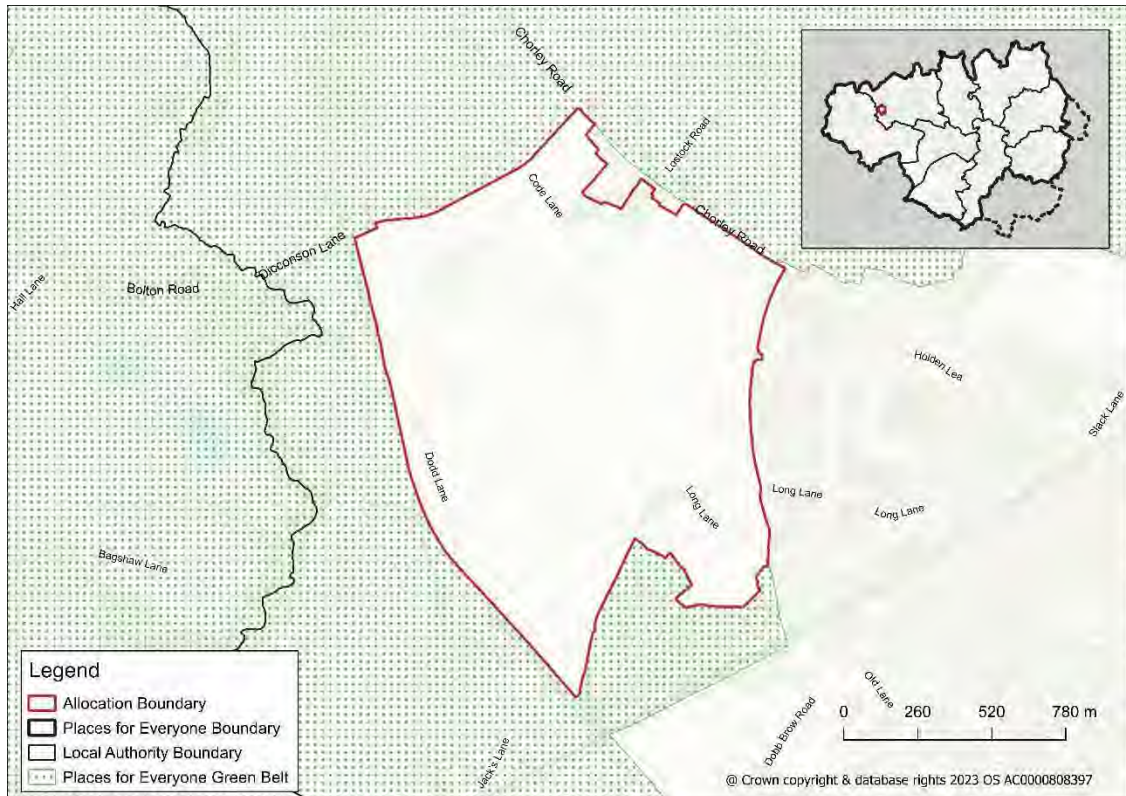

New paragraph: Chequerbent Embankment, which runs along the eastern boundary of the allocation, was designated as a Scheduled Ancient Monument in February 2022. Any development would need to consider the impact on Chequerbent Embankment, and its setting, including through a Heritage Impact Statement.

New paragraph: Where land is to be removed from the Green Belt, national guidance seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

New paragraph: The allocation is identified as containing Mineral Safeguarding Areas for surface coal (99.8%); and brickclay (99.8%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 6: West of Wingates / M61 Junction 6

Picture 11.14 JPA 6 West of Wingates / M61 Junction 6

Policy (MMBo6); (AMBo4)

Development at this site will be required to:

1. Provide a location for around 440,000 sqm of employment industrial and warehousing floorspace, consisting of a mix of large-scale warehousing and advanced manufacturing;
2. Be in accordance with an agreed a comprehensive masterplan agreed by the local planning authority that shows phasing within the site, and which areas should or should not be developed, in accordance with policy JP-D1;
- ~~3. Ensure that good quality road access is provided, allowing a link from the A6 to Westhoughton;~~

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

- ~~4. Take advantage of the site's location near Junction 6 of the M61, whilst making sure that it has no significantly adverse affect on the motorway or other surrounding roads;~~
- ~~5. Provide financial contributions to the enhancement of the highway network, public transport and demand responsive services, cycling and walking or other improvements identified through a transport assessment;~~

New criterion: Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;

6. Ensure that the siting and scale of buildings and the landscape planting scheme minimises ~~the impact on long range views and that a high quality scheme of landscaping is implemented to minimise~~ the prominence of the development and its impact upon the surrounding landscape and views;
7. ~~Protect the Site of Biological Importance at Four Gates from development and incorporate very high levels of landscaping, including the retention of existing woodland, hedgerows and ponds where practicable, so as to minimise the visual impact on the wider landscape and mitigate against its environmental impacts.~~ Make provision for biodiversity, including taking appropriate account of Four Gates Site of Biological Importance, in accordance with policy JP-G9;

New criterion: Make provision for green and blue infrastructure including, where practicable, the retention and enhancement of existing woodland, hedgerows and ponds in accordance with policy JP-G2;

New criterion: Define and strengthen the boundaries of the Green Belt around the site, particularly at Westhoughton Golf Course, such that they will

comprise physical features that are readily recognisable and likely to be permanent;

New criterion: Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with policy JP-G2;

- ~~8. Take into account the effects of air and noise pollution from the major highways in and around the site;~~
9. Ensure that there is no undue adverse impact of light, ~~air and noise~~ pollution from the development and its associated operations; ~~and~~
10. Ensure that the integrity of the extensive network of existing rights of way network is protected; ~~and~~

New criterion: Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMBo7); (AMBo5)

- 11.100 The Wigan to Bolton growth corridor is an excellent location for logistics and industrial uses. Strong demand for employment uses in the M61 corridor is evidenced by the success of other developments, including Logistics North.
- 11.101 The Logistics North site at Over Hulton is currently experiencing considerable pressure for development and is almost completely committed. ~~and it is expected that it will be completely committed by the early 2020s.~~

- 11.102 Developing the land to the west of Wingates would allow a continuing supply of land for industry and warehousing ~~and distribution~~ in the M61 corridor and make a significant contribution to the economy of Bolton and the northern part of Greater Manchester. The size of the site and its location make it particularly appropriate for large scale distribution uses.
- 11.103 ~~Development would require a new road across the site and to the north to link with junction 6 of the M61. The development should allow for a road to be continued south through Bowlands Hey providing both a link from the site to the residential areas of Westhoughton and a western bypass for Westhoughton. Where practicable development should protect the alignment of a sustainable transport corridor running from Westhoughton, through Bowlands Hey, across the site to the A6 and to the north to link with the De Havilland Way corridor and junction 6 of the M61. This transport corridor should be focused on sustainable and active transport.~~ There would be the opportunity to provide bus routes to link to nearby stations at Westhoughton and Horwich Parkway. This would allow improved access for local residents to new employment opportunities on this site, and existing employment areas such as Middlebrook and Lostock.

New paragraph: The proposed Green Belt boundary consists of the A6 Chorley Road, the B5239 Dicconson Lane, the former railway line and Westhoughton golf course. At Westhoughton golf course opportunities should be taken to reinforce the new Green Belt boundary.

New paragraph: Where land is to be removed from the Green Belt, national guidance seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

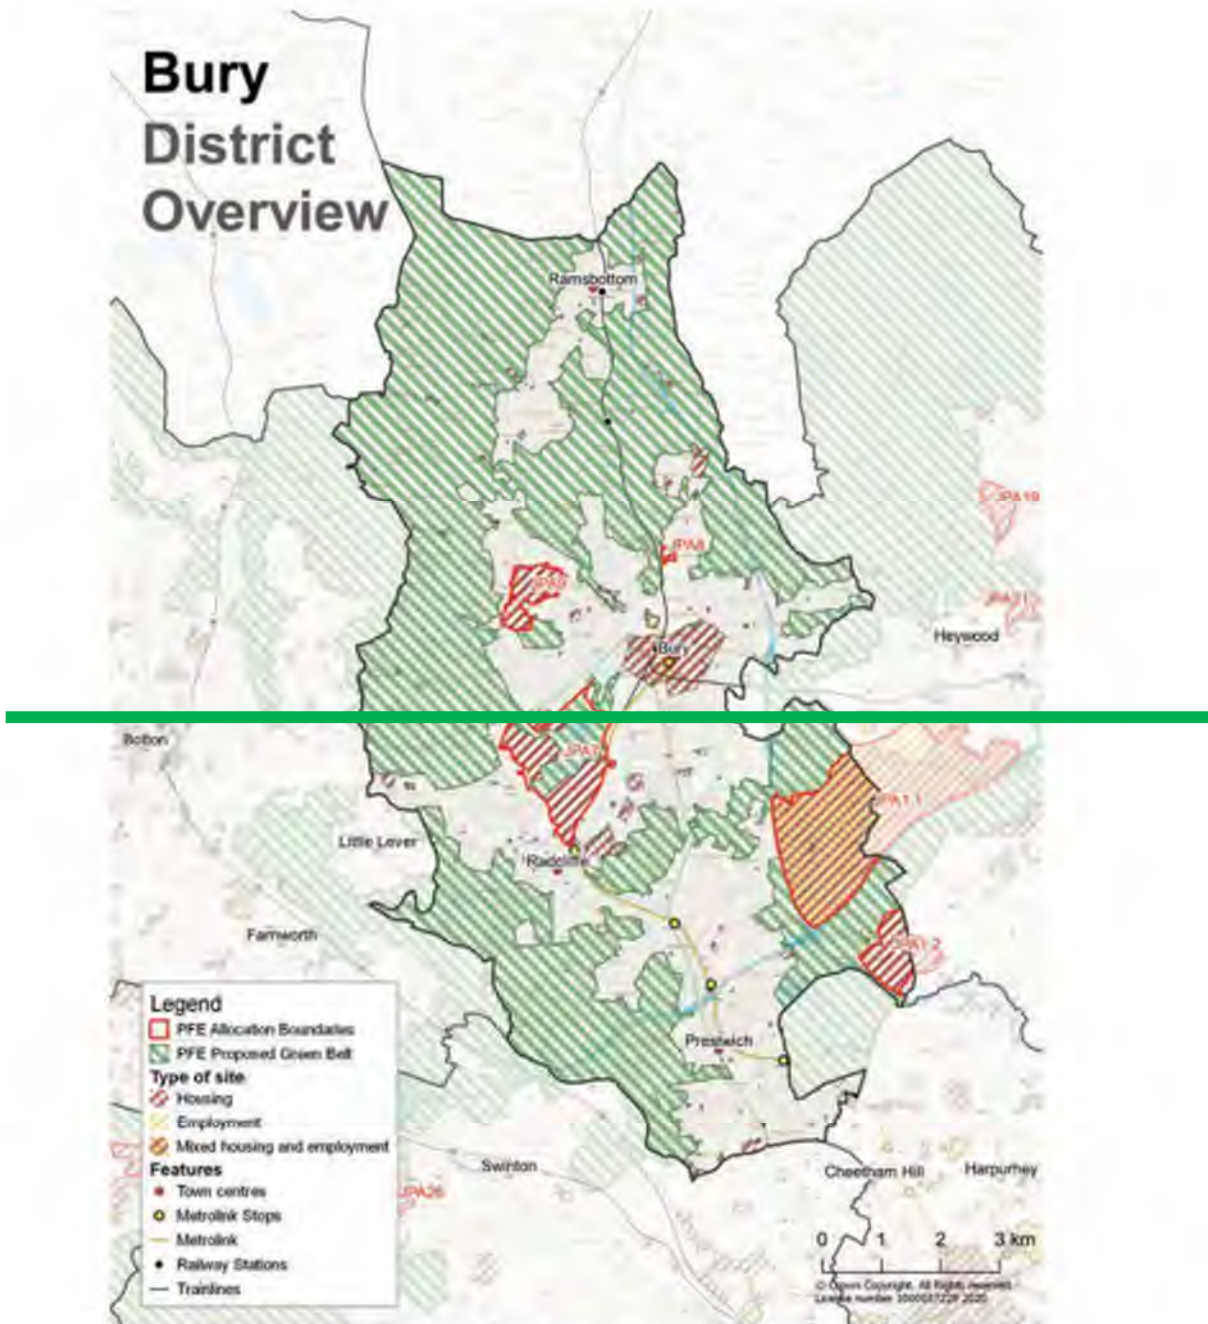

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

New paragraph: The allocation is identified as containing Mineral Safeguarding Areas for sandstone (11.5% of the site); surface coal (99.4%); and brickclay (99.4%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Strategic Allocations in Bury

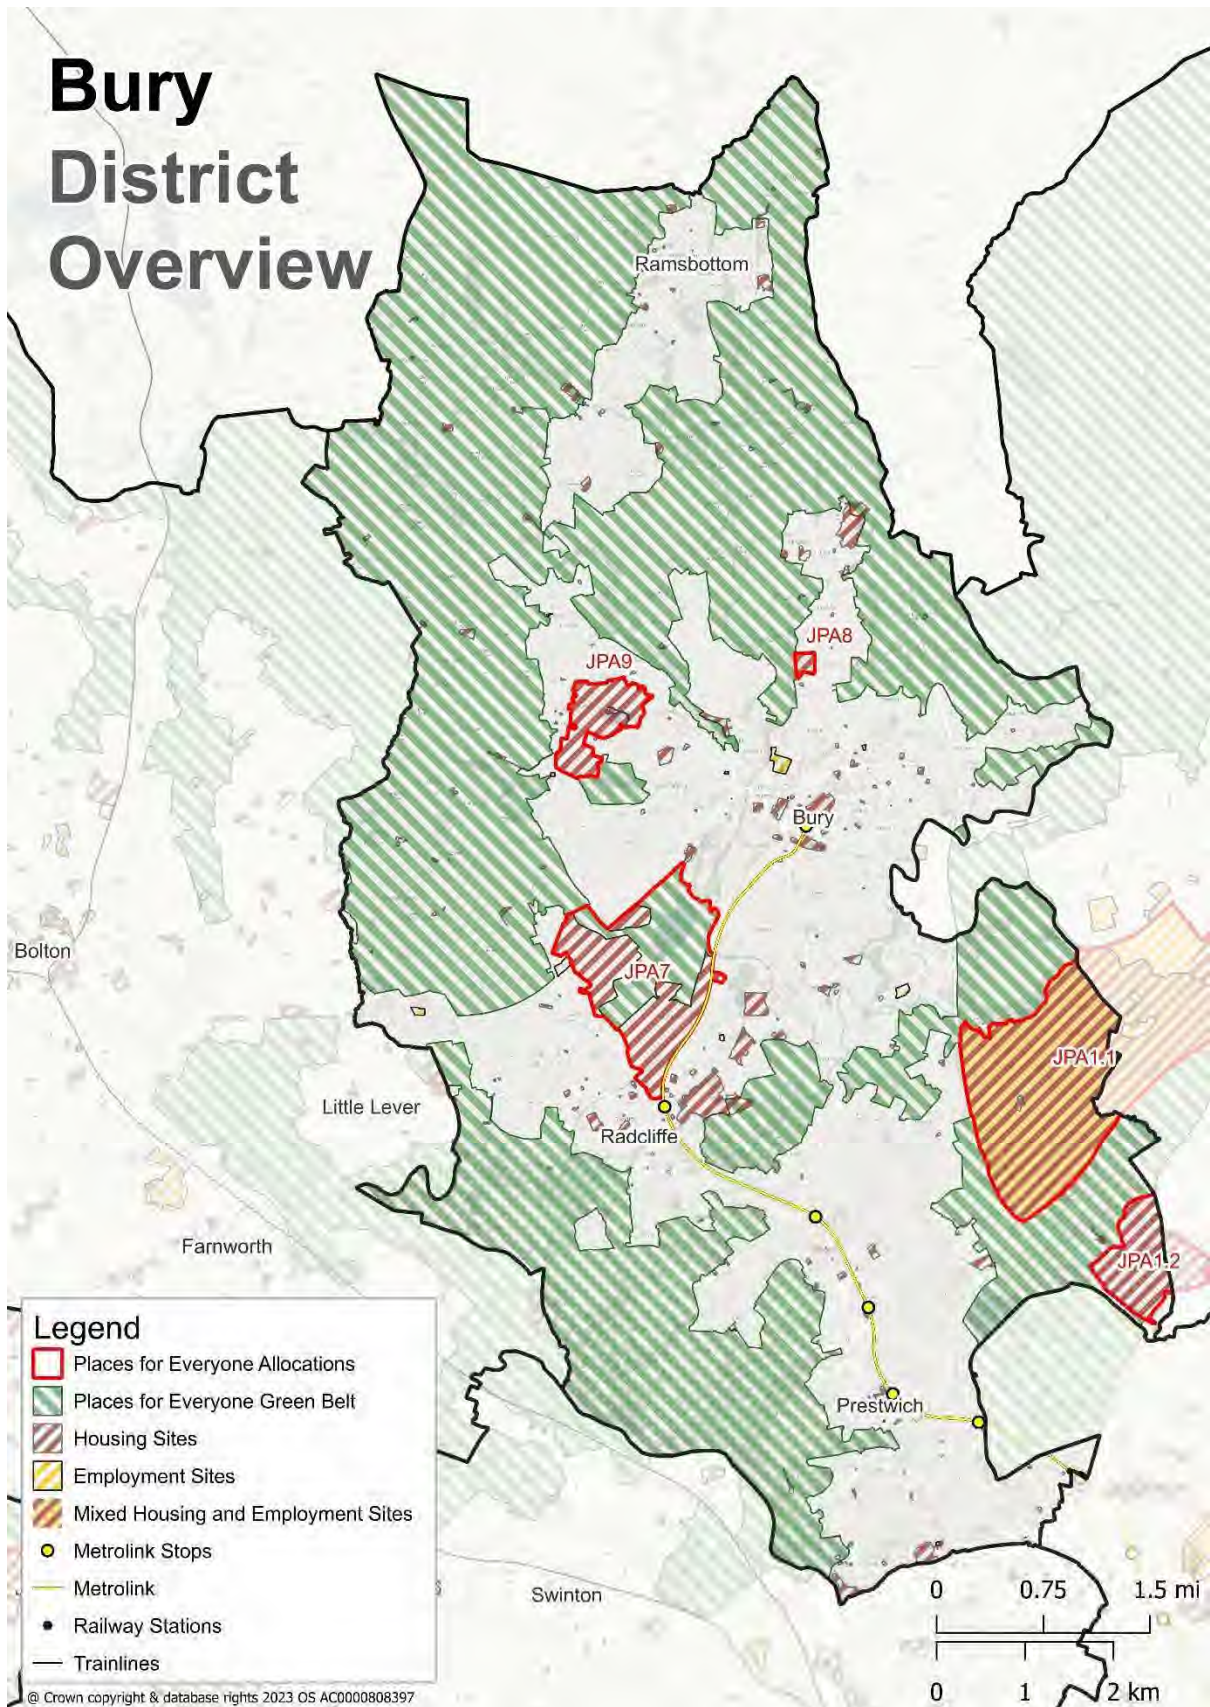

Picture 11.15 Bury District Overview (MMBu1)

Strategic Allocations in Bury

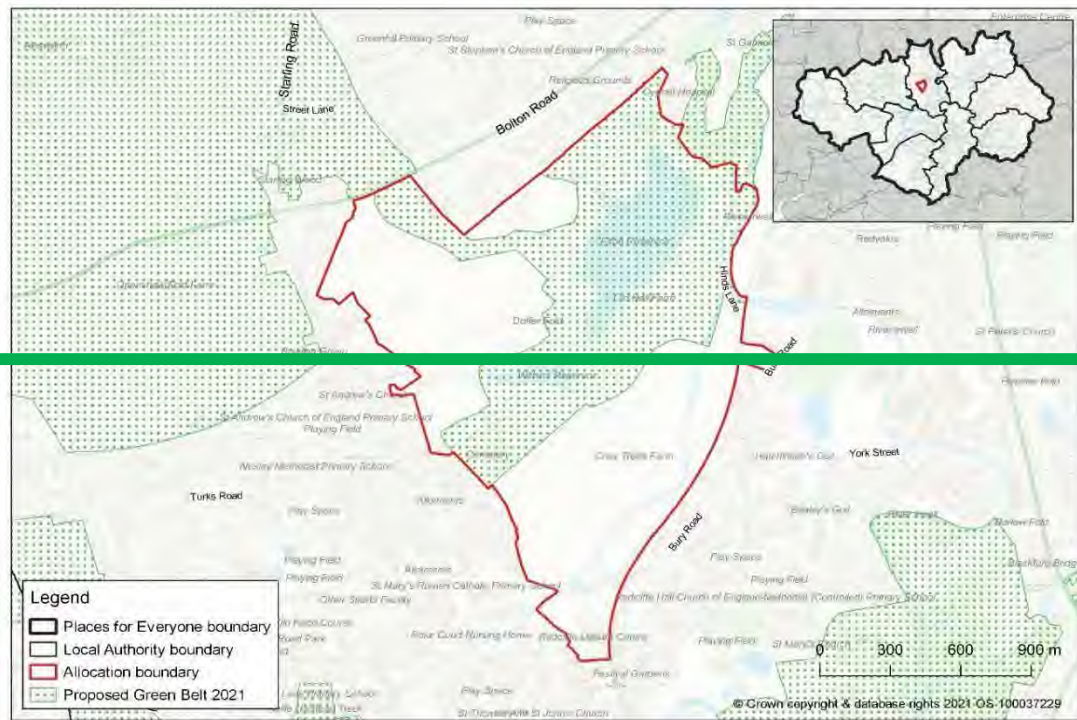

Picture 11.15 Bury District Overview

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

Policy JP Allocation 7 Elton Reservoir

Picture 11.16 JPA 7 Elton Reservoir (MMBu2)

Policy (MMBu3); (AMBu1)

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

Any proposals for this allocation must be in accordance with a comprehensive masterplan that has been ~~previously~~ approved by the LPA. It shall include a clear phasing strategy as part of an integrated approach to the delivery of infrastructure to support the scale of the whole development in line with Policy JP-D 1 'Infrastructure Implementation'. ~~This should include the delivery of highways infrastructure, surface water drainage, grey infrastructure including utilities provision, green and blue infrastructure, broadband, electric vehicle charging points, recreation provision and social infrastructure and ensure coordination between phases of development.~~

Development within this allocation will be required to:

1. Deliver a broad mix of around 3,500 homes to diversify the type of accommodation in the Bury and Radcliffe areas. This includes an appropriate mix of house types and sizes, accommodation for older people, plots for custom and self-build (subject to local demand as set out in the Council's self-build register) and higher densities of development in areas with good accessibility and with potential for improved public transport connectivity, particularly in the southern areas of the allocation. It is expected that around ~~4,900~~ 2,100 of these homes will be delivered during the plan period;
2. Make provision for key enabling infrastructure including:
 - i. A north-south strategic spine road connecting Bury and Bolton Road (A58) to Bury Road, Radcliffe that is designed to be suitable for buses, would not adversely impact on the operation of Metrolink services, incorporates provision for active travel and is in line with local design standards;
 - ii. A strategic connection from the spine road to Spring Lane, Radcliffe via the former Coney Green High School site that is designed to be suitable for buses, incorporates provision for active travel and is in line with local design standards;
 - iii. Other new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with Policy JP-C7;

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

~~off-site highway works where these are necessary to ensure acceptable traffic movement, including works in and around Radcliffe town centre and~~

- iv. Appropriate structural upgrades to Elton Reservoir, where required.

Residential development within the allocation will be controlled to ensure that the rate of housing delivery is coordinated with the implementation of the above infrastructure (or key elements of it); ~~limited until the above infrastructure (or key elements of it) is implemented as necessary mitigation~~

- ~~3. Make provision for major investment in public transport infrastructure to enable more sustainable transport choices, including a requirement for a new Metrolink stop and associated park and ride facilities in the Warth area;~~
- ~~4. Deliver a network of safe cycling and walking routes through the allocation linking neighbourhoods with key destinations, designed and constructed in accordance with national and GM standards and local planning policies;~~
5. Make provision for affordable housing in accordance with local planning policy requirements, equivalent to at least 25% of the dwellings on the site and across a range of housing types and sizes (with an affordable housing tenure split of 60% social or affordable rented and 40% affordable home ownership);
6. Make provision for two new two-form entry primary schools to meet ~~the~~ needs generated by the development of the prospective school-aged residents, in accordance with policy JP-P5;
7. Make provision for a new secondary school or, in the event that secondary school provision is delivered in an alternative way, make a financial contribution towards secondary school provision to meet ~~the~~ needs generated by the development of the prospective school-aged residents, in accordance with policy JP-P5;
8. Make provision for two new local centres in accessible locations which include a range of appropriate retail, health and community facilities required to serve purely local needs and ensure they are integrated with existing communities;

- ~~9. Make provision for other necessary infrastructure such as utilities, broadband and electric vehicle charging points in accordance with relevant joint plan or local planning policies;~~
10. Ensure the design and layout allows for effective integration with surrounding communities, including active travel links and connections to Inner Radcliffe, Radcliffe ~~T~~town ~~C~~centre, Radcliffe Metrolink ~~S~~station, local schools and Bury town centre;
11. Make provision for the replacement of existing recreation space at Warth Fold that is equivalent or better in terms of quantity and quality and in a sustainable location; Make provision for recreational facilities to meet the needs of the prospective residents in accordance with local planning policy requirements;
12. Provide a significant green corridor which remains within the Green Belt and provides a strategic amount of new, high quality and publicly accessible open space/parkland coupled with a network of multi-functional green and blue infrastructure within the allocation ~~to provide health benefits to residents as well as creating a visually attractive environment and providing linkages to the sites wider drainage strategy in accordance with Policy JP-G 2 'Green Infrastructure Network' and Policy JP-G 8 'Standards for Greener Places'. This should include including~~ the enhancement and the integration of the existing assets at Elton and Withins Reservoirs and the Manchester, Bolton and Bury Canal to create an extensive recreation, tourism and leisure asset;
- New criterion - Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt within the site in accordance with Policy JP-G2;
- New criterion - Define and/or strengthen the boundaries of the retained area of Green Belt within the site such that it will comprise physical features that are readily recognisable and likely to be permanent;
13. ~~Minimise impact on and provide net gains for biodiversity assets within the allocation~~ Make provision for biodiversity, including taking appropriate account of SBIs at Elton Reservoir; Manchester, Bolton and Bury Canal (East); Elton

Goyt; Withins Reservoir; Black Lane Marl Pits; and Radcliffe Wetlands in accordance with Policy JP-G9 'A Net Enhancement of Biodiversity and Geodiversity';

14. Ensure the allocation is safe from and mitigates for potential flood risk from all sources including the River Irwell, Elton and Withins Reservoir and surface water and does not increase the flood risk elsewhere. The delivery of the allocation should be guided by an appropriate flood risk and drainage strategy which ensures co-ordination between phases of development;
- ~~15. Ensure that sustainable drainage systems are fully incorporated into the development to manage surface water and control the rate of surface water run-off, discharging in accordance with the hierarchy of drainage options. Where possible, natural SuDS techniques should be utilised, prioritising the use of ponds, swales and other infrastructure which mimic natural drainage and be designed as multi-functional green infrastructure connecting to the wider green and blue infrastructure network in accordance with Policy JP-S 5 'Flood Risk and the Water Environment' and nationally recognised SuDS design standards. Proposals to discharge to the public sewer will need to submit clear evidence demonstrating why alternative options are not available;~~
- ~~16. Make appropriate provision for the long-term management and maintenance of areas of green infrastructure, biodiversity features, other areas of open space/parkland and sustainable drainage features; and~~
17. Take appropriate account of relevant heritage assets, Protect and, where appropriate, enhance heritage and archaeological assets and their setting, including the Old Hall Farmhouse Grade II listed building in accordance with Policy JP-P2; and and wider historic character of the surrounding area, in accordance with the findings and recommendations of the assessment of heritage assets that forms part of the Plan's evidence base and any updated assessment submitted as part of the planning application process.

New criterion - Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater

Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMBu4); (AMBu2)

- 11.104** The area around Elton Reservoir is of strategic significance, not only for Bury, but also in the Greater Manchester context given that it will bring forward one of the joint plan's largest contributions to future housing supply and provide a diverse mix of house types and affordable housing provision for the Bury and Radcliffe areas.
- 11.105** The allocation is almost entirely surrounded by the existing urban area and is well-connected to existing infrastructure although the delivery of around 3,500 new homes will require the provision of significant levels of new and improved highways, public transport and other supporting infrastructure. Although the allocation has the capacity to deliver a total of around 3,500 new homes, it is anticipated that around 2,100 ~~1,900~~ of these will be delivered within the plan period. Nevertheless, it is considered necessary to release the site in full at this stage given that the scale of the proposed development means that it will need to be supported by significant strategic infrastructure and this level of investment needs the certainty that the remaining development will still be able to come forward beyond the plan period.
- 11.106** Fundamental to the delivery of residential development in this area will be the provision of major highways infrastructure. This will include the need to incorporate a strategic north-south spine road through the allocation connecting Bury and Bolton Road (A58) to Bury Road, Radcliffe. This will provide an essential alternative to Bury Bridge for traffic travelling south towards Manchester from the west Bury area. The new road must not adversely impact on the operation of Metrolink services. Furthermore, in order to improve linkages to and assist in the physical and social regeneration of inner Radcliffe and Radcliffe town centre, there is a need to provide a significant spur road connecting the allocation to Spring Lane via the former Coney Green High School site. The new highways infrastructure

must be in place before significant amounts of housing are developed and this should be reflected in the Phasing Strategy.

- 11.107** Proposals for development of the allocation will be required to fully assess the impacts on traffic generation on existing highways and, where necessary, to incorporate or facilitate the delivery of the required improvements to other roads and junctions.
- 11.108** The Bury to Manchester Metrolink line runs along the eastern edge of this area and, in order to reduce reliance on the car, development within the allocation will be required to incorporate the provision of a new Metrolink stop and any associated park and ride facilities in the Warth area. Direct walking and cycling connections to the Metrolink stop will also be necessary.
- 11.109** New development and investment in this area will need to be fully integrated into the existing urban fabric and with surrounding neighbourhoods and communities. In doing so, any development will need to facilitate new pedestrian and cycle links through the development and into surrounding areas. This will include strong linkages to Inner Radcliffe and Radcliffe town centre, Radcliffe Metrolink and local schools which, in addition to the spur road, will further help in supporting on-going physical and social regeneration efforts in this area.
- 11.110** Development of this scale will significantly increase demands for education provision and, as a result, the development will need to include the provision of new facilities for primary and secondary education. It will also generate a need to make provision for appropriate local centres that are more accessible to and meet the day-to-day needs of surrounding communities.
- 11.111** A significant amount of the allocation is to remain as Green Belt. This provides the opportunity to significantly enhance the green infrastructure and biodiversity value of the allocation, enhance and incorporate existing assets such as the priority habitats and the water features of Elton and Withins Reservoirs and the Manchester and Bolton and Bury Canal and improve access to open space for the local community. The development will need to

have regard to existing features of ecological and wildlife interest by minimising impacts on and providing net gains for biodiversity.

New paragraph - Where land is to be removed from the Green Belt, national guidance seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020). A significant corridor of land through this site is retained as Green Belt and this should be the focus of compensatory improvements.

New paragraph - There is a need to define and/or strengthen the boundaries of the Green Belt around the whole of the site utilising existing landscape features and incorporating high quality boundary treatment so as to provide an attractive defensible Green Belt boundary that is readily recognisable and likely to be permanent.

- 11.112** Delivery of the allocation should be guided by an appropriate flood risk and drainage strategy [in accordance with Policy JP-S5](#) which ensures co-ordination between phases of development. Measures such as rainwater recycling, green roofs, water butts and permeable driveway surfaces should be considered to mitigate the impact of potential flood risk both within and beyond the site boundaries. As a green and blue infrastructure network will provide more sustainable options discharge surface water, only foul flows should connect with the public sewer.
- 11.113** Structural upgrades may be required to Elton Reservoir to reflect any changes to the categorisation of the reservoir as a result of new residential development being located downstream.
- 11.114** There is one Grade II Listed [Building](#) within the allocation – Old Hall Farmhouse and there are a number of locally listed buildings and structures throughout the allocation. Any development will be required to respect the setting of the Farmhouse and capitalise on opportunities to draw on the

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

contribution that the Farmhouse makes to the character of the area. The completion of a Heritage Impact Assessment will be required.

New paragraph - The allocation is identified as containing Mineral Safeguarding Areas for sandstone (15.5% of the site); sand and gravel (40.2%); surface coal (96.2%); and brickclay (96.2%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 8: Seedfield

Picture 11.17 JPA 8 Seedfield

Policy (MMBu5)

Development in this allocation will be required to:

1. Deliver a broad mix of around 140 homes to diversify the type of accommodation in the Seedfield area;
2. Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with Policy JP-C7; Make necessary improvements to local highway infrastructure to facilitate appropriate access to the allocation and incorporate enhancements to public transport, pedestrian and cycle routes in the area;
3. Make provision for affordable housing in accordance with local planning policy requirements, equivalent to at least 25% of the dwellings on the site and

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

across a range of housing types and sizes (with an affordable housing tenure split of around 60% social or affordable rented and 40% affordable home ownership);

- ~~4. Make provision for other necessary infrastructure such as utilities, broadband and electric vehicle charging points in accordance with relevant joint plan or local planning policies;~~
5. Ensure the design and layout allows for effective integration with surrounding communities, including active travel links to Burrs Country Park and employment opportunities in Bury Town Centre;
6. Retain and enhance existing recreation facilities and/or replace, where necessary, make provision for replacement facilities that are equivalent or better in terms of quantity and quality and in a suitable location; ~~existing recreation facilities and make provision for new recreation facilities to meet the needs of the prospective residents in accordance with local planning policy requirements~~
7. Retain and enhance the wildlife corridor and green infrastructure elements to the west and south of the allocation and introduce appropriate mitigation measures ~~to provide health benefits to residents as well as creating a visually attractive environment~~ in accordance with Policy JP-G2 'Green Infrastructure Network' ~~and Policy JP-G 8 'Standards for Greener Places';~~
- ~~8. Minimise impacts on and provide net gains for biodiversity assets within the allocation in accordance with Policy JP-G 9 'A Net Enhancement of Biodiversity and Geodiversity';~~
- ~~9. Ensure the allocation is safe from and mitigates for, potential flood risk from all sources including surface water, sewer flooding and groundwater. The delivery of the allocation should be guided by an appropriate flood risk and drainage strategy which ensures co-ordination between phases of development;~~
- ~~10. Ensure that sustainable drainage systems are fully incorporated into the development to manage surface water and control the rate of surface water~~

~~run-off, discharging in accordance with the hierarchy of drainage options. Where possible, natural SuDS techniques should be utilised, prioritising the use of ponds, swales and other infrastructure which mimic natural drainage and be designed as multi-functional green infrastructure connecting to the wider green and blue infrastructure network in accordance with Policy JP-S 5 'Flood Risk and the Water Environment' and nationally recognised SuDS design standards. Proposals to discharge to the public sewer will need to submit clear evidence demonstrating why alternative options are not available; and~~

- ~~11. Make appropriate provision for the long-term management and maintenance of areas of green infrastructure, biodiversity features and sustainable drainage features.~~

~~New criterion - Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with Policy JP-G2; and~~

~~New criterion - Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).~~

Reasoned Justification (MMBu6); (AMBu3)

- 11.115** The allocation is well-connected to the existing urban area and is less than 2 kilometres from Bury town centre. It provides an opportunity to deliver a diverse mix of house types and affordable housing provision for the Seedfield area.
- 11.116** Around 50% of the allocation is previously-developed and a large part of the remaining land is used as playing fields. In addition to making provision for the recreational needs of the prospective residents of the new development, there will also be a requirement to provide replacement sports pitch provision ~~in the event that the to-off-set the loss of the~~ existing playing fields within the allocation ~~are to be lost to development~~. It ~~will be~~ is important that the

replacement provision ~~is should be accessible, be of an equivalent or better quantity and quality and~~ laid out and usable prior to the commencement of any development on the existing playing fields within the Seedfield allocation.

New paragraph - Where land is to be removed from the Green Belt, national guidance seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

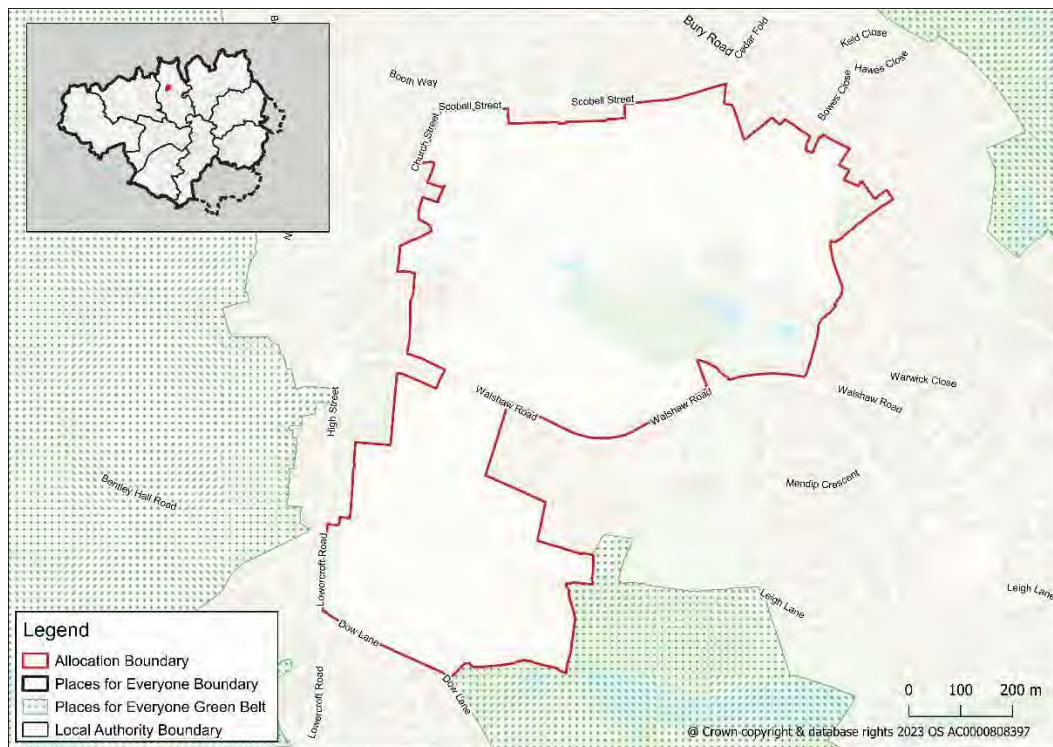

- 11.117** The attractive setting of the development will be further strengthened by the provision of improved east/west pedestrian and cycle linkages, particularly to and from the expanding leisure attractions at Burrs Country Park.
- 11.118** Delivery of the allocation should be guided by an appropriate flood risk and drainage strategy in accordance with Policy JP-S5. Measures such as rainwater recycling, green roofs, water butts and permeable driveway surfaces should be considered to mitigate the impact of potential flood risk both within and beyond the site boundaries. As a green and blue infrastructure network will provide more sustainable options discharge surface water, only foul flows should connect with the public sewer.

New paragraph - The allocation is identified as containing Mineral Safeguarding Areas for sandstone (5.4% of the site); sand and gravel (36.4%); surface coal (64%); and brickclay (64%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

Policy JP Allocation 9: Walshaw

Picture 11.18 JPA 9 Walshaw

**Policy (MMBu7)**

Any proposals for this allocation must be in accordance with a comprehensive masterplan that has been **previously** approved by the LPA. It shall include a clear phasing strategy as part of an integrated approach to the delivery of infrastructure to support the scale of the whole development in line with Policy JP-D 1 'Infrastructure Implementation'. ~~This should include the delivery of highways infrastructure, surface water drainage, grey infrastructure including utilities provision, green and blue infrastructure, broadband, electric vehicle charging points, recreation provision and social infrastructure and ensure coordination between phases of development.~~

Development in this allocation will be required to:

1. Deliver a broad mix of around 1,250 homes to diversify the type of accommodation in the Walshaw area. This includes an appropriate mix of house types and sizes, accommodation for older people, and provision of plots for custom and self-build housing (subject to local demand as set out in the Council's self-build register);

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

2. Make provision of a new strategic through road to enable an alternative to Church Street, Bank Street and High Street that is designed to be suitable for buses and incorporates active travel and is in line with local design standards; ~~Make provision for significant new and improved highways infrastructure to enable the proposed level of development to be accommodated, including:~~
 - i. ~~The provision of a new strategic through road to enable an alternative to Church Street, Bank Street and High Street that is designed to be suitable for buses and incorporates active travel and is in line with local design standards;~~
 - ii. ~~Off-site highway works where these are necessary to ensure acceptable traffic movement from the allocation, including appropriate linkages to the Elton Reservoir Link Road;~~
3. Make provision for a network of safe cycling and walking routes through the allocation linking neighbourhoods with key destinations, incorporating Leigh Lane and Dow Lane; ~~Make provision for major investment in public transport in order to encourage more sustainable transport choices (including potential upgrade of existing bus services or a new bus service linking Tottington – Walshaw – Elton – proposed new Metrolink stop at Warth – Bury/Radcliffe);~~
4. Make provision for other new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with Policy JP-C7; ~~Deliver a network of safe cycling and walking routes through the allocation linking neighbourhoods with key destinations, incorporating Leigh Lane and Dow Lane and in accordance with national and GM standards of design and construction and local planning policy requirements;~~
5. Make provision for affordable housing in accordance with local planning policy requirements, equivalent to at least 25% of the dwellings proposed on the site and across a range of housing types and sizes (with an affordable housing tenure split of 60% social or affordable rented and 40% affordable home ownership);

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

6. Make provision for a new one-form entry primary school ~~within the allocation and make financial contributions for off-site additional secondary school provision~~ to ~~accommodate additional demand on school places~~ meet needs generated by the development in accordance with Policy JP-P5;
- ~~7. Make a financial contribution towards off-site secondary school provision to meet the needs generated by the development;~~
8. Make provision for a new local centre in an accessible location which includes a range of appropriate retail, health and community facilities required to serve purely local needs and ensure that it is integrated within existing communities;
- ~~9. Make provision for other necessary infrastructure such as utilities, broadband and electric vehicle charging points in accordance with relevant joint plan or local planning policies;~~
10. Ensure the design and layout allows for effective integration with surrounding communities, including active travel links and connections to the recreation areas at Dow Lane, Elton Vale, Whitehead Lodges as well as Walshaw Village and Bury Town Centre;
11. Make provision for new, high quality, publicly accessible, multifunctional green and blue infrastructure within the allocation ~~to provide health benefits to residents to create a visually attractive environment and provide linkages to the sites wider drainage strategy in accordance with Policy JP-G 2 'Green Infrastructure Network' and Policy JP-G 8 'Standards for Greener Places'.~~ This should include including the integration and enhancement of the existing green infrastructure corridors and assets at Walshaw and Elton Brooks;

New criterion - Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with Policy JP-G2;

New criterion - Define and/or strengthen the boundaries of the Green Belt to the south-east of the site such that it will comprise physical features that are readily recognisable and likely to be permanent;;

- ~~12. Minimise impacts on and provide net gains for biodiversity assets within the allocation in accordance with Policy JP-G 9 'A Net Enhancement of Biodiversity and Geodiversity'; It is expected that the biodiversity gain provision will be focused on the Walshaw and Elton Brook corridors and integrated with other green infrastructure functions such as recreation and surface water management;~~
- ~~13. Ensure the allocation is safe from and mitigates for potential flood risk from all sources including surface water, sewer flooding and groundwater. The delivery of the allocation should be guided by an appropriate flood risk and drainage strategy which ensures co-ordination between phases of development;~~
- ~~14. Ensure that sustainable drainage systems are fully incorporated into the development to manage surface water and control the rate of surface water run-off, discharging in accordance with the hierarchy of drainage options. Where possible, natural SuDS techniques should be utilised, prioritising the use of ponds, swales and other infrastructure which mimic natural drainage and be designed as multi-functional green infrastructure connecting to the wider green and blue infrastructure network in accordance with Policy JP-S 5 'Flood Risk and the Water Environment' and nationally recognised SuDS design standards. Proposals to discharge to the public sewer will need to submit clear evidence demonstrating why alternative options are not available;~~
- ~~15. Make appropriate provision for the long term management and maintenance of areas of green infrastructure, biodiversity features, other areas of open space and sustainable drainage features; and~~
16. Take appropriate account of relevant heritage assets, Protect and, where appropriate, enhance heritage assets and their setting, including the Christ Church Grade II* Ilisted bBuilding, in accordance with Policy JP-P2; and the findings and recommendations of the assessment of heritage assets that forms part of the Plan's evidence base and any updated assessment submitted as part of the planning application process.

New criterion - Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMBu8); (AMBu4)

- 11.119** This is an extensive area of land occupying a sustainable and well-connected location set entirely within the existing urban area. The land is loosely bounded by the urban areas of Tottington to the north, Woolfold and Elton to the east Lowercroft to the south and Walshaw to the west.
- 11.120** The allocation has the potential to deliver around 1,250 houses, providing a diverse mix of house types and affordable housing provision for the local area.
- 11.121** This number of new homes will require significant improvements to the local highway network to accommodate increased traffic generation. This will require the provision of a new route through the allocation that provides an alternative to the use of the existing highway network through Walshaw and may require a contribution to the proposed strategic route through the Elton Reservoir allocation which will also allow traffic from the Walshaw area to travel south without needing to travel through Bury town centre. The development will need to facilitate improvements to public transport into and around the allocation in order to allow for more sustainable transport choices.
- 11.122** The scale of the development will create additional demands for education and the provision of a new one-form entry primary school and contributions to off-site secondary school provision will be required in order to accommodate needs that cannot be met through existing facilities.
- 11.123** The development will generate the need to make provision for a new accessible local centre providing facilities such as shops, health facilities and community facilities.

- 11.124** Existing sport and recreational facilities at Dow Lane and Elton Vale Sports Club are situated to the south of the allocation and the development should incorporate a green corridor to provide access from the allocation to these existing recreational assets.
- 11.125** The development will need to have regard to any existing ecological and wildlife features including Walshaw and Elton Brooks which run through the northern and southern parts of the allocation by minimising impacts on and providing net gains for biodiversity. The brooks should provide the focal point for the creation of a good quality green infrastructure network providing publicly accessible open spaces and recreational opportunities for residents in the area. Such a network should seek to maximise the value of existing features and areas of nature conservation value and offer opportunities for active travel, particularly between homes, schools, shops, places of work and recreation. Connectivity from west to east is already well established although there is potential for improved pedestrian and cycle routes linking Tottington in the north to Elton and Starling in the south. There are existing reservoirs within the allocation and other opportunities for blue infrastructure may exist to enhance visual amenity, provide sustainable drainage and widen local biodiversity.

New paragraph - Where land is to be removed from the Green Belt, national guidance seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

New paragraph - There is a need to define and/or strengthen the boundaries of the Green Belt around the whole of the site utilising existing landscape features and incorporating high quality boundary treatment so as to provide an attractive defensible Green Belt boundary that is readily recognisable and likely to be permanent.

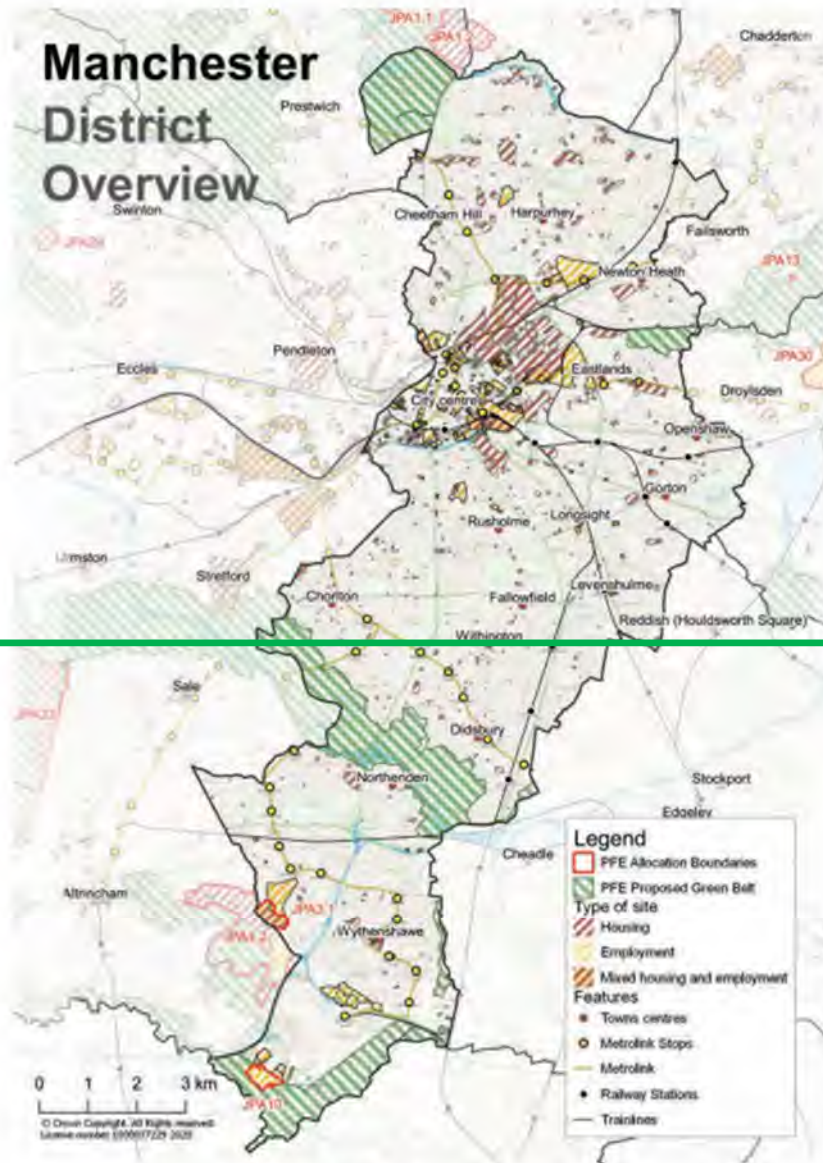

- 11.126** To reduce the risk of flooding, the development should minimise the risk associated with inadequate sewer capacity and minimise and control the rate of surface water run-off through an appropriate drainage strategy [in accordance with Policy JP-S5](#) and, where possible, safeguard land within the allocation for flood storage. Measures such as rainwater recycling, green roofs, water butts and permeable driveway surfaces should be considered to mitigate the impact of potential flood risk both within and beyond the site boundaries. As a green and blue infrastructure network will provide more sustainable options discharge surface water, only foul flows should connect with the public sewer.
- 11.127** Christ Church in Walshaw is a Grade II* Listed Building sitting adjacent to the allocation. Any development will, therefore, be required to respect the setting of the church and capitalise on opportunities to draw on the contribution that the church makes to the character of the area. The completion of a Heritage Impact Assessment will be required.

[New paragraph - The allocation is identified as containing Mineral Safeguarding Areas for sandstone \(6.3% of the site\); sand and gravel \(9.8%\); surface coal \(94.3%\); and brickclay \(94.3%\) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan \(or any subsequent minerals plan\) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.](#)

Strategic Allocations in Manchester

Strategic Allocations in Manchester

Picture 11.19 Manchester District Overview

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

Policy JP Allocation 10: Global Logistics (MMM2)

Picture 11.20 JPA 10 Global Logistics

Development at this site will be required to:

1. Support growth of the airport to 2030 and compliment the development of the wider Global Logistics;
2. Deliver around 25,000 sqm B2/B8 employment. Suitable uses for the site will be cargo facilities but could also include airport operational facilities where it would have no greater adverse impact than would occur for cargo facilities;
3. Minimise any adverse impact on national and locally designated assets of conservation, ecological and landscape value. In particular, development should avoid the Cotterill Clough SSSI, nearby SBIs and ancient woodland, and any existing landscape mitigation affected by development must be appropriately re-provided. Where it is not possible to avoid harm, mitigation measures to compensate for any adverse impact will be necessary and should be agreed with the Council, informed by an up to date environmental assessment. Suitable GMCONSULT.ORG 274 Places for Everyone buffers

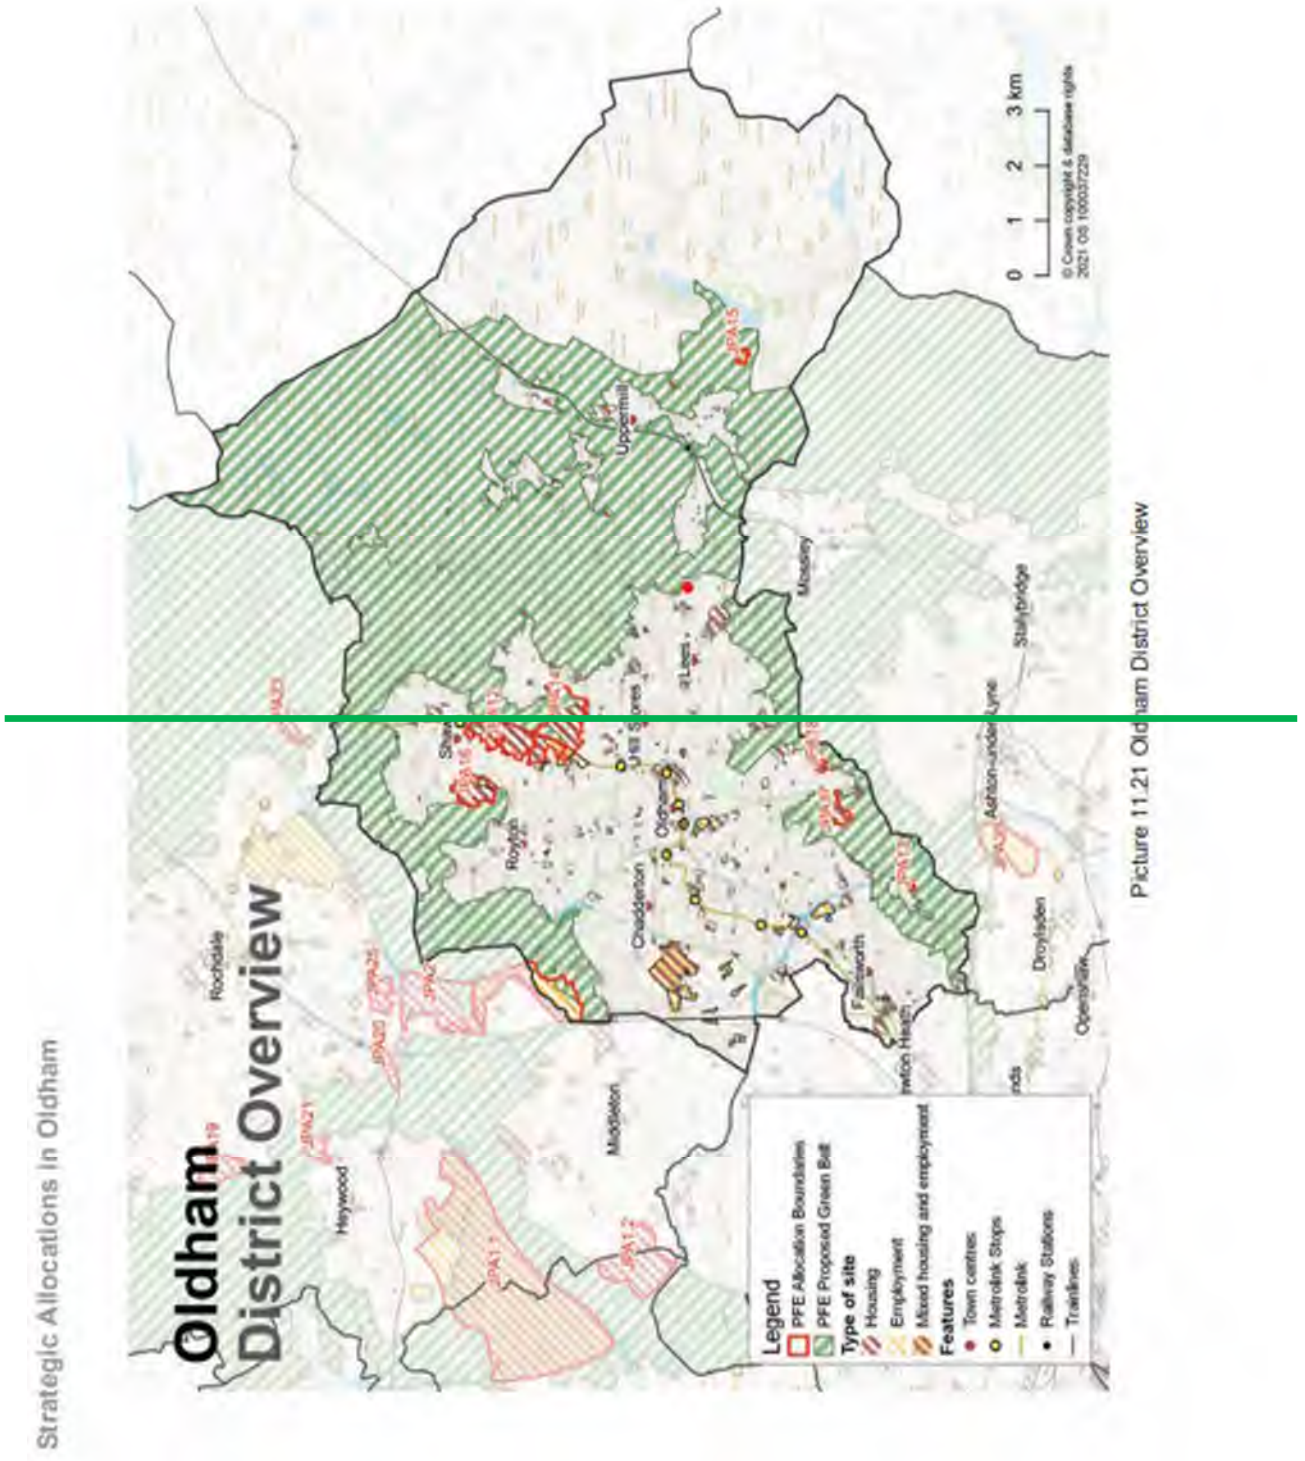

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

- ~~should be maintained between development and biodiversity assets with potential enhancement and provision for green infrastructure;~~
- ~~4. Improve access to training and job opportunities, particularly for people in Wythenshawe;~~
 - ~~5. Include surface access and car parking arrangements which encourage the use of public transport, walking and cycling, and satisfactorily manage impacts on the highway network (including addressing requirements around Public Rights of Way);~~
 - ~~6. Make necessary improvements to local highway infrastructure to mitigate for the impact of the development, facilitate appropriate access to the site and incorporate enhancements to public transport, direct and high quality pedestrian and cycle routes in the area; and~~
 - ~~7. Include measures to promote sustainable travel including production of a Travel Plan. Travel Plans could include measures such as public transport vouchers and access to car clubs.~~

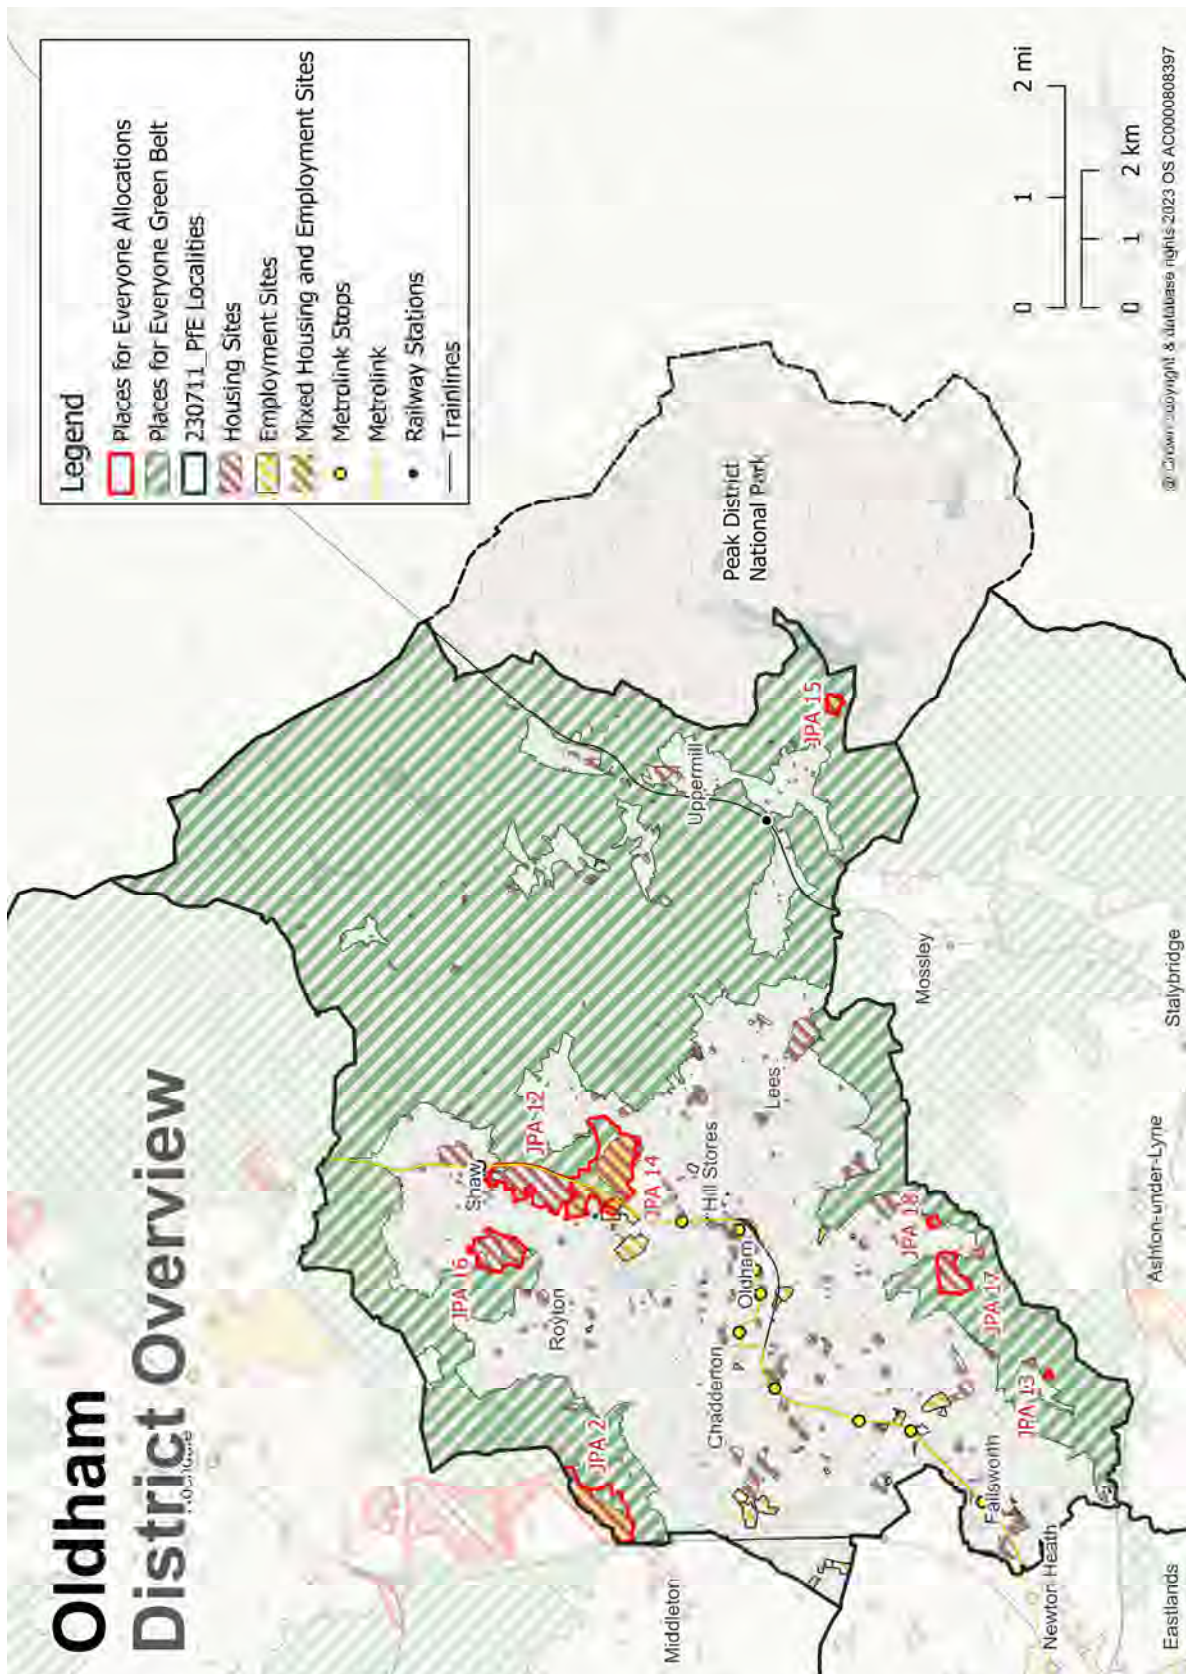

~~11.128 The opportunity that Manchester Airport and the associated Enterprise Zone provides for the growth of the wider economy is significant. By attracting investment from globally mobile industries to an exemplar development at Global Logistics, significant economic growth for the north of England can be captured. This is a singular location close to a major international airport, and with improvements to local transport infrastructure, it can play its full part in maximising future economic growth. The area's location within open countryside, adjoining, and including part of a Site of Biological Interest (SBI), and adjoining a SSSI, demands a high quality and sensitive design, which will complement, conserve and enhance the natural environment. Proposals within the site will need to take account of the existing landscape buffer provided as part of the existing World Logistics Hub.~~

Strategic Allocations in Oldham

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

Policy JP Allocation 12: Beal Valley

Picture 11.22 JPA 12 Beal Valley

Policy (MMO2); (AMO1)

Development on this site will be required to:

1. Be in accordance with a comprehensive masterplan and design code as agreed by the local planning authority. This will include the need for an infrastructure phasing and delivery strategy in accordance with policy JP-D1;
2. Deliver around 480 homes, providing a range of dwelling types and sizes to deliver inclusive neighbourhoods and meet local needs, including the delivery of high-quality family housing and affordable homes in accordance with relevant local plan requirements;
3. Provide for affordable homes in line with local planning policy requirements;

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

4. Provide for appropriate access points to and from the site in liaison with the local highway authority; The main point of access will be from Oldham Road (directly into the allocation) linking to a new internal spine road that will connect the site to the Broadbent Moss allocation to the south, and be delivered as part of the comprehensive development of both sites;
5. Safeguard a an accessible route for walking and cycling connections from the proposed spine road through the northern part of the site, as part of any development, to offer the potential to link the site to Shaw ~~Town~~ Centre and further improve connectivity to the local area and beyond;
6. ~~Take account of and deliver any other highway improvements, that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highway improvements, high-quality walking and cycling infrastructure and public transport facilities;~~
7. ~~Contribute~~ Provide a proportionate and evidence-based contribution to the delivery of the new Metrolink stop and new park and ride facility as part of the neighbouring Broadbent Moss allocation, which in part will help to serve and improve the accessibility and connectivity of both allocations;
8. Enhance pedestrian and cycling links to and from the site to the Shaw Metrolink stop, the new Metrolink stop proposed as part of the Broadbent Moss ~~strategie~~ allocation, the bus network and surrounding area, as part of the multi-functional green-infrastructure network to encourage sustainable modes of travel and maximise the sites accessibility, developing on the existing recreation routes and public rights of way network. ~~This should be delivered as part of a multi-functional green infrastructure network (incorporating the retention and enhancement of existing public rights of way), with high-quality landscaping within the site and around the main development areas, to~~

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

~~minimise the visual impact on the wider landscape, mitigate its environmental impacts, enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation;~~

New criterion: Make provision for other new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;

9. ~~Have regard to the recommendations of the Greater Manchester Landscape Character and Sensitivity Assessment for the Pennines Foothills South / West Pennines;~~ Reflect and respond to the special qualities and sensitivities of the key characteristics of the Pennine Foothills South / West Pennines landscape character type in accordance with policy JP-G1;
10. ~~Have regard to the findings of the Stage 2 Greater Manchester Green Belt Study, including mitigation measures to mitigate harm to the Green Belt;~~ Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with policy JP-G2;
11. Ensure the protection from development of a large green wedge, between the main development area and the Metrolink line to the east and its enhancement as part of the multi-functional green infrastructure network, ~~and contribute towards green infrastructure enhancement opportunities in the surrounding Green Belt as identified in the Identification of Opportunities to Enhance the Beneficial Use of the Green Belt assessment;~~
12. Make provision for Retain and enhance the hierarchy of biodiversity, including taking appropriate account of within the site, notably the existing Shawside SBI, including areas of areas of priority habitats, including Deciduous Woodland and Lowland Fens, and the Twingates local nature reserve, in accordance with policy JP-G9; following the

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

~~mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating them as part of multi-functional green infrastructure network which should ensure the requirements of wading bird populations are met;~~

13. ~~Provide further surveys on phase 1 habitats, amphibians, badgers, water voles and bats to inform any planning application. Regard should be also had to the river course and broadleaved woodland;~~

New criterion: Mitigate the recreation disturbance impacts on the South Pennine Moors SAC/SPAs with reference to policy JP-G5, criterion 7 (c);

14. ~~Protect and enhance the habitats and corridor along the River Beal to improve the existing water quality and seek to achieve 'good status' as proposed under the EU Water Framework Directive;~~
15. ~~Provide for new and/or the improvement of existing open space, sport and recreation facilities, including the expansion and/or improvement of existing facilities at Heyside Cricket Club, commensurate with the demand generated in accordance with relevant local planning policy requirements; This includes the expansion of, and improvement to existing, facilities at Heyside Cricket Club;~~
16. Make provision for onsite, and/or financial contributions towards ~~Contribute to~~ offsite, additional primary and/or secondary school provision places to meet needs generated by the development, the increased demand that will be placed on existing primary and secondary school provision within the area in accordance with policy JP-P5 and subject to the requirements of the agreed masterplan for the allocation; ~~either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority;~~
17. ~~Contribute to appropriate health and community facilities to meet the increased demand that will be placed on existing provision;~~
18. ~~Be informed by the findings and recommendations of the Historic Environment Assessment (2020) in the Plan's evidence base and any~~

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

~~updated Heritage Impact Assessment submitted as part of the planning application process. An up-to-date archaeological desk-based assessment to determine if any future evaluation and mitigation will be needed; Take appropriate account of relevant heritage assets, and their settings, including the listed buildings of Birshaw House and New Bank, in accordance with policy JP-P2;~~

19. ~~Be informed by an appropriate flood risk assessment feeding into a comprehensive drainage strategy for the whole site, which includes a full investigation of the surface water hierarchy. The strategy should include details of full surface water management throughout the site as part of the proposed green and blue infrastructure. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems, integrated as part of the multifunctional green infrastructure network and delivered in line with the GM Level 1 Strategic Flood Risk Assessment (SFRA) advice. Opportunities to use natural flood management and highway SUD's features should be explored;~~
20. Include provision for a wetland catchment area, in liaison with the Environment Agency, the Lead Local Flood Authority and Greater Manchester Ecology Unit, to the south east of the site within the Flood Zone 3 area, to provide net gains in flood storage for the wider catchment and / or actively reduce flood risk impacts downstream through additional storage, integrating it with the wider multi-functional green infrastructure network and incorporating sustainable drainage infrastructure;
21. Have regard to the Groundwater Source Protection Zone in the design of the development to ensure there are no adverse impacts to groundwater resources or groundwater quality and to ensure compliance with the Environment Agency's approach to groundwater protection and any relevant position statements; **and**

22. Incorporate necessary remediation measures in areas affected by contamination and previously worked for landfill purposes; and

New criterion: Consider the extraction of any viable mineral resources within Minerals Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMO3); (AMO2)

11.129 The site is currently designated as Other Protected Open Land (OPOL) and Green Belt in the Oldham Local Plan. There are also two brownfield sites in the northern part of the allocation; these are included within the red line to ensure they form part of the comprehensive development of the site. They are not included in the residential capacity set out in the policy, as they are already identified as part of the potential housing land supply, as set out in Oldham's current Strategic Housing Land Availability Assessment (SHLAA).

11.130 Whilst a significant proportion of Oldham's housing land will come from the urban area through maximising the use of brownfield land, it is considered that the site will help to diversify the existing housing stock in the area and boroughwide. The site has the potential to meet local housing need in the immediate vicinity and across the borough and contribute to, and enhance, the housing mix within the area through adding to the type and range of housing available.

11.131 Affordable housing will be provided as part of any development of the site, including a range of tenures, house sizes and types, in order to meet the needs of residents as appropriate. Affordable housing will be delivered in line accordance with relevant local ~~planning policy requirements~~. A Housing Strategy and Local Housing Needs Assessment has been prepared by Oldham Council which will inform the Local Plan affordable housing policy.

11.132 The site is in a sustainable and accessible location, on the edge of a large area of open land and in a strong housing market which offers the potential to provide a range of high-quality housing in an attractive setting. It is located near to existing residential communities, including Shaw ~~Town~~ Centre, and has the potential for greater connectivity through the proposed new Metrolink stop, which would serve both this site and the Broadbent Moss site, providing increased access to Rochdale Town Centre, Oldham Town Centre, Manchester City Centre and beyond.

11.133 The main points of access will be from Oldham Road (directly into the allocation) and from Meek Street or Moss Lane Ripponden Road (to the south and east (as part of the Broadbent Moss allocation), ~~and Oldham Road to the north of New Bank House~~. These will link to the proposed spine road running through the site, providing the opportunity to improve connectivity of the site ~~to Shaw Town Centre, Broadbent Moss to the south and~~ to the wider area. ~~Cop Road/Bullcote Lane (east of the spine road) will join where the two intersect and the remaining section of Bullcote Lane, (west of the spine road), will be downgraded accordingly, providing an emergency access, access to existing properties and businesses, and for pedestrian and cyclists. A network of accessible walking and cycling routes will be provided through the site and a route through~~ The route of the section in the northern part of the site is to be safeguarded ~~and offers the opportunity to address traffic and congestion issues within~~ provide sustainable and active travel options for movement to and from Shaw ~~Town~~ Centre, ~~whilst enhancing accessibility and connectivity.~~ Development in this northern part of the site will have a highway access linking to Greenfield Lane.

11.134 It is important to ensure that any development proposed does not place undue pressure on existing social infrastructure and that any development takes account of the increased demand it may place on existing provision. As such, any development would need to provide for:

- a. new and/or improved ment of existing open space, sport and recreation facilities; as well as

- ~~b.~~ additional school places ~~through the expansion of existing facilities or provision of new school facilities;~~ and
- ~~c.~~ ~~provide for appropriate~~ health ~~and community~~ facilities in accordance with policies JP-P5 and JP-P6 and relevant

11.135 ~~These would need to be provided in line with~~ local planning ~~policy~~ requirements ~~and in liaison with the local authority.~~

11.136 The site is split into two halves – the developable area to the west, close to the existing urban area, and the green wedge to the east, reflecting the topographical constraints of the site. The policy protects this green wedge from development and provides an opportunity to significantly enhance the green infrastructure and biodiversity value of the site, enhancing the existing assets (Shawside SBI and Twingates local nature reserve) and other non-designated ecology, as well as improving access to the open countryside for the local community.

New paragraph: Deciduous Woodland and Lowland Fen priority habitats are located in the northern part of the allocation.

11.137 The Beal Valley and Broadbent Moss allocations provide opportunities to secure net gains for nature. For these sites, net gains can be applied to Green Infrastructure, priority habitats ~~Deciduous Woodland, Lowland Fen~~ and ~~P~~protected ~~S~~species. The development of the two allocations should include partnership work with appropriate bodies, to ensure that they contribute towards a wider ecological network approach.

11.138 The allocations provide an opportunity to demonstrate an exemplar development, using green infrastructure that can be designed in a way to support local biodiversity, and strengthen coherent ecological networks beyond the site boundary. There is an opportunity to use SUDs, following the existing site hydrology, to create a network of wetlands that incorporate and enhance the existing fen, pond and watercourses within the site.

New paragraph: Where land is to be removed from the Green Belt, national policy seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

~~11.139 Deciduous Woodland is located north of the site, to the east of Shaw Side. Deciduous Woodland is a Priority Habitat, listed under Section 41 the NERC Act 2006. Lowland Fen Priority Habitat is located outside the site boundary, buffering the western edge of the site.~~

~~11.140 Development should have regard to the ecosystem services opportunity mapping, in the improvement and enhancement of Green Infrastructure. The Habitat Regulation Assessment for the Plan found that development within 7km of the SAC and SPAs will increase recreation pressures on these designated wildlife habitat sites. Consequently, development on site should mitigate the recreation disturbance impacts on the South Pennine Moors SAC/SPAs with reference to policy JP-G5, criterion 7 (c).~~

~~11.141 Development should conserve heritage assets and their setting in accordance with the findings and recommendations of the Historic Environment Assessment (2020) The site includes Duke Mill, an undesignated heritage asset. Development proposals should have regard to the findings and recommendations of the Oldham Mills Strategy. Relevant heritage assets and their settings, including the listed buildings of Birshaw House and New Bank and Duke Mill, an undesignated heritage asset identified in the Oldham Mill Strategy, will need to be taken account of where appropriate.~~

11.142 A flood risk assessment will be required to inform any development, in accordance with policy JP-S5. A comprehensive drainage strategy for the whole site should be prepared as part of the more detailed masterplanning stage, to ensure that undue pressure and burden is not placed on existing utilities infrastructure through piecemeal and uncoordinated development.

Regard should be had to the GM SFRA SUDs guidance. Proposals should apply greenfield run off rates and be supported by a maintenance plan.

11.143 The area in the south-eastern corner, which falls within Flood Zone 3, also offers an opportunity, working with the Environment Agency and Lead Local Flood Authority, to develop a wetland catchment area. As well as being an attractive feature of the site, this will allow the site to take a strategic approach to flood risk management and provide additional opportunities for upstream flood storage.

New paragraph: The allocation is identified as a Minerals Safeguarding Area for: brickclay (77.3% of the site); sand and gravel (11.9%); sandstone (2.4%) and surface coal (77.3%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 13: Bottom Field Farm (Woodhouses)

Picture 11.23 JPA 13 Bottom Field Farm (Woodhouses)

**Policy (MMO4); (AMO3)**

Development of this site will be required to:

1. Deliver around 30 homes, providing a range of dwelling types and sizes to deliver inclusive neighbourhoods and meet local needs, including a mix of high-quality family housing and affordable homes in accordance with relevant local plan requirements;
2. ~~Provide affordable homes in line with local planning policy requirements;~~
3. ~~Provide for appropriate access to and from the site in liaison with the local highway authority and take account of and deliver any other improvements that may be needed to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways~~

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

- ~~improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site;~~
Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;
4. ~~Deliver multi-functional green infrastructure and high-quality landscaping within the site and around the main development areas to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation;~~
 5. ~~Have regard to the recommendations of the Greater Manchester Landscape Character and Sensitivity Assessment for the Incised Urban Fringe Valleys;~~ Reflect and respond to the special qualities and sensitivities of the key characteristics of the Incised Urban Fringe Valleys landscape character type in accordance with policy JP-G1;
 6. ~~Retain and enhance the hierarchy of biodiversity within the site, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating them as part of a multi-functional green infrastructure network with the wider environment;~~
 7. ~~Provide further surveys on amphibians, birds, bats and extended phase 1 habitat surveys to inform planning applications;~~
 8. ~~Retain and enhance existing Public Rights of Way running through the site, integrating them as part of the multi-functional green infrastructure network to encourage active travel and improve connections and access to adjoining communities and countryside;~~
 9. ~~Provide for new and/or the improvement of existing open space, sport and recreation facilities, commensurate with the demand generated and local surpluses and deficiencies, in line with local planning policy requirements;~~

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

10. ~~Have regard to the findings of the Stage 2 Greater Manchester Green Belt Study, including mitigation measures to mitigate harm to the Green Belt; Define and/or strengthen the boundaries of the Green Belt around the site such that they will comprise physical features that are readily recognisable and likely to be permanent;~~
11. ~~Contribute towards green infrastructure enhancement opportunities in the surrounding Green Belt as identified in the Identification of Opportunities to Enhance the Beneficial Use of the Green Belt assessment; Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with policy JP-G2;~~
12. ~~Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority Make financial contributions for offsite additional primary and/or secondary school provision to meet needs generated by the development in accordance with policy JP-P5; and~~
13. ~~Contribute to appropriate health and community facilities to meet the increased demand that will be placed on existing provision;~~
14. ~~Conserve and enhance heritage assets and their setting in accordance with the findings and recommendations of the Historic Environment Assessment (2020). An up-to-date Heritage Impact Assessment will be required for any planning applications. Development should be in keeping with the local character of Woodhouses in terms of materials, design and landscaping;~~
15. ~~Take into consideration the findings of the Greater Manchester Historic Environment Assessment Screening Exercise, and provide an up-to-date archaeological desk-based assessment to determine if any future evaluation and mitigation will be needed; and~~

16. ~~Be informed by an appropriate flood risk assessment and a comprehensive drainage strategy which includes a full investigation of the surface water hierarchy. The strategy should include details of full surface water management throughout the site as part of the proposed green and blue infrastructure. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems as part of the multi-functional green infrastructure network and be in line with the GM Level 1 Strategic Flood Risk Assessment (SFRA) advice. Opportunities to use natural flood management and highway SUDs features should be explored.~~

New criterion: Consider the extraction of any viable mineral resources within Minerals Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMO5); (AMO4)

11.144 The site is currently designated as Green Belt in the Oldham Local Plan. ~~However, the site is brownfield land in the Green Belt.~~ Whilst a significant proportion of Oldham's housing land will come from the urban area through maximising the use of brownfield land, it is considered that the site will help to diversify the existing housing stock in the area and boroughwide. The site has the potential to contribute to meeting local housing need in the immediate vicinity and across the borough and contribute to and enhance the housing mix within the area, adding to the type and range of housing available. The location of the site, in a strong housing market, provides the potential for a range of high-quality housing in an attractive and accessible location.

11.145 Affordable housing will be provided as part of any development of the site, including a range of tenures, house sizes and types, in order to meet the needs of residents as appropriate. Affordable housing will be delivered in ~~line accordance~~ with ~~relevant~~ local ~~planning policy~~ requirements. A Housing

Strategy and Local Housing Needs Assessment has been prepared by Oldham Council which will inform the Local Plan affordable housing policy.

11.146 ~~The site may have ecological value that would need to be mitigated and integrated into the development as part of a complementary multi-functional green infrastructure.~~

11.147 It is important to ensure that any development proposed does not place undue pressure on existing social infrastructure and that any development takes account of the increased demand it may place on existing provision. Any development would need to provide for:

- ~~a.~~ new and/or improved ment of existing open space, sport and recreation facilities; as well as
- ~~b.~~ additional school places ~~through the expansion of existing facilities or provision of new school facilities;~~ and
- ~~c.~~ provide for appropriate health and ~~community~~ facilities in accordance with policies JP-P5 and JP-P6 and relevant local plan requirements.

11.148 ~~These would need to be provided in line with local planning policy requirements and in liaison with the local authority.~~

11.149 ~~Development should have regard to the ecosystem services opportunity mapping, in the improvement and enhancement of Green Infrastructure.~~ There is a need to define and/or strengthen the boundaries of the Green Belt around the whole of the site utilising existing landscape features and incorporating high quality boundary treatment so as to provide an attractive defensible Green Belt boundary that is readily recognisable and likely to be permanent.

New paragraph: Where land is to be removed from the Green Belt, national policy seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

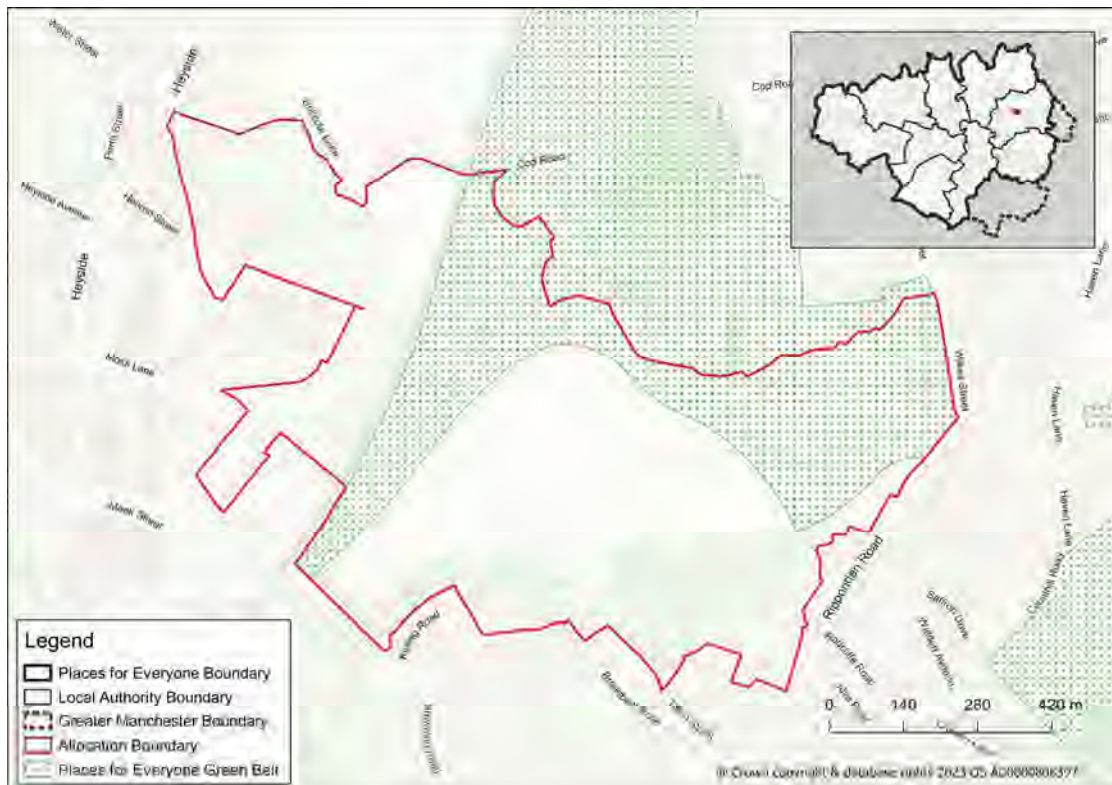

11.150 ~~Woodhouses Conservation Area is in close proximity to the site and, whilst outside the boundary, any development would need to consider the impact on its setting through the completion of a further Heritage Impact Assessment~~The site is close to Woodhouses Village Conservation Area, as such any development should be in keeping with the local character of the conservation area in terms of materials, design and landscaping in accordance with policy JP-P1.

11.151 A flood risk assessment will be required to inform any development, in accordance with policy JP-S5. ~~and a~~ A comprehensive drainage strategy for the site as a whole should be prepared ~~as part of the more detailed masterplanning stage~~, in line with the Greater Manchester Strategic Flood Risk Assessment (SFRA) SUDs guidance, to ensure that undue pressure and burden is not placed on existing utilities infrastructure through piecemeal and uncoordinated development. Proposals should be supported by a maintenance plan.

New paragraph: The allocation is identified as containing Mineral Safeguarding Areas for: brickclay (92.5% of the site); and surface coal (99.8% of the site) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 14: Broadbent Moss

Picture 11.24 JPA 14 Broadbent Moss (MMO6)

Policy (MMO7); (AMO5)

Development on the site will be required to:

1. Be in accordance with a comprehensive masterplan and ~~Design Code~~ design code as agreed by the local planning authority. This will include the need for an infrastructure phasing and delivery strategy in accordance with policy JP-D1;
2. Deliver around 1,450 homes providing a range of dwelling types and sizes to deliver inclusive neighbourhoods and meet local needs, including a mix of high-quality family housing. This includes making provision for affordable homes in accordance with relevant local plan requirements and incorporating higher density apartments adjacent to the proposed Metrolink stop. It is estimated that around ~~500-376~~ of these homes will be delivered post ~~2037-2039~~;
3. ~~Provide for affordable homes in line with local planning policy requirements;~~
4. Deliver around 21,000 sqm of industrial and warehouse floorspace employment floorspace extending the existing employment opportunities at Higginshaw Business Employment Area;
5. ~~The main points of access to the site will be via Vulcan Street and the new connections to Shaw and Oldham via the Beal Valley allocation, linking to a new internal spine road that will be delivered as part of the comprehensive development of the site. The spine road will provide a link to the residential area to the east of the Metrolink line, through delivering an appropriate crossing;~~ The main points of access will be from Ripponden Road to the east and Oldham Road via the proposed spine road to be constructed as part of the development of JPA12 Beal Valley allocation. The spine road from allocation JPA12 will be extended across the site, including the part to be retained in the Green Belt, to

Ripponden Road with a bridge over the Metrolink line. The spine road will serve the residential development and provide a through route between Ripponden Road and Oldham Road to the west of allocation JPA12. The industrial and warehouse development will be accessed from the existing industrial estate;-

6. ~~Take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highway improvements, high-quality walking and cycling infrastructure and public transport facilities.~~
7. Safeguard land for, and provide a proportionate and evidence-based ~~Contribute~~ contribution towards, the delivery of a new Metrolink stop and park and ride facility, along with the Beal Valley allocation, which in part will help to serve both allocations and improve their accessibility and connectivity;

New criterion: Make provision for other new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;

8. Make provision for a local centre which provides a range of shops and services in accordance with relevant local plan requirements, in a suitable and accessible location within ~~adjacent to the new Metrolink stop and new park and ride facility on the north-western part of the site, incorporating higher density apartments;~~
9. Enhance pedestrian and cycling links to and from the site to the new Metrolink stop, the Beal Valley strategic allocation, bus network and surrounding area, as part of the multi-functional green-infrastructure network, to encourage sustainable modes of travel and maximise the sites accessibility. This will include an accessible cycle and walking connection between the employment and residential developments within the allocation; ~~This should be delivered as part of a multi-~~

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

- ~~functional green infrastructure network (incorporating the retention and enhancement of existing public rights of way) and high quality landscaping within the site and around the main development areas to minimise the visual impact on the wider landscape, mitigate its environmental impacts, enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation;~~
10. ~~Have regard to the recommendations of the Greater Manchester Landscape Character and Sensitivity Assessment for the Pennines Foothills South / West Pennines. A Landscape Appraisal is required to inform any planning application; Reflect and respond to the special qualities and sensitivities of the key characteristics of the Pennine Foothills South / West Pennines landscape character type in accordance with policy JP-G1;~~
 11. ~~Have regard to the findings of the Stage 2 Greater Manchester Green Belt Study, including mitigation measures to mitigate harm to the Green Belt. Development will be required to create a new defensible Green Belt boundary around the development parcels identified to the east of the Metrolink line; Define and/or strengthen the boundaries of the retained Green Belt within and adjoining the site such that they will comprise physical features that are readily recognisable and likely to be permanent;~~
 12. ~~Contribute towards green infrastructure enhancement opportunities in the surrounding Green Belt, as identified in the Identification of Opportunities to Enhance the Beneficial Use of the Green Belt assessment; Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt within, and in the vicinity of, the site in accordance with policy JP-G2;~~
 13. ~~Retain and enhance areas of biodiversity within the site, most notably the priority habitats, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating them as~~

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

~~part of a multifunctional green infrastructure network with the wider environment; Make provision for biodiversity, including taking appropriate account of areas of priority habitat, which includes Deciduous Woodland and Lowland Fens, in accordance with policy JP-G9;~~

14. ~~Have regard to the recommendations of the Habitat Regulations Assessment and provide further surveys on phase 1 habitats, badgers, amphibians (including great crested newts) and bat surveys to inform any planning application;~~

New criterion: Mitigate the recreation disturbance impacts on the South Pennine Moors SAC/SPAs with reference to policy JP-G5, criterion 7 (c).

15. ~~Protect and enhance the habitats and corridor along the River Beal to improve the existing water quality; and seek to achieve 'good status' as proposed under the EU Water Framework Directive;~~
16. ~~Provide for new and/or the improvement of existing open space, sport and recreation facilities commensurate with the demand generated and local surpluses and deficiencies, in line with local planning policy requirements;~~
17. ~~Make provision for onsite, and/or financial contributions towards Contribute to offsite, additional primary and/or secondary school provision places to meet needs generated by the development the increased demand that will be placed on existing primary and secondary school provision within the area, in accordance with policy JP-P5 and subject to the requirements of the agreed masterplan for the allocation either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority;~~
18. ~~Contribute to appropriate health and community facilities to meet the increased demand that will be placed on existing provision;~~
19. ~~Be informed by the findings and recommendations of the Historic Environment Assessment (2020) in the Plan's evidence base and any~~

~~updated Heritage Impact Assessment submitted as part of the planning application process. An up-to-date archaeological desk-based assessment to determine if any future evaluation and mitigation will be needed;~~

20. Be informed by an appropriate flood risk assessment and a comprehensive drainage strategy, which includes a full investigation of the surface water hierarchy. The strategy should include details of full surface water management throughout the site as part of the proposed green and blue infrastructure. Development must avoid Flood Zone 3b, and deliver any appropriate recommendations, including those within the Strategic Flood Risk Assessment (SFRA) Level 2 Site Assessment Summary, ensuring development is safe and does not increase flood risk elsewhere. Natural sustainable drainage systems should be, integrated as part of the multifunctional green infrastructure network and delivered in line with the GM Level 1 SFRA advice. Opportunities to use natural flood management and highway SUD's features should be explored;
21. Include provision for a wetland catchment area, in liaison with the Environment Agency, Lead Local Flood Authority and Greater Manchester Ecology Unity, in the northern central part of the site to the south of Cop Road within the Flood Zone 3 area, to provide net gains in flood storage for the wider catchment and / or actively reduce flood risk impacts downstream through additional storage, integrating it with the wider multi-functional green infrastructure network and incorporating SUDs;
22. Have regard to the Groundwater Source Protection Zone in the design of the development, to ensure that there are no adverse impacts to groundwater resources or groundwater quality, and to ensure compliance with the Environment Agency approach to groundwater protection and any relevant position statements. A detailed hydrological assessment should support any planning application within this zone;

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

23. Incorporate necessary remediation measures in areas affected by contamination and previously worked for landfill purposes; ~~and~~
24. Incorporate noise and air quality mitigation to protect the amenity of any new and existing occupiers (both residential and employment), where new residential development adjoins Higginshaw Business Employment Area and the proposed extension; and

New criterion: Consider the extraction of any viable mineral resources within Minerals Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMO8); (AMO6)

11.152 The site is currently designated as Land Reserved for Future Development (LRFD), Other Protected Open Land (OPOL) and Green Belt in the Oldham Local Plan. Land at Hebron Street (with planning permission for 77 homes) is included in the red line boundary to ensure it forms part of the comprehensive development. It is not included in the residential capacity set out in the policy as it has already been identified as part of the potential housing land supply, as set out in Oldham's current Strategic Housing Land Availability Assessment (SHLAA). It is therefore anticipated that around 874 920 homes will be delivered during the plan period. The scale of development proposed means that a proportion of the site capacity may fall outside the plan period.

11.153 Whilst a significant proportion of Oldham's housing land will come from the urban area through maximising the use of brownfield land, it is considered that the site will help to diversify the existing housing stock in the area and boroughwide. The site has the potential to meet local housing need in the immediate vicinity and across the borough and contribute to and enhance the housing mix within the area through adding to the type and range of housing available.

11.154 Affordable housing will be provided as part of any development of the site, including a range of tenures, house sizes and types, in order to meet the needs of residents as appropriate. Affordable housing will be delivered in line accordance with relevant local planning policy requirements. A Housing Strategy and Local Housing Needs Assessment has been prepared by Oldham Council which will inform the Local Plan affordable housing policy.

11.155 Development of the site will also provide the opportunity to enhance and extend the existing employment offer at Higginshaw BEA and across the borough, which would otherwise have limited opportunity to emerge elsewhere due to the built-up nature of the borough.

11.156 The site is in a sustainable and accessible location, on the edge of a large area of open land. It is located near to existing neighbouring residential communities and has the potential for greater connectivity through the proposed new Metrolink stop, which would serve both this and the Beal Valley [site allocation](#), providing increased access to Rochdale Town Centre, Oldham Town Centre, Manchester City Centre and beyond.

11.157 The proposed spine road through the site provides the opportunity to improve connectivity to Shaw [Town Centre](#), Beal Valley to the north and the wider area. Improvements to the highway network, ~~including Bullcote Lane, Cop Road and the new access points proposed~~, will help to improve connectivity to the wider area [by a range of modes of travel](#), in particular [providing connections to Sholver](#).

11.158 The main points of access to the site will be from ~~Meek Street or Moss Lane to the west and Vulcan Street~~ [Ripponden Road](#) to the east [and \(via JPA12 Beal Valley allocation\) Oldham Road in the west](#). These will link to the proposed spine road running through the site, providing the opportunity to improve connectivity of the site to the Beal Valley allocation to the north, and to the wider area. ~~Cop Road/Bullcote Lane (east of the spine road) will join where the two intersect, and the remaining section of Bullcote Lane, (west of the spine road), will be downgraded accordingly, providing an emergency access, access to existing properties and businesses and for pedestrian and cyclists.~~ South of Cop Road, the new link will continue through the Broadbent Moss allocation, to form an east-west connection with ~~Vulcan St~~ [Ripponden Road](#) over the existing Metrolink line. At least one crossing point over the Metrolink line will be required to connect the eastern and western parts of the site. [Access to the proposed new employment development will be via Meek Street or Moss Lane, and this development will be connected to the rest of the allocation by accessible walking and cycling routes.](#)

11.159 It is important to ensure that any development proposed does not place undue pressure on existing social infrastructure and that any

development takes account of the increased demand it may place on existing provision. As such, any development would need to provide; for

- a. new and/or improved ment of existing open space, sport and recreation facilities; as well as
- b. additional school places ~~through the expansion of existing facilities or provision of new school facilities;~~ and
- c. ~~provide for appropriate~~ health and community facilities in accordance with policies JP-P5 and JP-P6 and relevant.

11.160 ~~These would need to be provided in line with~~ local planning policy requirements ~~and in liaison with the local authority.~~

New paragraph: There is a need to define and/or strengthen the boundaries of the retained Green Belt within and adjoining the site utilising existing landscape features and incorporating high quality boundary treatment so as to provide an attractive defensible Green Belt boundary that is readily recognisable and likely to be permanent.

11.161 A large proportion of the site is proposed to remain undeveloped and will be retained as Green Belt. Where land is to be removed from the Green Belt, national guidance seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Therefore, the retained areas of Green Belt within the allocation provide ~~,providing~~ an opportunity to significantly enhance the green infrastructure and biodiversity value of the site, enhancing the existing assets (such as the priority habitats) and improving access to the open countryside for the local community. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

New paragraph: Deciduous Woodland is located along the southern boundary to the east of the Metrolink line and outside the allocation boundary to the south of Cop Road. Lowland Fen priority habitat is located to the west of the Metrolink line.

11.162 The Beal Valley and Broadbent Moss strategic allocations provide opportunities to secure net gains for nature and local communities. For these site allocations net gains can be applied to Green Infrastructure, priority habitats ~~Deciduous Woodland, Lowland Fen~~ and ~~P~~protected ~~S~~species. The development of the two site allocations should include elements of partnership work with appropriate bodies, to ensure they contribute towards a wider ecological network approach.

11.163 The site allocations provide an opportunity to demonstrate an exemplar development using green infrastructure, that can be designed in such a way that it can support local biodiversity and strengthen coherent ecological networks beyond the site boundary, creating a resilient landscape through a network of connected sites. There is an opportunity to use Sustainable Urban Drainage (SUDs) systems following the existing site hydrology, to create a network of wetlands that enhance and incorporate the existing fen, pond and watercourses within the site that is subject to hydrological investigations.

11.164 ~~Deciduous Woodland is located north of the site east of Shaw Side. Deciduous Woodland is a Priority Habitat listed under Section 41 the Natural Environmental and Rural Communities (NERC) Act 2006.~~

11.165 ~~Lowland Fen Priority Habitat is located outside of the site boundary, buffering the western edge of the site.~~

11.166 ~~Development should have regard to the ecosystem services opportunity mapping, in the improvement and enhancement of Green Infrastructure. The Habitat Regulation Assessment for the Plan found that development within 7km of the SAC and SPAs will increase recreation pressures on these designated wildlife habitat sites. Consequently, development on site should mitigate the recreation disturbance impacts on the South Pennine Moors SAC/SPAs with reference to policy JP-G5, criterion 7 (c).~~

11.167 ~~Development should conserve heritage assets and their settings through a Heritage Impact Assessment and having regard to the findings and recommendations of the Historic Environment Assessment (2020).~~

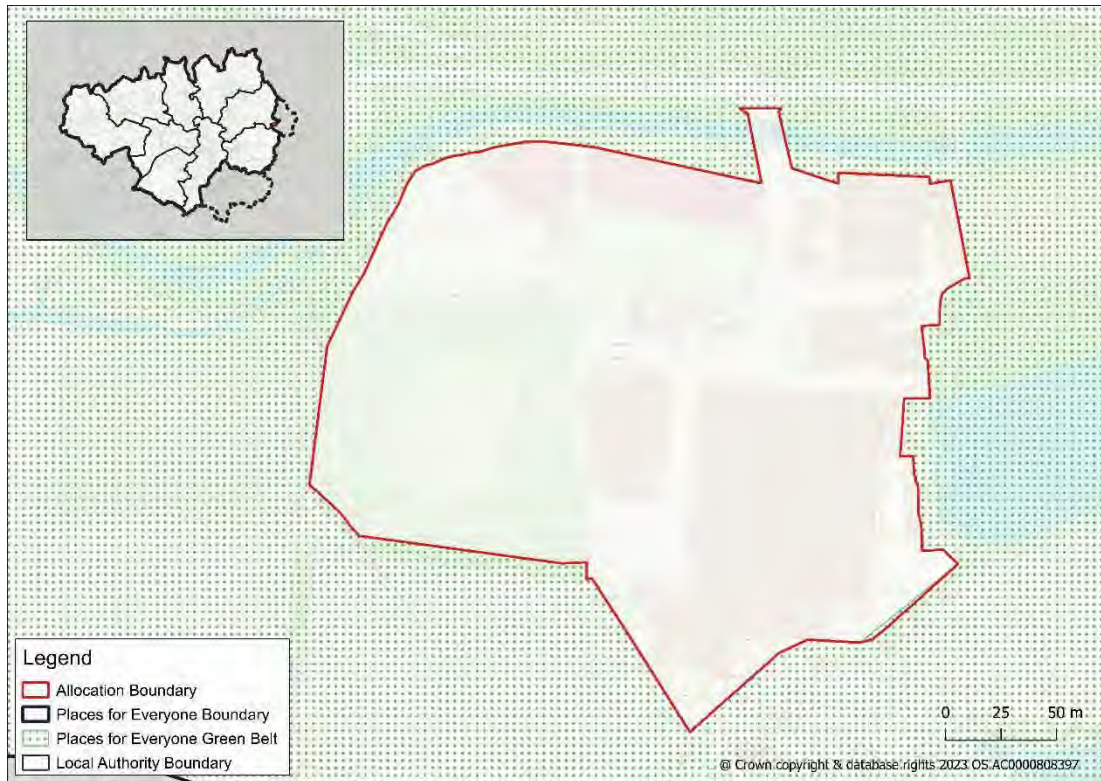

11.168 A flood risk assessment will be required to inform any development. A comprehensive drainage strategy for the whole site should be prepared as part of the more detailed masterplanning stage, to ensure that undue pressure and burden is not placed on existing utilities infrastructure through piecemeal and uncoordinated development. Proposals should apply greenfield run off rates and be supported by a maintenance plan. Regard should be had to the GM SFRA SUDs guidance. The area in the northern central part of the site, and which falls within Flood Zone 3, also offers an opportunity, working with the Environment Agency and Local Lead Flood Authority, to develop a wetland catchment area which, as well as being an attractive feature of the site, will allow a strategic approach to flood risk management and provide additional opportunities for upstream flood storage.

11.169 Part of the allocation is in within a Source Protection Zone. Any planning applications within this zone are expected to be supported by a detailed hydrological assessment. This will need to consider the vulnerability of the land and to propose suitable mitigation measures which will be employed to reduce the risk of pollution of groundwater.

New paragraph: The allocation is identified as a Minerals Safeguarding Area for: brickclay (79.3% of the site); sand and gravel (29.7%); sandstone (19.2%) and surface coal (79.3%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 15 Chew Brook Vale (Robert Fletchers)

Picture 11.25 JPA15 Chew Brook Vale (Robert Fletchers)

Policy (MMO9); (AM07)

Development at this site will be required to:

1. Be in accordance with a comprehensive masterplan and [Design Code design code](#) agreed by the local authority. [This will include the need for an infrastructure phasing and delivery strategy in accordance with policy JP-D1;](#)

[New criterion: Deliver around 138 homes, providing a range of dwelling types and sizes to deliver inclusive neighbourhoods and meet local needs, including the delivery of high-quality family housing and affordable homes in accordance with relevant local plan requirements;](#)

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

2. Provide a range of commercial, leisure and retail facilities of up to ~~6,000~~ 3,000 sqm in accordance with relevant local plan requirements, as part of a mix of uses, to support tourism and leisure facilities, connected to its gateway location to the Peak District National Park and capitalising on its proximity to Dove Stone Reservoir;
3. ~~Deliver around 90 homes with a mix of low-density family and executive homes and affordable homes of 2 and 3 bedrooms, in line with local planning policy requirements;~~
4. Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7 including ~~Provide~~ an improved access off the A669 / A635 and improvements to the existing access road up to the mill complex, including the river crossing over Chew Brook, up to adoptable standards;
5. ~~Take account of and deliver other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve access to the surrounding area, including off-site highway improvements, high-quality walking and cycling and public transport facilities, including opportunities for bus service provision into the site;~~
6. ~~Be informed by, and deliver the recommendations of, an appropriate visitor management plan to ensure that there is no adverse impact on Dove Stone Reservoir, the Peak District National Park and designated conservation areas. Development must have regard to the duty to care for the Peak District National Park under Section 62(2) of the Environment Act 1995;~~
7. Incorporate multi-functional green and blue infrastructure and high levels of landscaping to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance pedestrian and cycling linkages with ~~the~~ neighbouring communities, including Greenfield, Dove Stone reservoir and the

surrounding countryside. This should include footpath networks and recreation routes that incorporate existing trees and habitat areas, providing a range of formal and informal recreational open space and access to existing public footpath networks and woodland areas surrounding the site;

8. ~~Be designed to minimise the landscape impact having regard to the findings and recommendations of the Greater Manchester Landscape Character and Sensitivity Assessment for the Open Moorlands and Enclosed Upland Fringes (Dark Peak);~~ Reflect and respond to the special qualities and sensitivities of the key characteristics of the Open Moorlands and Enclosed Upland Fringes (Dark Peak) landscape character type in accordance with policy JP-G1 and the site's proximity to Dove Stone Reservoir and the Peak District National Park;
9. ~~Retain and enhance biodiversity within and adjoining the site, notably the areas of priority habitats, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating them as part of the multi-functional green infrastructure network with the wider environment;~~ Make provision for biodiversity, including taking appropriate account of areas of adjoining priority habitat, which includes Deciduous Woodland, in accordance with policy JP-G9;
10. ~~Provide further surveys on extended phase 1 habitats, bats and birds to inform any planning application;~~
11. ~~Ensure that development does not have an adverse impact on the integrity of the nearby Special Protection Area (SPA) and Special Area of Conservation (SAC). The recommendations from the Habitat Regulations Assessment must be considered;~~ Mitigate the recreation disturbance impacts on the South Pennine Moors SAC/SPAs with reference to policy JP-G5, criterion 7(c);
12. Be designed to relate positively to Chew Brook along the northern boundary, and other watercourses running through the site, integrating them as part of a the multi-functional green infrastructure network, creating a green routes along the

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

~~river / brook~~ watercourses, ensuring that development is set back to allow ecological movement, and providing opportunities to improve the existing water quality;

13. ~~Provide for opportunities to protect and enhance the habitats and corridor along Chew Brook to improve the existing water quality and seek to achieve 'good' status as proposed under the EU Water Framework Directive;~~
14. ~~Have regard to the findings of the Stage 2 Greater Manchester Green Belt Study, including mitigation measures to mitigate harm to the Green Belt; Define and/or strengthen the boundaries of the Green Belt around the site such that they will comprise physical features that are readily recognisable and likely to be permanent;~~
15. ~~Contribute towards green infrastructure enhancement opportunities in the surrounding Green Belt as identified in the Identification of Opportunities to Enhance the Beneficial Use of the Green Belt assessment; Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with policy JP-G2;~~
16. ~~Provide for new and/or the improvement of existing open space, sport and recreation facilities commensurate with the demand generated in line with local planning policy requirements, and local surpluses and deficiencies;~~
17. ~~Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority Make financial contributions for offsite additional primary and/or secondary school provision to meet needs generated by the development in accordance with policy JP-P5;~~

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

18. ~~Contribute to appropriate health and community facilities to meet the increased demand that will be placed on existing provision in liaison with the local authority and Public Health;~~
19. ~~Be informed by the findings and recommendations of the Historic Environment Assessment (2020) and addendum (2021) in the Plan's evidence base and any updated Heritage Impact Assessment submitted as part of the planning application process. An up-to-date archaeological desk-based assessment to determine if any future evaluation and mitigation will be needed; Have regard to the setting of heritage assets in close proximity to the site, including Hey Top Conservation Area and Greenfield House and New Barn Grade II Listed Buildings, and be informed by a Heritage Statement which identifies those buildings and structures on the site that are considered to be non-designated assets and should be retained as part of development proposals. The alteration, extension or demolition of any buildings contributing to the landscape or heritage interest of the site will require clear justification in relation to the significance and setting of the asset within and/or in close proximity to the site; and~~
20. ~~Ensure high quality design that is environmentally and sustainably driven, including grey harvesting and recycling, maximising energy efficiency through good building design and fuel efficient technology, a reduction of car usage and household recycling facilities; and~~
21. Be informed by an appropriate flood risk assessment, which takes account of any recommendations from the Level 2 Strategic Flood Risk Assessment Site Summary Report, and a comprehensive drainage strategy which includes a full investigation of the surface water hierarchy. Development must avoid Flood Zone 3b and deliver any appropriate recommendations, including mitigation measures, ensuring development is safe over its lifetime and does not increase flood risk elsewhere. The strategy should include details of full surface water management throughout the site which should be integrated into as part of the proposed multi-functional green and blue infrastructure and include the de-culverting of Fletcher's Brook and the creation of an open channel watercourse running

~~through, and discharging downstream, of the site. Development must avoid Flood Zone 3b and deliver any appropriate recommendations, including mitigation measures, ensuring development is safe over its lifetime and does not increase flood risk elsewhere. Natural sustainable drainage systems should be integrated to control the rate of surface water run-off. Proposals should be integrated as part of the multi-functional green infrastructure network and opportunities to use natural flood management and highway SUDs features should be explored.~~

Reasoned Justification (MMO10); (AMO8)

11.170 The site comprises the redundant Robert Fletchers mill complex, which is brownfield land. Given the previous use of the Robert Fletchers site as a paper mill, and its subsequent dereliction, it is considered that the need for remediation will be high contributing to higher viability costs in preparing the site for development.

11.171 The site is in a gateway location into the Peak District National Park and presents a strategic and unique opportunity for Oldham and Greater Manchester. ~~As such, there may be an opportunity to deliver to achieve~~ complementary tourism and leisure development ~~as part of a mix of uses on the site where these are in accordance with relevant local plan requirements, such as a small convenience retail or café that may benefit the visitor economy given its proximity to Dove Stone Reservoir. to enhance the sub-region's visitor and destination offer. The development of the site for leisure and tourism uses will also capture leisure spend in the local economy due to its proximity to the RSPB reserve, Dove Stone Reservoir and the Saddleworth villages, and create employment opportunities. The~~ Any tourism and leisure offer ~~provided on the site~~ should capitalise on, and complement, its location in a way that is sensitive to its unique setting.

11.172 The site provides the potential to provide a range of ~~dwelling~~s, ~~including~~ high-quality family ~~and executive~~ homes, in an attractive and desirable rural location. It also provides an opportunity to enhance Oldham's housing offer and contribute to meeting Oldham's housing need. Due to the scenic location of the site,

it should be an attractive location for larger and bespoke housing, providing a distinctive offer to the borough's housing market. ~~There is however also a need for affordable homes across the Saddleworth villages as many residents who wish to remain living within the area cannot currently afford to do so.~~

11.173 There is also a need for affordable homes across the Saddleworth villages as many residents who wish to remain living within the area cannot currently afford to do so. Affordable housing will be provided as part of any development of the site, including a range of tenures, house sizes and types, in order to meet the needs of residents as appropriate. Affordable housing will be delivered in line accordance with relevant local ~~planning policy~~ requirements. A Housing Strategy and Local Housing Needs Assessment has been prepared by Oldham Council which will inform the Local Plan affordable housing policy.

11.174 Existing access to the site will need to be improved as part of any development, which may include its relocation. This includes the current road from the site, the existing river crossing over Chew Brook from the site to the access road and the access arrangements onto the A669 / A635. Any proposals will need to be agreed by the local highway authority and to adoptable standards.

11.175 The policy seeks multi-functional green and blue infrastructure and high levels of landscaping as part of the comprehensive development of the site. This includes the retention and enhancement of existing public rights of way and recreation routes to improve linkages to and from the site to Greenfield, Dove Stone Reservoir, the Peak District National Park and ~~the wider~~ surrounding countryside. It will also be important to ensure that any development is designed to relate positively to Chew Brook which runs along the northern boundary and any other watercourses running through the site so as to allow for ecological movement.

11.176 ~~Development should have regard to the ecosystem services opportunity mapping, in the improvement and enhancement of Green Infrastructure.~~ Given the proximity of the site any development will need to have regard to the duty to care for the Peak District National Park under Section 62(2) of the Environment

Act 1995. This will be addressed through policies elsewhere in the Plan, such as policy JP-C7 in relation to the requirements for transport assessments, and criteria above addressing matters such as landscape and green infrastructure.

~~11.177 Development must follow the legal and policy requirements of protecting irreplaceable habitats and the mitigation hierarchy of doing everything possible to avoid and then minimise the impact on biodiversity, and only then after taking all measures compensate for losses that cannot be avoided. Meaningful biodiversity net gain is then applied on top of this approach. The allocation provides opportunities to secure net gains for nature. This should be applied to green infrastructure and priority habitats, including areas of Deciduous Woodland adjoining the site.~~

New paragraph: Where land is to be removed from the Green Belt, national policy seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

New paragraph: The Habitat Regulation Assessment for the Plan found that development within 7km of the SAC and SPAs will increase recreation pressures on these designated wildlife habitat sites. Consequently, development on site should mitigate the recreation disturbance impacts on the South Pennine Moors SAC/SPAs with reference to policy JP-G5, criterion 7 (c).

New paragraph: There is a need to define and/or strengthen the boundaries of the Green Belt around the whole site utilising existing landscape features and incorporating high quality boundary treatment so as to provide an attractive defensible Green Belt boundary that is readily recognisable and likely to be permanent.

~~11.178 ——— It is important to ensure that any development proposed does not place undue pressure on existing social infrastructure and that any development takes~~

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

~~account of the increased demand it may place on existing provision. As such any development would need to provide:~~

- ~~a. new and/or improvement of existing open space, sport and recreation facilities;~~
- ~~b. additional school places through the expansion of existing facilities or provision of new school facilities; and~~
- ~~c. provide for appropriate health and community facilities.~~

11.179 ~~These would need to be provided in line with local planning policy requirements and in liaison with the local authority. It is important to ensure that any development proposed does not place undue pressure on existing social infrastructure and that any development takes account of the increased demand it may place on existing provision. As such any development would need to provide for new and/or improved existing open space, sport and recreation facilities as well as additional school places and health facilities in accordance with policies JP-P5 and JP-P6 and relevant local plan requirements.~~

11.180 Heritage assets play an important role in the area's local historical and cultural identity and distinctiveness. There are undesignated assets throughout the site and a number of other heritage assets within close proximity, including Hey Top Conservation Area and Greenfield House and New Barn Grade II Listed Buildings which lie outside of the strategic allocation boundary. ~~Any development would need to consider the impact on their setting, through the completion of a further Heritage Impact Assessment and having regard to the Historic Environment Assessment (2020) and addendum (2021). Any development proposals should also have regard to the findings and recommendations of the Oldham Mill Strategy. Development should conserve heritage assets and their setting in accordance with policy JP-P2 and relevant local plan requirements.~~ Finally reflecting the sites unique location, the ~~Design Code~~ design code should ensure new development is in keeping with the surrounding character of the area through the use of local materials and design.

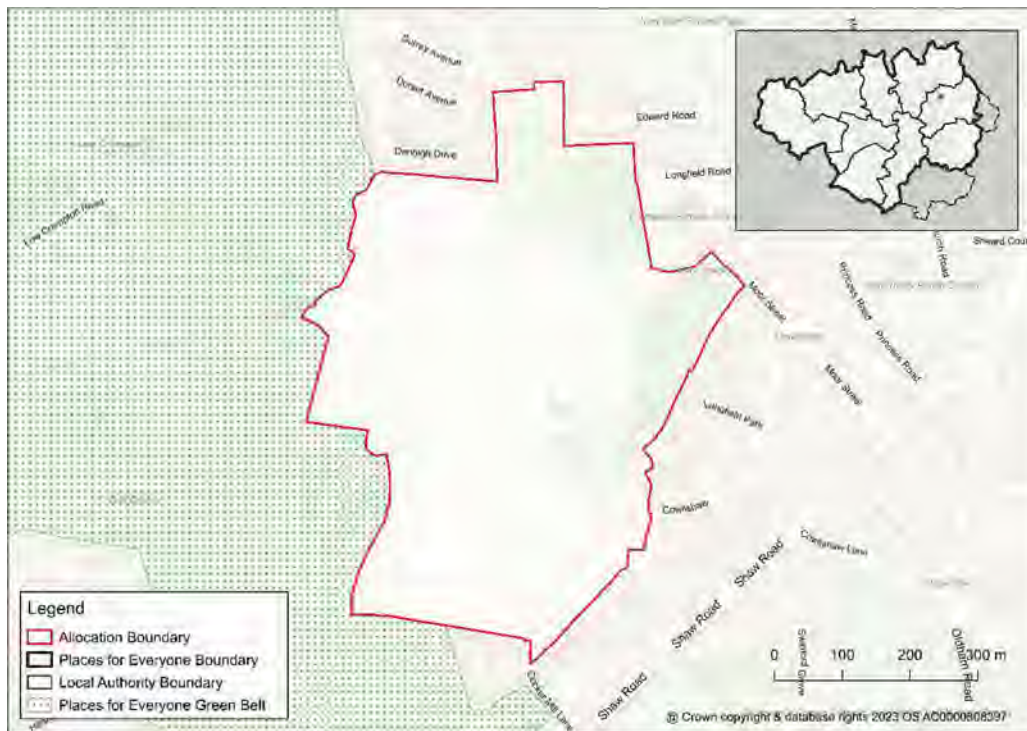

11.181 The Greater Manchester Level 2 Strategic Flood Risk Assessment considers the flood risk to the site and provides recommendations that will need to be considered to meet the requirements of the Exception Test. As such, any

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

development would need to follow the sequential approach on site and a flood risk assessment would be required to inform any development, including the recommendations from the Level 2 report. A comprehensive drainage strategy, including a maintenance plan, for the whole site would be required as part of the more detailed masterplanning stage ~~to ensure that undue pressure and burden is not placed on existing utilities infrastructure through piecemeal and uncoordinated development.~~ As part of the strategy for surface water management across the site Fletcher's Brook should be de-culverted and an open space channel watercourse created that runs through, and discharges downstream of, the site. When preparing the strategy, regard ~~Regard~~ should also be had to the SUDS guidance set out in the Greater Manchester Level 1 Strategic Flood Risk Assessment and other National Standards (such as CIRIA, Water UK Design and Construction Guidance).

Policy JP Allocation 16: Cowlshaw

Picture 11.26 JPA 16 Cowlshaw

Policy (MMO11); (AM09)

Development at this site will be required to:

1. Be in accordance with a comprehensive masterplan and **Design Code design code** agreed by the local planning authority;
2. Deliver around 460 homes, providing a range of dwelling types and sizes so as to deliver more inclusive neighbourhoods and meet local needs, including the delivery of a mix of high-quality family housing **and affordable homes in accordance with relevant local plan requirements**;
3. **Provide for affordable homes in line with local requirements set out in local planning policy requirements**;
4. Provide for appropriate access points to and from the site in liaison with the local highway authority. The main points of access to the site will be Cocker Mill Lane to the southern part of the site, with an

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

~~emergency/controlled secondary access to Cowlishaw,~~ Kings Road to the west where any access arrangements will need to take account of the nearby priority habitats and children's play area ~~central part of the site that lies to the north of Cowlishaw Farm~~ and Denbigh Drive to the north where, ~~with~~ access will be limited to the small parcel at the north only. An emergency / controlled secondary access to the site should be provided via Cowlishaw;

5. ~~Take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding area, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities;~~ Make provision for other new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;
6. ~~Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and high-quality landscaping within the site and around the main development areas. This is to minimise the visual impact on the wider landscape, mitigate its environmental impacts, and enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation.~~ Make provision for green infrastructure (incorporating the retention and enhancement of existing public rights of way where appropriate), landscaping and biodiversity, including taking appropriate account of Cowlishaw Ponds SBI, the areas of priority habitat near to Kings Road, areas of woodland and other features on the site, so as to mitigate its environmental impacts, minimise the visual impact on the wider landscape and enhance linkages with the neighbouring communities and countryside;
7. ~~Have regard to the recommendations of the Greater Manchester Landscape Character and Sensitivity Assessment for the Pennines~~

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

Foothills South / West Pennines; Reflect and respond to the special qualities and sensitivities of the key characteristics of the Pennine Foothills South / West Pennines landscape character type in accordance with policy JP-G1;

8. ~~Retain and enhance the hierarchy of biodiversity within the site, notably the existing Cowlshaw Ponds SBI and the area of priority habitat to the south of Crompton Primary School, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating them as part of the multi-functional green infrastructure network with the wider environment;~~
9. ~~Provide further surveys on amphibians (including great crested newts), extended phase 1 habitat, breeding birds, badgers and bats to inform any planning application;~~

New criterion: Mitigate the recreation disturbance impacts on the South Pennine Moors SAC/SPAs with reference to policy JP-G5, criterion 7 (c);

10. Provide for new and/or the improvement of existing open space, sport and recreation facilities, including the retention, or relocation to elsewhere in the site, of the existing play area off Kings Road, commensurate with the demand generated and local surpluses and deficiencies, in accordance line with relevant local planning policy requirements. ~~This includes the retention or relocation if required, and improvement of, the existing play area off Kings Road within the site;~~ and
11. ~~Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority;~~ Make financial contributions for offsite additional

primary and/or secondary school provision to meet needs generated by the development in accordance with policy JP-P5.

12. ~~Contribute to appropriate health and community facilities to meet the increased demand that will be placed on existing provision;~~
13. ~~Be informed by the findings and recommendations of the Historic Environment Assessment (2020) in the Plan's evidence base and any updated Heritage Impact Assessment submitted as part of the planning application process. An up-to-date archaeological desk-based assessment to determine if any future evaluation and mitigation will be needed; and~~
14. ~~Be informed by an appropriate flood risk assessment and a comprehensive drainage strategy which includes a full investigation of the surface water hierarchy. The strategy should include details of full surface water management throughout the site as part of the proposed green and blue infrastructure. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems integrated as part of the multi-functional green infrastructure network, and be in line with the GM Level 1 Strategic Flood Risk Assessment (SFRA) advice. Opportunities to use natural flood management and highway SUDs features should be explored.~~

Reasoned Justification (MMO12); (AMO10)

11.182 The site is currently designated as Other Protected Open Land (OPOL) in the Oldham Local Plan. Whilst a significant proportion of Oldham's housing land will come from the urban area through maximising the use of brownfield land, it is considered that the site will help to diversify the existing housing stock in the area and boroughwide. The site has the potential to meet local housing need in the immediate vicinity and across the borough and

contribute to and enhance the housing mix within the area through adding to the type and range of housing available.

11.183 Affordable housing will be provided as part of any development of the site, including a range of tenures, house sizes and types, in order to meet the needs of residents as appropriate. Affordable housing will be delivered in accordance ~~line~~ with relevant local planning policy requirements. A Housing Strategy and Local Housing Needs Assessment has been prepared by Oldham Council which will inform the Local Plan affordable housing policy.

11.184 The site is in a sustainable and accessible location, on the edge of a large area of open land and in a successful and attractive neighbourhood, and connected to neighbouring communities in Low Crompton, Cowlshaw, Royton and nearby town centres, including Shaw, where there is a Metrolink stop. Any development would be required to enhance links to and from the site to the bus network, to encourage sustainable modes of travel and maximise the site's accessibility, developing the existing recreation routes and Public Right of Way network.

11.185 The development will need to provide for suitable access to the site, in liaison with the local highway authority. As stated in the policy the main access points to the site will be Cocker Mill Lane (supported by an emergency/controlled secondary access to Cowlshaw), Kings Road and Denbigh Drive. The access at Denbigh Drive is constrained and will be limited to provide access to the small parcel in the northern section of the site only.

11.186 Cowlshaw Ponds SBI is made up of three pond areas and there ~~is~~ are an additional areas of priority habitat to the south of Crompton Primary School near Kings Road. Any development will need to retain and enhance these, incorporating them as a key feature within the green infrastructure network and landscaping proposals for the site.

11.187 Biodiversity net gain could be applied to Green Infrastructure, deciduous woodland, lowland fen and protected species.

New paragraph: The Habitat Regulation Assessment for the Plan found that development within 7km of the SAC and SPAs will increase recreation pressures on these designated wildlife habitat sites. Consequently, development on site should mitigate the recreation disturbance impacts on the South Pennine Moors SAC/SPAs with reference to policy JP-G5, criterion 7 (c).

11.188 ~~Development should have regard to the ecosystem services opportunity mapping, in the improvement and enhancement of Green Infrastructure.~~

11.189 It is important to ensure that any development proposed does not place undue pressure on existing social infrastructure and takes account of the increased demand it may place on existing provision. As such, any development would need to provide: for

- ~~a. new and/or improvement of existing open space, sport and recreation facilities; as well as~~
- ~~b. additional school places through the expansion of existing facilities or provision of new school facilities; and~~
- ~~c. provide for appropriate health and community facilities in accordance with policies JP-P5 and JP-P6 and~~

11.190 ~~These would need to be provided in line with relevant local planning policy requirements and in liaison with the local authority.~~

11.191 ~~There are heritage assets in the surrounding area. Any development would need to consider the impact on their setting, through the completion of a further Heritage Impact Assessment and having regard to the Historic Environment Assessment (2020).~~

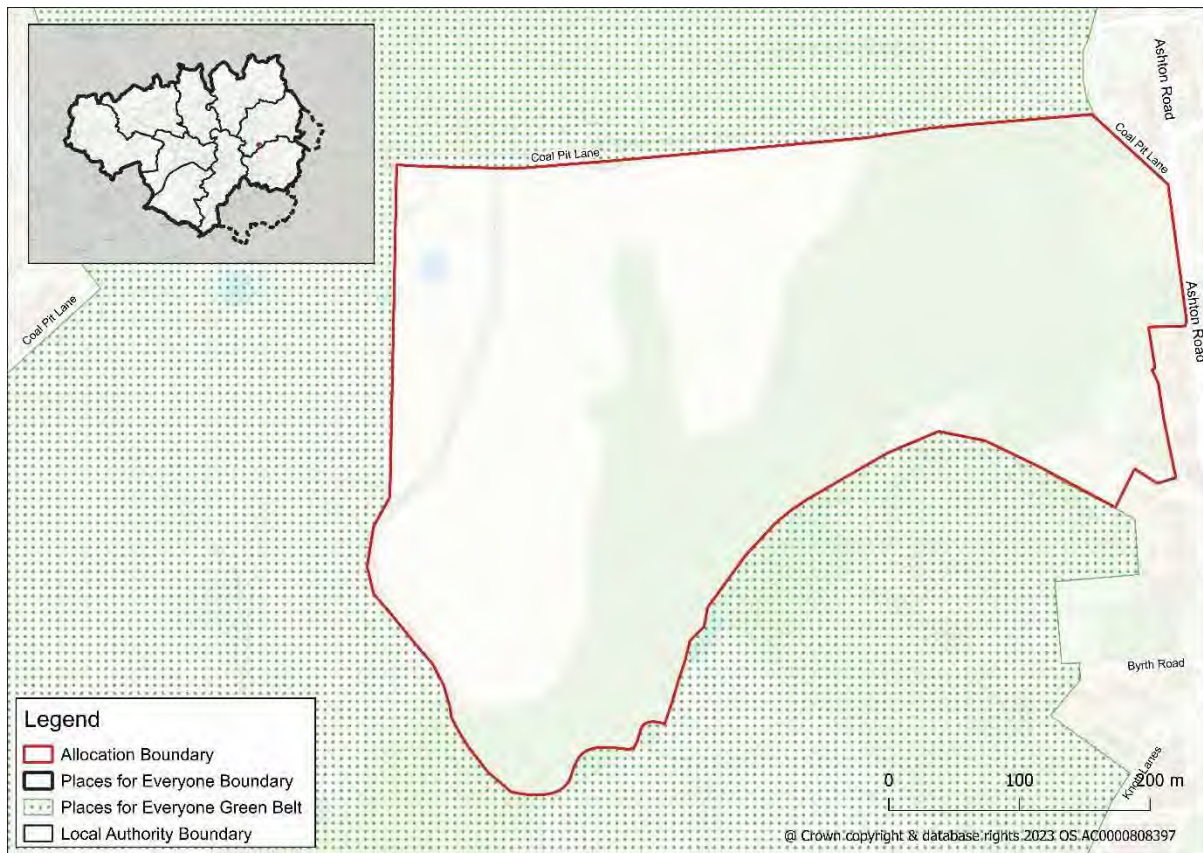

11.192 A flood risk assessment will be required to inform development, in accordance with policy JP-S5. A comprehensive drainage strategy for the whole site should be prepared as part of the more detailed masterplanning stage, to ensure that undue pressure and burden is not placed on existing utilities infrastructure through piecemeal and uncoordinated development.

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

Regard should be had to the GM SFRA SUDs guidance. Proposals should apply greenfield run off rates, be supported by a maintenance plan and the use of highway SUD's features.

Policy JP Allocation 17: Land South of Coal Pit Lane (Ashton Road)

Picture-11.27 JPA 17 Land South of Coal Pit Lane (Ashton Road)

Policy (MMO13); (AMO11)

Development on this site will be required to:

1. Be in accordance with a comprehensive masterplan and design code agreed by the local planning authority. This will include the need for an infrastructure phasing and delivery strategy in accordance with policy JP-D1;
2. Deliver around 175 homes, providing a range of dwelling types and sizes to deliver more inclusive neighbourhoods and meet local needs, including the delivery of high-quality family housing and affordable homes in accordance with relevant local plan requirements;

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

3. ~~Provide for affordable homes, in line with local planning policy requirements;~~
4. ~~Provide for appropriate access points to and from the site in liaison with the local highway authority. As part of this, provision should be made to safeguard a route from the north western edge of the site through to Coal Pit Lane, linked to the internal infrastructure of the site~~ Provide for appropriate access points to and from the site in liaison with the local highway authority, with the main point of access being from Ashton Road. In addition, ensure that vehicular access from the western edge of the site is safeguarded so as to facilitate the provision of a future link road that would run through the site from Ashton Road to Coal Pit Lane (Limeside) and that the layout of development and design of roads within the site are capable of accommodating the said link road;
5. ~~Take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on the surrounding areas and roads, including off-site highways improvements, high-quality walking and cycling infrastructure and public transport facilities such as waiting facilities at bus stops near the site;~~ Make provision for other new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;
6. ~~Deliver multi-functional green infrastructure (incorporating the retention and enhancement of existing public rights of way) and high-quality landscaping within the site so as to minimise the visual impact on the wider landscape, mitigate its environmental impacts, enhance linkages with the neighbouring communities and countryside and provide opportunities for leisure and recreation;~~ Make provision for green infrastructure, landscaping and biodiversity, including taking appropriate account of areas of priority habitat, which includes Deciduous Woodland, so as to mitigate the potential environmental

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

- impacts, minimise the visual impact on the wider landscape and enhance linkages with the neighbouring communities and countryside;
7. ~~Have regard to the recommendations of the Greater Manchester Landscape Character and Sensitivity Assessment for the Incised Urban Fringe Valleys;~~ Reflect and respond to the special qualities and sensitivities of the key characteristics of the Incised Urban Fringe Valleys landscape character type in accordance with policy JP-G1;
 8. ~~Retain and enhance the hierarchy of biodiversity within the site, notably areas of priority habitats, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating them as part of the multifunctional green infrastructure network;~~
 9. ~~Provide further surveys on amphibians, extended phase 1 habitats, badgers and bats to inform any planning application;~~
 10. ~~Provide for new and/or the improvement of existing open space, sport and recreation facilities commensurate with the demand generated and local surpluses and deficiencies, in line with local planning policy requirements;~~
 11. ~~Have regard to the findings of the Stage 2 Greater Manchester Green Belt Study, including mitigation measures to mitigate harm to the Green Belt.~~ Define and/or strengthen the boundaries of the Green Belt to the south and west of the site such that they will comprise physical features that are readily recognisable and likely to be permanent;
 12. ~~Contribute towards green infrastructure enhancement opportunities in the surrounding Green Belt, as identified in the Identification of Opportunities to Enhance the Beneficial Use of the Green Belt assessment;~~ Make provision for compensatory improvements to the

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with policy JP-G2;

13. ~~Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through expansion of existing facilities or through the provision of new school facilities, in liaison with the local education authority. Make financial contributions for offsite additional primary and/or secondary school provision to meet needs generated by the development in accordance with policy JP-P5;~~
14. ~~Contribute to appropriate health and community facilities to meet the increased demand that will be placed on existing provision;~~
15. ~~Conserve and enhance heritage assets and their setting in accordance with the findings and recommendations of the Historic Environment Assessment (2020) and addendum (2021). An up-to-date Heritage Impact Assessment will be required for any planning applications;~~
16. ~~Take into consideration the findings of the Greater Manchester Historic Environment Assessment Screening Exercise, and provide an up-to-date archaeological desk-based assessment to determine if any future evaluation and mitigation will be needed;~~
17. ~~Be informed by an appropriate flood risk assessment and a comprehensive drainage strategy, which includes a full investigation of the surface water hierarchy. The strategy should include details of full surface water management throughout the site as part of the proposed green and blue infrastructure. Development should deliver any appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems as part of the multi-functional green infrastructure network, and be in line with the GM Level 1 Strategic Flood Risk Assessment (SFRA) advice. Opportunities~~

~~to use natural flood management and highway SUDs features should be explored; and~~

18. Incorporate necessary remediation measures in areas which are affected by ~~previous coal mining contamination and have been previously worked for~~ landfill on the site ~~purposes~~; and

New criterion: Consider the extraction of any viable mineral resources within Minerals Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMO14); (AMO12)

11.193 The site is currently designated Green Belt. The red line boundary incorporates the existing saved Oldham UDP allocation at Danisher Lane, to ensure it forms part of the comprehensive development of the site. The saved UDP allocation is not included in the residential capacity set out in the policy, as it has already been identified as part of Oldham's ~~base-line~~ baseline housing land supply. Whilst a significant proportion of Oldham's housing land will come from the urban area through maximising the use of brownfield land, it is considered that this site will help to diversify the existing housing stock in the area and the borough as a whole. The site has the potential to meet local housing need in the immediate vicinity and across the borough and contribute to and enhance the housing mix within the area, through adding to the type and range of housing available.

11.194 Affordable housing will be provided as part of any development of the site, including a range of tenures, house sizes and types, in order to meet the needs of residents as appropriate. Affordable housing will be delivered in ~~accordance-line~~ with relevant local planning policy requirements. A Housing Strategy and Local Housing Needs Assessment has been prepared by Oldham Council which will inform the Local Plan affordable housing policy.

11.195 The site is well positioned in a sustainable and accessible location and has good connectivity to the wider strategic highway network. The site has good access to public transport and a range of local services, with access to a number of bus routes along Ashton Road between Tameside and Oldham. TfGM have also identified the A627/A671 corridor between Rochdale – Oldham – Ashton within the first tranche of the ‘Streets for All’ corridor studies to improve connectivity on Greater Manchester’s Key Route Network. These corridors have been identified on the basis of their potential to support a range of GM agendas, around delivering modal shift (particularly to public transport, walking and cycling), improving air quality and regenerating local centres. Any development would therefore be required to enhance links to and from the site to the bus network, to encourage sustainable modes of travel and maximise the site’s accessibility, developing the existing recreation routes and Public Right of Way network.

11.196 The development will need to provide for suitable access to the site, in liaison with the local highway authority with the main point of access being from. ~~Potential access points to the site may be from Coal Pit Lane and Ashton Road. The allocation provides an opportunity to consider As part of bringing this site forward consideration should be given as to~~ how movement and connectivity along Coal Pit Lane can be enhanced to improve highway safety, for ~~vehicles, pedestrians, and cyclists~~ and vehicles. As such, any development will be required to safeguard a vehicular access from the western edge of the site to facilitate the provision of a future link road that would run through the site from Ashton Road to Coal Pit Lane, Limeside. To facilitate this the layout of development and design of roads within the site will need to be capable of accommodating the future link road. provision should be made to safeguard a route from the north western edge of the site through to Coal Pit Lane, with appropriate links through the site to an appropriate access onto Ashton Road.

11.197 It is important to ensure that any development proposed does not place undue pressure on existing social infrastructure and that any

development takes account of the increased demand it may place on existing provision. As such any development would need to provide: for

- a. new and/or improved ment of existing open space, sport and recreation facilities; as well as
- b. additional school places through the expansion of existing facilities or provision of new school facilities; and
- c. provide for appropriate health and community facilities in accordance with policies JP-P5 and JP-P6 and

11.198 ~~These would need to be provided in line with relevant local planning policy requirements and in liaison with the local authority.~~

11.199 The allocation provides opportunities to secure net gains for nature. This should be applied to green infrastructure and priority habitats, including areas of Deciduous Woodland located throughout the site.

11.200 ~~Development should have regard to the ecosystem services opportunity mapping, in the improvement and enhancement of Green Infrastructure. The allocation is contained by permanent, physical boundaries, to the north and east. However, there is a need to define and/or strengthen the boundaries of the Green Belt to the south and west of the site utilising existing landscape features and incorporating high quality boundary treatment so as to provide an attractive defensible Green Belt boundary that is readily recognisable and likely to be permanent.~~

New paragraph: Where land is to be removed from the Green Belt, national policy seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

11.201 ~~There are also heritage assets close to the proposed strategic allocation. Any development would need to consider the impact on their setting, through the completion of a further Heritage Impact Assessment.~~

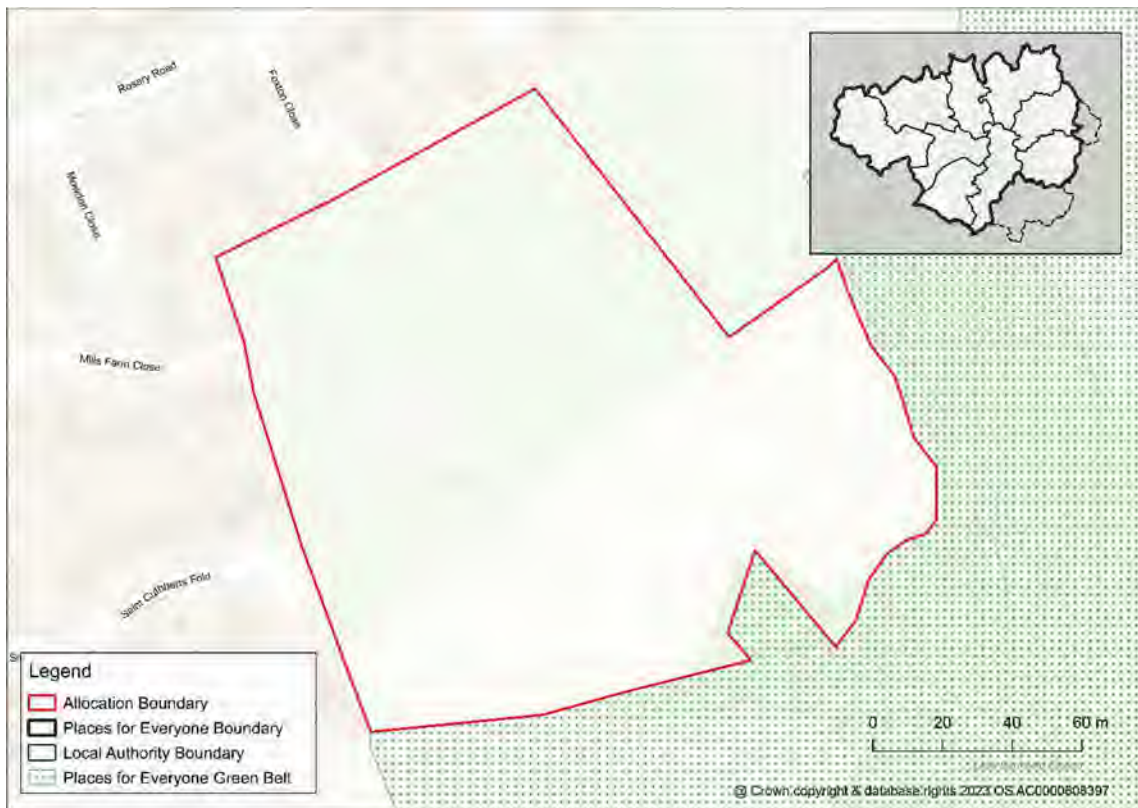

11.202 A flood risk assessment will be required to inform any development in accordance with policy JP-S5. A comprehensive drainage strategy should be prepared, for the site as a whole, as part of the more detailed masterplanning stage, to ensure that undue pressure and burden is not placed on existing utilities infrastructure through piecemeal and uncoordinated development. Regard should be had to the GM SFRA SUDs guidance. Proposals should apply greenfield run off rates and be supported by a maintenance plan.

11.203 There has been previous coal mining and are a number of historic landfill on the sites, as such there will need to be liaison with the Coal Authority and the necessary within the allocation. Necessary remediation measures in areas affected by contamination and previously worked for landfill purposes should be undertaken.

New paragraph: The allocation is identified as a Minerals Safeguarding Area for: brickclay (96.4% of the site); and surface coal (96.4%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 18: South of Rosary Road

Picture 11.28 JPA 18 South of Rosary Road (MMO15)

Policy (MMO16)

Development at this site will be required to:

1. Deliver around 60 homes, providing a range of dwelling types and sizes to deliver more inclusive neighbourhoods and meet local needs, including the delivery of high-quality family housing;
2. Provide for appropriate access points to and from the site in liaison with the local highway authority. The main point of access to the site will be through the neighbouring former Centre for Professional Development site and onto Rosary Road, ~~with the potential for a secondary emergency only access from St Cuthbert's Fold;~~
3. ~~Take account of and deliver any other highway improvements that may be needed to minimise the impact of associated traffic on the local highway network and improve accessibility to the surrounding areas, including off-site highway improvements, high-quality walking and cycling infrastructure and public transport facilities;~~ Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;
4. ~~Retain and enhance the hierarchy of biodiversity within the site, notably Bankfield Clough SBI and the area of priority habitat, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating the delivery of functional ecological networks into multi-functional green infrastructure to enable free movement of species of principal importance. Planning proposals should incorporate a suitable buffer between development plots and the SBI to protect its important features;~~ Make provision for green infrastructure and biodiversity net gain across the site, incorporating a suitable landscaping buffer between the proposed houses and the adjoining

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

Bankfield Clough SBI and Deciduous Woodland priority habitat, so as to mitigate the potential environmental impacts, minimise the visual impact on the wider landscape and enhance linkages with the neighbouring communities and countryside;

5. ~~Have regard to the recommendations of the Greater Manchester Landscape Character and Sensitivity Assessment for the Incised Urban Fringe Valleys; Reflect and respond to the special qualities and sensitivities of the key characteristics of the Incised Urban Fringe Valleys landscape character type in accordance with policy JP-G1;~~
6. ~~Retain and enhance the hierarchy of biodiversity within the site, notably Bankfield Clough SBI and the area of priority habitat, following the mitigation hierarchy and deliver a meaningful and measurable net gain in biodiversity, integrating the delivery of functional ecological networks into multi-functional green infrastructure to enable free movement of species of principal importance.~~
7. ~~Provide further surveys on extended phase 1 habitats and bats, to inform any planning application;~~
8. ~~Have regard to the findings of the Stage 2 Greater Manchester Green Belt Study, including mitigation measures to mitigate harm to the Green Belt; Define and/or strengthen the boundary of the Green Belt to the south of the site such that it will comprise physical features that are readily recognisable and likely to be permanent;~~
9. ~~Contribute towards green infrastructure enhancement opportunities in the surrounding Green Belt as identified in the Identification of Opportunities to Enhance the Beneficial Use of the Green Belt assessment; Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with policy JP-G2;~~

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

10. ~~Provide for new and/or the improvement of existing open space, sport and recreation facilities commensurate with the demand generated and local surpluses and deficiencies, in line with local planning policy requirements;~~
11. ~~Contribute to additional school places to meet the increased demand that will be placed on existing primary and secondary school provision within the area, either through an expansion of existing facilities or through the provision of new school facilities in liaison with the local education authority Make financial contributions for offsite additional primary and/or secondary school provision to meet needs generated by the development in accordance with policy JP-P5;~~
12. ~~Contribute to appropriate health and community facilities to meet the increased demand that will be placed on existing provision;~~
13. ~~Conserve and enhance heritage assets and their setting in accordance with the findings and recommendations of the Historic Environment Assessment (2020). An up-to-date Heritage Impact Assessment will be required for any planning applications. Take appropriate account of relevant heritage assets, and their settings, including the setting of Enhancements between the development and Bank Top Farmhouse (Grade II listed building) to the south of the site, in accordance with policy JP-P2 should include additional tree planting and native hedgerows to improve the interface between the farmhouse and any new development; and~~
14. ~~Be informed by an appropriate flood risk assessment and a comprehensive drainage strategy which includes a full investigation of the surface water hierarchy. The strategy should include details of full surface water management throughout the site as part of the proposed green and blue infrastructure. Development should deliver any~~

~~appropriate recommendations, including mitigation measures and the incorporation of sustainable drainage systems as part of the multi-functional green infrastructure network and be in line with the GM Level 1 Strategic Flood Risk Assessment (SFRA) advice. Opportunities to use natural flood management and highway SUDs features should be explored; and~~

15. ~~Ensure that appropriate access is maintained for United Utilities to their onsite infrastructure;~~

New criterion: Consider the extraction of any viable mineral resources within Minerals Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMO17); (AMO13)

11.204 The land south of Rosary Road is within the Green Belt. Whilst a significant proportion of Oldham's housing land will come from the urban area through maximising the use of brownfield land, it is considered that the site will help to diversify the existing housing stock in the area and boroughwide. The site has the potential to meet local housing need in the immediate vicinity and across the borough and contribute to and enhance the housing mix within the surrounding area through adding to the type and range of housing available, informed by Oldham Council's Housing Strategy and Local Housing Needs Assessment.

11.205 The site is well positioned in a sustainable and accessible location that has good connectivity to the wider highway network. The site has good access to public transport and a range of local services with access to bus routes along Ashton Road between Tameside and Oldham. TfGM have also identified the A627/A671 corridor between Rochdale – Oldham – Ashton within the first tranche of the 'Streets for All' corridor studies to improve

connectivity on Greater Manchester's Key Route Network. These corridors have been identified due to their potential to support a range of GM agendas, around delivering modal shift (particularly to public transport, walking and cycling), improving air quality and regenerating local centres. Any development would therefore be required to enhance links to and from the site to the bus network, to encourage sustainable modes of travels and maximise the sites accessibility, developing on the existing recreation routes and Public Right of Way network.

11.206 The development will need to provide for suitable access to the site, in liaison with the local highway authority. The main point of access to the site is through the neighbouring former Centre of Professional Development site, which along with the former Marland Fold School, is identified as a potential housing site in Oldham's current Strategic Housing Land Availability Assessment. Integration of the allocation with the neighbouring development sites will therefore be important. Any development will also be required to minimise and mitigate the impact of associated traffic on the local highway network, including the neighbouring Fitton Hill housing estate.

11.207 It is important to ensure that any development proposed does not place undue pressure on existing social infrastructure and that any development takes account of the increased demand it may place on existing provision. Any development would need to provide: for

- a. new and/or improved ment of existing open space, sport and recreation facilities; as well as
- b. additional school places through the expansion of existing facilities or provision of new school facilities; and
- c. provide for appropriate health and community facilities in accordance with policies JP-P5 and JP-P6 and relevant

11.208 These would need to be provided in line with local planning policy requirements and in liaison with the local authority.

11.209 Bankfield Clough SBI and an area of Deciduous Woodland priority habitat sit just outside the eastern and southern boundary fall within the site along the eastern boundary. Any development should incorporate a landscaping buffer between the proposed houses and adjoining SBI and priority habitat as part of the wider green infrastructure network for the site. This area should form part of the wider landscaping and green infrastructure network for the site and be retained and enhanced as part of the biodiversity hierarchy within the site.

11.210 ~~Development should have regard to the ecosystem services opportunity mapping, in the improvement and enhancement of Green Infrastructure. The allocation is contained by permanent, physical boundaries, to the north, east and west. However, there is a need to define and/or strengthen the Green Belt boundary to the south utilising existing landscape features and incorporating high quality boundary treatment so as to provide an attractive defensible Green Belt boundary that is readily recognisable and likely to be permanent.~~

New paragraph: Where land is to be removed from the Green Belt, national policy seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

11.211 There are assets of historical significance close to the site, including Bank Top Farmhouse. Whilst outside the boundary any development proposal would need to consider the impact on their setting, through the completion of a Heritage Impact Assessment. Furthermore, it is considered that additional tree planting and native hedgerows would help to enhance the interface between the existing farmhouse and any development, as well as the green wedge that will sit in between.

11.212 A flood risk assessment will be required, in accordance with policy JP-S5. A comprehensive drainage strategy for the whole site should be prepared as part of the more detailed masterplanning stage, to ensure that undue pressure and burden is not placed on existing utilities infrastructure

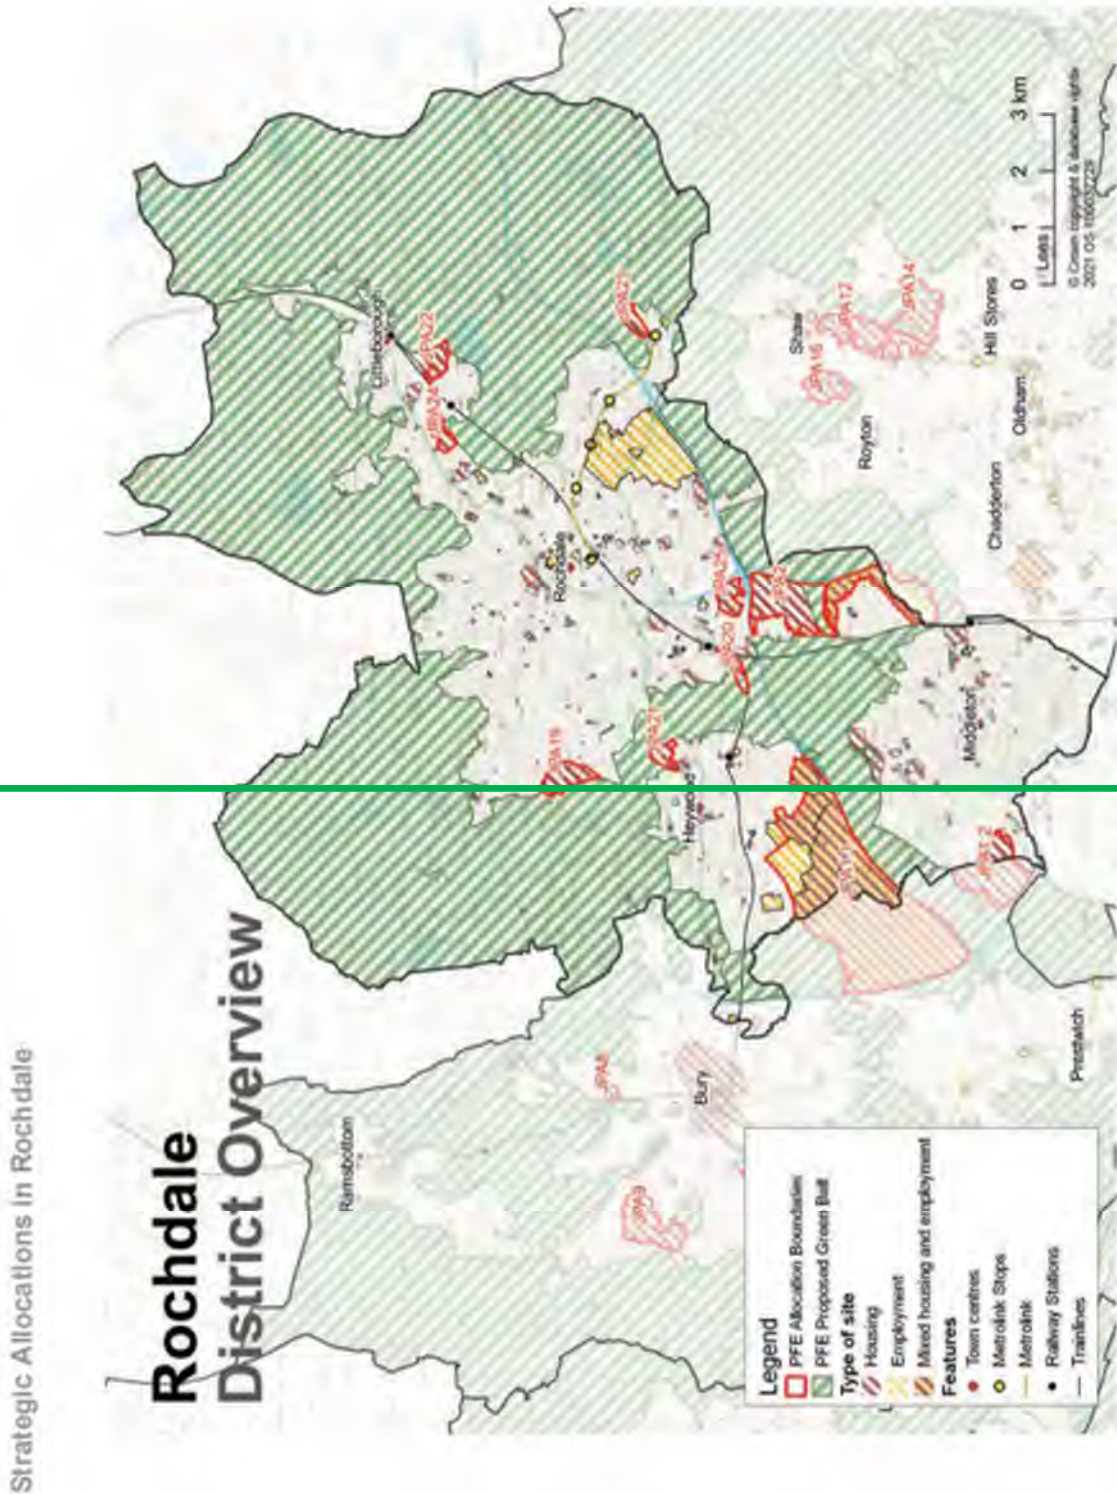

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

through piecemeal and uncoordinated development. Regard should be had to the GM Strategic Flood Risk Assessment (SFRA) SUDs guidance. Proposals should apply greenfield run off rates, be supported by a maintenance plan and make use of highway SUD's features.

New paragraph: The allocation is identified as a Minerals Safeguarding Area for: brickclay (98.1% of the site); and surface coal (98.1%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

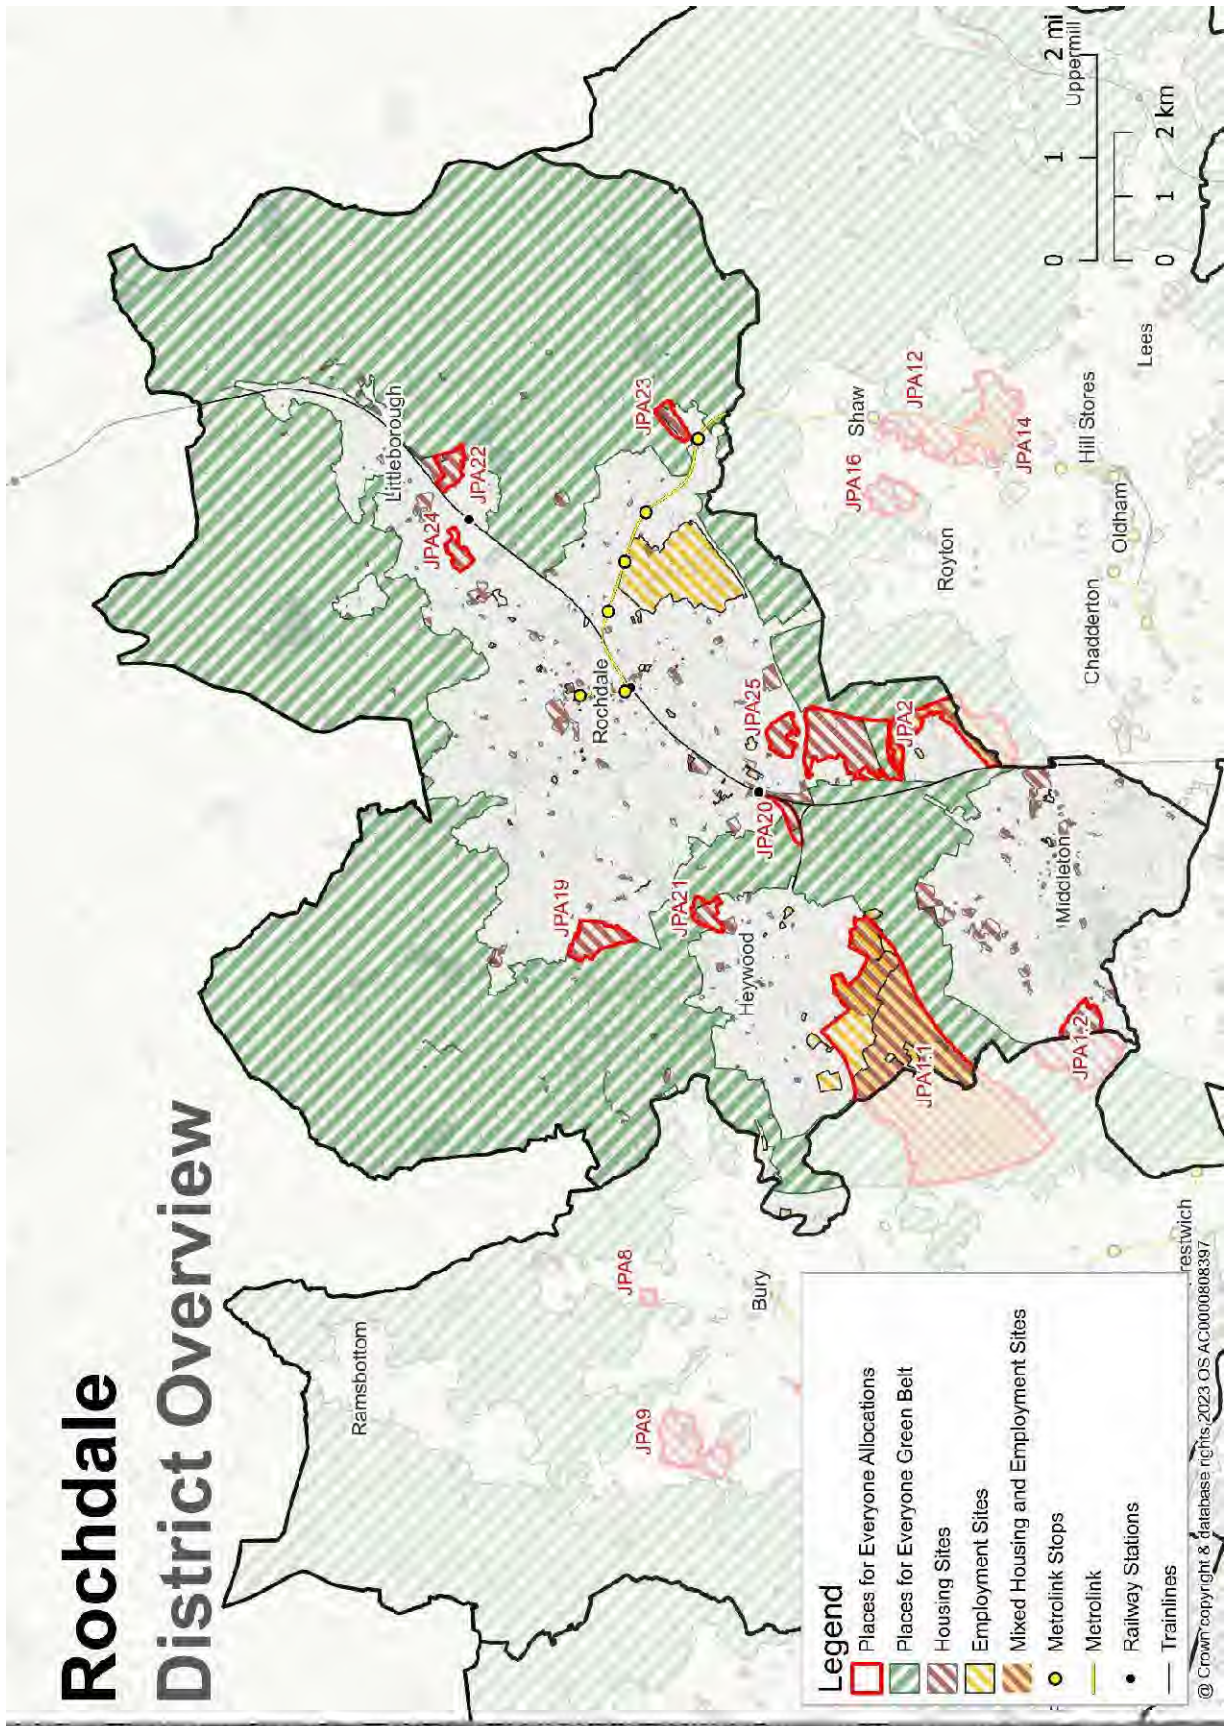

Strategic Allocations in Rochdale

Picture 11.29 Rochdale District Overview (MMR1)

Picture 11.29 Rochdale District Overview

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

Places for Everyone Composite Plan – Modifications Version 2023

Policy JP Allocation 19: Bamford / Norden Bamford / Norden

Picture 11.30 JPA 19 Bamford / Norden

Policy (MMR2)

Development at this site will be required to:

1. Deliver around 450 new homes predominantly in the western and southern parts of the site, with a focus on larger, higher value family housing to balance out the current offer within the borough and including significant provision of larger (4, 5 and 6 bedroom) houses in spacious plots, to reflect the grain and density of the surrounding residential areas, and affordable housing in accordance with relevant local plan requirements;
2. Retain and significantly enhance the existing recreational facilities as part of an integrated green and blue infrastructure network on the site. The residential development on the site will provide contributions towards the improvement of the facilities which will create a high quality recreational and

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

- sports 'hub' serving the local area and the borough as a whole. The development should incorporate existing public rights of way along with new routes for active travel into a high quality integrated green infrastructure network that links to existing public rights of way in the countryside to the west and north west of the site;
3. Achieve excellent design and sustainability through masterplanning and the use of design codes for the whole site to ensure comprehensive development This will include the need for an infrastructure phasing and delivery strategy in accordance with policy JP-D1;
 4. Define the archaeological potential of the development site through the completion of archaeological evaluation in the form of geophysics, field walking and trial trenching for areas specified in the Bamford/Norden Historic Environment Assessment 2020. The masterplan must detail where significant archaeology must be preserved in situ and demonstrate how the development has responded sympathetically to this;
 5. Provide access to the site from suitable points along Norden Road;
 6. ~~Provide financial contributions to mitigate impacts on the highway network identified through a transport assessment~~ Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;
 - ~~7. Contribute to the potential extension of the proposed bus rapid transit services between Heywood and Manchester;~~
 - ~~8. Provide appropriate access to electric vehicle charging infrastructure and cycle storage;~~
 9. Reflect and respond to the special qualities and sensitivities of the key characteristics of the Pennine Foothills (West /South Pennines) landscape character type in accordance with policy JP-G1. This should take account of any visual impact from Ashworth Valley to the west given the high landscape

and recreational value of that area ~~and ensure there are high quality links/routes to the wider countryside;~~

New criterion: Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with policy JP-G2.

10. ~~Ensure that the design of the scheme preserves or enhances the setting of the listed Bamford United Reform Church immediately to the south of the site. Proposals should be informed by the findings and recommendations of the Historic Environment Assessment (2020) in the Plan's evidence base and any updated assessment submitted as part of the planning application process; Take appropriate account of relevant heritage assets, and their settings, including the listed Bamford United Reform Church, in accordance with Policy JP-P2;~~
11. Make financial contributions for offsite additional primary and secondary school provision to meet needs generated by the development in accordance with policy JP-P5 ~~Provide contributions to ensure that there are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities; and~~
12. ~~Retain and enhance public rights of way across and around the site.~~

New criterion: Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMR3)

11.213 Norden and Bamford are well-established residential areas to the west of Rochdale town centre and there is a strong market demand for housinghomes within the area. It is one of the most significant areas of larger, higher value housinghomes within the sub-region and is considered to be a desirable and aspirational place to live. This development offers an excellent opportunity to expand on this area to deliver a type of housing

which is in short supply across the borough. Rochdale currently has a relatively small proportion of properties in Council Tax bands E and above and the conurbation as a whole. Properties in these bands are situated in well-landscaped settings, with spacious plot sizes and larger internal floorspaces. The provision of such housing is important to ensure that a good range of housing is available ~~across the plan area to support economic growth~~ and will help to achieve the spatial objective of boosting northern competitiveness. This will also include the delivery of affordable housing, in line with the requirements of the Local Plan.

11.214 The area does contain a number of sporting recreational facilities in the form of playing pitches, a cricket ground and tennis courts. The Council's 2018 Playing Pitch Strategy identified the playing pitches as a key club site supporting clubs with a large number of junior teams. Any proposal should seek to ensure that these pitches and the other sporting facilities are retained and significantly enhanced as part of a high quality, integrated development, and the residential development on the site should contribute towards the delivery of these improvements. The improvements to the playing pitches should include, but not be limited to, the following:

- Underground pitch drainage;
- A replacement pavilion incorporating necessary changing facilities and community space; and
- The provision of a 'red path' around the pitches to accommodate a range of walking and running activities.

11.215 There is a proposal, linked to the development at Northern Gateway, to provide a bus rapid transit service linking Heywood and Manchester city centre. There is potential to extend some of these services to Norden which could serve this development and the wider western part of the town. This proposal should provide a financial contribution to support the delivery of this route extension.

- 11.216** There is an opportunity to deliver improvements to the local highway network in the area to improve the flow of traffic and ensure that the proposed development does not have an adverse impact on local roads. The development will be expected to contribute to identified mitigations.
- 11.217** The site is also relatively close to Ashworth Valley to the west. This river valley is of high landscape value and provides some attractive recreational routes. Where land is to be removed from the Green Belt, national guidance seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. This requirement offers an opportunity to improve existing routes along with other identified improvements. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

It is important that any development does not have a negative impact on Ashworth Valley ~~this natural asset~~ and where practical historic field boundaries as identified in the Bamford/Norden Heritage Assessment should be retained and incorporated into the masterplan. Similarly, the existing footpath network should also be maintained. This could be addressed through a high-quality boundary treatment on the western edge of the opportunity area. To ensure any development does not impact upon the setting of the Bamford United Reform Church, a Grade II listed building, the tree line along Jowkin Lane should be retained to provide screening.

- 11.218** As with a lot of areas within the borough there is limited capacity in relation to primary school places. Therefore, any proposal would need to address this through a contribution to expand existing schools in the area.
- 11.219** The layout of development will also need to take account of the location of electricity pylons that cross the site. This could be linked to a high-quality network of green infrastructure and landscaping within the scheme.

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

New paragraph: The allocation is identified as containing Mineral Safeguarding Areas for brickclay (99.9% of the site); sand and gravel (10.6%); sandstone (22.0%) and surface coal (99.9%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 20: Castleton Sidings Castleton Sidings

Picture 11.31 JPA 20 Castleton Sidings

Policy (MMR4)

Development at this site will be required to:

1. Deliver around 125 **high quality** homes including **higher value family housing provision of larger (4, 5 and 6 bedroom) houses, and affordable housing in accordance with relevant local plan requirements;**
2. **Create an area of accessible open space on the part of the site to be retained as Green Belt as part of a multi-functional green and blue infrastructure network. This will include defining a new Green Belt boundary to the west of the residential development that will comprise physical features that are readily recognisable and likely to be permanent and mitigation of the visual and noise impacts of the nearby railway.**

Built development will be limited to the eastern half of the site to minimise encroachment of built development into the Green Belt with the western part

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

- ~~of the site being redeveloped as an area of open space or nature conservation area and retained within the Green Belt;~~
3. ~~The north east of the site will accommodate a temporary rail halt and associated parking~~ Make land available within the site to facilitate the extension of the East Lancashire Railway (ELR) from Heywood to Castleton, and ~~potentially a provision of tram-train infrastructure trial project if progressed in this location;~~
 4. Achieve excellent design and sustainability through masterplanning and the use of design codes for the whole site to ensure comprehensive development;
 5. ~~Provision should be made within the scheme for appropriate access by Network Rail and ELR to undertake any maintenance and improvements relating to the extended ELR when required;~~
 6. ~~Address the risk of surface water flooding that affects part of the site through an appropriate sustainable drainage strategy (SuDS);~~
 7. ~~Provide~~ Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7. This should include the provision of good quality pedestrian and cycling routes through the site to Heywood Road/Manchester Road to the north east of the site, and to the existing footpaths on the adjoining golf course in order to facilitate safe and convenient ~~links~~access to the centre of Castleton ~~and the Castleton Bee Network scheme, the nearby railway Castleton station, bus stops and westwards to~~ employment locations around Heywood;
 8. ~~Provide appropriate access to electric vehicle charging infrastructure and cycle storage;~~
 9. ~~Provide financial contributions to mitigate impacts on the highway network identified through a transport assessment;~~
 10. Carry out a project specific Habitats Regulation Assessment in relation to the Rochdale Canal for planning applications of 50 dwellings or more;

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

11. ~~Incorporate high quality landscaping, multi-functional green and blue infrastructure and acoustic attenuation to mitigate the potential visual and noise impact on the railway side of the land and provide appropriate boundary treatment in relation to the retained Green Belt; and~~

New criterion: Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt within and/or in the vicinity of the site in accordance with policy JP-G2;

12. Make financial contributions for offsite additional primary and secondary school provision to meet needs generated by the development in accordance with policy JP-P5; and ~~Provide contributions to ensure that there are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities.~~

New criterion: Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMR5); (AMR1)

- 11.220** The site offers the opportunity to deliver high quality housing on previously-developed land in a sustainable and accessible location. The western part of the site is within the Green Belt but the eastern part of the site closest to Castleton is within the urban area and is available and deliverable. Overall, the site is well placed to utilise existing community facilities and social infrastructure.

Rochdale currently has a relatively small proportion of properties in Council Tax bands E and above. This development offers an opportunity to deliver a type of housing which is in short supply across the borough. The delivery of such housing will contribute to widening housing choice which will help to achieve the spatial objective of boosting northern competitiveness. This will also include the delivery of affordable housing, in line with the requirements of the Local Plan.

11.221 The development of the site is important to facilitate the extension of the East Lancashire Railway (ELR) from Heywood to Castleton. The delivery of this extension is identified in the ELR 2020 Development Strategy and will assist in the wider regeneration of Castleton local centre. It also offers further potential connectivity given that it provides a convenient link between the heritage line to mainline passenger services at Castleton station. The first stage of this requires a temporary halt and parking in the north east part of the site. The halt will only be required until the legal procedures to extend the line under the Manchester Road Bridge to provide a connection with the Calder Valley main line are in place. Once the halt is not required the land will revert to a residential allocation. ~~In the longer term, t~~here could also be potential for a tram-train trial project between Rochdale, Castleton and Heywood. The feasibility of tram-train technology in Greater Manchester is currently being studied by TfGM.

11.222 Given the shape of the site it is not appropriate that all of it is developed as this would have a significant impact on the Green Belt between Castleton and Heywood. The redevelopment of the site as a whole does offer the opportunity to create a high-quality area of accessible open space ~~or an area for nature conservation~~ on the ~~western~~ part of the site to be retained as Green Belt. Where land is to be removed from the Green Belt, national guidance seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Therefore, this area also provides an opportunity to provide compensatory improvements to retained Green Belt land. Further potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

~~In addition to this, t~~he proximity of the site to the railway line means that any proposal will need to incorporate a good quality, sensitive and well-designed acoustic attenuation and landscape buffer to mitigate against visual and noise impacts and improve amenity for new residents.

~~Furthermore, given the proximity of the site to the adjacent Heritage Assets, specifically: St Martins Church, Castleton South Conservation Area, Lock 52, Towpath Bridge and the United Reform Church, new development will respond positively to preserve and enhance their setting, retain key views to and from the assets and ensure the new development avoids being overly dominant.~~

11.223 ~~A designated National and European site is located close to the site. Therefore, any impact from the new development and any associated traffic generated will need to be taken into account. The Rochdale Canal Special Area of Conservation (SAC) lies adjacent to the site. Protected habitats in the canal can be affected by changes in light, shading, leaf fall and water quality. As such, a project specific Habitats Regulation Assessment will be required for planning applications involving 50 or more residential units to ensure that development close to the canal is designed sensitively to the protected habitat.~~

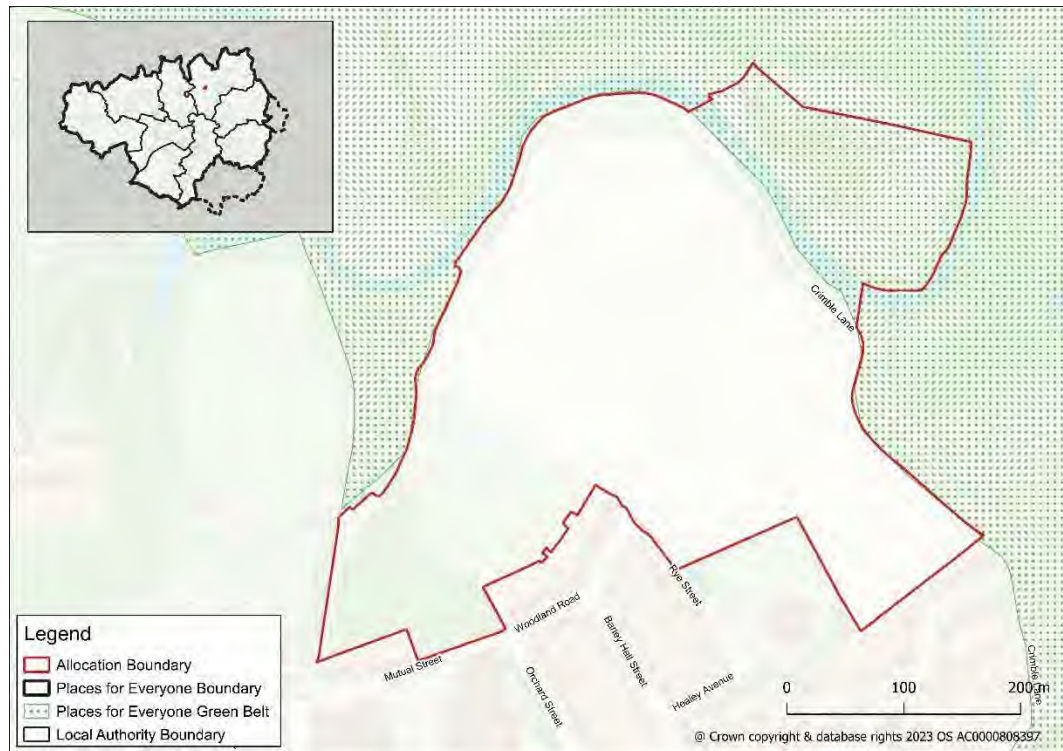

11.224 The operational needs of the mainline railway line, ELR extension and a potential tram-train trial project will also need to be taken fully into account in the design and layout of any scheme. In particular this would require appropriate access to be facilitated through any detailed proposal on the site.

New paragraph: The allocation is identified as containing Mineral Safeguarding Areas for brickclay (72.8% of the site); sand and gravel (57.8%); and surface coal (72.8%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 21: Crimble Mill

Crimble Mill

Picture 11.32 JPA 21 Crimble Mill

Policy (MMR6)

Development at this site will be required to:

1. Deliver around 250 new homes, including higher value family housing provision of larger (4, 5 and 6 bedroom) houses, and affordable housing in accordance with relevant local plan requirements, within an attractive riverside setting. This includes the provision of new homes within the converted Grade II* Listed Crimble Mill and on adjoining parts of the allocation retained in the Green Belt, in accordance with national policy relating to the partial or complete redevelopment of previously developed land in the Green Belt;
- ~~2. 4. Achieve excellent design and sustainability through masterplanning and the use of design codes for the whole site to ensure comprehensive development;~~

Secure the conversion and long term future of the listed mill buildings as part of a comprehensive, high quality development through masterplanning, design codes and a phasing and delivery strategy;

- ~~3.2.~~ Protect and enhance the character and significance of the mill complex in order to secure the long-term future of these nationally significant Listed Buildings. This will include detailed masterplanning to be informed by the Crimble Mill Historic Environment Assessment 2020; Protect and enhance the significance of the listed mill buildings and their setting, having regard to the Crimble Mill Historic Environment Assessment 2020;
- ~~5.4.~~ The detailed layout of any scheme should respect the setting of the Listed mill complex and Reflect and respond to the special qualities and sensitivities of the key characteristics of the Incised Urban Fringe Valleys landscape character type in accordance with policy JP-G1, having regard to the adjacent Queens Park, the River Roch and the wider river valley setting, including the incorporation of high-quality green and blue infrastructure;
- ~~3.5.~~ Define the archaeological potential of the development site to the south of the mill complex and river through the completion of archaeological evaluation in the form of geophysics, field walking and trial trenching for areas specified in the Historic Environment Assessment (2020). The masterplan must detail where significant archaeology will be preserved in situ;
- New criterion: Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with policy JP-G2;
- ~~6.~~ Provide appropriate access on to the A58 to the south of the site along with secondary access onto Mutual Street;
7. Provide financial contributions to mitigate impacts on the highway network identified through a transport assessment Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7. This should include vehicular access from an improved Crimble

Lane access from the A58 as well as from Mutual Street and/or Woodland Road. This should also include retaining and enhancing existing rights of way and general access through and around the site including:

1. New and improved walking and cycling access to the adjacent Queens Park;
 2. Enhancing walking and cycling routes to encourage sustainable access to Heywood town centre; and
 3. Facilitating a route adjacent to the River Roch to support the wider Roch Valley Way;
8. Any proposal needs to take into account the risk of flooding, particularly in respect of those parts of the site that are identified as being within Flood Zone 3. This includes ensuring that the mill building can be accessed from the north;
- ~~9. Retain and enhance existing rights of way and general access through and around the site. This should include:~~
- ~~1. New and improved access to the adjacent Queens Park;~~
 - ~~2. Enhancing walking and cycling routes to encourage sustainable access to Heywood town centre; and~~
 - ~~3. Creation of a route adjacent to the River Roch to support the wider Roch Valley Way~~
- ~~10. Provide appropriate access to electric vehicle charging infrastructure and cycle storage; and~~
11. Any proposal should provide ~~some~~ land adjacent to the existing primary school to the south of the site, to allow for the expansion of the school to accommodate the additional demand for places. Financial contributions will also be required to ensure provision of primary and secondary schools places to ~~servemeet~~ the needs generated by the development in accordance with policy JP-P5; and

New criterion: Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMR7)

11.225 The proposal provides an opportunity to deliver a sustainable urban extension to the north east of Heywood whilst safeguarding and preserving a heritage asset. The sustainable attributes of the site would be enhanced by the creation of new and improved pedestrian and cycle access. The site is adjacent to Queens Park, an award-winning Victorian park which includes a range of recreation and leisure facilities. Any proposal should create high-quality physical and visual links to the park. The site also has the potential to deliver convenient access to Heywood town centre to the south west of the site as well as destinations further afield via the Roch Valley Way.

11.226 The site will deliver high quality homes in an attractive location which will also secure the future of a Grade II* Listed Building. Crimble Mill dates back to the mid-18th Century as a fulling mill. It is a rare surviving example of a textile mill that illustrates the transition from water to steam power on a rural site. It is likely to be the last, large-scale water powered rural mill to survive in Greater Manchester. The property is on Historic England's Heritage at Risk Register at Category A (Immediate risk of further rapid deterioration or loss of fabric: no solution agreed). The condition is recorded as "Very Bad". Building condition and recording surveys must be agreed and completed to document the premises prior to any development or demolition taking place.

Rochdale currently has a relatively small proportion of properties in Council Tax bands E and above. This development offers an opportunity to deliver a type of housing which is in short supply across the borough. The delivery of such housing will contribute to widening housing choice which will help to achieve the spatial objective of boosting northern competitiveness. This will

also include the delivery of affordable housing, in line with the requirements of the Local Plan.

- 11.227** The proposal will be required to demonstrate how it would support the retention and enhancement of the mill complex. This would need to be agreed by the local planning authority prior to commencement of any development with a clear timetable secured via a legal agreement or planning condition as part of any planning permission. The expectation would be that this would be the first phase of any development given the condition of the listed mill building. The design and layout of any scheme should respond to its rural setting and location adjacent to the River Roch and have full regard to the listed mill and its semi-rural surroundings. Key views to and from the listed mill complex from the development site, historic field boundaries and areas of woodland which contribute to the rural character of the site should also be retained. Where opportunities for interpretation are present these should be included in the masterplan.

New paragraph: Where land is to be removed from the Green Belt, national guidance seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

- 11.228** Parts of the site adjacent to the River Roch are at risk from flooding and this includes part of the mill complex itself. Any proposal would need to demonstrate how it has addressed the issue of flooding within the scheme. Any proposed mitigation would need to consider the effects of the development downstream from the site. The development will also need to ensure that the mill site can be accessed from the north via Crimble Lane and onto Bury and Rochdale Old Road.
- 11.229** The site is adjacent to All Souls C of E Primary School. The development will place significant demand on school places within the area and local schools

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

are already at or near to capacity. Any proposal should therefore provide some land adjacent to the school to allow for future expansion including associated outdoor playing space. This would provide new places in a location convenient for the residents of the new development.

New paragraph: The allocation is identified as containing Mineral Safeguarding Areas for brickclay (96.8%of the site); sand and gravel (52.8%); and surface coal (96.8%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 22: Land North of Smithy Bridge

Land North of Smithy Bridge

Picture 11.33 JPA 22 Land North of Smithy Bridge

Policy (MMR8)

Development at this site will be required to:

1. Deliver around 300 new homes, including provision of larger (4, 5 and 6 bedroom) houses, and affordable housing in accordance with relevant local plan requirements; higher value family housing, to meet needs within the local area and to attract and retain higher income households, taking advantage of its attractive setting next to Hollingworth Lake and the Rochdale Canal.
2. Achieve excellent design and sustainability through masterplanning and the use of design codes for the whole site to ensure comprehensive development;
3. Deliver a landscape-led development, incorporating high-quality green and blue infrastructure, which maximises that takes advantage of the site's attractive setting next to Hollingworth Lake and the Rochdale Canal and reflects and responds to the special qualities and sensitivities of the key

- ~~characteristics of the Pennine Foothills (West /South Pennines) landscape character type in accordance with policy JP-G1 its Pennine fringe setting and takes account of views from and into the site, including the incorporation of high quality green and blue infrastructure;~~
- ~~4. Incorporate a design and layout which complements the existing housing to the west of the site and the proposed new housing on the former Akzo Nobel site to the north;~~
 - ~~5. Create high quality, safe and convenient walking and cycling routes through the site providing improved linkages to key local destinations including Littleborough Town Centre, Hollingworth Lake, Rochdale Canal and the two railway stations – Smithy Bridge and Littleborough;~~
 6. Define the archaeological potential of the development site through the completion of archaeological evaluation in the form of geophysics, field walking and trial trenching for areas specified in the Land North of Smithy Bridge Historic Environment Assessment 2020. The masterplan must detail where significant archaeology must be preserved in situ and demonstrate how the development has responded sympathetically to this;
 - ~~7. Provide appropriate access to electric vehicle charging infrastructure and cycle storage;~~
 8. ~~Provide financial contributions to mitigate impacts on the highway network identified through a transport assessment~~ Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7. This should include facilitating high quality, safe and convenient walking and cycling routes through the site to provide improved linkages to key local destinations including Littleborough Town Centre, Hollingworth Lake, Rochdale Canal and the two railway stations – Smithy Bridge and Littleborough;

New criterion: Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with policy JP-G2;

9. Carry out a project specific Habitats Regulation Assessment in relation to the Rochdale Canal for planning applications of 50 dwellings or more;

New criterion: Mitigate the recreation disturbance impacts on the South Pennine Moors SAC/SPAs with reference to JP-G5, criterion 7 (c);

10. Facilitate the delivery of a new primary school and associated outdoor playing space ~~at the southern end of the site.~~ Make financial contributions for offsite additional secondary school provision to meet needs generated by the development in accordance with policy JP-P5 and contribute to additional primary and secondary places to meet demand arising from the new development; and

11. ~~Deliver the provision of replacement visitor car parking to replace the existing spaces lost on the car park at the southern end of the site.~~ Development will be required to retain and enhance the existing visitor car parking spaces on the site, or provide replacement visitor car parking spaces in a suitable location nearby for any existing spaces lost; and

New criterion: Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMR9)

- 11.230** This site provides an excellent opportunity to deliver a high-quality housing scheme and associated facilities which maximises the potential of this sustainable location. Any proposal should take advantage of its setting close to Hollingworth Lake and build on the existing and proposed residential offer within the area.

Rochdale currently has a relatively small proportion of properties in Council Tax bands E and above. This development offers an opportunity to deliver a type of housing which is in short supply across the borough. The delivery of such housing will contribute to widening housing choice which will help to achieve the spatial objective of boosting northern competitiveness. This will also include the delivery of affordable housing, in line with the requirements of the Local Plan.

- 11.231** The site is within walking distance of both Littleborough and Smithy Bridge rail stations and adjacent to Smithy Bridge which is an attractive and popular residential area which also includes Hollingworth Lake Country Park. The site is also relatively close to Littleborough town centre which contains a range of local services and facilities. Access between these destinations can be significantly improved through the creation of new routes within this development and the adjoining housing site to the north. Given these important linkages, the masterplanning of the site should have regard to the proposed residential development to the north.

New paragraph: Where land is to be removed from the Green Belt, national guidance seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

- 11.232** ~~Designated National and European sites are located immediately adjacent to the site and in the wider landscape area. Therefore, any impact from the new development and any associated traffic generated will need to be taken into account.~~ The Rochdale Canal Special Area of Conservation (SAC) lies adjacent to the site. Protected habitats in the canal can be affected by changes in light, shading, leaf fall and water quality. As such, a project specific Habitats Regulation Assessment will be required for planning applications involving 50 or more residential units- to ensure that

development close to the canal is designed sensitively to the protected habitat.

The Habitat Regulation Assessment for the Plan found that development within 7km of the SAC and SPAs will increase recreation pressures on these designated wildlife habitat sites. Consequently, development on site should mitigate the recreation disturbance impacts on the South Pennine Moors SAC/SPAs with reference to JP-G5, criterion 7 (c).

- 11.233** The Land North of Smithy Bridge Historic Environment Assessment 2020 identifies heritage assets which may be impacted upon through the development of this site. The masterplan must seek to protect and enhance such assets where possible, otherwise their harm must be robustly justified and mitigated.
- 11.234** There is a local issue in terms of primary school places and this can only be resolved through the provision of a new school. This area provides an excellent location for a new facility given that it lies between Littleborough and Smithy Bridge and therefore can serve both areas sustainably. It also provides an attractive location for a school which can provide access to open areas and activities, thus promoting healthy lifestyles.
- 11.235** The southern end of the site is currently occupied by a car park which accommodates visitors to the lake. Any spaces lost as a result of the development This will need to be replaced by an equivalent facility in order that the parking needs of visitors to the lake are met and to avoid displacing car parking on to nearby roads and streets. The delivery of appropriate parking will need to be linked to the overall delivery of the wider proposal.

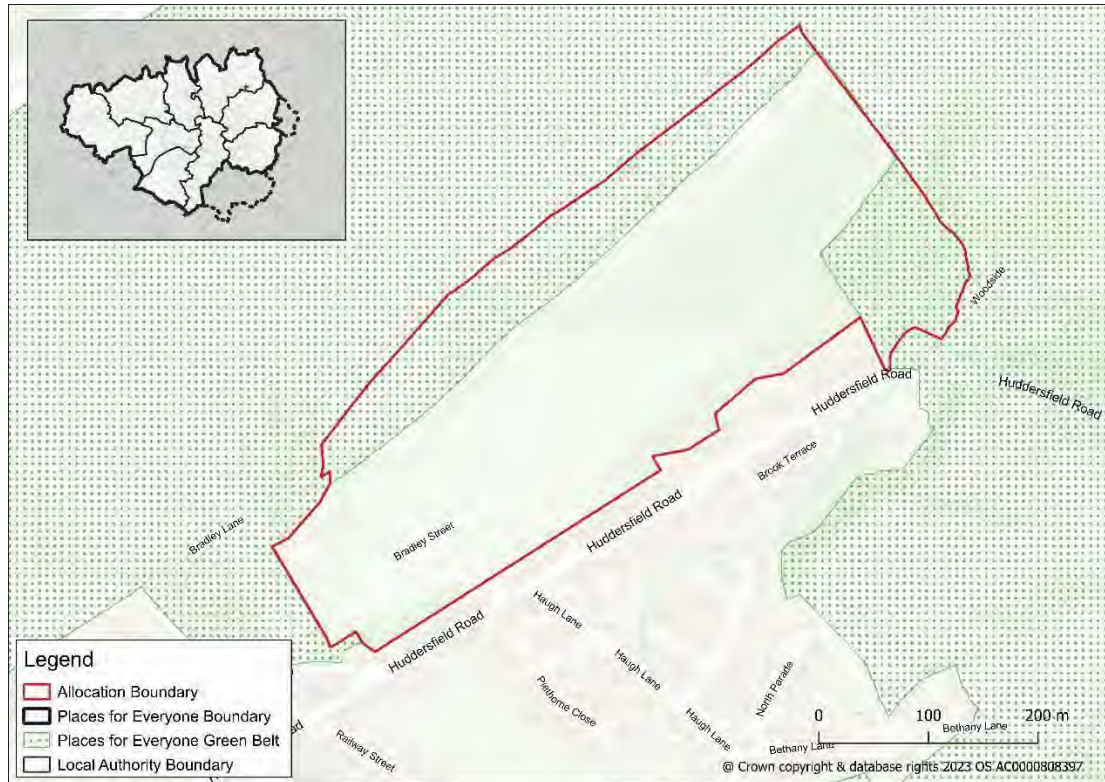

New paragraph: The allocation is identified as containing Mineral Safeguarding Areas for brickclay (99.6% of the site); sandstone (34.7%); and surface coal (99.6%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 23: Newhey Quarry Newhey Quarry

Picture 11.34 JPA 23 Newhey Quarry

Policy (MMR10)

Development at this site will be required to:

1. Deliver around 250 new homes, including higher value family housing provision of larger (4, 5 and 6 bedroom) houses, and affordable housing in accordance with relevant local plan requirements;
2. Deliver a mix of housing density, with the potential for higher density development in the south west part of the site closest to the village centre and the Metrolink stop. The northern and eastern parts of the site could include larger, higher value housing to diversify housing choice in the local area;
3. Achieve excellent design and sustainability through masterplanning and the use of design codes for the whole site to ensure comprehensive development;

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

4. Create a unique, high quality development including attractive and interesting open spaces and landscaping by carrying out any necessary re-profiling of the quarry face, which is to be retained within the Green Belt. This should incorporate water features and safeguarding and enhancing biodiversity;
- New criterion: Define and/or strengthen the Green Belt boundaries around/within the site such that they will comprise physical features that are readily recognisable and likely to be permanent;
- New criterion: Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt within and/or in the vicinity of the site in accordance with policy JP-G2;
- ~~5. Ensure that the re-profiled quarry face, which is to be retained in the Green Belt, takes the opportunity to incorporate biodiversity and attractive visual features to enhance the quality of the development;~~
- ~~6. Ensure that the design of the scheme preserves and enhances the setting of the listed St Thomas Church immediately to the west of the site, provides a buffer zone to the east of Bradley Farmhouse and avoids the use of Bradley Lane for vehicular access; Take appropriate account of relevant heritage assets, and their settings, including the listed St Thomas Church and Bradley's Farmhouse, in accordance with Policy JP-P2;~~
7. Provide publicly available car parking to serve the Metrolink stop in Newhey and, if necessary, the residents on Huddersfield Road ~~to alleviate on street parking issues;~~
- ~~8. Retain and enhance existing rights of way and create a network of safe and attractive pedestrian and cycling routes linking the development to the centre of Newhey, the nearby Metrolink stop and the existing cycle / walking network;~~
- ~~9. Provide appropriate access to electric vehicle charging infrastructure and cycle storage;~~
10. ~~Provide financial contributions to mitigate impacts on the highway network identified through a transport assessment~~ Make provision for new and

improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7. This will include retaining and enhancing existing rights of way and creating a network of safe and attractive pedestrian and cycling routes linking the development to the centre of Newhey, the nearby Metrolink stop and the existing cycling / walking network;

11. Provide ~~safe and appropriate vehicular~~ access to serve the proposed residential development and car parking via the existing access ~~ent~~from Huddersfield Road; and
12. Make financial contributions for offsite additional primary and secondary school provision to meet needs generated by the development in accordance with policy JP-P5 ~~Provide contributions to ensure that there are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities;~~

New criterion: Mitigate the recreation disturbance impacts on the South Pennine Moors SAC/SPAs with reference to JP-G5, criterion 7 (c); and

New criterion: Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMR11)

- 11.236** Newhey Quarry has been disused for a number of years but does have existing permission for mineral extraction. This allocation provides an opportunity to deliver a high-quality development incorporating a range of house types in an attractive and spectacular setting. The setting of this site will be the key driver in terms of any detailed designs and layout for the site. Given the opportunity that exists to create something exceptional, a 'traditional' suburban housing development would not be considered acceptable for this site.

Rochdale currently has a relatively small proportion of properties in Council Tax bands E and above. This development offers an opportunity to deliver a type of housing which is in short supply across the borough. The delivery of such housing will contribute to widening housing choice which will help to achieve the spatial objective of boosting northern competitiveness. This will also include the delivery of affordable housing, in line with the requirements of the Local Plan.

- 11.237** The site is in a sustainable location with easy access to the centre of Newhey and the Metrolink stop. Presently the Metrolink stop at Newhey is well used and has no dedicated parking. The development of this site will be required to deliver publicly available car parking. The size, location and design of any parking would need to be agreed between the Council, TfGM and the developer. In addition to parking to serve the Metrolink stop, the development should, if necessary, also provide parking for residents on Huddersfield Road. This would be to deal with existing issues as well as taking account of any impact accessing the development may have on existing on-street parking e.g. to ensure necessary visibility along Huddersfield Road.
- 11.238** Given the location of the site and the nature of the surrounding area, it will be important for any layout to incorporate a high-quality green and blue infrastructure network and attractive open spaces and maximise opportunities presented by the quarry face, even where re-profiling of the quarry face is necessary. This should reflect and utilise the features within the site to create attractive and usable spaces for new and existing residents. The re-profiled quarry face is to be retained within the Green Belt along with the south east corner of the site. These retained areas of Green Belt provide opportunities for enhancement of retained Green Belt in accordance with NPPF as well as providing opportunities to safeguard habitats and deliver biodiversity net gain within the site. Although the site is generally well screened from a number of points, the impact on the wider

landscape should be taken fully into account in terms of the choice of materials and landscaping.

Where land is to be removed from the Green Belt, national guidance seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. The retained Green Belt within the allocation provides some opportunities for improvements. Further potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

New paragraph: The Habitat Regulation Assessment for the Plan found that development within 7km of the SAC and SPAs will increase recreation pressures on these designated wildlife habitat sites. Consequently, development on site should mitigate the recreation disturbance impacts on the South Pennine Moors SAC/SPAs with reference to JP-G5, criterion 7 (c).

New paragraph: The allocation is identified as containing Mineral Safeguarding Areas for brickclay (99.7% of the site); sand and gravel (0.9%); sandstone (10.4%) and surface coal (99.7%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 24: Roch Valley Roch Valley

Picture 11.35 JPA 24 Roch Valley

Policy (MMR12)

Development at this site will be required to:

1. Deliver around 200 homes, including higher value family homes provision of larger (4, 5 and 6 bedroom) houses, and affordable housing in accordance with relevant local plan requirements, on the northern part half of the site adjacent to existing residential areas to be accessed primarily from Smithy Bridge Road to the east;
2. Achieve excellent design and sustainability through masterplanning and the use of design codes for the whole site to ensure comprehensive development;
3. Safeguard the land between the developed part of the site and the River Roch to contribute to measures that deliver flood alleviation benefits for the River Roch catchment between Littleborough and Rochdale town centre. **This**

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

~~should be accompanied by appropriate water management in the site itself, including sustainable drainage infrastructure (SuDS);~~

4. Reflect and respond to the special qualities and sensitivities of the key characteristics of the Pennine Foothills (West /South Pennines) landscape character type in accordance with policy JP-G1 ~~Have regard to the river valley setting in terms of the design and layout,~~ particularly in relation to the materials used~~s~~, the incorporation of green and blue infrastructure and the landscaping along the boundary of the site;
5. Protect and enhance archaeological features and where appropriate carry out archaeological evaluation for areas specified in the Roch Valley Historic Environment Assessment 2020 to understand where especially significant archaeology must be preserved in situ. ~~Proposals should be informed by the findings and recommendations of the Historic Environment Assessment (2020) in the Plan's evidence base and any updated assessment submitted as part of the planning application;~~
- ~~6. Maintain and enhance pedestrian and cycle routes through the valley both to promote active lifestyles and provide sustainable routes to local centres, services and public transport, notably Smithy Bridge railway station to the south and the bus corridor on the A58 to the north;~~
- ~~7. Provide appropriate access to electric vehicle charging infrastructure and cycle storage;~~
8. ~~Provide financial contributions to mitigate impacts on the highway network identified through a transport assessment~~ Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7. This should include maintaining and enhancing pedestrian and cycle routes through the valley both to promote active lifestyles and provide sustainable routes to local centres, services and public transport, notably Smithy Bridge railway station to the south;

9. The layout of the schemedevelopment should be designed in a way so as not to preclude the tofuture delivery of the eastern section of a proposed potential residential-relief road between Smithy Bridge Road and Albert Royds Street. This proposed new road will need to incorporating attractive, high quality pedestrian and cycle routes between Smithy Bridge Road and Albert Royds Street (A664) to the west of the site; and
10. Make financial contributions for offsite additional primary and secondary school provision to meet needs generated by the development in accordance with policy JP-P5 Provide contributions to ensure that there are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities; and
- New criterion: Mitigate the recreation disturbance impacts on the South Pennine Moors SAC/SPAs with reference to JP-G5, criterion 7 (c); and
- New criterion: Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMR13)

11.239 This site is located within the wider Roch Valley between Rochdale and Littleborough which is outside the current defined urban area but is not within the Green Belt, being currently designated as Protected Open Land. This land is adjacent to well-established areas of housing and is within an attractive setting. Some development has recently gained planning permission and the opportunity exists for more, relatively small scale, proposals which respect the river valley location and setting.

Rochdale currently has a relatively small proportion of properties in Council Tax bands E and above. This development offers an opportunity to deliver a type of housing which is in short supply across the borough. The delivery of such housing will contribute to widening housing choice which will help to

achieve the spatial objective of boosting northern competitiveness. This will also include the delivery of affordable housing, in line with the requirements of the Local Plan.

- 11.240** The Roch Valley Historic Environment Assessment identified the sensitivities that need to be taken in to account in relation to the masterplan and any subsequent planning applications for this site.
- 11.241** The area has good access to the A58 bus corridor and there are local services and facilities along this route. The development will need to provide good walking and cycling routes to the Calder Valley Railway line station at Smithy Bridge which offers good access to the city centre and other areas.
- 11.242** Although none of the land proposed for development would be at risk from flooding the land to the north of the River Roch has been identified by the Environment Agency and the Council as a location where flood water storage capacity should be safeguarded to enhance measures that deliver flood alleviation benefits for the River Roch catchment between Littleborough and Rochdale town centre. Any development should take account of this proposal and, where possible, include measures that will contribute to the ability of this location to mitigate against flood risk in the wider Roch Valley.
- 11.243** The river valley setting of the site, as part of the Pennine Foothills (West/South Pennines) landscape character type, means that the impact of any development must be taken into account in terms of any design and layout. There are some long-distance views into the site from across the valley and therefore it is important that the impact of any scheme is minimised as much as possible through the use of appropriate materials and high-quality landscaping.
- 11.244** There are proposals to deliver a residential relief road linking Smithy Bridge Road and Albert Royds Street. This route would improve traffic flow on the local route network and reduce congestion at a number of junctions in the area. This site provides an opportunity to ~~deliver~~accommodate the eastern section of this road as part of a high-quality residential layout. Any new road

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

will include attractive, high quality pedestrian and cycle routes to promote sustainable modes of transport from, to and through the site.

New paragraph: The Habitat Regulation Assessment for the Plan found that development within 7km of the SAC and SPAs will increase recreation pressures on these designated wildlife habitat sites. Consequently, development on site should mitigate the recreation disturbance impacts on the South Pennine Moors SAC/SPAs with reference to JP-G5, criterion 7 (c).

New paragraph: The allocation is identified as containing Mineral Safeguarding Areas for brickclay (99.3% of the site); sandstone (94.5%) and surface coal (99.3%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 25: Trows Farm Trows Farm

Picture 11.36 JPA 25 Trows Farm

Policy (MMR14)

Development at this site will be required to:

1. Deliver around 550 new homes, including provision of larger (4, 5 and 6 bedroom) houses, incorporating a good mix of house types including higher value family housing and provision for affordable housing in accordance with relevant local plan requirements;
2. Achieve excellent design and sustainability through masterplanning and the use of design codes for the whole site to ensure comprehensive development This will include the need for an infrastructure phasing and delivery strategy in accordance with policy JP-D1;
3. Provide access to the site primarily via Cowm Top Lane to the north Make provision for new and improved sustainable transport and highways

- infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7. This should include vehicular access to the site from Cowm Top Lane, as well as facilitating safe and attractive walking and cycling routes to the local centre of Castleton and the railway station;
- ~~4. Provide safe and attractive walking and cycling routes to the local centre of Castleton and the railway station;~~
 - ~~5. Provide appropriate access to electric vehicle charging infrastructure and cycle storage;~~
 6. Use the topography and contours within the site to deliver a well-designed scheme which incorporates good quality green and blue infrastructure that reflects and responds to the special qualities and sensitivities of the key characteristics of the Urban Fringe Farmland landscape character type in accordance with policy JP-G1, having regard to the topography of the site, its prominent location adjacent to the M62 and A627(M) motorways, and existing biodiversity and greenspace corridors;
 - ~~7. Carry out a project specific Habitats Regulation Assessment for planning applications of 50 dwellings or more;~~
 8. Define the archaeological potential of the development site through the completion of archaeological evaluation in the form of geophysics, field walking and trial trenching for areas specified in the Trows Farm Historic Environment Assessment 2020. The masterplan must detail where significant archaeology must be preserved in situ and demonstrate how the development has responded sympathetically to this;
 - ~~9. Ensure that development provides a positive visual impact given its prominent position adjacent to the M62 and A627(M) motorways;~~
 - ~~10. Provide financial contributions to mitigate impacts on the highway network identified through a transport assessment;~~

11. Incorporate appropriate noise and air quality mitigation along the M62 and A627(M) motorway corridors; ~~and~~
12. Make financial contributions for offsite additional primary and secondary school provision to meet needs generated by the development in accordance with policy JP-P5 ~~Provide contributions to ensure that there are sufficient school places to accommodate the new housing either through an expansion of existing schools or the provision of new school facilities; and~~

New criterion: Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMR15)

11.245 The site is available and deliverable for residential development and provides an excellent opportunity to widen housing choice in a sustainable location. The wider area around Castleton has a number of existing housing opportunities and this site complements these and offers the potential to regenerate Castleton in the longer term. Castleton offers a number of local services and has excellent transport links.

Rochdale currently has a relatively small proportion of properties in Council Tax bands E and above. This development offers an opportunity to deliver a type of housing which is in short supply across the borough. The delivery of such housing will contribute to widening housing choice which will help to achieve the spatial objective of boosting northern competitiveness. This will also include the delivery of affordable housing, in line with the requirements of the Local Plan.

11.246 Rail journeys into the city centre from Castleton station take only fifteen minutes and this is complemented by a quality bus corridor along Manchester Road. High-quality walking and cycling connections to Castleton

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

station and Manchester Road should therefore be ~~provided~~facilitated as part of the development. The site also has good access to the motorway network.

11.247 The topography of the site does not affect its deliverability and provides an opportunity to deliver a visually interesting scheme using the topography within the site. Where possible, the masterplan should incorporate the retention of historic field boundaries as highlighted in the Trows Farm Historic Environment Assessment 2020. This will help retain the rural character of the site and will contribute to the green infrastructure offer within the site.

11.248 There is new employment development to the north of the site at Crown Business Park but the site is large enough to achieve adequate separation between the two uses.

~~**11.249** It is considered that by 2040 this development may lead to traffic increases on the M62 motorway because of its size and relative proximity to the motorway. The M62 passes close to designated National and European sites known to be susceptible to traffic pollution, particularly nitrate deposition. As such, a project specific Habitats Regulation Assessment will be required for planning applications involving 50 or more residential units.~~

11.250 There is a local issue in terms of primary school places and this can only be resolved through the provision of a new school in the area. Therefore this development will be expected to contribute to the provision of a new school to ensure that the demand for new school places created by the development can be met.

New paragraph: The allocation is identified as containing Mineral Safeguarding Areas for brickclay (100% of the site); sand and gravel (99.5%); and surface coal (100%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

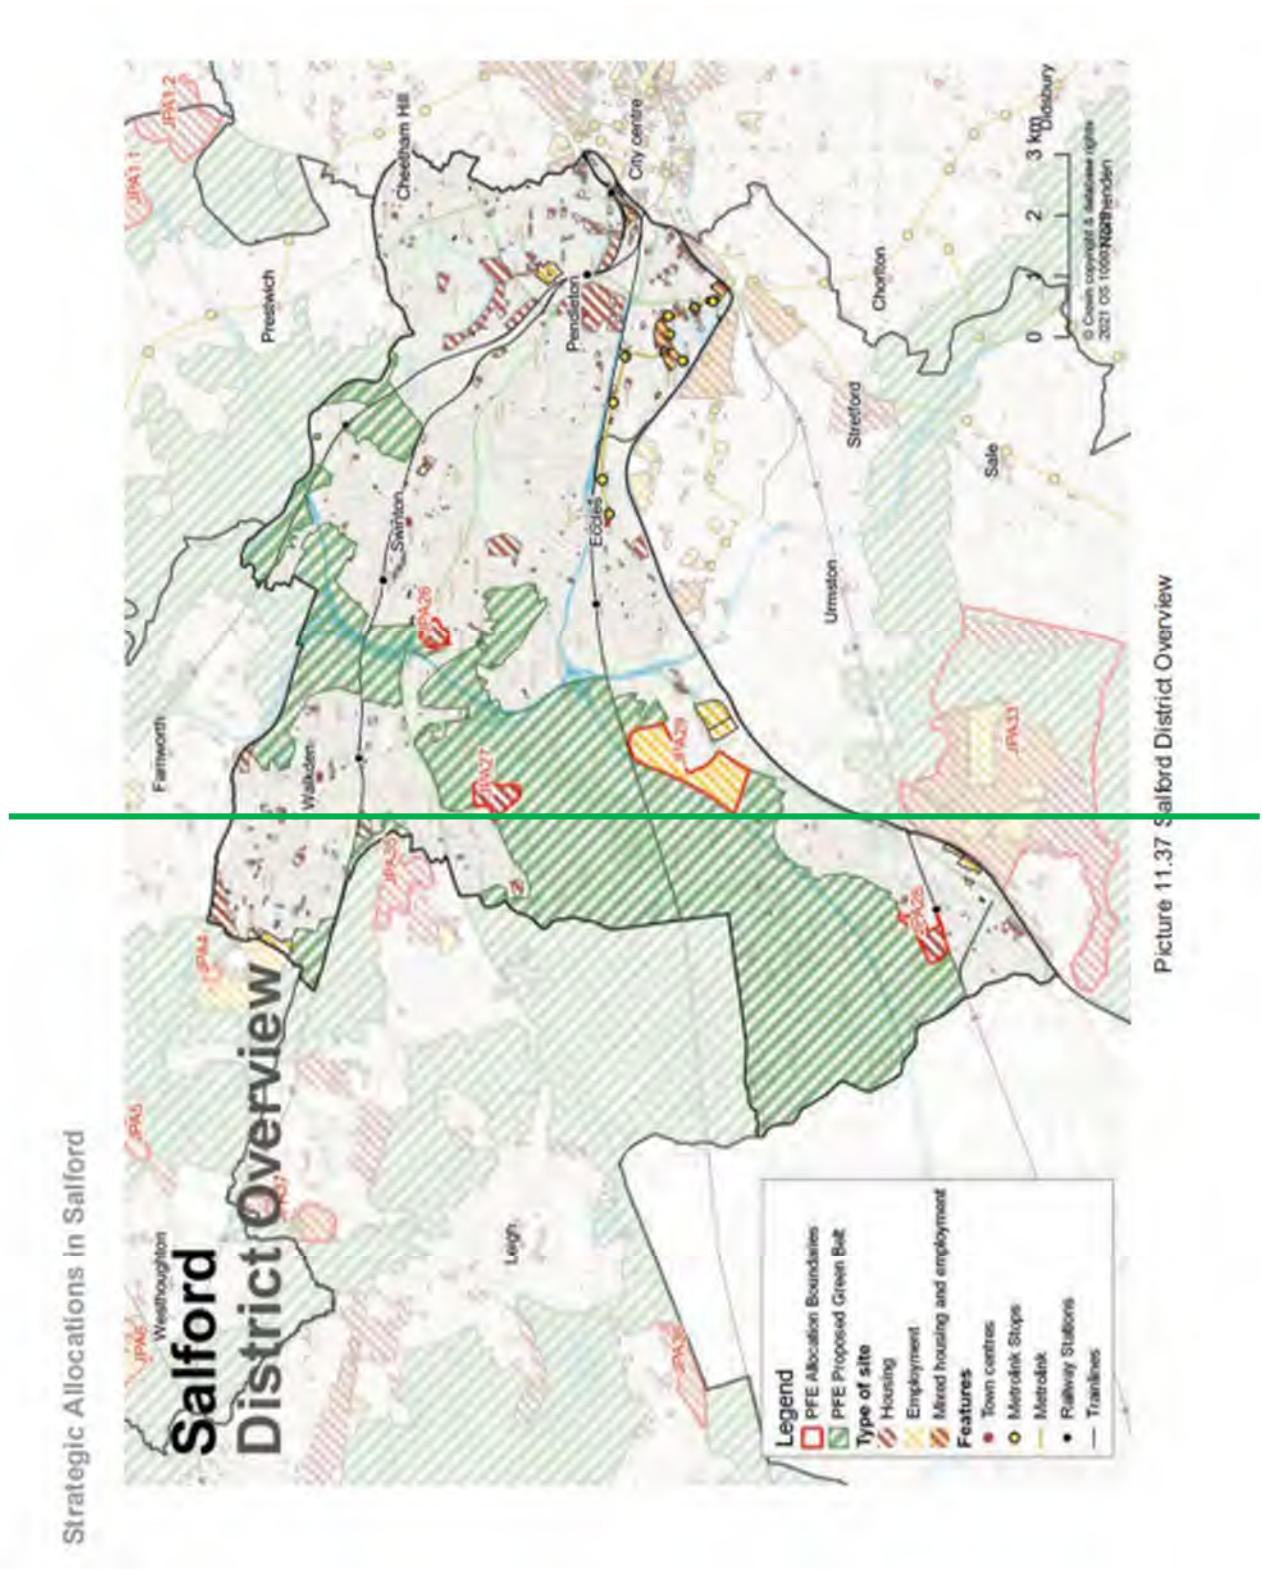

Places for Everyone Composite Plan – Modifications Version 2023

491

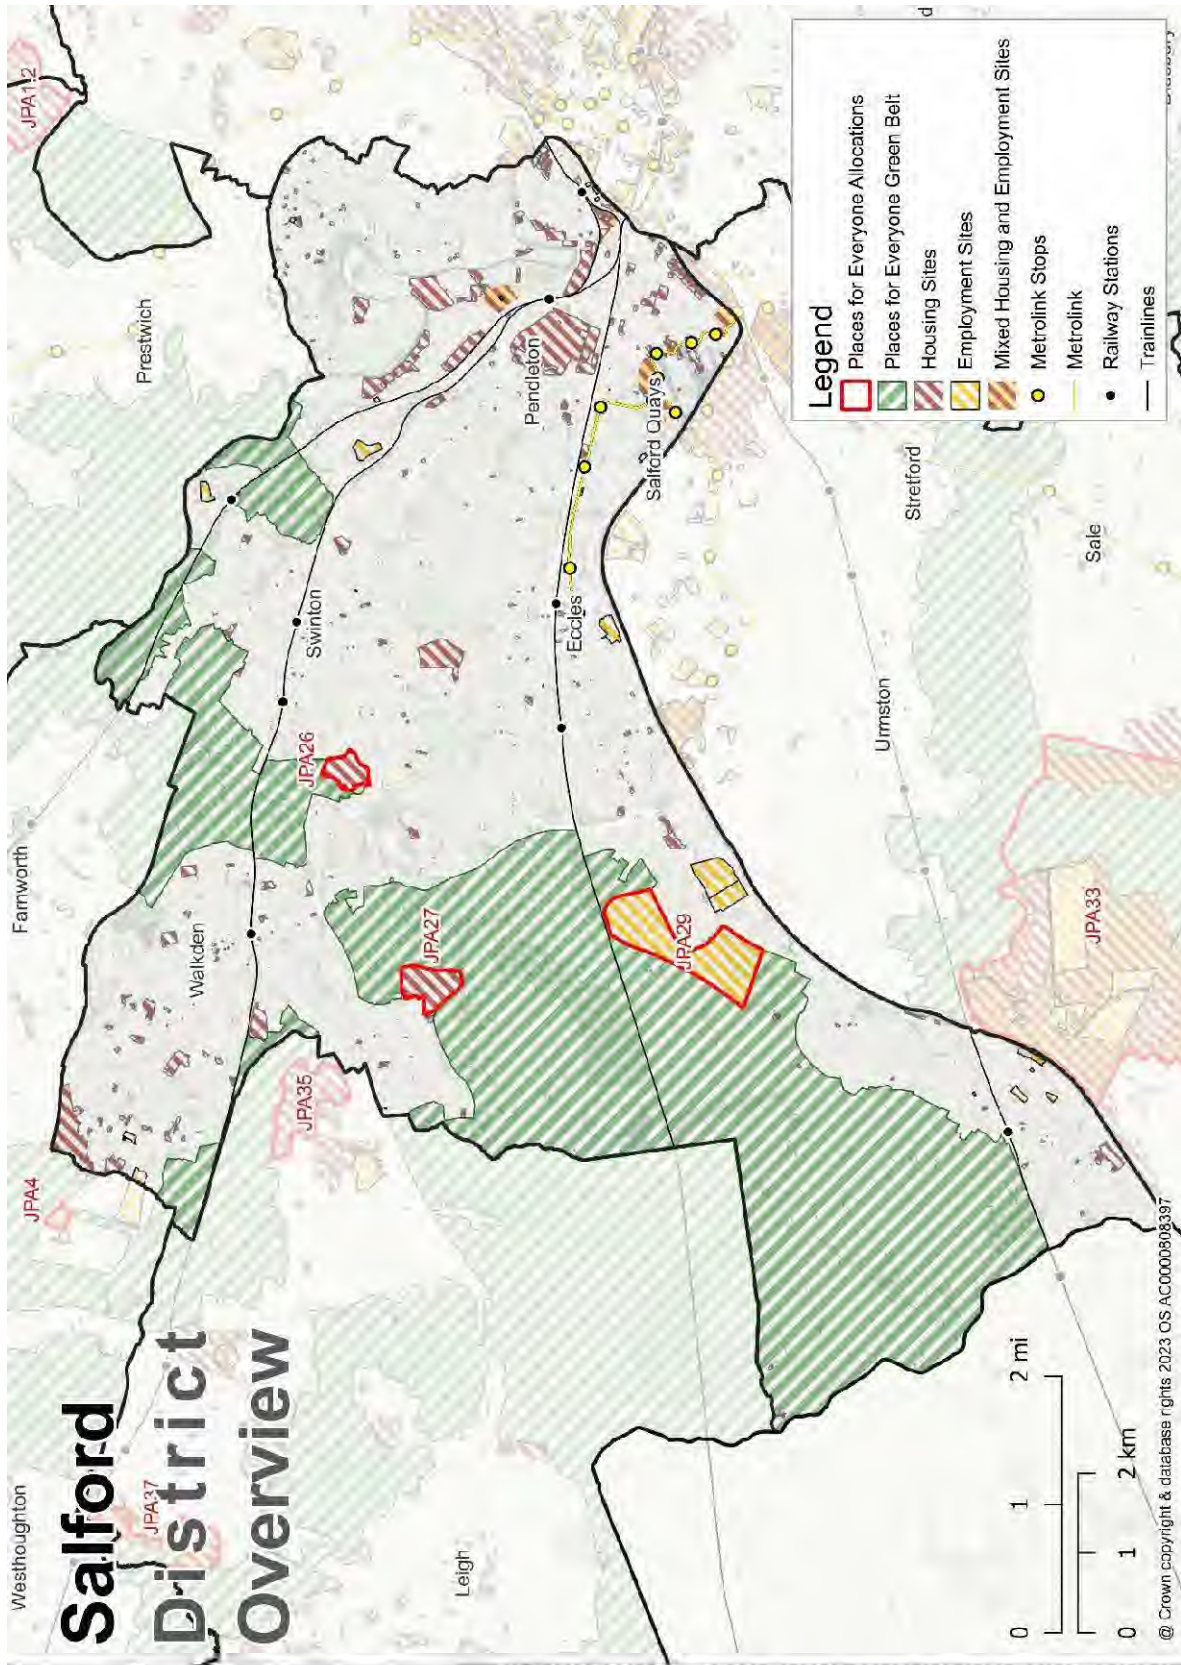

Places for Everyone Composite Plan PMM4.1 Version - Post IN36 (June 2023)

Strategic Allocations in Salford

Picture 11.37 Salford District Overview (MMS1)

Picture 11.37 Salford District Overview

Policy JP Allocation 26: Land at Hazelhurst Farm

Picture 11.38 JPA 26 Land at Hazelhurst Farm (MMS2)

Policy (MMS3)

Land at Hazelhurst to the east of the M60 and south of the A580 East Lancashire Road will be developed for around 400 dwellings.

Development of this site will be required to:

1. Be in accordance with a masterplan/framework ~~or Supplementary Planning Document (SPD)~~, consistent with a phasing and delivery strategy prepared in accordance with policy JP-D1 that has been developed in consultation with the local community and other stakeholders, and is considered acceptable by the city council, ~~or in the case of an SPD adopted by the city council;~~
2. ~~Provide an affordable housing scheme equivalent to at least 50% of the dwellings on the site (with an indicative affordable housing tenure split of 37.5% social rented, 37.5% affordable rented and 25% shared ownership), with some of this directed towards off-site provision~~ Provide at least 50% affordable housing in accordance with relevant local planning policies, with some of this directed towards off-site provision;

New criterion: Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7; including:

- ~~3.~~ a) Being designed to encourage the use of nearby public transport services, in particular the Leigh-Salford-Manchester bus rapid transit service, with high quality pedestrian and cycling routes and off-site pedestrian crossings that connect all parts of the site to nearby bus stops;
- ~~4.~~ b) Incorporating attractive public rights of way through the site which connect into the wider pedestrian and cycling network providing access to local facilities;

5. Ensure that vehicular access to the site does not have an unacceptable impact on the quality of existing residential areas;

New criterion: Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with policy JP-G2;

6. Protect the quality of watercourses through and around the site;
7. Respond to the site's location, characteristics and surroundings to take opportunities to incorporate green infrastructure that can most effectively benefit the site and the wider area;
8. Protect and enhance the Worsley Woods Site of Biological Importance to the west of the site;
9. Retain mature woodland, hedgerows, swamp and water bodies as important landscape features within the site, supporting an overall increase in its nature conservation value;
10. Support the objectives for the Great Manchester Wetlands Nature Improvement Area in accordance with local planning policies and avoid harm to protected species;

New criterion: Make provision for biodiversity in accordance with policy JP-G9

- ~~11. Incorporate sustainable drainage systems to mitigate the surface water flooding on the site, while ensuring that there is no adverse impact on the potential for flooding off-site;~~
12. Provide a buffer for the overhead power lines that run across the site, in accordance with National Grid requirements;
13. Provide mitigation to address noise and air pollution from nearby roads;
- ~~14. Include new allotment plots to meet the local standard unless suitable alternative provision can be made in the local area; and~~

New criterion: Contribute to the achievement of recreation space standards in accordance with local planning policies;

15. Set aside land to accommodate additional primary school provision, unless it can be demonstrated that sufficient additional school places will be provided off-site within the local area to meet the likely demand generated by the new housing;

New criterion: Employ methods throughout the construction process that will ensure the potential for archaeology is investigated and any finds safeguarded and properly recorded; and

New criterion: Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMS4)

11.251 The site benefits from close proximity to stops for the Leigh-Salford-Manchester bus rapid transit service, providing good public transport access to the employment and leisure opportunities in the City Centre. It is important to the sustainable development of the site that it is designed to maximise the use of those services, and this is likely to require some off-site improvements to pedestrian routes to the stops as well as influencing the on-site layout. The landscape features within and around the site are important to the character of the wider area, and their retention will help to differentiate its development and ensure a high quality residential environment. The woods to the west of the site are already designated for their nature conservation importance, and the development should secure further improvements. ~~A desk-based assessment of the site's archaeological interest will be required.~~

New paragraph: Where land is to be removed from the Green Belt, national policy seeks compensatory improvements to the environmental quality and accessibility of

remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

New paragraph: The allocation is wholly within the brick and clay Mineral Safeguarding Area as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 27: East of Boothstown

Picture 11.39 JPA 27 East of Boothstown

Policy (MMS5); (AMS1)

The area between the existing settlement of Boothstown and the RHS Garden Bridgewater site, between Leigh Road and the Bridgewater Canal, will be developed for around 300 dwellings. The site will be developed at a low density and to an exceptional quality, primarily targeting the top end of the housing market with the intention of attracting and retaining highly skilled workers within Greater Manchester.

Development of this site will be required to:

1. Be in accordance with a masterplan/framework ~~or Supplementary Planning Document (SPD)~~, consistent with a phasing and delivery strategy prepared in accordance with policy JP-D1 that has been developed in consultation with the local community and other stakeholders, and is considered acceptable by the city council, ~~or in the case of an SPD adopted by the city council;~~

2. ~~Provide an affordable housing scheme equivalent to at least 50% of the dwellings on the site (with an indicative affordable housing tenure split of 37.5% social rented, 37.5% affordable rented and 25% shared ownership), with some of this directed towards off-site provision~~ Provide at least 50% affordable housing in accordance with relevant local planning policies, with some of this directed to off-site provision;

New criterion: Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with policy JP-G2;

3. Retain Alder Wood and the other areas of mature deciduous woodland and protected trees;
4. Take opportunities to enhance the ecological value of Shaw Brook, including naturalising where practicable and retaining significant open land around it, and utilise the brook as a central landscape feature running through the site;
5. Incorporate a landscaped buffer along the eastern boundary of the site facing RHS Garden Bridgewater;
6. Provide a detailed drainage and flood risk management strategy which addresses the outcomes of the Strategic Flood Risk Assessment, ensuring that development does not increase flood risk elsewhere;
7. Incorporate high quality sustainable drainage systems as part of the green infrastructure for the site and accommodate sufficient space for any necessary flood storage, particularly in the south of the site;
8. Protect the quality of watercourses through and around the site;
9. Support the objectives for the Great Manchester Wetlands Nature Improvement Area in accordance with local planning policies and avoid harm to protected species;

New criterion: Make provision for biodiversity in accordance with policy JP-G9;

New criterion: Undertake hydrological and ground investigations to determine the extent and quality of any peat identified in the southern part of the site to

inform the potential for restoration and the comprehensive masterplanning of the site which should ensure that the loss or deterioration of any irreplaceable habitat is avoided.

New criterion: Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7; including:

- ~~10. a)~~ Ensuring good quality access by walking and cycling for all residents to services and facilities in Boothstown and the local area, bus services on the surrounding road network, the Bridgewater Canal and Chat Moss to the south, including through the provision of a high quality network of pedestrian and cycle routes throughout the site; off-site pedestrian crossings and a footpath adjacent to the site on the south side of Leigh Road;
 - ~~11. b)~~ Securing further improvements to the path on the north side of the Bridgewater Canal to provide a high quality walking and cycling route to RHS Garden Bridgewater, Worsley Village and Boothsbank Park;
12. Include a new neighbourhood equipped area of play and contribute to the achievement of recreation space standards in accordance with local planning policies;

New criterion: Make financial contributions for offsite additional primary and/or secondary provision to meet needs generated by the development, in accordance with JP-P5;

- ~~13. Retain or replace existing playing fields;~~
 - ~~14. Include new allotment plots to meet the local standard unless suitable alternative provision can be made in the local area;~~
15. Provide an easement for the significant utilities infrastructure running through and near the site;
16. Take its primary access from Occupation Road;

17. Incorporate mitigation to address noise pollution from nearby roads;
- ~~18. Take appropriate account of relevant heritage assets, and their settings, including Worsley Hall Garden Cottage; the Bothy; and Worsley Park, in accordance with policy JP-P2; Conserve and enhance the setting of nearby heritage assets and, informed by the findings and recommendations of the Heritage Assessment (2019) in the Plan's evidence base and any Heritage Impact Assessment submitted as part of the planning application process; and~~
19. Employ methods throughout the construction process that will ensure the potential for archaeology is investigated and any finds safeguarded and properly recorded; ~~and~~

New criterion: Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMS6)

11.252 This site to the east of Boothstown offers one of a small number of opportunities within Greater Manchester to deliver very high value housing in an extremely attractive environment, benefiting not only from an established premium housing market but also a location immediately next to the new RHS Garden Bridgewater which is due to open in 2021. It is essential that the development of the site fully maximises the opportunities presented by this location, and delivers the highest quality living environment. A lower density of development than would normally be required under Policy JP-H 4 'Density of New Housing' will be acceptable on this site.

New paragraph: Where land is to be removed from the Green Belt, national policy seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

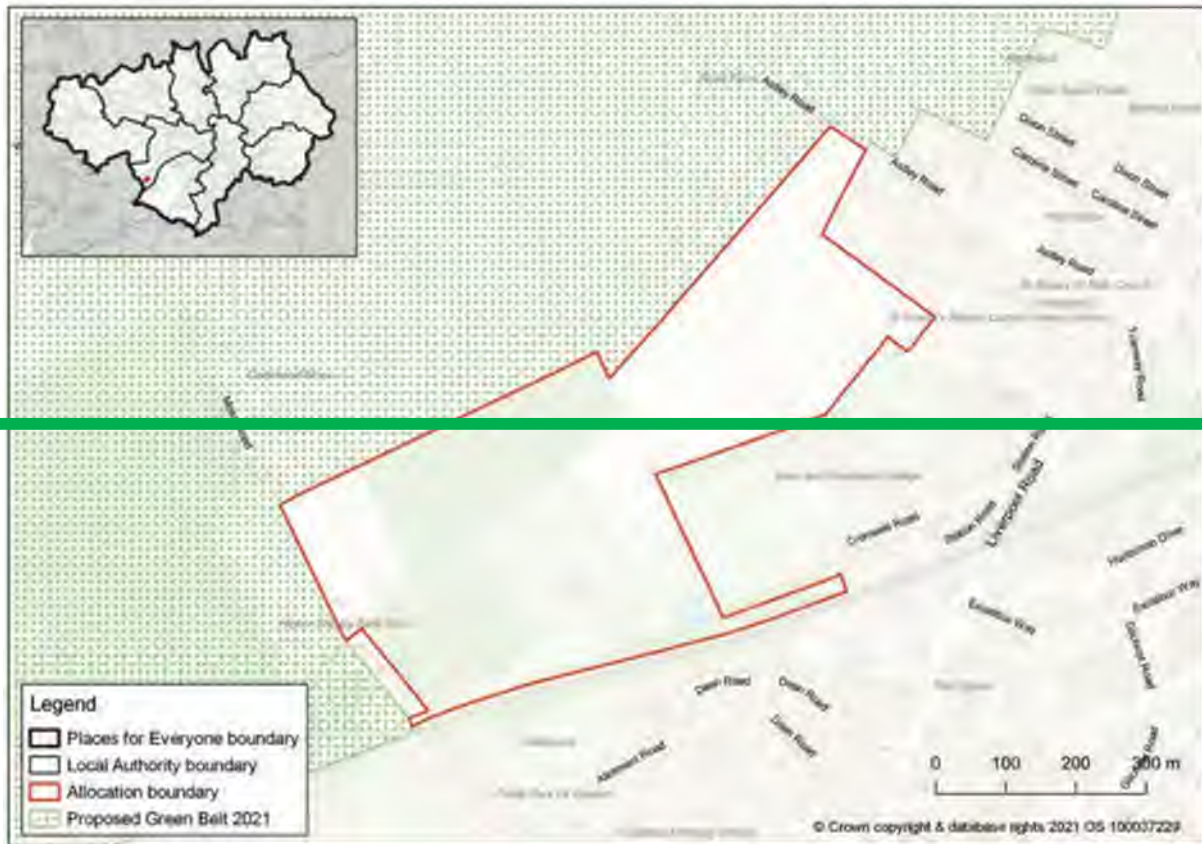

11.253 ~~Water vole and bird surveys will be required prior to any development, as will a desk-based archaeological assessment of the whole site and an historic building assessment of Boothsbank Farm.~~ The priority for any off-site nature conservation enhancements required to deliver a minimum 10% net gain in biodiversity from the development of the site is likely to be the restoration of lowland raised bog and complementary habitats in Chat Moss to the south.

New paragraph: The allocation is wholly within the brick and clay Mineral Safeguarding Area as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

New paragraph: The Natural England/Defra 'Peaty Soils Location (England)' layer is published on the Natural England website with the intention of identifying the extent of peaty soils and this shows a potential area of peat in the southern part of the site to the north of the Bridgewater Canal. There is very limited site-specific information from Natural England/Defra on the quality of the peat within the proposed allocation. As such, there will be a need to undertake hydrological and ground investigations to fully understand the extent and quality of any peaty soils in this area of the site to inform the potential for restoration and identify any areas of irreplaceable habitat where loss or deterioration should be avoided, subsequently helping to shape the comprehensive masterplanning of the site.

Policy JP Allocation 28: North of Irlam Station (MMS7)

Picture 11.40 JPA 28 North of Irlam Station

Land North of Irlam Station, between New Moss Road and Astley Road, will be developed to provide a high quality extension to the Irlam and Cadishead neighbourhood focused around Irlam Station. The site has capacity for around 800 dwellings and associated social and community uses.

Development of this site will be required to:

1. Be in accordance with a masterplan/framework or Supplementary Planning Document (SPD) that has been developed in consultation with the local community and other stakeholders, and is considered acceptable by the city council, or in the case of an SPD adopted by the city council. Central to the masterplan shall be the consideration of opportunities to restore habitats, strengthen ecological networks, and manage the carbon and hydrological implications of development, having regard to the presence of peat on this site;

- ~~2. Be supported by a robust delivery strategy, which is prepared in partnership with key stakeholders and secures the effective delivery of the full masterplan, including transport, green and social infrastructure, affordable housing and planning obligation contributions;~~
- ~~3. Be provided in the form of houses with densities increasing towards the most accessible parts of the site around Irlam Station, and include accommodation specifically targeted at older people;~~
- ~~4. Provide an affordable housing scheme equivalent to at least 25% of the dwellings, and substantially more if other funding becomes available to allow for this (with an indicative affordable housing tenure split of 37.5% social rented, 37.5% affordable rented and 25% shared ownership);~~
- ~~5. Minimise the loss of the carbon storage function of the peat and undertake a hydrological assessment in order to avoid any adverse impacts on the hydrology of Chat Moss, whilst ensuring that there is no potential for future problems of land stability or subsidence;~~
- ~~6. Incorporate a high quality network of public routes through the site, connected into the wider pedestrian and cycling network that provides access to local facilities, public transport services, New Moss Wood and Chat Moss;~~
- ~~7. Minimise impact on local highways and provide contributions to support the improvement of affected local junctions;~~
- ~~8. Include a new direct pedestrian and cycle route to Irlam Station from the west and enhance cycle parking and car parking facilities at the station;~~
- ~~9. Ensure that vehicular access to the site does not have an unacceptable impact on the quality of existing residential areas;~~

- ~~10. Integrate high levels of green infrastructure throughout the site, including retaining landscape features such as mature trees and hedgerows, so as to minimise the visual impact on the wider landscape, achieve a minimum 10% net gain in biodiversity, mitigate the environmental impacts of development and provide an attractive backdrop to walking and cycling routes;~~
- ~~11. Support the objectives for the Great Manchester Wetlands Nature Improvement Area and avoid harm to protected species;~~

- ~~12. Be supported by breeding and winter bird surveys to understand and minimise any adverse impact on bird species in this area. Surveys of potential compensation areas should also be undertaken to demonstrate that displacement into the wider landscape is possible;~~
- ~~13. Be supported by a project specific Habitats Regulations Assessment for any planning applications involving 50 or more dwellings;~~
- ~~14. Incorporate measures to mimic natural drainage through the use of green sustainable urban drainage to control the rate of surface water run-off;~~
- ~~15. Protect the quality of watercourses through and around the site;~~
- ~~16. Include a new neighbourhood park, incorporating an equipped area for play;~~
- ~~17. Include new allotment plots to meet the local standard;~~
- ~~18. Incorporate appropriate mitigation including tree planting to address issues of noise generated by the M62 motorway and the rail line;~~
- ~~19. Set aside land to provide additional school provision, unless it can be demonstrated that sufficient additional school places will be provided off-site within the local area to meet the likely demand generated by the new housing;~~
~~and~~
- ~~20. Employ methods throughout the construction process that will ensure the potential for archaeology is investigated and any finds safeguarded and properly recorded.~~

~~11.254 The site has been identified as being appropriate for development due to its location next to Irlam rail station, with services that provide easy access to the huge range of employment and leisure opportunities in the City Centre and Trafford Park. It also benefits from Northbank Industrial Park just to the south and bus routes to Port Salford and Eccles to the east.~~

~~11.255 Higher density houses will be appropriate in the most accessible parts of the site immediately around Irlam Station, in accordance with Policy JP-H 4 'Density of New Housing', helping to maximise the number of people within easy walking distance of the station.~~

~~11.256 The additional population will help to support existing shops and services in Irlam and Cadishead, such as the nearby Lower Irlam and Cadishead local centres, but the site could potentially accommodate small scale facilities to serve local needs if identified as appropriate through the masterplanning process. It is anticipated that the site's location and the dwelling types provided will be attractive to families with a resulting demand for additional school places which may, at least in part, need to be accommodated within the site.~~

~~11.257 The site is currently in multiple ownerships, and will deliver a range of complementary uses alongside residential (such as education, public open space and green infrastructure) and will require infrastructure enhancements. To ensure the allocation is deliverable, it will be essential that a delivery strategy manages different interests effectively and equitably to secure delivery of the overall masterplan. This is to avoid a situation in which initial phases do not make adequate provision to support subsequent phases, and in particular the community uses these will include.~~

~~11.258 It will be important that the design and layout of the site effectively integrates development into the existing area and promotes community cohesion. In particular, publicly accessible recreation space, facilities, and routes through the site onto Chat Moss should be positioned so as to be accessible to both new and existing residents.~~

~~11.259 Most of the site has significant depths of peat across it, meaning that there will be high costs associated with development on it. The peat on the site has been degraded due to decades of drainage and agricultural activity. Nevertheless, it still performs an important carbon storage function, and should be retained wherever possible. However, this will have to be balanced against the need to ensure that there is no risk of subsidence for development on the site or for surrounding infrastructure such as the M62 motorway. The priority for any off-site nature conservation enhancements required to deliver a minimum 10% net gain in biodiversity from the development of the site is likely to be the enhancement of New Moss Wood, and the restoration of lowland raised bog and complementary habitats~~

~~in Chat Moss to the north. Much of the site is grade 1 agricultural land, but the benefits of delivering additional housing in this accessible location are considered to outweigh the loss of the land's farming potential. Wider ecological surveys, including water vole, brown hare and birds, will be required prior to any development.~~

~~11.260 For any planning applications within the boundary of the allocation involving 50 or more dwellings, a project specific Habitats Regulations Assessment will be required given that such developments may lead to traffic increases on the M62 motorway because of their size and relative proximity to the motorway. The M62 passes close to designated European sites known to be susceptible to traffic pollution, particularly nitrate deposition.~~

~~11.261 The depths of peat heighten the potential for archaeological finds. There will be a need to undertake a detailed archaeological desk based assessment, including aerial photograph analysis, field walking, historic building assessment, and coring/evaluation trenching of the peatlands, leading to further investigations and recording in advance of and during the construction process.~~

Policy JP Allocation 29: Port Salford Extension

Picture 11.41 JPA 29 Port Salford Extension

Policy (MMS8); (AMS2)

A major expansion of Port Salford accommodating around 320,000 sqm of employment floorspace will be delivered to the north and west of Barton Aerodrome, taking advantage of the new port facilities, rail link and highway improvements that will have been completed as part of the early phases of Port Salford. This will provide one of the most well-connected and market-attractive industrial and warehousing locations in the country, with a strong focus on logistics activities ([Use Class B8](#)) but also incorporating high quality manufacturing floorspace ([Use Classes E\(g\)\(iii\) and B2](#)).

Development of this site will be required to:

1. Be in accordance with a masterplan/framework ~~or Supplementary Planning Document (SPD)~~, [consistent with a phasing and delivery strategy prepared in](#)

- accordance with policy JP-D1 that has been developed in consultation with the local community and other stakeholders, and is considered acceptable by the city council, ~~or in the case of an SPD adopted by the city council.~~ Central to the masterplan shall be the consideration of opportunities to restore habitats, strengthen ecological networks, and manage the carbon and hydrological implications of development, having regard to the presence of peat on this site;
- ~~2. Involve high levels of community engagement, including through regular liaison meetings convened by the landowner and/or developers;~~
 3. Not be commenced until the rail link, highway improvements, canal berths and container terminal associated with the permitted Port Salford scheme to the south of the A57 have been completed and are operational and there is a clear commitment to the ongoing maintenance and full operation of this transport infrastructure;
 4. Be designed to form part of an integrated facility with the Port Salford site to the south of the A57 and associated infrastructure, encouraging and enabling all occupiers to utilise the rail and water connections for freight movement;

New criterion: Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7; including:

- ~~5. a)~~ Delivering necessary highway improvements of a strategic and local nature to cater for the additional traffic created by the expansion of Port Salford in a way that is compatible with any proposals for the enhancement of the wider motorway network and ensures the safe and efficient operation of the local road network;
- ~~6. b)~~ Incorporatinge suitable HGV parking provision to cater for the area's anticipated use, including as appropriate stop over provision, and amenity facilities to serve the needs of HGV drivers;
- ~~7. c)~~ Providinge high quality walking and cycling routes from across the site to the bus stops on the A57 and the wider pedestrian and cycling network including Port Salford Greenway;

- ~~8. d) Maximising~~ links to existing public transport services and support new routes and enhanced services as appropriate, including accommodating a potential extension of the Trafford Park Metrolink line to serve Port Salford;
9. Protect the full functioning and operational safety of Barton Aerodrome;
- ~~10. Conserve and where appropriate enhance, the significance of surrounding designated and non-designated heritage assets, including by:~~
- ~~i. Designing and landscaping the development to minimise any adverse impacts on the setting of Barton Aerodrome and the listed buildings within it;~~
 - ~~ii. Where harm to Barton Aerodrome and any heritage asset within it is justified, opportunities shall be sought to better reveal the significance of the heritage asset securing repairs to them, improving public access to them and/or providing publicly accessible information about them; and~~
 - ~~iii. Being informed by the findings and recommendations of the Heritage Assessment (2019) in the Plan's evidence base and any Heritage Impact Assessment submitted as part of the planning application process.~~

New criterion: Take appropriate account of relevant heritage assets, and their settings, including Barton Aerodrome and the listed buildings within it, in accordance with policy JP-P2;

New criterion: Define and/or strengthen the boundaries of the Green Belt to the north and south of the site such that they will comprise physical features that are readily recognisable and likely to be permanent;

New criterion: Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with policy JP-G2;

- ~~11. Justify and provide full compensation for the loss of the golf course in accordance with paragraph 97 of the NPPF (February 2019) or any subsequent~~

~~revision of national planning policy~~ Manage the loss of recreation land and facilities in accordance with local planning policies;

New criterion: Make provision for biodiversity in accordance with policy JP-G9. Where appropriate and necessary, the priority for any off-site nature conservation enhancements will be the Foxhill Glen Site of Biological Importance and ecological enhancements to remaining areas of Green Belt to the site's south-western and north-eastern boundaries;

12. Incorporate high levels of landscaping, including the retention or replacement of existing woodland, hedgerows and ponds where practicable, so as to minimise the visual impact on the wider landscape (including on the remaining Green Belt separating the site from Irlam), ~~achieve a minimum 10% net gain in biodiversity~~ and mitigate the environmental impacts of development including noise;
13. Support the objectives for the Great Manchester Wetlands Nature Improvement Area in accordance with local planning policies ~~and avoid harm to protected species;~~
14. ~~Be supported by breeding and winter bird surveys to understand and~~ mMinimise any adverse impact on bird species in this area. ~~Surveys of potential compensation areas should also be undertaken to~~ and demonstrate that displacement is possible into the wider landscape;
- ~~15. Protect and enhance surrounding habitats, including the Foxhill Glen Site of Biological Importance;~~
- ~~16. Be supported by a project specific Habitats Regulation Assessment for any planning applications involving a floorspace of 1,000 sqm and above;~~
17. Mitigate the risk of surface water and groundwater flood risk, incorporating green sustainable drainage systems as part of the landscaping of the site;
- ~~18. Minimise the loss of the carbon storage function of the peat and avoid any adverse impacts on the hydrology of surrounding areas of peat/mossland, whilst ensuring that there is no potential for future problems of land stability or subsidence;~~ Undertake hydrological and ground investigations to inform the comprehensive masterplan and use of suitable construction techniques to

ensure any loss or deterioration of irreplaceable habitat, and adverse impacts on the hydrology of undeveloped areas, is minimised. Where loss or deterioration is unavoidable, a suitable compensation strategy should be identified and delivered, including the potential restoration of lowland raised bog and complementary habitats either within the site and/or in other parts of Chat Moss;

19. Protect the quality of watercourses through and around the site;
20. Protect the amenity of remaining residential properties within or on the edge of the allocation, including through the provision of appropriate landscaped buffers;
21. Provide an appropriate buffer to the Barton Moss Secure Care Centre on Barton Moss Road, to protect the privacy and amenity of residents and staff;
22. Implement an agreed strategy for dealing with its local air quality impacts;
- ~~23. Give positive consideration to the incorporation of renewable and low carbon energy infrastructure, including the potential for solar panels on buildings; and~~
24. Employ methods throughout the construction process that will ensure the potential for archaeology is investigated and any finds safeguarded and properly recorded; **and**

New criterion: Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans)

Reasoned Justification (MMS9); (AMS3)

11.262 The combination of excellent water, rail and road access, including direct shipping links to the post-panamax facility at the Port of Liverpool, will make Port Salford one of the most attractive locations in the country for industrial and warehousing development. An initial phase of development to the south of the A57 will provide around 150,000 sqm of primarily warehousing floorspace in total. Enabling its expansion to the north of the A57 to provide an additional 320,000 sqm

of floorspace will help to significantly boost the competitiveness of Greater Manchester, offering the type of site that can compete with locations internationally for investment. The transport connections mean that the location is particularly attractive for logistics activities, but high quality manufacturing could also be provided in order to diversify the employment and investment opportunities in this part of Greater Manchester. Much of the site is grade 1 agricultural land, but the unique economic opportunity provided by the location is considered to outweigh the loss of the land's farming potential.

11.263 One of the key attributes of Port Salford is its potential to remove freight from roads and move it more sustainably by rail and water, and it will be vital that any development of the site takes advantage of this by utilising the infrastructure delivered as part of the permitted scheme. Nevertheless, the expansion of Port Salford will generate significant additional traffic and highway improvements to cater for these demands should be delivered as part of the site's development. The ongoing North West Quadrant Study, commissioned by [National Highways England](#), is investigating the options for broader motorway network improvements in this area, and it will be important to coordinate the development of Port Salford with any resulting proposals.

11.264 The retention of the Green Belt to the west and east of the site will help to prevent the coalescence of Irlam and Eccles. It will be important to make positive use of this Green Belt, including by expanding the facilities at Brookhouse Playing Fields to the east, and there may be opportunities to retain/reconfigure the former golf course to the west of the site. Even with the retention of part of the Green Belt, the scale of the development is likely to have a significant visual impact, and it will be very important for it to be integrated into the landscape as far as possible, particularly through the provision of high quality green infrastructure.

New paragraph: [Where land is to be removed from the Green Belt, national policy seeks compensatory improvements to the environmental quality and accessibility of](#)

remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

11.265 Barton Aerodrome (~~City Airport and Heliport~~) to the south of the site is an important facility for Greater Manchester, as well as being a significant heritage asset. The expansion of Port Salford will need to be designed so that it does not adversely impact on its successful functioning, taking into account any safeguarding requirements for flight paths, and ensure that any harm to the setting of the heritage assets is minimised. In particular, careful consideration will need to be given to the siting and orientation of units, the choice and colour of materials, and the landscaping scheme adopted.

New paragraph: The allocation was found sound at examination on the basis that, in principle, the public benefit arising from the development proposed would be likely to clearly outweigh the loss or deterioration of an irreplaceable habitat and that a suitable compensation strategy was capable of being delivered. The policy seeks to ensure that detailed development proposals are consistent with that conclusion.

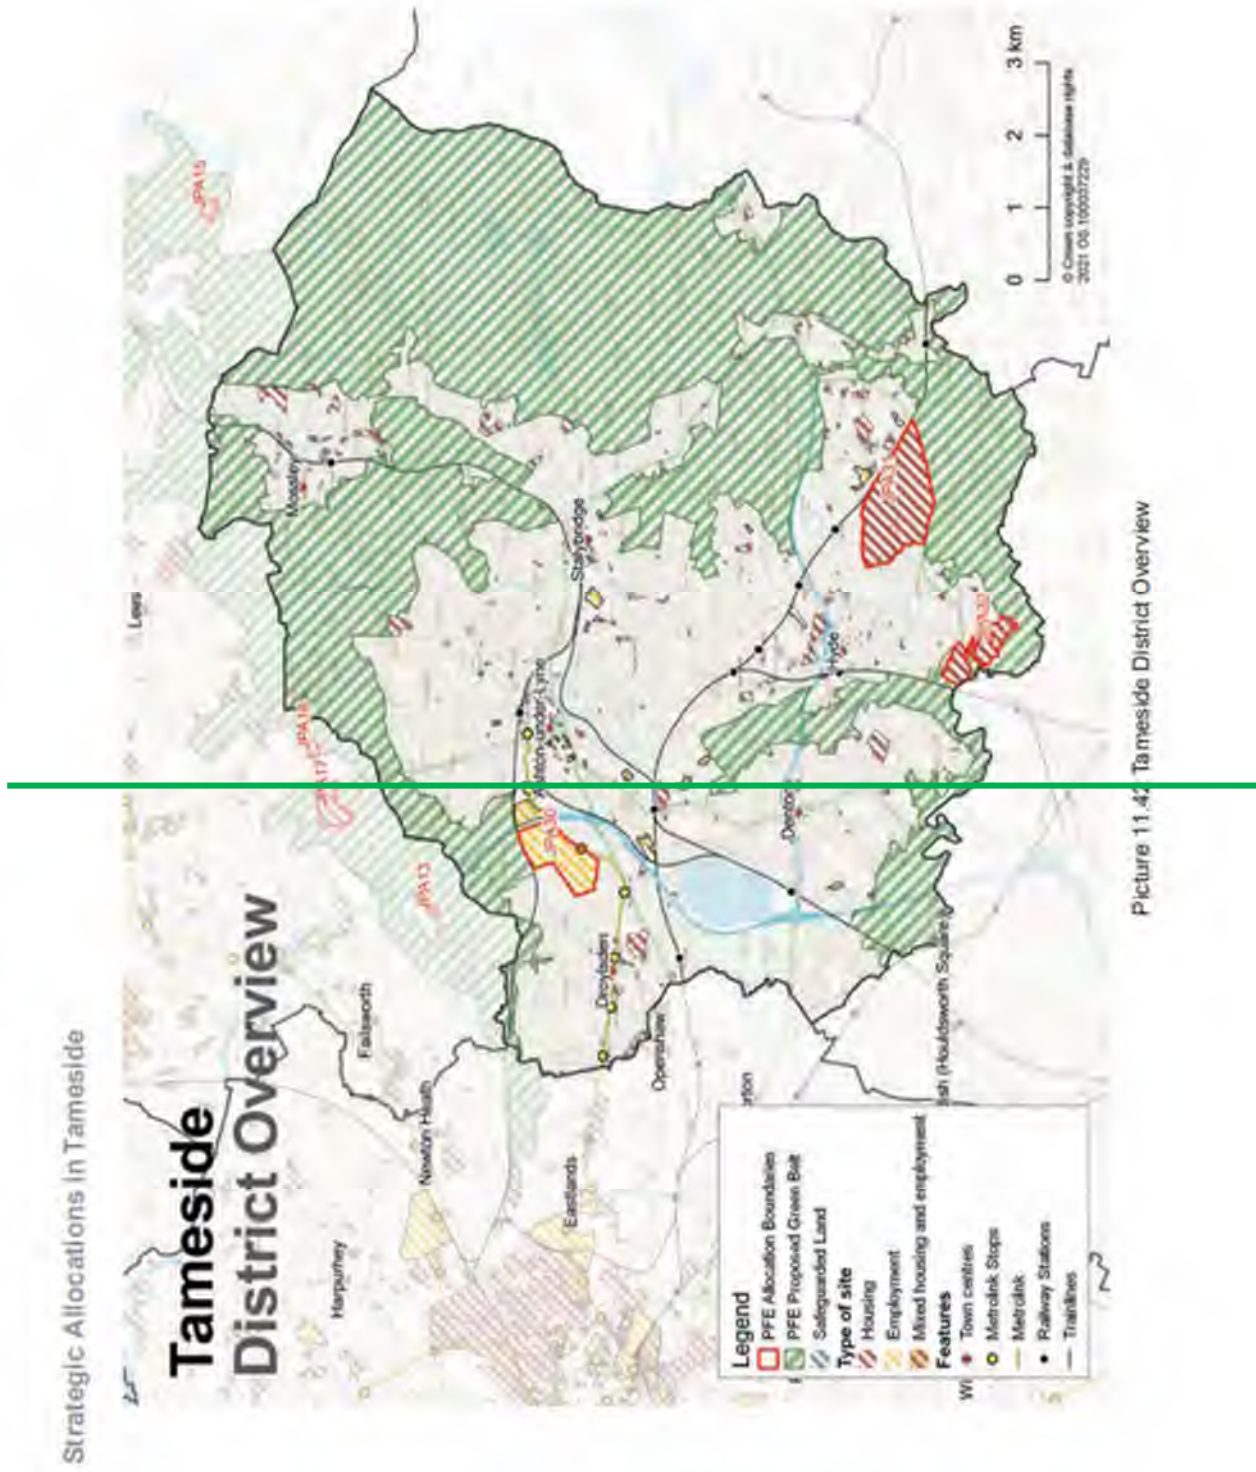

11.266 The priority for any off-site nature conservation enhancements required to deliver a minimum 10% net gain in biodiversity from the development of the site is likely to include the enhancement of Foxhill Glen Site of Biological Importance, ecological enhancements to remaining areas of Green Belt to the site's south western and north eastern boundaries and the restoration of lowland raised bog and complementary habitats in Chat Moss to the north. Wider ecological surveys, including water vole, brown hare, great crested newts and birds, will be required prior to any development. ~~For any planning applications within the boundary of the allocation involving a floorspace of over 1,000 sqm, a project specific Habitats Regulations Assessment will be required given that such developments may lead to traffic increases on the M62 motorway because of their size and relative proximity to the motorway. The M62 passes close to designated European sites known to be susceptible to traffic pollution, particularly nitrate deposition.~~

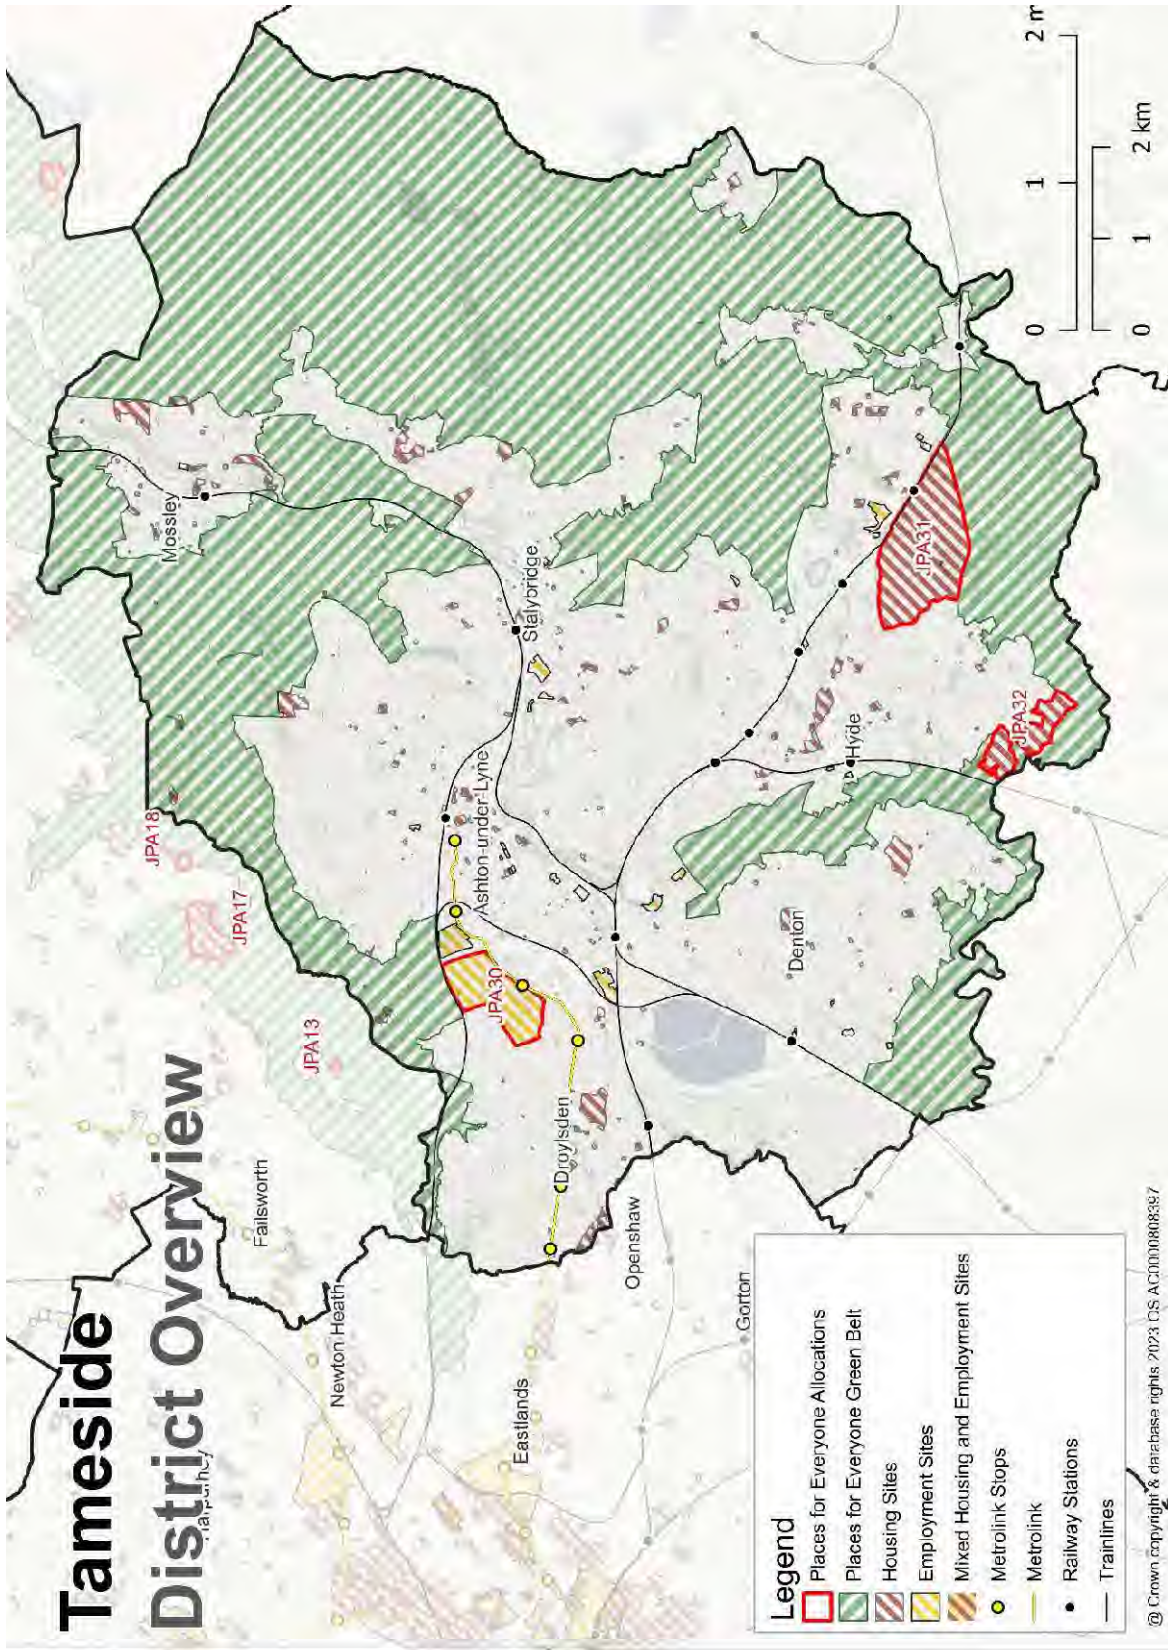

11.267 The depths of peat heighten the potential for archaeological finds. There will be a need to undertake a detailed archaeological desk-based assessment, including aerial photograph analysis, field walking, historic building assessment, and coring/evaluation trenching of the peatlands, leading to further investigations and recording in advance of and during the construction process.

New paragraph: The allocation is identified as containing a Mineral Safeguarding Area for brick and clay (4.6%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Strategic Allocations in Tameside

Picture 11.42 Tameside District Overview (MMTa1)

Policy JP Allocation 30: Ashton Moss West

Picture 11.43 JPA 30 Ashton Moss West

Policy (MMTa2)

Development of this site will be required to:

1. Deliver around 160,000 square metres of employment floorspace, **primarily** within the E(g)(ii) - Research and Development, E(g)(iii) - Light **and** Industrial and B2 - General Industrial use classes;
2. Be in accordance with a comprehensive masterplan, phasing strategy and design code approved by the Local Planning Authority for the whole site, developed through engagement with the local community, Council and other appropriate stakeholders, in accordance with policy JP-D1;
- ~~3. Be informed by a detailed earthworks and remediation strategy;~~
4. Be informed by an assessment of **Employ methods throughout the development process that will ensure the potential for** archaeology is investigated as appropriate;

- ~~5. Take an integrated and co-ordinated approach to infrastructure to support the scale of the whole development;~~
- ~~6. Ensure that architecture is innovative and creative, while respecting and integrating into the surrounding landscape, creating a high quality and contemporary employment location;~~
7. Ensure the character of, and interface between, new and existing development, including the setting of neighbouring heritage assets and surrounding residential dwellings and gardens, are sensitively designed and acknowledged by development proposals;
- ~~8. Provide developer contributions towards transport and other infrastructure as deemed appropriate;~~
- ~~9. Ensure employment, education and training opportunities are available for residents within the local area both through construction phases and upon completion;~~
- ~~10. Provide access into the site from the A6140 Lord Sheldon Way;~~
- New** Make provision for vehicular access into the site from the A6140 Lord Sheldon Way and for new and improved sustainable transport and highways infrastructure, having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;
- ~~11. Ensure highways are designed to accommodate access to the rail line to the northern boundary and land is set aside in that location to potentially accommodate provision for a future rail station;~~
- New** Ensure the masterplan layout is designed so as not to preclude highway access to the rail line to the northern boundary and land is set aside in that location to accommodate provision for a potential future rail station;
- ~~12. Ensure proposals create a safe, walkable and green development;~~

- ~~13. Ensure active travel is promoted to be the most attractive form of local transport through a clear network and hierarchy of legible and attractive streets, footpaths and cycle ways;~~
- ~~14. Protect and enhance key landscape and ecological features, including trees, watercourses and ponds;~~
- New** Make provision for biodiversity, including taking appropriate account of priority species and ecological features in accordance with policy JP-G9;
- ~~15. Deliver a high-quality public realm that incorporates street tree planting;~~
16. Incorporate and enhance as attractive and desirable routes existing public rights of way including that between the community of Littlemoss to the north and the Metrolink stop at Ashton Moss to the south and the active travel route along the site's western edge;
- ~~17. Be designed to enhance connectivity to existing communities in the locality alongside key assets such as: schools, cycle and walking routes, public transport services and Daisy Nook Country Park; and~~
- ~~18. Set aside land for a range of public open spaces, such as: natural space and amenity space, in accordance with the Council's most up to date Open Space Review.~~
- New** Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with policy JP-G2;
- New** Use suitable construction techniques to ensure that any impact on the carbon storage function of deep peat is minimised; and
- New** Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMTa3)

- 11.268** Having previously been identified as part of a potential World EXPO site, Ashton Moss West represents a major opportunity for Tameside and the east of Greater Manchester to deliver approximately 160,000 square metres of high-quality employment floorspace. This should **primarily** fall within the E(g)(ii) - Research and Development, E(g)(iii) - Light **and** Industrial and B2 - General Industrial use classes and be aimed at delivering facilities suitable for identified areas of economic strength and key **growth economic** sectors within Tameside and Greater Manchester: life sciences; health technologies, advanced manufacturing and materials science/fabrication.
- 11.269** The site's urban fringe setting with proximity to existing employment, leisure and retail opportunities, excellent transport connections with close proximity to rail, Metrolink and motorway, as well as a dark fibre network and surrounding green and blue infrastructure set the framework for a unique opportunity and logical sustainable extension to the existing Ashton Moss employment area.
- 11.270** Additionally, Tameside's existing manufacturing and engineering base is currently constrained by the supply of sites available, curtailing potential growth and stifling regeneration and churn within the borough's industrial spaces. The site is therefore critical to provide expansion opportunities for existing businesses operational within Tameside as well as providing the facilities required to compete for inward investment.
- 11.271** To deliver a high-quality development it will be important to have a clear and comprehensive masterplan, phasing strategy and design code; which should carefully consider matters of character, including orientation, materials and soft landscaping in respect of the setting of neighbouring heritage assets¹³⁸ and surrounding residential properties.
- 11.272** This should be accompanied by an integrated approach to delivering infrastructure, including for example: a site wide drainage strategy, green,

¹³⁸ Historic Environment Assessment, GMSF Land Allocations, Tameside, Ashton Moss West, University of Salford

blue and grey infrastructure (including utilities provision), high speed broadband connectivity through fibre to the premises and electric vehicle charging infrastructure, either by providing charging points or through installing appropriate ducting to allow for future provision.

- 11.273** A site wide drainage strategy will need to incorporate sustainable drainage systems with the aim of achieving greenfield run-off rates as a means of combating surface water flood risk and contributing towards climate change resilience. Furthermore, the site overlaps with the current Air Quality Management Area along the M60 corridor to the east and Lord Sheldon Way to the south will need to be considered in the masterplanning process. This could take the form of appropriate buffering as part of the green infrastructure network across the site.
- 11.274** One of the principle challenges to developing Ashton Moss West is the [underlying peat overlain with a](#) volume of placed material, alongside other geotechnical considerations. Contamination testing, gas monitoring, and ground investigation and analysis will therefore be required to produce an earthworks assessment and remediation strategy prior to development taking place.
- 11.275** A programme of archaeological assessment should also inform the masterplanning approach to the site, allowing for archaeological evaluation to determine the extent and condition of potential remains. This will help to establish where significant archaeology should be preserved in situ through sympathetic planning or where the archaeology can be removed, but first of all recorded, and opportunities that may exist to create public interpretation information relating to the sites historical past.
- 11.276** Architectural design solutions should deliver an innovative and creative development that is also resilient to climate change, using, where possible, zero-carbon development and energy-positive technology (i.e. producing more energy than is consumed), thus creating a high quality and

contemporary employment development that also benefits from access to a range of sustainable modes of transport.

- 11.277** Development of the site has the potential to create a range of educational, training and employment opportunities for local residents during the construction phases and upon completion. Given the proximity of this site to areas of high deprivation in Ashton-under-Lyne, Droylsden and east Manchester the proposed development will help to bring about long-term benefits to these communities by providing locally accessible employment.
- 11.278** To enhance and optimise the excellent transport connectivity of the site further, there is the potential opportunity to deliver a new rail station on the Manchester to Leeds line that will service the employment allocation and the Droylsden and Audenshaw areas. Provision should therefore be included in the site's masterplan for the safeguarding of land along the northern boundary of the allocation to accommodate a potential new rail station, access and car parking.
- 11.279** It is important that existing landscape and ecological features alongside other green infrastructure, habitats and assets of biological importance are protected, managed and enhanced as part of the comprehensive masterplan of the site, taking into account guidance in the Landscape Character Assessment.¹³⁹
- 11.280** The development will seek to minimise the number of trips made by private car to and from the site by connecting with adjacent residential areas, employment locations, leisure uses and centres, via a network of safe walking and cycling routes and public open spaces. Priority should be given to cycle and pedestrian routes that provide direct access to the existing and proposed cycle and pedestrian network, together with opportunities for linking access to public transport.

¹³⁹ Greater Manchester Landscape Character Assessment [GM Landscape Character & Sensitivity Report](#)
Places for Everyone Composite Plan – Modifications Version 2023

11.281 The existing active travel route to the site's western edge should be retained and enhanced and could form part of a landscape buffer to existing residential properties. In addition, consideration should be given to a number of existing informal routes and public rights of way to the site's northern edge that could also benefit from improved connectivity and enhancement, including access to Metrolink.

11.282 While the site is in a sustainable and accessible location, being well served by public transport and with convenient access to junction 23 of the M60, new vehicular access will be required into the site off the A6140 Lord Sheldon Way, integrating with the existing and proposed pedestrian and cycle network.

11.283 Alongside the intention that the development will ensure active travel becomes the most attractive form of local transport, it will also contribute towards active and healthy communities through on-site open space provision, in accordance with the Council's most up to date Open Space Review, and through the provision of safe and accessible connections to neighbouring public open spaces, including Daisy Nook Country Park.

New Where land is to be removed from the Green Belt, national planning policy seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects related to this site have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

New The allocation is identified as containing Mineral Safeguarding Areas for brick clay (92.4% of the site) and surface coal (92.4% of the site) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 31: Godley Green Garden Village

Picture 11.44 JPA 31 Godley Green Garden Village

Policy (MMTa4)

Development of this site will be required to:

1. ~~Construct around 2,350 new homes;~~
2. ~~Deliver homes across a range of types and tenures in accordance with the Council's most up-to-date Housing Needs Assessment;~~
- New** Make provision for around 2,350 new homes across a range of types and tenures and having regard to the Council's most up-to-date Housing Needs Assessment. Affordable housing will be provided in accordance with the Council's affordable housing requirements;
3. Ensure Garden City principles are enshrined throughout;
4. Be in accordance with a comprehensive masterplan, phasing strategy and design code approved by the Local Planning Authority for the whole site,

Places for Everyone Composite Plan – Modifications Version 2023

528

developed through engagement with the local community, Council and other appropriate stakeholders, in accordance with policy JP-D1;

5. Be informed by an assessment of Employ methods throughout the development process that will ensure the potential for archaeology is investigated as appropriate;
- ~~6. Take an integrated and co-ordinated approach to infrastructure to support the scale of the whole development;~~
- ~~7. Ensure that architecture is innovative and creative, while respecting and integrating into the surrounding landscape, creating aspirational and desirable communities in which to live;~~
8. Ensure the character of, and interface between, new and existing development including the setting of heritage assets and dwellings and gardens, particularly those within the site, are sensitively designed and acknowledged by development proposals;
- ~~9. Establish two connected villages, each with their own distinct identity and served by a local hub offering flexible workspace opportunities and a range of community, retail, cultural and leisure uses, separated by Godley Brook as a central landscape feature;~~
- New** Establish two connected villages, each with their own distinct identity and separated by Godley Brook as a central landscape feature. Each village should be served by a local hub offering flexible workspace opportunities and a range of appropriate community, retail, cultural and leisure uses required to serve local needs;
10. Deliver higher density residential development around Hattersley train station in accordance with JP-H4, and around the village hubs;
- New** Make financial contributions for offsite additional primary and/or secondary school provision to meet needs generated by the development and, where appropriate, set aside land within the allocation to facilitate the expansion of Alder High School in accordance with policy JP-P5, to be completed in an early phase of development;

- ~~11. Provide developer contributions towards education, health, transport and other infrastructure as deemed appropriate;~~
- ~~12. Ensure employment, education and training opportunities are available for residents within the local area, both through construction phases and upon completion;~~
- ~~13. Set aside land to accommodate additional education provision, unless it can be demonstrated that sufficient additional school places will be accommodated off site within the local area to meet the likely demand generated;~~
- ~~14. Provide access into the site from the A560 Mottram Old Road including improved cycling and pedestrian facilities along the site's frontage;~~
- New** Make provision for vehicular access into the site from the A560 Mottram Old Road, and for new and improved sustainable transport and highways infrastructure, having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;
- ~~15. Ensure highways are designed to accommodate bus routing and provision of services are sought within the early phases of development;~~
16. Provide, in ~~the~~an early phase of development, a pedestrian, cycle, equine (multi-user and accessible to all) bridge connecting to Hattersley and be designed and located to encourage use of public transport services at Hattersley train station;
- ~~17. Ensure neighbourhoods are green, walkable and safe places;~~
- ~~18. Ensure active travel is promoted through a clear network and hierarchy of legible and attractive streets, footpaths and cycle ways;~~
19. Incorporate and enhance as attractive and desirable routes, existing public rights of way ~~and~~, the Trans Pennine Trail, and linkages to local assets such as Hyde town centre, schools, public transport services and Werneth Low Country Park;

- ~~20. Be designed to enhance connectivity to existing communities in the locality, alongside key assets such as Hyde town centre, schools, cycle and walking routes, public transport services and Werneth Low Country Park;~~
- ~~21. Protect and enhance the designated Sites of Biological Importance of Werneth Brook and Brookfold Wood;~~
- New** Make provision for biodiversity, including taking appropriate account of the designated Sites of Biological Importance of Werneth Brook and Brookfold Wood, priority species and ecological features in accordance with policy JP-G9;
- ~~22. Protect and enhance key landscape and ecological features, including protected trees and woodlands, areas of Ancient Woodland, other mature trees, hedgerows, cloughs, watercourses and ponds;~~
- ~~23. Deliver a high quality public realm that incorporates street tree planting; and~~
- ~~24. Set aside land for a range of public open spaces, such as: parks and gardens, natural space, amenity space, play provision and allotments, in accordance with the Council's most up to date Open Space Review.~~
- New** Mitigate the recreation disturbance impacts on the South Pennine Moors SAC/SPAs with reference to policy JP-G5, criterion 7 (c);
- New** Strengthen the boundary of the Green Belt along the A560 such that it will comprise physical features that are readily recognisable and likely to be permanent;
- New** Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt within the vicinity of the site in accordance with policy JP-G2; and
- New** Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMTa5)

11.284 Godley Green presents a significant opportunity to realise the ambitious vision of delivering a new large-scale settlement of around 2,350 new homes in the south of the borough, adjacent to the residential neighbourhoods of Godley and Hattersley. The site's semi-rural setting, together with an existing network of green and blue infrastructure set the framework for an attractive, high quality and accessible settlement that will be enshrined in Garden City principles¹⁴⁰ and is a logical sustainable extension to the existing urban area.

New The Garden City principles, as set out by the Town and Country Planning Association, are a distillation of the key elements that have made the Garden City model of development so successful. Together, these principles form an indivisible and interlocking framework for the delivery of high-quality places. The Garden City principles are:

- Land value capture for the benefit of the community.
- Strong vision, leadership and community engagement.
- Community ownership of land and long-term stewardship of assets.
- Mixed-tenure homes and housing types that are genuinely affordable.
- A wide range of local jobs in the Garden City within easy commuting distance of homes.
- Beautifully and imaginatively designed homes with gardens, combining the best of town and country to create healthy communities, and including opportunities to grow food.
- Development that enhances the natural environment, providing a comprehensive green infrastructure network and net biodiversity gains, and that uses zero-carbon and energy-positive technology to ensure climate resilience.
- Strong cultural, recreational and shopping facilities in walkable, vibrant, sociable neighbourhoods.

¹⁴⁰ Understanding Garden Villages

- Integrated and accessible transport systems, with walking, cycling and public transport designed to be the most attractive forms of local transport.

New National policy states delivering new homes can often be best achieved through planning for larger scale development, such as by following Garden City principles. These principles are an overarching concept that should be considered as appropriate at all stages of the development process, in particular during the masterplanning and design code phase.

11.285 The site is in close proximity to both rail and motorway connections, with Hattersley train station located adjacent and Godley train station to the north. There is potential to enhance the existing sustainable travel opportunities, through the provision of tram-train services along the Glossop line and new bridge access to Hattersley is required, connecting to the surrounding community. The ongoing regeneration in Hattersley will be reinforced by the development at Godley Green, providing positive outcomes and opportunities in an area of deprivation.

11.286 The new homes will assist in meeting the full range of housing needs and aspirations through a diversity of housing opportunities, including through the provision of older persons housing and plots for custom and self-build. ~~There is potential to deliver innovative and creative development that is energy efficient and resilient to climate change using, where possible, zero-carbon and energy-positive technology (i.e. producing more energy than is consumed).~~

11.287 ~~Older persons housing and plots for custom and self-build will also feature as important elements of the housing mix in the Garden Village and some should be affordable to those on lower and middle incomes seeking this type of opportunity.~~ There is potential to deliver innovative and creative development that is energy efficient and resilient to climate change using, where possible, zero-carbon and energy-positive technology (i.e. producing more energy than is consumed).

- 11.288** To deliver a high-quality development it will be essential to have a clear and comprehensive masterplan, phasing strategy and design code, which should carefully consider matters of character, appearance and setting, including for example: orientation, materials, building heights, densities, boundary treatments, soft landscaping and enhanced screening. Such considerations will be particularly important in respect to historic buildings of local significance and existing residential properties.
- 11.289** This should be accompanied by an integrated approach to delivering infrastructure. This should include for example: a site wide drainage strategy, green, blue and grey infrastructure (including utilities provision), high speed broadband connectivity through fibre to the premises and electric vehicle charging infrastructure, either by providing charging points or through installing appropriate ducting to allow for future provision.
- 11.290** In addition, the site wide drainage strategy will need to incorporate sustainable drainage systems with the aim of achieving greenfield run-off rates as a means of combatting surface water flood risk and contributing towards climate change resilience.
- 11.291** The Historic Environment Assessment¹⁴¹ has identified a number of non-designated built heritage assets within the site as having a degree of local heritage significance. In recognition of this, built heritage in the form of historic routes, field boundaries, hedgerows, farmsteads, the agricultural hamlet at Greenside and villas within their existing residential plots along Green Lane should be retained where possible and could be incorporated into the masterplan to help create a sense of place and link with the site's past.
- 11.292** A programme of archaeological assessment should inform the masterplanning approach to the site, allowing for archaeological evaluation to determine the extent and condition of potential remains, in particular around Greenside, east of Brookfold Wood, Green Lane and north of

¹⁴¹ Historic Environment Assessment, GMSF Land Allocations, Tameside, Godley Green, University of Salford
Places for Everyone Composite Plan – Modifications Version 2023

Brookfold. This will help to establish where significant archaeology should be preserved in situ through sympathetic planning or where the archaeology can be removed but first of all recorded. There may also be the opportunity to involve the community in such activities through excavation projects, for example at Dove House Farm.

11.293 Building for a Healthy Life¹⁴², as the Government endorsed industry standard for well-designed homes and neighbourhoods, should be used alongside Garden City principles to guide the masterplanning and development of Godley Green as an attractive, functional and sustainable settlement with the aim of achieving Building for a Healthy Life commendation.

11.294 Due to the site's semi-rural location, topography and landscape character; architectural and landscape design solutions must be innovative and creative; taking into account guidance in the Landscape Character Assessment.¹⁴³ This could include integration into the surrounding landscape, particularly along development edges, and the interface between new and existing development along Green Lane and the historic hamlet of Greenside on Mottram Old Road, particularly where the rural landscape and views contribute to the significance of farmsteads and where buffer zones could retain a sense of openness.

11.295 Godley Brook as a key landscape feature, which runs south-north through the centre of the site, will effectively divide Godley Green into two smaller villages, each served by a local hub offering a range of community and retail facilities in which residents can meet most of their day-to-day needs, although it is not envisaged that convenience retail floor space should exceed 500 sqm gross external area within each local hub.

11.296 As part of the hubs, there may be potential to develop a hotel or elderly care facilities which would take advantage of the co-location with the proposed

¹⁴² Building for a Healthy Life - A Design Toolkit for neighbourhoods, streets, homes and public spaces [Building for a Healthy Life](#)

¹⁴³ Greater Manchester Landscape Character Assessment [GM Landscape Character & Sensitivity Report](#)

retail and community facilities and in particular the proximity to Hattersley train station.

11.297 Flexible workspace could be delivered within the site close to Hattersley train station, providing employment opportunities for residents. With the proximity of two railway stations, public transport, motorway connectivity and active travel network, it is envisaged that a wide range of employment opportunities located around Hyde, Tameside and across the city region will be accessible to Garden Village residents.

11.298 Although the site is within a sustainable and accessible location, new access and linkages into the site off the A560 Mottram Old Road together with the existing and proposed pedestrian and cycle network will be necessary. Fibre to the premises will also enable opportunities for home working as a sustainable alternative to traditional commuting.

11.299 It is also important that landscape, habitat and ecological features such as: Werneth Brook and Brookfold Wood Sites of Biological Importance (Ancient Woodland); protected trees and woodlands, hedgerows; together with the array of ponds and watercourses and other green infrastructure, are protected and managed as part of the comprehensive masterplan of the site to maintain and enhance their conservation status and prevent habitat fragmentation.

New [The Habitat Regulation Assessment for the Plan found that development within 7km of the SAC and SPAs will increase recreation pressures on these designated wildlife habitat sites. Consequently, development on site that is within 7km of the SAC and SPAs should mitigate the recreation disturbance impacts on the South Pennine Moors SAC/SPAs with reference to JP-G 5, criterion 7 \(c\).](#)

11.300 Open space and recreation areas comprise an essential element of both Garden City and Building for a Healthy Life principles, contributing to the

creation of healthy and active communities. Sport England’s Active Design¹⁴⁴ and other age friendly design principles¹⁴⁵ should be incorporated as far as possible in the masterplanning of the site to encourage active lifestyle behaviour and play at all ages.

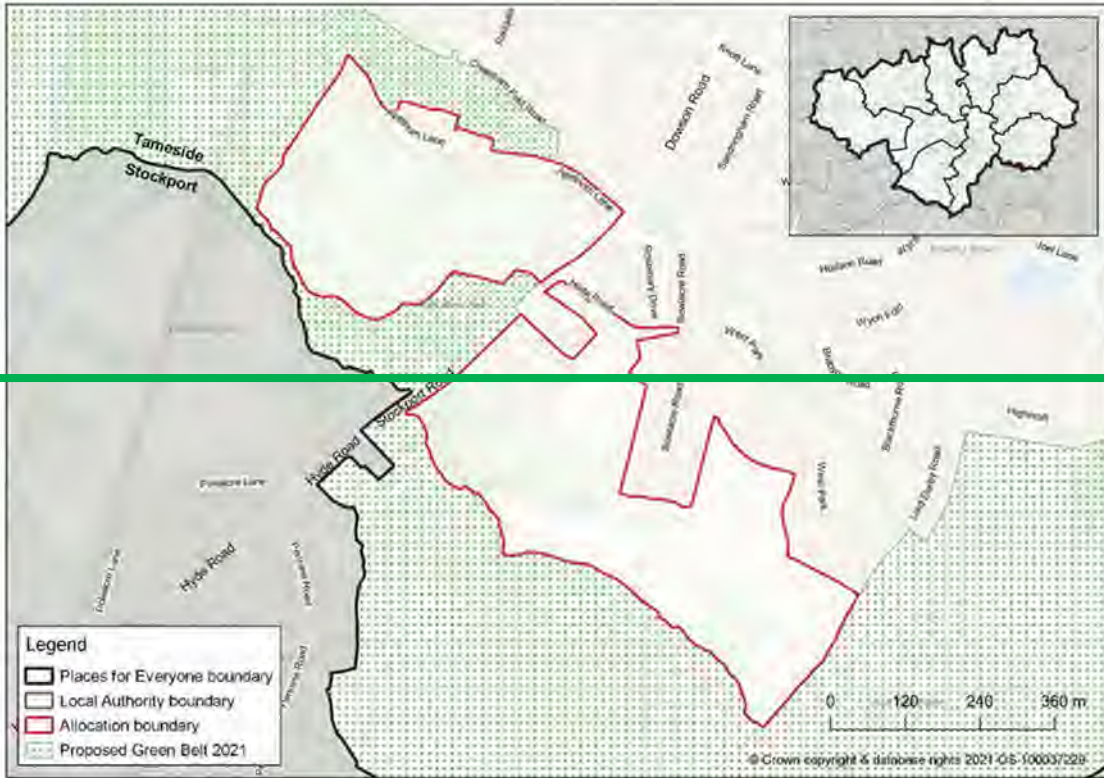

- New** Strengthening the Green Belt boundary is an important requirement for the proposed southern boundary along the A560. For example, strengthening the boundary could be through additional woodland planting. This will increase the future distinction between retained Green Belt land and the allocation.
- New** Where land is to be removed from the Green Belt, national policy seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).
- New** The allocation is identified as containing Mineral Safeguarding Areas for brick clay (22.5% of the site), sand and gravel (29.0% of the site) and sandstone (1.7% of the site) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 32: South of Hyde

Picture 11.45 JPA 32 South of Hyde (MMTa6)

Policy (MMTa7)

Development of this site will be required to:

- ~~1. Construct around 440 new homes;~~
- ~~2. Deliver homes across a range of types and tenures in accordance with the Council's most up-to-date Housing Needs Assessment;~~
- New** Make provision for around 440 new homes, across a range of types and tenures having regard to the Council's most up-to-date Housing Needs Assessment. Affordable housing will be provided in accordance with the Council's affordable housing requirement;
- ~~3. Ensure Garden City principles are enshrined throughout;~~
4. Be in accordance with a comprehensive masterplan, phasing strategy and design code approved by the Local Planning Authority for the whole site, developed through engagement with the local community, Council and other appropriate stakeholders, in accordance with policy JP-D1;
- ~~5. Take an integrated and co-ordinated approach to infrastructure to support the scale of the whole development;~~
- ~~6. Ensure that architecture is innovative and creative, while respecting and integrating into the surrounding landscape, creating aspirational and desirable communities in which to live;~~
7. Ensure the character of, and interface between, new and existing development including the setting of heritage assets and dwellings and gardens, particularly those within the site are sensitively designed and acknowledged by development proposals;
8. Ensure that development edges successfully integrate into the adjoining landscape;
9. Deliver lower density residential development as the site elevation increases toward its eastern most extent at Lord Derby Road, having regard to the

Landscape Character and Sensitivity Assessment within the plan's evidence base, and the guidance and opportunities identified within the Pennine Foothills (Dark Peak) character type;

10. ~~Sustain and enhance both designated and non-designated~~ Take appropriate account of relevant heritage assets, and their settings, including the Grade II* listed Apethorn Farmhouse and Grade II Pole Bank Hall, in accordance with policy JP-P2. This shall include delivery of the sensitive restoration and long-term future use of the Grade II* listed Apethorn Farmhouse within an early phase of development so as to facilitate its removal from the Heritage at Risk Register;
11. Proposals should be informed by the findings and recommendations of the Historic Environment Assessment (2020) in the Plan's evidence base ~~and any updated Historic Impact Assessment(s) submitted as part of the planning application process;~~
- ~~12. Deliver the sensitive restoration and long-term future use of the Grade II* listed Apethorn Farmhouse and complex within an early phase of development together with its removal from the Heritage at Risk Register;~~
13. ~~Make financial Provide developer~~ contributions towards education, health, transport and other infrastructure ~~as deemed appropriate for offsite~~ additional primary and/or secondary provision to meet needs generated by the development in accordance with JP-P5;
- ~~14. Ensure employment, education and training opportunities are available for residents within the local area through the construction phases;~~
- New** Make provision for vehicular access into the east and west parcels from the A560 Stockport Road, and for new and improved sustainable transport and highways infrastructure, having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;
- ~~15. Provide access to each east and west parcel from the A560 Stockport Road;~~

- ~~16. Ensure neighbourhoods are green, walkable and safe places;~~
- ~~17. Ensure active travel is promoted to be the most attractive form of local transport through a clear network and hierarchy of legible and attractive streets, footpaths and cycle ways;~~
18. Incorporate and enhance as attractive and desirable routes, existing public rights of way, including the Cown Edge Way and linkages to other recreational assets, including the Peak Forest Canal, Trans Pennine Trail and Werneth Low Country Park;
- ~~19. Be designed to enhance connectivity to existing communities in the locality, alongside key assets such as Hyde town centre, schools, cycle and walking routes, public transport services, the Peak Forrest Canal, Trans Pennine Trail and Werneth Low Country Park;~~
- ~~20. Protect and enhance the designated Pole Bank Sites of Biological Importance;~~
- New** Make provision for biodiversity, including taking appropriate account of the designated Pole Bank Site of Biological Importance, priority species and ecological features in accordance with policy JP-G9;
- ~~21. Protect and enhance key landscape and ecological features including protected trees and woodlands, areas of Ancient Woodland, other mature trees, hedgerows, cloughs, watercourses and ponds;~~
- ~~22. Deliver a high-quality public realm that incorporates street tree planting; and~~
- ~~23. Set aside land for a range of public open spaces such as; natural space, amenity space, play provision and allotments in accordance with the Council's most up to date Open Space Review.~~
- New** Define and strengthen the boundaries of the Green Belt between the eastern development parcel and the adjoining retained Green Belt to the south such that they will comprise physical features that are readily recognisable and likely to be permanent;

- New** Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with policy JP-G2;
- New** Make provision for flood risk and drainage having regard to the findings of, and indicative mitigation identified in, the Strategic Flood Risk Assessment within the plan's evidence base and prepare a site-wide drainage strategy; and
- New** Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMTa8)

- 11.301** The two parcels that make up the south of Hyde allocation represent an opportunity to deliver housing in advance of the larger more complex sites contained in Places for Everyone due to their smaller scale. The sites' semi-rural setting, opportunity to secure the future of a grade II* listed building together with an existing network of green infrastructure, set the framework for an attractive, high quality and accessible neighbourhood ~~that enshrines Garden City principles and~~ is a logical, sustainable, extension to the suburb of Gee Cross.
- 11.302** Apethorn Fold is a small group of historic agricultural buildings, straddling Apethorn Lane to the north of the allocation. The Grade II* listed Apethorn Farmhouse is considered to be a rare surviving example in Tameside of a medieval cruck framed open hall house, which once comprised domestic accommodation to the north and shippon used to house animals to the south, separated by a cross passage. The farmhouse which dates back to the C.15 and altered during the C.17-C.19 owes its survival in part to its timber truss construction.¹⁴⁶ The farmhouse is currently unoccupied and has

¹⁴⁶ Historic Environment Assessment, GMSF Land Allocations, Tameside, South of Hyde, University of Salford
Places for Everyone Composite Plan – Modifications Version 2023

been identified on Historic England's Heritage at Risk Register, where its current condition has been recorded as very bad.

- 11.303** Development of the site is therefore expected to secure the restoration and long-term future reuse of the Apethorn Farmhouse and complex. A Heritage Impact Assessment will be required to support the masterplanning of the site and any subsequent planning applications, demonstrating how the proposal will support the retention, enhancement and long-term future use of Apethorn Farmhouse and complex and ensure the proposed new development has a positive impact on the heritage asset's conservation and setting.
- 11.304** It is expected that full restoration of the farm complex, including those features which are considered to be curtilage listed, will commence in the early phase of development and this be set out in the masterplan and phasing strategy. It is noted that this should include the curtilage listed building to the north side of Apethorn Lane which will remain within the Green Belt. In doing so, condition surveys, an archaeological presence on site and watching brief are all likely to be needed.
- 11.305** The new homes will assist in meeting the full range of housing needs and aspirations through a diversity of housing opportunities, including older persons housing and plots for custom and self-build. ~~There is potential to deliver innovative and creative development that is energy efficient and resilient to climate change using, where possible, zero-carbon and energy-positive technology (i.e. producing more energy than is consumed).~~
- 11.306** ~~Older persons housing and plots for custom and self-build could also feature as elements of the housing mix and some should be affordable to those on lower and middle incomes seeking this type of opportunity. There is potential to deliver innovative and creative development that is energy efficient and resilient to climate change using, where possible, zero-carbon and energy-positive technology (i.e. producing more energy than is consumed).~~

- 11.307** To deliver a high-quality development it will be important to have a clear and comprehensive masterplan, phasing strategy and design code, which should carefully consider matters of character, appearance and setting. This includes for example: orientation, materials, building heights, densities, boundary treatments, soft landscaping and enhanced screening. Such considerations will be particularly important in respect to heritage assets and existing residential properties.
- 11.308** This masterplanning should be accompanied by an integrated approach to delivering infrastructure. This should include for example: a site wide drainage strategy, green, blue and grey infrastructure (including utilities provision), high speed broadband connectivity through fibre to the premises and electric vehicle charging infrastructure, either by providing charging points or through installing appropriate ducting to allow for future provision.
- 11.309** Taking into account the findings of the most recent strategic flood risk assessment, the site wide drainage strategy will need to incorporate sustainable drainage systems with the aim of achieving greenfield run-off rates as a means of combatting surface water flood risk and contributing towards climate change resilience.
- 11.310** A number of buildings and features have been identified within the site as having heritage significance. In recognition of this, built heritage, in the form of heritage assets, historic routes, field boundaries, hedgerows and woodland should be retained where possible and could be incorporated into the masterplan to help create a sense of place and link with the site's past.
- 11.311** A programme of archaeological assessments should inform the masterplanning approach, allowing for archaeological evaluation to determine the extent and condition of potential remains particularly around heritage assets. This will help to establish where significant archaeology should be preserved in situ through sympathetic planning or where it can be removed but first of all recorded.

11.312 Due to the sites' semi-rural location, topography and landscape character; architectural and landscape design solutions must be innovative and creative; taking into account guidance in the Landscape Character Assessment.¹⁴⁷ This could include: integrating into the surrounding landscape, particularly along development edges, at the interface between new and existing development and as the site ascends in elevation toward Lord Derby Road. This is also particularly relevant where the rural landscape and views contribute to the significance of heritage assets and where buffer zones could retain a sense of openness.

New Strengthening the Green Belt boundary is an important requirement for the proposed eastern part of the allocation and the retained Green Belt land to the south. For example, strengthening the boundary could be through additional woodland planting. This will help to increase the future distinction and permanence between the retained Green Belt land and the allocation.

New Where land is to be removed from the Green Belt, national policy seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

11.313 Building for a Healthy Life¹⁴⁸ as the Government endorsed industry standard for well-designed homes and neighbourhoods should be used to guide the masterplanning and development, ~~alongside Garden City principles,~~ as an attractive, functional and sustainable settlement with the aim of achieving Building for a Healthy Life commendation.

11.314 Neighbourhoods will be linked via safe walking and cycling routes, including existing public rights of way such as the Cown Edge Way, and public open spaces, all of which will respect and integrate into the surrounding

¹⁴⁷ Greater Manchester Landscape Character Assessment [GM Landscape Character & Sensitivity Report](#).

¹⁴⁸ Building for a Healthy Life - A Design Toolkit for neighbourhoods, streets, homes and public spaces [Building for a Healthy Life](#).

landscape. Cycle and pedestrian routes within the development area should provide direct connection to the existing and proposed cycle and pedestrian network, Woodley Railway Station and Hyde town centre where possible.

- 11.315** Development of this site has the potential to create education, training and employment opportunities during the construction phase for local residents, thus bringing about benefits to these communities by providing locally accessible employment.
- 11.316** Although the site is in a sustainable and accessible location, being well served by a high frequency bus service between Ashton-under-Lyne and Stockport, with convenient access to the Marple rail line at Woodley and the highway network; new access and linkages into the site off the A560 Stockport Road together with the existing and proposed pedestrian and cycle network will be necessary.
- 11.317** The GM Rail Prospectus articulates the future vision for rail with longer trains and more frequent services, and TfGM has committed in Our Five-Year Transport Delivery Plan to explore the options for delivering a Metro/tram-train service on the Marple line with the potential to deliver greatly increased capacity and connectivity. Therefore, enhancing pedestrian and cycle connectivity between the site and the nearby Woodley station will be critical in improving a move away from private car use.
- 11.318** It is also important that landscape, habitat and ecological features such as: Pole Bank Site of Biological Importance (Ancient Woodland); protected trees and woodlands; hedgerows; together with the array of watercourses and other green infrastructure are protected and managed as part of the comprehensive masterplan of the sites to maintain and enhance their conservation status and prevent habitat fragmentation.
- 11.319** Open space and recreation areas comprise an essential element of **both Garden City and** Building for a Healthy Life principles, contributing to the

creation of healthy and active communities. Sport England's Active Design¹⁴⁹ and age friendly design principles¹⁵⁰ should be incorporated as far as possible in the masterplanning of the site to encourage active lifestyle behaviour and play at all ages.

New The allocation is identified as containing Mineral Safeguarding Areas for brick clay (66.4% of the site), surface coal (66.4% of the site) and sandstone (13.7% of the site) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 33: New Carrington

Picture 11.47 JPA 33 New Carrington

Picture 11.48 New Carrington Indicative Allocation Policy Plan(MMTr2)

Policy (MMTr3)

Development of this site will be required to:

1. Be in accordance with a masterplan ~~or Supplementary Planning Document (SPD)~~ that has been developed in consultation with the local community and approved by the Local Planning Authority. The masterplan must include a phasing and delivery strategy, as required by policy JP-D1. Central to the masterplan shall be the consideration of opportunities to restore habitats, strengthen ecological networks, and manage the carbon and hydrological implications of development. It should also have regard to the anticipated Hynet North West Hydrogen pipeline (as relevant). The masterplan will be prepared in partnership with key stakeholders to ensure the whole allocation site is planned and delivered in a coordinated and comprehensive manner with proportionate contributions to fund necessary infrastructure;

New criterion: Have regard to the relevant Health and Safety Executive's consultation zones and Land Use Planning advice;

Residential Development

2. Deliver around 5,000 units, ~~of which 4,300 will be delivered in the plan period at Carrington / Partington and Sale West; , in the following distinct character areas, as set out on the Allocation Policy Plan:~~
 - ~~Carrington Village — approximately 600 units~~
 - ~~Sale West — approximately 1,450 units~~
 - ~~East Partington — approximately 2,600 units~~
 - ~~Warburton Lane — approximately 420 units~~
3. ~~Deliver high quality residential units which are accessible, integrated with the existing community and well designed to create a genuine sense of place;~~

~~4. Demonstrate how the constraints on land to the west of Warburton Lane can be addressed. Planning applications will need to demonstrate how the site will:~~

~~i. Integrate into and reflect the character of the historic landscape; avoiding areas of the highest heritage significance;~~

~~ii. Integrate successfully into Partington and the wider New Carrington allocation, both in terms of physical linkages and the ability to understand the wider area as a distinct place.~~

~~Development proposals which do not address these constraints will not be accepted;~~

~~5. Deliver a range of house types, sizes, layouts and tenures through a place-led approach based on each of the Character Areas in the New Carrington Masterplan / SPD and the Trafford Local Plan;~~

6. Deliver residential development at the following average densities, recognising the distinct characteristics of each area (as set out on the Indicative Allocation Plan (Picture 11.48)):

- Central Carrington ~~Village~~ – average 35 dph
- Sale West – average 40 dph
- East Partington East – average 35 dph, increasing to an average of 40 dph in areas close to the existing Partington urban area. Higher density development at an average of 55 dph will be appropriate close to the local centre;
- Warburton Lane – average 25 dph

~~7. Provide Make provision for a minimum of 15% affordable housing across the New Carrington allocation to be provided in accordance with local policy requirements. In determining appropriate affordable housing provision regard should be had to the distinct Character Areas within the New Carrington site which each reflect different housing markets. The New Carrington~~

~~Masterplan / SPD and the Trafford Local Plan will provide additional guidance on appropriate affordable housing contributions for each of the Character Areas~~

8. Make appropriate ~~specific~~ provision for self-build/custom-build plots, subject to local demand as set out in the Council's self-build register;

Employment development

9. Deliver around 350,000 sqm (gross) of employment opportunities for B2 / B8 uses; ~~industry and warehousing as set out on the Allocation Policy Plan~~
- ~~10. Create legible streets and spaces within the employment area with attractive buildings that respond positively to the landscape and provide accessible linkages to residential areas and local / neighbourhood centres;~~
- ~~11. Create employment and training opportunities for local people in particular through the construction phase, to be set out in a Local Labour Agreement in accordance with Local Plan policies;~~

Delivery and phasing

- ~~12. Coordinate the phasing of development with the delivery of infrastructure on the site, ensuring sustainable growth at this location;~~
- ~~13. Make a proportionate contribution, by means of an equalisation mechanism, to infrastructure delivery. Detailed requirements will be set out in the masterplan/SPD;~~

Transport, Integration and Accessibility

14. ~~Deliver accessible streets which prioritise cycling, walking and public transport over the private car;~~ Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;

15. Deliver a network of safe cycling and walking routes through the allocation and linking to surrounding areas, including utilising the Carrington rides, improving the Trans Pennine Trail and creating new/enhancing existing Public Rights of Way and bridleways;
16. Deliver connected neighbourhoods which successfully link with existing communities at Carrington, Partington and Sale West, overcoming barriers such as the Red Brook and the disused railway line between Timperley and Irlam, to successfully integrate development;
17. Provide an east / west ~~Utilise the route of the disused railway line through the site as a~~ strategic sustainable transport corridor across the site from the Manchester Ship Canal to Sale to link with ~~providing links from New Carrington to~~ the wider area ~~as part of the Carrington Greenway scheme which includes reinstatement of the Cadishead viaduct for pedestrians and cyclists, as well as contributing to future improved east/west public transport linkages;~~
18. Contribute to new / enhanced bus services and ~~D~~deliver bus priority infrastructure within the site and, where appropriate, on bus routes linking to the site;
19. Facilitate delivery of ~~Deliver and directly contribute to~~ the Carrington Relief Road to provide an alternative route to the A6144 and a strategic link through Carrington, incorporating provision for pedestrians, cyclists and bus priority measures.

~~Other highway links to access development parcels will also be required, including:~~

- i. ~~Southern link connecting the A6144 Warburton Lane and the A6144 Manchester Road (via either Moss Lane or Broadway), crossing the Red Brook and providing a local route around the Partington urban area~~

- ii. ~~Eastern link — connecting development parcels in the East Partington area to Isherwood Road, crossing the rail line and linking through the employment parcels~~
 - iii. ~~Sale West link — from the Carrington Relief Road and extending south through the Sale West development parcel and linking to Firs Way.~~
20. ~~Make the necessary improvements to the Strategic, Primary and Local Road Networks including the following key new / upgraded junctions to enable the proposed level of development and mitigate the impact of increased vehicle numbers:~~
- i. ~~Carrington Spur widening on the approach to M60, J8 (approx. 500m)~~
 - ii. ~~Carrington Relief Road widening between Isherwood Road and the Carrington Spur~~
 - iii. ~~Upgrades to the Flixton Road junction~~
 - iv. ~~Upgrades to the Carrington Relief Road / Banky Lane / Carrington Spur junction~~
 - v. ~~Upgrade Isherwood Road~~

Community Facilities

21. ~~Provide~~ Create a new local centre comprising a range of small shops with convenience shopping facilities and services providing up to in the region of 2,500 sqm of retail floorspace, within the ~~East~~ Partington East development area at a scale to serve the needs of the proposed communities and improve the sustainability of the wider Partington and Carrington area;
22. Provide a new Neighbourhood Centres ~~at in the Central~~ Carrington ~~Village~~ and Sale West character areas to provide local services and community facilities to meet local needs;
23. ~~Provide and contribute to the provision of~~ Make financial contributions for offsite additional primary and/or secondary school provision to meet needs

~~generated by the development and, where appropriate, make provision for a new primary school on site, in accordance with JP-P5; places. Extensions will be required to primary and secondary schools in Partington and Sale West;~~

~~24. Provide and contribute to new health facilities to support the new community;~~

Green Belt

25. Provide a significant green corridor through the site which remains in the Green Belt and provides an area of protected, high quality, publicly accessible green infrastructure;

~~26. Create defensible~~ Define and/or strengthen the boundaries of the Green Belt around/within the site such that they will comprise physical features that are readily recognisable and likely to be permanent; ~~boundaries utilising, where appropriate, existing landscape features;~~

~~27. Make provision for compensatory improvements to~~ Mitigate any impact and improve the environmental quality and accessibility of remaining Green Belt ~~land~~ within and/or in the vicinity of the site in accordance with policy JP-G2;

Green Infrastructure

28. Provide significant areas of open and publicly accessible green space throughout the allocation as part of the wider strategic green infrastructure network. ~~Creating These will provide~~ important multi-functional recreational spaces and active travel routes, linking different areas within and beyond the site;

~~29. Retain, create and enhance wildlife corridors and steppingstone habitats within the development areas to support nature recovery networks, provide ecosystem services and accessible green infrastructure;~~

30. Provide a range of types and sizes of open space ~~within the allocation boundary~~ in accordance with local planning policy requirements the

~~Council's open space and outdoor sports policies~~, including local open space; natural and semi-natural greenspace; equipped and informal play and youth provision; outdoor sports facilities and allotments, ensuring arrangements for their long-term maintenance;

31. ~~Protect the~~ Provide strategic green spaces ~~at Sale West identified broadly in the locations~~ identified on the Indicative Allocation Policy Plan (Picture 11.48) ~~and promote their use as an accessible green infrastructure area.~~ These areas will be protected from development ~~and proposals will need to demonstrate how they and~~ will deliver improved green infrastructure and access ~~(including new/or improved public rights of way), to these parcels to mitigate the impacts~~ of development;

Natural Environment

32. ~~Protect and enhance natural environment assets within the site and the surrounding area,~~ Make provision for biodiversity, including taking appropriate account of including Brookheys Covert Site of Special Scientific Interest (SSSI), eight local Sites of Biological Importance (SBIs), ~~and~~ local nature conservation sites and features including woodland and hedgerows ~~both within and adjacent to~~ the allocation, in accordance with Policy JP-G9;

New criterion: Undertake hydrological and ground investigations as necessary to inform the comprehensive masterplan and use of suitable construction techniques to ensure any loss or deterioration of irreplaceable habitat, and adverse impacts on the hydrology of undeveloped areas, is minimised. Where loss or deterioration is unavoidable, a suitable compensation strategy should be identified and delivered, including the potential restoration of lowland raised bog and complementary habitats elsewhere within the site;

33. Achieve enhanced delivery of ecosystem services through the restoration and creation of wildlife corridors, steppingstone habitats and areas of wetland within the site, commensurate with the identified high potential of the area in this regard and the role of the allocation site in the context of the

Local Nature Recovery Network for Greater Manchester and, in accordance with policy JP-G2. These areas will seek to deliver the objectives of the Great Manchester Wetlands Nature Improvement Area;

34. Deliver a clear and measurable net gain in biodiversity, including provision for long-term management of habitats and geological features which may include SUDs systems of high biodiversity value created as part of the overall flood risk and drainage strategy;
35. Protect and enhance the habitats and corridors along Sinderland Brook, the River Mersey and the Manchester Ship Canal as part of the catchment-based approach for the Upper Mersey to improve the existing water quality and seek to achieve 'good' status as required under the North West River Basin Management Plan (2019);
- ~~36. Provide a project specific Habitats Regulation Assessment for planning applications of over 50 residential units or 1,000 sqm employment floorspace;~~

Landscape

37. Retain important landscape views and features such as the rides, hedgerows and tree belts and use these features to develop a distinct sense of place at Carrington;
38. Reflect and respond to the special qualities and sensitivities of the key characteristics of the Mossland and Lowland Farmland landscape character type in accordance with Policy JP-G1, ~~Conserve and enhance local landscape character, including particularly as regards layout and design that respects~~ the settings of the Dunham Massey estate, Warburton Village and Warburton Deer Park;
39. Provide appropriate landscape buffers across the site, including a substantial landscape buffer along the southern boundary of the Warburton Lane development parcels to mitigate the impact on the rural landscape to the south of the allocation area;

Design

40. Ensure new development is place-led, ~~creative and contextual in its response~~, respecting the local character, heritage and positive local design features of the area;
- ~~41. Be in accordance with the Council's adopted Design Guide embracing strategic design principles, including creating connected communities, redefining streets, delivering inclusive characterful design and responding to heritage;~~
42. Respect the urban/rural fringe setting in the design of the development, in terms of its height, scale and siting, and demonstrate high standards of design;

Historic Environment

- ~~43. Conserve and enhance the historic environment in line with the findings and recommendations of the Historic Environment Assessment (2020) in the Plan's evidence base and any updated HIA submitted as part of the planning application process. Take appropriate account of relevant heritage assets and their settings, including the Warburton Deer Park, listed buildings and areas of high archaeological potential in the south west of the site, in accordance with Policy JP – P2;~~
- ~~44. Positively conserve archaeological features and, where appropriate, carry out archaeological evaluation in the form of geophysics, field walking and trial trenching for areas specified in the New Carrington Historic Environment Assessment 2020 to establish where especially significant archaeology should be preserved in situ;~~

Utilities, Environmental Protection and Climate Change

- ~~45. Mitigate the impacts of climate change and utilise the most energy and water efficient technologies to achieve zero carbon by 2028;~~

46. ~~Explore and deliver the most appropriate solutions to providing decentralised, low carbon heat and energy as part of new residential and employment development. This will include exploring the potential for the development of district heat, cooling and energy networks, energy centres, the implementation of renewable and low carbon heat and energy technologies in design and the co-location of potential heat and energy customers and suppliers;~~
47. ~~Ensure new development maximises on-site renewable energy measures in line with the energy hierarchy, for example via solar PV and other low carbon technologies, linked to the provision of and supply to electric vehicle charging infrastructure;~~
48. ~~Make provision for necessary infrastructure such as utilities, full fibre broadband and electric vehicle charging points in accordance with relevant Places for Everyone or Local Plan policies;~~
49. Mitigate flood risk and surface water management issues, both within and beyond the site, ~~including provision of SUDS~~ through the design and layout of development and in accordance with an allocation wide a flood risk, foul and surface water management strategy, which will form part of the Masterplan/delivery strategy (Criterion 1); ~~The allocation-wide drainage strategy should be prepared after having fully assessed site topography, flood risk, existing water features and naturally occurring flow paths to identify where water will naturally accumulate. The strategy will demonstrate how each phase interacts with other phases of development and further detail will be set out in the Masterplan / SPD;~~
50. ~~Incorporate on-site measures to deal with surface water and control the rate of surface water runoff. Planning applications will be expected to apply the full surface water hierarchy and ensure water is managed close to where it falls by mimicking the natural drainage solution;~~
51. ~~Demonstrate that development proposals will not adversely affect existing water supply infrastructure that passes through the site. This will include~~

~~consideration of any changes in ground levels and management of the construction process;~~

52. Address land contamination issues by undertaking appropriate site investigations to identify the level of contamination and deliver effective remediation to ensure there are no unacceptable risks to human health and the water environment;
53. Incorporate appropriate noise and air quality mitigation particularly along major transport corridors, ~~including HS2~~, and in relation to existing and new businesses, facilities and employment uses, including existing operational wastewater treatment works;
54. Improvements to the existing Partington and Altrincham wastewater treatment works will be supported where they are needed to respond to future foul and surface water infrastructure requirements; and

New criterion: Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMTr4); (AMTr1)

11.320 The New Carrington allocation will deliver a new community that links to the existing Carrington, Partington and Sale West areas and provides improved transport, social and green infrastructure. New development will create a distinct, attractive place which capitalises on the industrial history and prominent landscape features on the site. As set out on the Indicative Allocation Plan (Picture 11.48) the allocation includes areas identified for residential use, employment use and mixed residential and employment use. This is alongside areas of retained Green Belt, Strategic Green Spaces and strategic transport improvements.

11.321 The successful development of the site will require a coordinated approach between all landowners and developers. Trafford Council is therefore

committed to working with stakeholders to bring forward a detailed Masterplan /SPD which provides a framework for the sustainable delivery of a new community at Carrington, Partington and Sale West. The delivery strategy must ensure that a mechanism is put in place to secure proportionate contributions from all developers within the New Carrington allocation and deliver the wide-ranging infrastructure required. All development will be expected to make a proportionate contribution to necessary infrastructure, including transport, social and green infrastructure.

New paragraph: The masterplan will need to have regard to the presence of peat on parts of the site and identify opportunities to restore habitats and minimise the loss of carbon as part of the development. The allocation was found sound at examination on the basis that, in principle, the public benefit arising from the development proposed would be likely to clearly outweigh the loss or deterioration of an irreplaceable habitat and that a suitable compensation strategy was capable of being delivered. The policy seeks to ensure that detailed development proposals are consistent with that conclusion.

New paragraph: Development of the New Carrington site will need to be phased alongside the necessary infrastructure to ensure a successful, sustainable development. A high level, indicative phasing plan has been developed which recognises the distinctive character areas and demonstrates the deliverability of the site. A more detailed development and infrastructure phasing plan will be required as part of the Masterplan. It is expected that multiple residential sites will be delivered alongside each other throughout the plan period in order to maximise the delivery rate and cater for the distinct market areas.

~~11.322 A high level Masterplan has been prepared for the New Carrington site which has assessed the existing site constraints and determined the overall residential and employment development quantum, as well as identifying green infrastructure areas and opportunities. The Masterplan identifies four~~

~~distinct residential character areas across the allocation: Carrington Village, Sale West, Partington East and Warburton Lane.~~

New paragraph: In determining any planning application up to date advice from the Health and Safety Executive (HSE) will be needed to understand the full extent of the HSE consultation zone constraints in relation to existing uses and the Hynet North West Hydrogen pipeline.

Residential development

11.323 The New Carrington site will deliver around 4,300 homes in the plan period and up to 5,000 new homes in total. High quality design will be essential to ensuring the successful integration of development with existing communities and in delivering a positive step change in the local area.

New paragraph: Picture 11.48 identifies four distinct residential character areas across the allocation: Central Carrington, Partington East, Sale West and Warburton Lane. The approximate number of units expected in each character area is set out below. These are not policy requirements but they reflect the average density which is considered to be appropriate in each area (Criterion 6):

- Central Carrington – approx. 600 units
- Partington East – approx. 2,600 units
- Sale West – approx. 1,450 units
- Warburton Lane – approx. 400 units

~~**11.324** Some areas of the site have particularly high sensitivity and will require additional work to be undertaken in advance of any planning application to ensure that any impacts can be suitably addressed. The land to the west of Warburton Lane was previously designated as safeguarded land in the Trafford Core Strategy and is a particularly sensitive parcel. The New Carrington Historic Environment Assessment 2020 identified that the area has potentially significant heritage value and it is therefore necessary to take a cautious approach to the development potential of this area in advance of~~

~~the necessary investigative works being undertaken. The site is also located on the periphery of the Carrington allocation and any future planning application will therefore need to demonstrate how the site can be integrated with Partington to the north and the wider New Carrington development area. Such measures will need to include pedestrian / cycle crossings over the Red Brook linking to Oak Road, providing well lit, safe access to Partington. The high-level phasing of the New Carrington site has taken a cautious approach and development of this parcel is not expected to come forward within the Places for Everyone plan period, recognising the significant issues which development in this area will need to overcome.~~

- 11.325** The site will primarily deliver family housing at a medium density to meet the identified need and reflect the existing residential communities around the site. Slightly higher densities of 40 dph are appropriate close to the existing Partington and Sale West communities, which reflects and builds on existing suburban development to create a sustainable urban extension. A lower density of 25 dph is appropriate on the land at Warburton Lane to reflect the rural character of this area and the need to avoid ~~assets of~~ heritage assets significance. Higher density development (up to 55 dph) will be appropriate in and close to the local or neighbourhood centres. Development should be innovatively designed across the site to deliver the specified density whilst acknowledging the local context, landscape character and site characteristics.
- 11.326** Trafford has an acute affordable housing need and this site offers an opportunity to deliver affordable housing on a greenfield site. Reflecting the PfE Viability Assessment, the policy requires a minimum of 15% affordable housing to be delivered across the whole allocation. To achieve this, it is possible that some parts of the allocation will need to deliver a higher proportion of affordable housing than others. This should be considered as part of the preparation of the masterplan, the delivery strategy and through individual planning applications, having regard to differing levels of viability within the site. The Council will monitor affordable housing provision across the allocation to ensure the 15% overall requirement is met. Any affordable

~~housing provision should be delivered in accordance with the [Trafford Local Plan](#). A minimum of 15% affordable housing contribution is required across the whole allocation, however, regard will be given to the distinct Character Areas identified within the New Carrington allocation: Carrington Village, East Partington, Sale West and Warburton Lane in determining an appropriate contribution. Further guidance will also be provided in the Carrington Masterplan / SPD and the [Trafford Local Plan](#).~~

Employment development

11.327 Employment development [for B2 / B8 uses](#) will be located in the north western area of New Carrington, largely on existing brownfield land. This is the most appropriate use in this area considering the existing [Control of Major Accidents Hazards \(COMAH\)](#) HSE consultation zone constraints. The employment land will make an important contribution to Greater Manchester's overall employment land needs and provide a strategic employment location in the south of Greater Manchester. Careful consideration should be given to the design of the employment development to ensure that it is well connected and integrated with the surrounding residential development.

~~**11.328** The site is close to deprived communities in Partington, Carrington and Sale West and it will also be accessible by bus and tram to other deprived areas in Trafford. Therefore targets for the training and employment of local people could, therefore, be agreed between the developers, the local colleges and the Local Authority to ensure local people, particularly from these more deprived communities, benefit from training and new jobs as a result of the development.~~

Delivery and phasing

~~**11.329** Development of the New Carrington site will need to be phased alongside the necessary infrastructure to ensure a successful, sustainable development. A high level, indicative phasing plan has been developed which recognises the distinctive character areas and demonstrates the~~

~~deliverability of the site. A more detailed development and infrastructure phasing plan will be required as part of the Masterplan / SPD. It is expected that multiple residential sites will be delivered alongside each other throughout the plan period in order to maximise the delivery rate and cater for the distinct market areas.~~

~~11.330 All development will be expected to make a proportionate contribution to necessary infrastructure, including transport, social and green infrastructure. Further details on supporting infrastructure requirements will be set out in the Masterplan / SPD together with information on trigger points for when infrastructure including road improvements, new schools and link roads will be required linked to the development trajectory.~~

Transport, integration and accessibility

11.331 A significantly improved active travel and public transport network is central to the success of the New Carrington allocation. Development will be designed to support walking and cycling, encouraging sustainable short journeys and promoting healthier lifestyles. Development will also need to be connected to existing communities and, where required, overcome any physical barriers to ensure it is integrated. The development should have regard to the Greater Manchester Transport Strategy 2040 refresh, providing improved links to the city centre, enhancing sustainable travel links to/from New Carrington and Flixton Station, as well as contributing to east-west links to Altrincham and Salford through the use of the Cadishead viaduct disused rail route. This route will form part of the wider deliver the Carrington Greenway scheme providing an important sustainable transport active travel link to Irlam Station, and improved east/west connections through the New Carrington site and linking to surrounding communities as well as a potential future public transport corridor.

11.332 Public transport from the New Carrington area is currently unattractive in relation to the private car and it will therefore be essential for the development to provide genuinely attractive alternatives. This will require

significant investment in bus priority measures (potentially including bus gates, dedicated bus lanes or busways and priority and signalised junctions) to minimise any delay from congestion on key roads.

- 11.333** The New Carrington Transport Locality Assessment provides a high-level assessment of current highways infrastructure and identifies key transport interventions which will be required to mitigate the impact of the New Carrington allocation. The Carrington Relief Road, a new strategic link through the site, is integral to delivering the development at New Carrington, providing increased capacity and access to the development parcels. Development proposals within the New Carrington allocation will need to make a proportionate contribution to the Carrington Relief Road, as well as other highways infrastructure across the site.
- 11.334** The New Carrington Transport Locality Assessment also identified key highway junctions which may will require intervention to mitigate the impact of development, as well as other link roads which will be required to access development parcels within the site. The detailed design of these interventions will be determined by Transport Assessments to fully understand the impact of the development and to identify appropriate solutions.
- 11.335** These transport infrastructure improvements will enhance the attractiveness of New Carrington as an employment and residential location and also promote modal shift from car travel to sustainable travel modes.

Community facilities

- 11.336** A new local centre, located in the east Partington East character area, will be a hub for community infrastructure and will service the needs of the new community. Smaller neighbourhood centres will also provide local community hubs in the at Sale West and Central Carrington Village-character areas. The large number of new residents will also help to support existing shops and services in the surrounding area, such as the Partington Local Centre.

11.337 The site will be an attractive location for families and this will generate an additional demand for school places. The development will need to provide new facilities for primary and secondary education. Development will also be required to provide new and improved health facilities to support the new community, [as required by Policy JP-P6](#).

Green Belt

11.338 The development will require the removal of some land from the Green Belt; but a significant area of Green Belt will remain within the allocation through the middle of the site which will prevent the merging of Carrington/Partington and Sale West. This green wedge will also provide an attractive setting for the development and will be an important green resource. It will include features which characterise the landscape such as the existing woodlands, hedgerows and rides. The wedge will be protected as a green infrastructure corridor, connecting Sinderland Brook to the Mersey Valley in the north.

New paragraph: [The new Green Belt boundary is defined by existing features such as hedgerows, roads and field boundaries, although in some locations there is a need to strengthen the boundary as part of the development. This includes the southern boundary of the employment land, which is not currently identifiable, as well as the boundary to the east of the Manchester United Football Club training facilities. The new Green Belt boundary to the east of the Altrincham Waste Water Treatment Works should also be strengthened.](#)

Green Infrastructure

11.339 The New Carrington site has been identified as a Green Infrastructure Opportunity Area and has the potential to deliver significant improvements to the green infrastructure network. The development will enhance existing green infrastructure characteristics across the site and other open spaces. Enhancements to the mature tree belt along the existing Sale West boundary (which forms part of Dainewell Wood) will contribute to the green setting of the Sale West extension as well as improved access and green

infrastructure enhancement to the strategic green spaces identified at Sale West which are protected from development. Improved access within and through these parcels will be a priority and should include enhancement of the Trans Pennine Trail. Where green spaces remain in the allocation area that is to be removed from the Green Belt, the highest level of protection will be applied in accordance with the Trafford Local Plan.

Natural Environment

11.340 The development will need to have regard to existing ecological features and should seek to enhance these as part of the development. This includes the eight SBIs within the site boundary and the habitats and green corridors along Sinderland Brook and Red Brook.

11.341 Parts of the allocation also support organic soils (peat) which, when taken together with a low-lying topography and existing nature conservation interest, makes the area potentially particularly suitable for peat restoration or to important wetland habitats. Much of the area which may be is suitable for peatland restoration or wetland habitats restoration is within the identified Green Belt gap and it will therefore be protected from development. Other ~~other~~ locations within the proposed development area across the site will require ground investigations to establish the depth and quality of peat and to consider the potential for restoration, alongside development also be considered in relation to their wetlands potential. Regard should also be had to the hydrology of development parcels and surrounding areas in assessing the impact on peat.

The Carrington area is included in the locally determined Great Manchester Wetlands Nature Improvement Area whose objectives seek to deliver a living landscape between Greater Manchester and Merseyside through identified wildlife corridors and through the complementary creation of, or restoration of, wetland habitat. and has been identified as New Carrington has the potentially to be an important part of a developing this Wetlands Ecological Network through the creation and restoration of wetland habitats and their

designation in the Local Plan, where appropriate. In addition, the conservation of organic soils will help to reduce carbon emissions.

~~11.342 A project specific Habitats Regulation Assessment will be required for all development proposals of over 50 units / 1,000 sqm floorspace, as the site has the potential to result in increased traffic on the M62 motorway by 2040. Whilst it is recognised that New Carrington does not have direct connectivity to the M62 a precautionary approach has been taken considering the scale of this allocation. The M62 passes close to designated European sites known to be susceptible to traffic pollution, particularly nitrate deposition.~~

Landscape

11.343 Much of the Carrington / Partington area is currently undeveloped and open, development proposals will therefore be required to consider the landscape setting of the site and enhance the transition from the urban edge to the open countryside. Development should have ing regard to views/vistas into and out of the site, as well as sensitive receptors through the retention of existing natural features important to the Mossland and Lowland Farmland landscape character type of the area in particular hedgerows, ditches, rides and small pockets of woodland and the introduction of additional tree planting and vegetation to soften new development. Areas of the site and surrounding area, such as Warburton Deer Park, Warburton Village Conservation Area and Carrington Moss, have particularly high landscape sensitivity as regards views south to Warrington and Cheshire and therefore development proposals in these areas will need to have regard to these sensitivities (where relevant) and demonstrate how any landscape impact can be appropriately mitigated.

Design

11.344 The New Carrington development will need to set a new high quality design standard for this area and development should draw upon the guidance in the Council's adopted relevant Design Guides / Codes. Specific parameters for the development of the site will be set out in the Masterplan ~~/SPD~~.

11.345 The development will reduce the isolation of existing communities at Carrington, Partington and Sale West, and to fully achieve this, it will be essential for development to be carefully integrated with the existing communities. Issues such as design and linkages to existing communities and through the site should be carefully considered.

Historic Environment

11.346 The New Carrington Historic Environment Assessment considered the characterisation of the site in respect of the known archaeological, built heritage and historic landscape within the allocation. It assessed the potential for the development to affect designated and non-designated heritage assets and this has been taken into account in considering an appropriate development quantum for the site. The Assessment makes recommendations for mitigation and identifies opportunities for enhancement. Further archaeological investigation and a Heritage Impact Assessment will be required as part of future planning applications. The area of highest archaeological potential is land to the south of Partington and to the west of Warburton Lane, which has been identified as a potentially significant medieval deer park. ~~Other areas of the Carrington site which are of potentially high value include areas of peat where assessments to establish the depth and condition of any remaining peat will be required.~~ For the areas of highest archaeological value, work will need to be undertaken in advance of any planning application to understand the heritage significance of these areas. A suitable mitigation strategy should be developed which also identifies opportunities to enhance the heritage assets.

~~**11.347** The Historic Environment Assessment also identified the designated and non-designated built heritage assets, their settings and important views that enhance the historic character and identity of the area. The Assessment makes recommendations for mitigation and identifies opportunities for enhancement. Further archaeological investigation and a Heritage Impact Assessment will be required as part of future planning applications.~~

Utilities, Environmental Protection and Climate Change

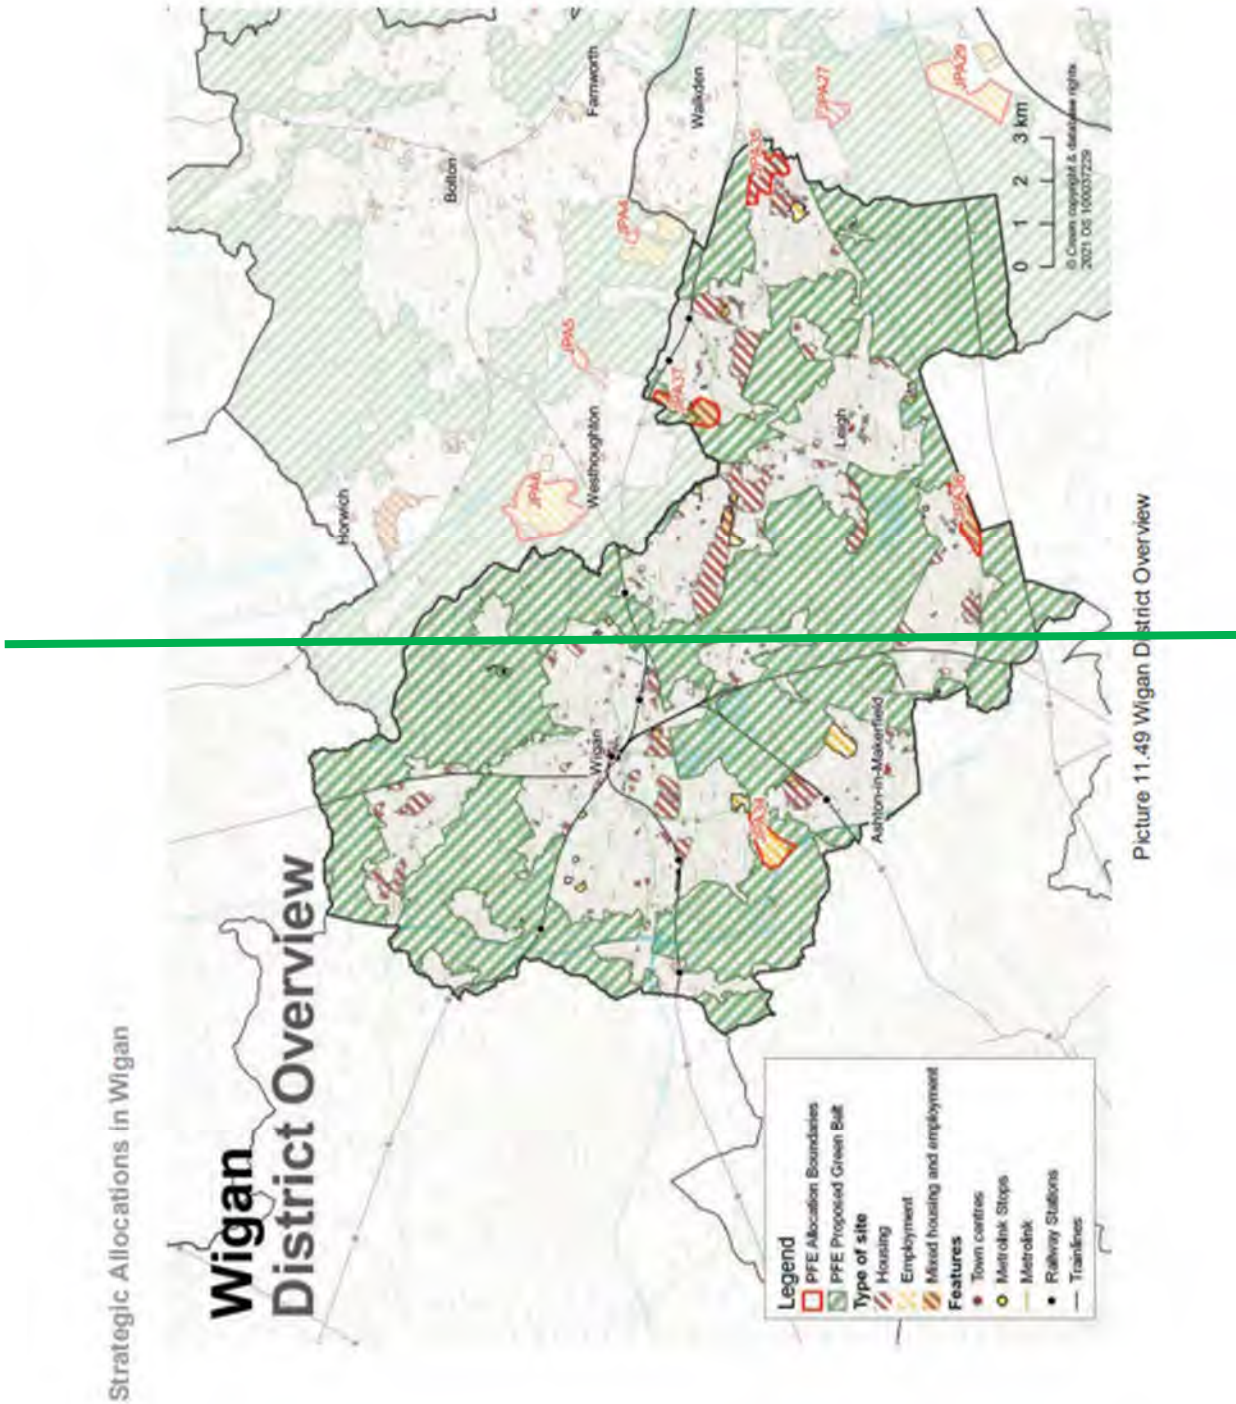

- 11.348** A high-quality coordinated drainage strategy will be required for New Carrington which is integrated with the green and blue environment and which is a key component of the new high quality design standard for the area ~~– this is required as part of the overall Delivery Strategy (Criterion 1).~~ Landowners / developers will be expected to work together in the interest of sustainable drainage ~~and if pumping stations are identified as necessary, the strategy will demonstrate how the number of pumping stations is minimised so to avoid a proliferation of pumping stations between phases.~~ Where necessary, the strategy must be updated and agreed with the local planning authority to reflect any changing circumstances between each phase of development.
- 11.349** Opportunities will also be explored to maximise the potential of the Sinderland Brook in terms of urban flood management. ~~The brook currently has a rating of ‘moderate’ under the EU Water Framework Directive, and the development should seek opportunities to improve this to ‘good’.~~
- 11.350** The allocation includes the former Shell Carrington industrial estate and other industrial land uses. Prioritising development across these areas provides an opportunity to bring previously developed land back into beneficial use. However in doing so new development will need to ensure that any contamination risks are appropriately remediated and do not give rise to the pollution of any watercourse or groundwater and/or present risks to human health. The area is particularly sensitive for the water environment given its location above a Principal Aquifer and nearby surface waters (including the River Mersey and Sinderland Brook).
- 11.351** Noise mitigation such as woodland buffers and landscape bunds will ensure major transport corridors and employment uses are not seen to be bad neighbours to development.

New paragraph: The allocation is identified as containing a Mineral Safeguarding Area for sand and gravel (26.5%) as defined in the Greater

Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Strategic Allocations in Wigan

Picture 11.49 Wigan District Overview (MMW1)

Places for Everyone Composite Plan – Modifications Version 2023
577

Policy JP Allocation 34: M6 Junction 25

Picture 11.50 JPA 34 M6 Junction 25

Policy (MMW2)

Development of this site will be required to:

1. Be in accordance with a comprehensive masterplan that is agreed with by the Council and is effectively informed by detailed site investigations and other constraints This will include the need for an infrastructure phasing and delivery strategy in accordance with Policy JP-D1;
2. Deliver around 140,000 sqm of high quality B2 and B8 employment floorspace;

New criterion: Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with Policy JP-C7;

3. Provide good quality road access from the M6 motorway and the A49, whilst making sure that it has no significantly adverse effect on the motorway or other surrounding roads;
4. ~~Ensure that the employment development is accessible by walking and cycling from Winstanley, Hawkley and Bryn, and from bus services in these areas, including on the A49 through the provision of a safe pedestrian crossing;~~
5. Incorporate high quality landscaping within the site and along sensitive site boundaries to minimise its visual impact on the wider area, including the A49 road frontage, the remaining Green Belt to the north, and around each building within the site, in accordance with Policy JP-G2;
6. Incorporate a landscaped green infrastructure corridor, with walking and cycling links, connecting the A49 to the remaining area of Green Belt to the north, and ensure suitable diversions to public rights of way as necessary, with good links to the footbridge over the M6 motorway;

New criterion: Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site, in accordance with Policy JP-G2;

7. Ensure that the site layout will not preclude the provision of a future ~~Provide an internal~~ road connection with Wheatlea Industrial Estate;
8. ~~Provide easements for the significant utilities infrastructure running through the site;~~
9. Safeguard land within the allocation ~~Allow~~ for the provision of an all-ways junction at M6 Junction 25 ~~and the ability for more direct access from the motorway once provided, subject to agreement by Highways England;~~ and

New criterion: Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the

Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMW3)

- 11.352** The M6 Junction 25 site presents a major opportunity to provide a high-quality location for substantial employment development in the M6 corridor. A masterplanning process will guide the future delivery of this major development scheme.
- 11.353** The M6 is a major business asset. It is the UK's most important strategic route for freight movement between the north and south of the country, and Wigan is the only district in Greater Manchester which has direct access to it. The site is large, relatively unconstrained, directly accessible to the motorway and has a long visible frontage along it. These attributes make the site highly attractive to the market, including key growth sectors such as logistics and advanced manufacturing which are growing rapidly in the North West, primarily due to its strong global connections including Manchester Airport and the new deep-water port at Liverpool 2.
- 11.354** There is a significant demand and requirement for large scale logistics development within the M6 Corridor. Yet, despite its strategic location, Wigan currently does not have the sites to attract this demand. This site has the scale, prominence and motorway connectivity to satisfy this demand and deliver new jobs and investment for the local economy.
- 11.355** Junction 25 is the main gateway into Wigan from the south and an all-ways junction would enhance the economic profile of the borough whilst taking full advantage of its strategic location, which will have sub-regional benefits. The site also has the potential to provide a connection to the adjacent established Wheatlea Industrial Estate, so that it also has improved access to the M6.
- 11.356** Land to the south of the Winstanley residential area has been retained within the Green Belt and will provide a robust green infrastructure corridor. In

addition to safeguarding residential amenity, this green corridor will open up the site for wider public access, including suitable diversions to public rights of way as necessary, with good links to the footbridge over the M6 motorway. It will also provide enhanced walking and cycling opportunities for local residents to the Wigan Flashes to the east, which are a major environmental and recreation resource in the borough. As part of the delivery of necessary new and improved road infrastructure, as set out in Appendix D, a safe crossing of the A49 Warrington Road will need to be provided.

11.357 In accordance with Policy JP-C7, it is important that provision is made for this employment site to be safely and conveniently accessed from nearby residential areas by walking, cycling and bus services, to enable local people to take advantage of the job opportunities that it will provide and to reduce car dependency in the area.

11.358 In order to make the site attractive to potential occupiers and to minimise any adverse visual impacts, high quality landscaping is required within the site and along sensitive site boundaries, including the A49 road frontage and the remaining Green Belt to the north. ~~The development must also provide easements for the significant utilities infrastructure that runs through the site.~~

New paragraph - Where land is to be removed from the Green Belt, national policy seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

New paragraph - The allocation is wholly within a Mineral Safeguarding Area for brickclay and surface coal as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 35: North of Mosley Common

Picture 11.51 JPA 35 North of Mosley Common

Policy (MMW4)

Development of this site will be required to:

1. Be in accordance with a comprehensive masterplan that is agreed by the Council, ~~and is effectively informed by detailed site investigations, an archaeological assessment, the presence of priority habitats and other constraints~~ This will include the need for an infrastructure phasing and delivery strategy in accordance with policy JP-D1;
2. Deliver around 1,100 new homes, including affordable housing in accordance with local policy requirements, with higher densities close to existing and new bus stops on the Leigh-Salford-Manchester (LSM) Guided Busway, as applicable;
3. Make provision for new and improved sustainable transport and highways infrastructure, having regard to the indicative transport interventions set

Places for Everyone Composite Plan – Modifications Version 2023

583

- out in Appendix D in accordance with Policy JP-C7. This includes Provide an additional stop on the busway and/or new/improved pedestrian and cycle links to existing busway stops, and proportionate contributionse proportionally and meaningfully to increaseding passenger capacity on the busway at peak times, subject to full detailed busway service analysis being undertaken in conjunction with Transport for Greater Manchester;
4. Ensure that good quality road access is provided into the site, including from Mort Lane, Bridgewater Road, City Road and Silk Mill Street; Any access arrangements from Silk Mill Street should ensure good quality pedestrian and cycle linkages into the rest of the site with at least two choices of connection into and out of the site for residents to the north of the guided busway and for residents to the south of the guided busway, with exceptions only where a small extension of an existing cul-de-sac is appropriate;
 5. ~~Deliver necessary highway capacity improvements to mitigate the impact of the full development, including at the junction of the A577 Mosley Common Road and the A580 East Lancashire Road, B5232 Bridgewater Road and B5232 Newearth Road, and A5082 Armitage Avenue and the A6, as applicable~~
 6. ~~Ensure safe and convenient access for pedestrians and cyclists to services and amenities in Tyldesley, Mosley Common and Ellenbrook, and to bus services on the surrounding road network and busway, through the retention and enhancement of existing public rights of way and the creation of new footpaths, including links across the guided busway corridor, where appropriate;~~
 7. Provide new community and health facilities on-site, potentially in a suitably accessible location close to a future additional stop on the guided busway as part of a new local centre, or an equivalent financial contribution as appropriate, to meet additional demand generated by the development;

8. Provide new primary education facilities on-site, as a new school and/or as an expansion to St John's Mosley Common Primary School, unless it is determined by the council that it is not needed; and ~~make provide a~~ financial contributions for off-site additional secondary school provision to meet ~~needs the demand~~ generated by ~~secondary school pupils~~ the development, in accordance with Policy JP-P5;

New criterion: Make provision for biodiversity, including taking appropriate account of areas of priority habitat, which include watercourses, ponds, hedgerows and areas of woodland on and/or around the site, in accordance with Policy JP-G9;

9. Protect and enhance the environs of Honksford Brook through the creation of a green infrastructure corridor, including safeguarding land for a flood storage area to mitigate the risk of flooding downstream;
10. Provide a robust landscaped boundary with open countryside in the Green Belt to the north; ~~and~~

New criterion: Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with Policy JP-G2; and

- ~~11. Provide necessary easements for the gas pipeline that crosses the western part of the site; and~~

New criterion: Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMW5)

11.359 Mosley Common and Tyldesley are located close to Salford and Manchester and offer an attractive location to help meet the city region's housing needs to the west of the conurbation.

- 11.360** The site forms a logical eastern extension to Tyldesley and maintains a substantial Green Belt gap with Walkden to the north east. It is a relatively flat and unconstrained site with capacity for around 1,100 homes in a sustainable location.
- 11.361** This site significantly benefits from the LSM Guided Busway which crosses the site providing direct and sustainable rapid public transport access to employment, leisure and retail services within Manchester City Centre and other places along its route. The busway opened in April 2016 and has strong patronage, with extra services added in 2017 to meet demand. There is an opportunity to create a new stop within the site to serve the development and increase the frequency of the service. Higher residential densities are appropriate and could be achieved close to any new stops and also the existing stop on Sale Lane to the west of the site. Provision will need to be made for pedestrian/cycle links from the development to busway stops.
- 11.362** The site is also well connected to the highway network with direct access to the A577 to the west and a short distance to the A580 to the south, which is the main non-motorway route between Manchester and Liverpool. However, the A577/A580 junction is regularly congested at peak times, therefore the development will be required to contribute significantly towards the delivery of highway capacity improvements at this junction and other junctions as applicable, [in accordance with Policy JP-C7](#). Good quality road access will need to be provided into the site from the local highway network.
- 11.363** Walkden railway station is located within 2km of the northeast of the site and a number of bus routes, in addition to the guided services, connect the site to the wider area. Both Walkden Town Centre in Salford and Tyldesley local centre are within 2km of the site and provide a range of retail and community facilities, with additional facilities available locally in Mosley Common and Ellenbrook. Safe and convenient routes for pedestrians and cyclists will need to be provided from the development to enable residents to access these services and facilities. They will benefit the development and complement

associated community facilities provided in a suitably accessible location within on the site, ~~which could be developed as part of a new local centre close to a future additional stop on the guided busway~~. Alternatively financial contributions could be required, if appropriate, to meet additional demand generated by the development in a location off-site.

- 11.364** In terms of educational provision, new primary education facilities will be required on-site, as a new school and/or as an expansion to St John's Mosley Common Primary School which lies adjacent to the site, unless it is determined by the Council that this provision is not needed. A financial contribution will be required to meet the demand generated by secondary pupils.
- 11.365** Honksford Brook, which is classed as a main river, crosses the site and should be regarded as a priority green infrastructure asset. As such the habitat corridor should be protected and enhanced. Given its size, the site has potential to create significant volumes of runoff if infiltration is not possible. This will be mitigated through the safeguarding of land as flood storage areas within the allocation and through the provision of sustainable drainage systems as appropriate.
- 11.366** In order to ensure that a co-ordinated approach is taken to the delivery of this site, a masterplan will need to be prepared and agreed by the Council. The design and layout will need to be informed by relevant site investigations, an archaeological assessment, the presence of priority habitats and other constraints and opportunities provided by the site. In accordance with Policy JP-G1, a robust landscaped boundary will need to be provided to the north of the site to limit its impact on the adjacent open countryside in the Green Belt. ~~The development will also be required to provide easements for the gas pipeline that crosses the western part of the site.~~

New paragraph - Where land is to be removed from the Green Belt, national policy seeks compensatory improvements to the environmental quality and

accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

New paragraph - The allocation is wholly within a Mineral Safeguarding Area for brickclay and surface coal as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Policy JP Allocation 36: Pocket Nook

Picture 11.52 JPA 36 Pocket Nook

Policy (MMW6)

Development of this site will be required to:

1. Be in accordance with a comprehensive masterplan that is agreed with by the Council and is effectively informed by an archaeological assessment and other constraints. This will include the need for an infrastructure phasing and delivery strategy in accordance with Policy JP-D1;
2. Safeguard a north-south corridor towards the west of the site allocation for the potential construction of High Speed 2 Rail;
3. Deliver around 600 homes; including affordable housing in accordance with local policy requirements. including a Around 75 of these homes should be to the west of the proposed-safeguarded HS2 route on land accessed from Rowan Avenue;

4. Deliver around 15,000 sqm of E(g), B2 and/or B8 employment floorspace on land to the west of the proposed-safeguarded HS2 route accessed from Newton Road;
5. Deliver ~~or contribute effectively to the delivery of~~ a new road through the site from A579 Atherleigh Way to A572 Newton Road (via Enterprise Way), including a new bridge over the HS2 rail line as-if necessary, that is of a design quality to accommodate bus services, ~~safeguarding the route for future construction where applicable~~;

New criterion: Make financial contributions for offsite additional primary and/or secondary school provision to meet needs generated by the development, in accordance with policy JP-P5.

6. ~~Ensure safe and convenient access for pedestrians and cyclists within the site and to services in Lowton, including Lowton High School, employment sites, neighbouring housing areas and green spaces within and adjacent to the site~~ Make provision for new and improved sustainable transport infrastructure, having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;
7. Protect and enhance the environs of Carr Brook through the creation of a green infrastructure corridor, in accordance with Policy JP-G2;

New criterion: Make provision for biodiversity, including taking appropriate account of areas of priority habitat, which include ponds, hedgerows and areas of broad-leaved woodland on and/or around the site, in accordance with policy JP-G9;
8. Ensure that groundwater resources are not jeopardised through the construction process or uses thereafter; and
9. Take appropriate account of heritage assets and their settings, including ~~Ensure that the heritage setting of~~ the Grade II Listed Fair House Farmhouse on Pocket Nook Lane, in accordance with Policy JP-P2 ~~is retained or~~

~~enhanced. Proposals should be informed by the findings and recommendations of the Historic Environment Assessment (2020) in the Plan's evidence base and any updated assessment(s) submitted as part of the planning application process.~~

Reasoned Justification (MMW7)

- 11.367** Within the East Lancashire Road Corridor, the Pocket Nook strategic area provides an opportunity for a substantial housing and employment development. The principle of development on this site is established in the adopted Wigan Local Plan Core Strategy, which identifies the site within a broad location for new development.
- 11.368** Lowton is a popular residential area with excellent road connections into both the Manchester and Liverpool City Regions via the A580 and is also in close proximity to the M6.
- 11.369** There is potential to enhance sustainable travel opportunities by foot, cycle and public transport in the Lowton and Golborne area for employment and other services in Leigh and the city centre, consequently reducing car dependency in this area; and, with possible connections to LSM Guided Busway services. It is also important that safe and convenient pedestrian access is provided to green spaces within and adjacent to the site, in accordance with Policy JP-C7.
- 11.370** A north-south corridor in the west of the allocation has been safeguarded by the Government for the potential delivery of HS2 Phase 2B¹⁵¹. This safeguarded zone needs to be kept free from development to enable access and for servicing. If delivered, The proposed alignment of HS2 runs parallel to the route of a dismantled railway which runs north-south through the west of the site. HS2 will result in the demolition of existing business units to the north of the site on Enterprise Way which will need to be relocated. A buffer

¹⁵¹ <https://www.gov.uk/government/publications/hs2-phase-two-safeguarding-maps-warrington-trafford-and-wigan>

~~zone of 60 metres either side of the route needs to be kept free from development to enable access and for servicing.~~

- 11.371** The site will be principally served from a new junction on the A579 Atherleigh Way, close to its junction with the A580. The development will deliver a new road from Atherleigh Way to the east through the site to Newton Road in the west and, if necessary, will need to bridge the ~~proposed~~ HS2 route. The new road will connect into Newton Road on land close to its existing junction with Enterprise Way, and serve both new housing and employment development. The road will enable the development to be properly integrated with the existing communities of Lowton and Golborne, provide local residents with an alternative route to the A580, and enable the delivery of enhanced bus services in the area, ~~serve both new housing and employment development and will be able to accommodate bus services.~~
- 11.372** A small parcel of residential development on the western edge of the site is accessible from Rowan Avenue.
- 11.373** Carr Brook, which is classed as a main river, crosses the site and should be regarded as a priority green infrastructure asset. As such the habitat corridor should be protected and enhanced.
- 11.374** Three Groundwater Source Protection Zones have been identified either within or immediately adjacent to the northern boundary of the site. The design of new development should ensure that there are no adverse impacts to groundwater resources or groundwater quality and ensure compliance with the Environment Agency approach to groundwater protection.
- 11.375** Fair House Farmhouse on Pocket Nook Lane is a Grade II Listed Building. The building is important in many respects, not least as an example of timber-framing in an area where little remains. In order that its heritage setting is retained or enhanced consideration needs to be given at a detailed stage to the treatment of the northern portion of the site to ensure that any development harmonises with the wider setting of the Listed Building and it does not harm its heritage value and significance.

11.376 To ensure that a co-ordinated approach is taken to the delivery of this site, a masterplan will need to be prepared and agreed by the Council. The design and layout, including infrastructure provision, will need to be informed by an archaeological assessment and other constraints and opportunities provided by the site.

Policy JP Allocation 37: West of Gibfield

Picture 11.53 JPA 37 West of Gibfield

Policy (MMW8)

Development of this site will be required to:

1. Be in accordance with a comprehensive masterplan that is agreed by the Council, and is effectively informed by detailed site investigations, an archaeological assessment and other constraints. This will include the need for an infrastructure phasing and delivery strategy in accordance with policy JP-D1;
2. Deliver around 500 new homes, including affordable housing in accordance with local policy requirements;
3. Deliver around 45,500 sqm of E(g), B2 and/or B8 employment floorspace in the south east of the allocation on land in the southern part of the site, as a logical extension to the existing Gibfield Park Industrial Area;

4. Ensure good quality road access is provided into the site, including through an extension of Gibfield Park Way northwards. A route for the continuation of Gibfield Park Way further northwards to wards the rail line should be safeguarded within the site, to connect into potential future road infrastructure to be provided in Bolton;
 5. ~~Provide highway improvement measures at the junction of the A577 and Gibfield Park Way, and make effective contributions towards highway improvement measures including at Platt Lane and/or Chequerbent roundabout / Junction 5 of the M61 in Bolton, necessary to mitigate the development~~ Make provision for new and improved sustainable transport and highways infrastructure having regard to the indicative transport interventions set out in Appendix D in accordance with policy JP-C7;
 6. Ensure convenient and safe access for pedestrians and cyclists within the site towards local bus services and to Daisy Hill and Hag Fold rail stations, ~~and contribute appropriately to improved passenger facilities at those rail stations, as applicable;~~
- New criterion: Make financial contributions for offsite additional primary and/or secondary school provision to meet needs generated by the development, in accordance with policy JP-P5;**
7. Provide a high quality, landscaped corridor along Gibfield Park Way, including its extension northwards within the allocation, through the planting of street trees and other strategic landscaping;
 8. Provide a ~~substantive~~ substantial accessible green infrastructure corridor and country park on land remaining in the Green Belt within the allocation, and ensure ongoing arrangement for its maintenance, agreed with the Council;
 9. ~~Make~~ Ensure appropriate provision is made to sufficiently mitigate the impact of development on ~~for~~ great crested newts ~~sufficient to mitigate the development;~~

New criterion: Make provision for biodiversity, including taking appropriate account of Sites of Biological Importance and areas of priority habitat, which include ponds, watercourses, dry heath/acid grassland, hedgerows and areas of woodland on and/or around the site in accordance with policy JP-G9;

- ~~10. Provide easements for the significant utilities infrastructure running through the site; and~~

New criterion: Make provision for compensatory improvements to the environmental quality and accessibility of remaining Green Belt in the vicinity of the site in accordance with Policy JP-G2; and

- ~~11. Safeguard the amenity of existing and future homes from the employment development, through appropriate screening and landscaping.~~

New criterion: Consider the extraction of any viable mineral resources within Mineral Safeguarding Areas, in accordance with Policy 8 of the Greater Manchester Joint Minerals Development Plan (or any relevant policies in subsequent minerals plans).

Reasoned Justification (MMW9)

11.377 The West of Gibfield area provides an opportunity for a substantial housing and employment development to the west of Atherton. The employment development will be on land in the southern part of the site ~~extend the existing Gibfield Park Industrial Area~~ and is considered suitable for E(g), B2 and/or B8 employment floorspace. The development will include new green infrastructure serving Atherton and Daisy Hill, Westhoughton.

11.378 The M61 corridor is a strategic opportunity for Greater Manchester but while Atherton, Hindley and Leigh are close to the M61, existing routes to the motorway are constrained and not conducive to attracting economic development. Improved road infrastructure between Gibfield Park Way and Junction 5 of the M61, via the Chequerbent junction on the A6, will be transformative for the area. The development is therefore required to extend

Gibfield Park Way northwards as far as possible within the allocation and safeguard sufficient land to allow for a potential future extension to the A6 and M61 in Bolton.

- 11.379** In accordance with Policy JP-C7, hHighway improvement measures will be needed to mitigate the impact of the development, notably at the junction of the A577 and Gibfield Park Way and between the site and the A6 and Junction 5 of the M61 in Bolton. The development will be required to make an effective contribution to the provision of these measures.
- 11.380** There is also a need for strategic improvements to services along the Atherton railway line between Wigan and Manchester, via Daisy Hill station, specifically to increase capacity at peak times, and increase service frequencies and extent, in accordance with Policy JP-C7. The increased use of the existing rail line could include its conversion to tram-train use, enabling greater frequency of services. This development is required to ensure good convenient and safe access within the site towards Daisy Hill and Hag Fold stations for pedestrians and cyclists ~~and contribute appropriately to passenger improvements at these stations.~~
- 11.381** The green infrastructure requirement will need to be delivered in advance and alongside the housing development and should provide effectively for a country park with wildlife habitats and recreational space. Appropriate provision should be made to sufficiently mitigate the impact of the development on great crested newts that are present in the area, as well as the presence of priority habitats in accordance with Policy JP-G9. The ongoing maintenance of the country park will need to be agreed with the Council.
- 11.382** In order to make the site attractive to potential occupiers and to safeguard the amenity of existing and future residents, high quality landscaping is required within the site and along sensitive site boundaries, including the provision of appropriate screening from the employment development. Street

trees and other strategic landscaping will be required along Gibfield Park Way, which is the key route through the site.

New paragraph - Where land is to be removed from the Green Belt, national policy seeks compensatory improvements to the environmental quality and accessibility of remaining Green Belt land. Potential enhancement projects have been identified in the Stage 2 Greater Manchester Green Belt Study – Identification of Opportunities to Enhance the Beneficial use of the Greater Manchester Green Belt (2020).

- 11.383** To ensure that a co-ordinated approach is taken to the delivery of this site, a masterplan will need to be prepared and agreed by the Council. The design and layout will need to be informed by site investigations, an archaeological assessment and other constraints and opportunities provided by the site. ~~The development will be also required to provide easements for the significant utilities infrastructure that runs through the site.~~

New paragraph - The allocation is identified as containing Mineral Safeguarding Areas for brickclay (99.7% of the site); sandstone (18.1%) and surface coal (99.7%) as defined in the Greater Manchester Joint Minerals Development Plan. The need for extraction prior to development commencing will be assessed against policies of that minerals plan (or any subsequent minerals plan) to ensure that specific mineral resources of local or national importance are not unnecessarily sterilised.

Blank Page

Delivering the Plan

- 12.1** The Greater Manchester Strategy (GMS) sets out a clear vision for Greater Manchester. This Plan has a vital role in delivering this vision but many of the necessary actions lie outside its scope and will be taken forward through other strategies, plans and programmes. Delivering these ambitions is a challenge but our history demonstrates that we are able to rise to this challenge. The level of growth proposed will require substantial amounts of investment from both the public and the private sector. It is therefore important that this Plan is supported by sources of funding and delivery mechanisms that are both timely and appropriate.
- 12.2** There are a number of adopted or emerging strategies and plans which relate to different infrastructure provision or influence the policy direction within this Plan, for instance the Infrastructure Strategy, Housing Strategy, Greater Manchester Transport Strategy 2040 refresh, Estates Strategy, Health and Social Care Strategic Plan, 5-year Environment Plan and the Natural Capital Investment Plan. Please see each of these strategies for their own methods of delivery.

Implementation

- 12.3** (AM12.1) In implementing the policies and proposals within this Plan, Local Authorities, the Mayor and GMCA will all have important roles, and should make best of all appropriate delivery mechanisms available, including:
- Working in partnership with other delivery agencies and organisations such as Homes England, the Environment Agency, Sport England, [National Highways England](#), Transport for Greater Manchester and utilities companies to ensure that essential infrastructure is provided.
 - Working in partnership with landowners, developers and other private sector organisations to secure deliverable development proposals and investment.
 - Establishing Mayoral Development Corporations, and preparation of Local Plans, Local Development Orders, Supplementary Planning

Documents, Masterplans and other frameworks to provide context and support for site and area-specific delivery.

- Support for Neighbourhood Planning and other local and community-led initiatives.
- Application of the Development Management process and other relevant regulatory functions.
- Use of compulsory purchase powers to assist with site assembly.
- Proactive use of publicly owned land holdings to assist in land assembly and the delivery of development.
- Use of Government grants, other sources of funding and prudential borrowing.
- Use of Section 106 agreements to secure affordable housing and other types of planning obligations.
- Use of tariff-based systems such as the Strategic Infrastructure Tariff and Community Infrastructure Levy for infrastructure delivery, where appropriate and in with the most current statutory regulations.
- Use of other sources of funding such as the lottery fund and other initiatives as they arise.

12.4 We will work in a collaborative way with infrastructure providers, national government, regulators and others involved in infrastructure planning and funding, to ensure the effective development and implementation of the infrastructure needed to support the delivery of the vision and objectives set out in this Framework.

Policy JP-D1: Infrastructure Implementation (MM12.1) (AM12.2)

~~To make this happen we will:~~ To ensure the effective development and implementation of the infrastructure needed to support the delivery of the vision and objectives set out in this document:

We will:

1. Take a long term, strategic, holistic and integrated approach to place shaping, supported by devolved resources and powers. Utilising the spatial locations set out in this Plan a place-based approach will be undertaken to overcome barriers, achieving prosperity and opportunity;

We will work with infrastructure providers to:

2. Promote collaboration and synchronisation of investment plans ~~between ourselves and the main infrastructure providers.~~ Key infrastructure providers include NHS Greater Manchester Integrated Care Partnership (formerly Clinical Commissioning Groups), the NHS, National Highways England, Network Rail, Transport for Greater Manchester, United Utilities, the Environment Agency, National Grid, Cadent, United Utilities and digital/telecommunication providers;
3. ~~Work directly with the infrastructure providers and regulators (including Ofcom, Ofwat and Ofgem) to ensure that future investment plans are consistent with~~ have regard to this Plan; The involvement of regulators (including Ofcom, Ofwat and Ofgem) will be critical in this regard;
4. ~~Establish a new long-term funding mechanism for transport and site specific infrastructure to ensure timely delivery and capture of developer contributions;~~
 New criterion: Minimise disruption to highways and businesses during major infrastructure upgrades and pipe subway construction; and
 New criterion: Promote the provision and use of shared routing, trenching and programming particularly in areas where there is extreme pipe and cable congestion under the streets to reduce disruption.

We will, through local plans, other local planning documents and development management decisions:

5. Encourage early dialogue between developers and infrastructure providers to identify the infrastructure needs arising from new development and ensuring that these are addressed through building design, utility networks and connections in time to serve the proposed development;

6. Require applicants to prepare an infrastructure phasing and delivery strategy ~~for strategic sites, and major sites~~ to be agreed by the local planning authority for sites where build out will be delivered by different developers or in phases. This strategy must outline what needs to be provided by when and who will fund and deliver it; and
7. Ensure that development does not lead to capacity or reliability problems in the surrounding area by requiring applicants to demonstrate that there will be adequate utility ~~infrastructure~~ capacity to support the delivery and occupation of their proposed development, from first occupation until development completion. Where potential capacity problems are identified and no improvements are programmed by the relevant infrastructure provider, we will require the developer to contribute to and/or facilitate necessary improvements where this would be necessary to mitigate the impact of development. As a minimum, applicants should identify and plan for:
- ~~• Minimising the demand for energy, water and utility services by requiring sustainable building design and the incorporation of demand management measures within all new development and conversions where practicable;~~
 - ~~• Electricity supply to serve the construction phase and the intended use for the site, and identify, in conjunction with electricity providers the estimated load capacity of the building and the substations and routes for supply;~~
 - ~~• Reasonable gas and water supply, considering the need to conserve natural resources;~~
 - ~~• The provision of multiple ducting to support full fibre digital connections from different providers;~~
 - ~~• Heating and cooling demand and the viability of its provision via decentralised energy networks. Designs must incorporate access to existing networks where feasible and viable; and~~
 - ~~• Where potential capacity problems are identified and no improvements are programmed by the relevant infrastructure provider, we will require the developer to contribute to and/or facilitate necessary improvements.~~

- ~~8. Work with infrastructure providers to minimise disruption to highways and businesses during major infrastructure upgrades and pipe subway construction; and~~
- ~~9. Promote the provision and use of shared routing, trenching and programming particularly in areas where there is extreme pipe and cable congestion under the streets to reduce disruption.~~
- 12.5** We have strong links with the various infrastructure providers that service the conurbation, including United Utilities, Environment Agency, Electricity North West, Cadent (gas) digital/telecommunication providers. The continuation of this co-operative working relationship is key to ensuring delivery of this policy. Developers, landowners and building occupants also have a role to play in demand management, early engagement with utility providers and co-operative working to avoid disruption.

Infrastructure Strategy

- 12.6** The quality, distribution and resilience of infrastructure will be an important factor in determining whether the GMS and consequently this Plan, is successfully implemented and delivered. Infrastructure is essential to support the delivery of the vision and objectives of this Plan.
- 12.7** The capacity of the utility network to accommodate increased demand is considered generally robust. However, population, economic growth and changes in technology will increase demand, both for new and for existing infrastructure. Combined with a backlog of capital investment, historically low levels of investment compared to other countries and continually growing and changing expectations for infrastructure requirements over the next thirty years will be substantial. This is why we are working with the Government through the Local Industrial Strategy to ensure that the right powers and funding are in place to ensure the timely delivery of the right infrastructure in the right place at the right time.

12.8 An Infrastructure Framework for Greater Manchester¹⁵² has been produced. It frames the key issues and priorities which need to be addressed and sets out:

- The key trends affecting Greater Manchester's Infrastructure to 2040
- How these trends will affect each infrastructure network
- The eleven challenges that will have to be overcome through a series of responses

12.9 The Greater Manchester Strategic Infrastructure Board will consider and respond to the issues and challenges raised by the Infrastructure Framework. It includes representatives from United Utilities, Electricity North West, Cadent, Environment Agency, Transport for Greater Manchester as well as GMCA officers and Chief Resilience Officer.

Delivering New Infrastructure

12.10 To achieve our ambitions, investment in transport infrastructure is required, as is the need to invest in enabling infrastructure, such as social infrastructure, green infrastructure, water, wastewater, energy and digital connectivity.

12.11 The “Greater Manchester Transport Strategy 2040” (refreshed in 2020) describes our ambitions for transport in more detail. It outlines how significant investment in sustainable modes of transport, in particular, will be essential to achieving this more sustainable vision for the future. The Strategy is supported by Our Five-Year Transport Delivery Plan, updated annually, to set out the immediate and longer-term programme for transport interventions needed to support sustainable growth. The Greater Manchester Cycling and Walking Infrastructure Proposal sets out a vision for Greater Manchester to become the first city region in the UK to have a fully joined up walking and cycling network.¹⁵³ To support the delivery of the proposal, a broad range of improvement measures will be required, varying

¹⁵² [GM Infrastructure Framework 2040](#)

¹⁵³ [Mayor of GM, GMCA and TfGM \(2018\): Greater Manchester's cycling and walking infrastructure proposal](#)

from route to route, including the provision of easy crossing points, innovative approaches to junction design, and the creation of fully segregated cycleways. The availability of future funding, particularly from central government, will be a key determinant of the extent to which the necessary improvements to our connectivity and transport infrastructure can be achieved. New development will also have a significant role in supporting the delivery of new and improved transport infrastructure and services.

12.12 (AM12.3) There is a growing need for social infrastructure across the Plan area, in particular to support education and health provision. Central government provides the majority of the capital funding through the basic need grant and Department for Education (DfE) free school programme to create school places and to carry out capital maintenance and repair work to existing school buildings, supplemented by capital contributions from individual local authorities. Since 2013, Public Health has been the responsibility of local authorities, which allows for a more joined-up approach to the delivery of public health policies and facilities. In April 2016, Greater Manchester became the first region in the country to take control of its combined health and social care budgets. As part of this, a key aim is to better integrate health and social care services including wider community health services. Local Authorities work with Clinical Commissioning Groups ([now the NHS Greater Manchester Integrated Care Partnership](#)) and NHS England to determine what investment is required by monitoring housing and population growth. Contributions secured through Section 106 agreements can be used to support the provision of new social infrastructure facilities, particularly in Strategic Allocations where there is limited existing infrastructure.

12.13 The city's green infrastructure provides a wide range of benefits and services that generate significant economic value in a cost-effective way. However, provision of green infrastructure has traditionally been the responsibility of public authorities and various public or third-sector land-management bodies. In an attempt to address the problem of not properly valuing the services and benefits of green infrastructure, the Government has committed

to including natural capital accounts in the UK Environmental Accounts by 2020. This re-framing of our understanding of the economic value of green infrastructure should mean that developers are more willing to integrate green infrastructure into developments rather than considering the provision of green space as simply a condition of planning. A Natural Capital Investment Plan for Greater Manchester is being prepared which will promote investment and delivery of opportunities to protect and enhance our natural capital. This Plan will help to ensure that the economic benefits of green infrastructure can be understood alongside other key indicators of economic performance.

12.14 Investment in energy, fresh water and wastewater infrastructure is usually funded by providers through user charges to the consumer and connections charges to developers. Spend on new assets and operating costs are agreed through negotiations between the provider and regulator. These plans are then set out at the beginning of the regulatory price-control period in the provider's business plan. Capital expenditure is funded through user charges, so utilities companies typically borrow to fund the upfront costs of investment. The scale of growth in some parts of the Plan area may require significant capital investment in water and energy infrastructure, so investment ahead of demand will be required to ensure the utilities are available when sites are developed. In collaboration with the GMCA we are working with providers to ensure the investment is secured to support development at the right time.

12.15 New digital connectivity infrastructure is typically paid for upfront through finance or private equity investment backed by user charges and connections charges to developers. In general, decisions on where to invest in infrastructure are determined on a demand-led basis. The fast-changing nature of digital technology and increasing dependence on faster broadband means that investment ahead of demand should be supported. In collaboration with the GMCA we are working with providers to ensure the investment is secured to support development at the right time.

Funding

12.16 (MM12.2) There is a significant gap between the public-sector funding required to deliver and support our growth, and the amount currently committed to fund it. In some areas of the city region, major development projects are not being progressed because of the uncertainty around funding. Developments will need to deliver, or help to enable the delivery of, infrastructure required to support sustainable communities, through planning conditions, and developer contributions secured in a variety of ways. These methods include: Section 106 planning obligations, the Community Infrastructure Levy, and agreements made under Section 278 of the Highways Act 1990 (as amended), ~~or the potential introduction of a Strategic Infrastructure Tariff.~~

12.17 Planning obligations made under Section 106 of the Town and Country Planning Act 1990 (as amended), are a mechanism used to make development acceptable in planning terms through securing the provision of affordable housing or the delivery of infrastructure or requiring development to be used in a particular way. Planning obligations must be used in accordance with national guidance and legislation and are subject to statutory and policy tests to ensure that they are necessary to make the development acceptable in planning terms, directly related to the development, and fairly and reasonably related in scale and kind to the development. A local planning authority should set out policies which indicate the level of contributions required. Site-specific legal contracts taking account of these policies are then made on a site-by-site basis, securing financial sums to pay for infrastructure provision, or through 'in-kind' contributions. Examples of in-kind contributions include: provision of land to accommodate new facilities provided by other organisations, construction and fit-out of new facilities, or provision of 'shell and core' space at peppercorn rent; however any direct delivery must not contravene state aid or public procurement rules.

12.18 The Community Infrastructure Levy (CIL) is a locally-determined, non-negotiable, pounds-per-square metre development charge designed to help

finance the delivery of infrastructure and was introduced as a mechanism by the Government in April 2010. In contrast to Section 106, which require developer contributions for infrastructure to mitigate a specific development, CIL is intended to address the cumulative impact of developments across an area. Variations in charging rates are permitted between areas within the planning authority, as well as by different types of development, which must be set out in a published charging schedule. Local authorities are able to determine their CIL charges according to local considerations, although these are subject to two rounds of public consultation and review by an Independent Examiner. Across the Plan area, only one Local Authority has progressed work sufficiently to implement a CIL charging schedule, adopted in Trafford in July 2014.

12.19 ~~(AM12.3) In August 2020 the Government published its White Paper 'Planning For The Future'. The White Paper was accompanied by a consultation document, 'Changes to the current planning system'. Together, these documents propose radical reforms to the planning system—long and short term. Key changes include zoning of land in local plans into three types of area—Growth, Renewal and Protection and replacing the current system of planning obligations and CIL with a single development levy to fund local infrastructure. However, these proposals are still subject to potential change following the public consultation in 2020. It is also noted that primary legislation may be required to bring forward the proposals. In May 2022 the Government published its Levelling Up and Regeneration Bill. The Bill proposes reforms to the planning system including a new mandatory and locally set infrastructure levy to replace the current system of developer contributions. The detailed design of the levy will be delivered through regulations.~~

12.20 Across the Plan area we have a range of locally based priorities to be fulfilled through developer contributions. Some boroughs have supplementary planning documents setting out these priorities and the likely scale of contributions that different types of development are likely to require.

Policy JP-D2: Developer Contributions (MM12.3)

We will require developers to provide, or contribute towards, the provision of mitigation measures to make the development acceptable in planning terms. These will be secured through the most appropriate mechanism, including, but not limited to, planning conditions, ~~legal contracts~~ Section 106 planning obligations, agreements made under Section 278 of the Highways Act 1990 (as amended), or CIL (or any subsequently adopted planning gain regime).

~~Applicants should take account of policies in development plans and other relevant documents when developing proposals and acquiring land. It is expected that viability assessments should only be undertaken where there are clear circumstances creating barriers to delivery. If an applicant wishes to make the case that viability should be considered, they should provide clear evidence at the planning application submission stage, demonstrating the specific issues that would create barriers to delivery in a transparent manner and reflecting national guidance.~~

If an applicant wishes to make a case that a development is not viable, they should provide clear evidence at the planning application stage, identifying the specific issues and/or changes in circumstance which would create barriers to delivery in a transparent manner and reflecting national guidance.

Where it is accepted that viability should be considered as part of the determination of an application, the Local Planning Authority should determine the weight to be given to a viability assessment alongside other material considerations.

Monitoring

12.21 Monitoring is a key component of any development plan document and therefore is key to the success of this Plan. To be effective plans need to be kept up-to-date and monitored. We need to regularly monitor performance to assess whether we are achieving our strategic objectives and whether our policies remain relevant, or whether they need to be updated.

12.22 This plan is based on a number of projections, forecasts and research available at this point in time. While these provide a sound basis for the plan's overall strategy and policies, it is important to understand that

circumstances can change and that the plan is flexible to this change. It is therefore important to establish indicators that can be robustly monitored, to gain an understanding of any significant changes that could give rise to reconsideration of the content of the strategy or policies and to update the associated evidence base where required.

- 12.23 (MM12.4) The table below sets out the proposed monitoring framework for the Plan. ~~It focuses on the key priorities of the plan. It sets out the indicators which will be used and the geographical areas each will be applied to. In order to monitor the Vision, Objectives and Strategy effectively, the data for the indicators will be collected across varying geographical areas of the plan. The analysis will have a particular focus on the Core Growth Area (JP-Strat 1), the Inner Areas (JP-Strat 5), the Northern Areas (JP-Strat 6) and the Southern areas (JP-Strat 9). The spatial strategy geographical areas referred to in table 12.1 reflect the Strategic Policies set out in Chapter 4 of the Plan. Until such time that the detailed boundaries of these areas are established in district local plans, the authority monitoring report will illustrate the geographical boundaries to which the data refers.~~
- 12.24 The Allocations will be monitored by districts but where a PfE indicator will form part of this monitoring it is noted in the 'Allocation' column of table 12.1.
- 12.25 The outcomes of PfE monitoring will form part of each of the districts own Local Plan Authority Monitoring Reports.

Table 12.1 Places for Everyone Monitoring Framework (MM12.5)

<u>PfE KPI/Target</u> <u>Baseline at 2020 unless</u> <u>otherwise stated</u> <u>Policy Outcome</u>	Places for Everyone Strategic Objective	<u>Relevant PfE policy</u>	Policy Outcome/Indicators	<u>Geographical level to which indicator is monitored</u>

Appendix A: Replaced District Local Plan Policies

- A.1** Regulation 8(5) of the Town and Country Planning (Local Planning) (England) Regulations 2012 explains that ‘where a Local Plan contains a policy that is intended to supersede another policy in the adopted development plan, it must state that fact and identify the superseded policy.’
- A.2** (MMApxA.1) ~~Upon adoption of this Plan a number of policies in district local plans will be partially replaced by policies in this Plan (see tables below) The following policies have been wholly or partially replaced.~~ Any part of the policy which is not replaced will be retained and will remain part of the respective statutory development plan.

Schedule of Proposed Additional Modifications to the Places for Everyone Plan

Additional modifications (sometimes also referred to as “minor modifications”) are changes which do not materially affect the policies in the Plan. They do not fall within the scope of the examination however the nine PfE districts consider that it would be helpful to identify these alongside the Main Modifications’ Schedule for completeness. The additional modifications are clearly set out with deletions being shown as strikethrough and new text being underlined.

Add. Mod. Ref.	PfE Ref.	PfE Page No.	Additional Modification Text	Reason for modification	Doc/ PQ/ MIQ Ref
AM1.1	Sub-title above para 1.1	8	Include new sub-title before paragraph 1.1 as follows: “ <u>Background</u> ”	This clarifies the role of paragraphs 1.1 to 1.11	-
AM1.2	Para 1.13	10	Modify the last sentence of paragraph 1.13 as follows: “Of course, we need to underpin all of this this with quality education, work and skills provision across the Plan area: using science and digital to engage people at a young age; developing a clear light <u>line</u> of sight to opportunities; guaranteeing opportunities for all young People; and support those furthest from the labour market back into work.”	Typos	-

Add. Mod. Ref.	PfE Ref.	PfE Page No.	Additional Modification Text	Reason for modification	Doc/ PQ/ MIQ Ref
AM1.3	Para 1.14	10	<p>Modify the final sentence of paragraph 1.14 as follows:</p> <p>“Urban greenspace is under pressure and needs to be protected and enhanced wherever possible. The proposals for the first city centre park at Mayfield is leading <u>has led</u> the way.”</p>	To reflect the passage of time	-
AM1.4	Para 1.16	10	<p>Modify paragraph 1.16 as follows:</p> <p>“The Places for Everyone: Publication Plan is our spatial plan to underpin our recovery.”</p>	To reflect the passage of time	-
AM1.5	Para 1.17	10	<p>Modify the title above paragraph 1.17 as follows:</p> <p>“The Places for Everyone: Publication Plan”</p>	To reflect the passage of time	-
AM1.6	Para 1.21	11	<p>Modify the first sentence of paragraph 1.21 as follows:</p> <p>“The text of the GMSF2020 <u>was</u> has been revised following the withdrawal of Stockport.”</p>	To reflect the passage of time	-
AM1.7	Para 1.29	13	<p>Modify the first sentence of paragraph 1.29 as follows:</p> <p>“In extremely challenging times, the need for bold ambitious plans for good quality employment are <u>is</u> critical.”</p>	Typo	-

Add. Mod. Ref.	PfE Ref.	PfE Page No.	Additional Modification Text	Reason for modification	Doc/ PQ/ MIQ Ref
AM1.8	Para 1.30	13	<p>Modify the second sentence of paragraph 1.30 as follows:</p> <p>“Meeting market demand for sites and infrastructure is essential however as all places in the UK will be seeking to capture growth to offset the impact of the economic downturn and the loss of jobs in our current growth sectors.”</p>	Typo	-
AM1.9	Para 1.39	14	<p>Modify the last sentence of paragraph 1.39 as follows:</p> <p>“We are piloting <u>piloted</u> the development of a Local Nature Recovery Network Strategy with Natural England.”</p>	To reflect the passage of time	-
AM1.10	Para 1.41	15	<p>Modify the first sentence of paragraph 1.41 as follows:</p> <p>“As part of this consultation we are being as transparent as possible about the land we have identified within the urban area. The land supply position for the nine districts is published alongside this consultation.”</p>	To reflect the passage of time	-
AM1.11	Para 1.43	15	<p>Modify the last sentence of paragraph 1.43 as follows:</p> <p>“If we cannot demonstrate that our brownfield land is available, and then we are required to identify other land which is this may be Protected Open Land or Green Belt.”</p>	Typo	-
AM1.12	Para 1.45	15	<p>Modify the second and third sentences of paragraph 1.45 as follows:</p>	To reflect the passage of time	-

Add. Mod. Ref.	PfE Ref.	PfE Page No.	Additional Modification Text	Reason for modification	Doc/ PQ/ MIQ Ref
			<p>“The recently announced Brownfield Land Fund is targeted at Combined Authorities and begins to help to address viability issues across the conurbation, but it is not enough. We continue to work are bidding for more funding but further discussions with Government are critical to enable the full potential of our brownfield land supply to be realised”.</p>		
AM1.1 3	Para 1.53	17	<p>Modify the third sentence of paragraph 1.53 as follows:</p> <p>“We <u>Greater Manchester</u> have looked at the major challenges that we consider our existing infrastructure networks will have to respond to and have produced an Infrastructure Framework setting this out.”</p>	To clarify that the Infrastructure Framework is a GM document	-
AM1.1 4	Para 1.62	18	<p>Modify the last sentence of paragraph 1.62 as follows:</p> <p>“On this basis, it is proposed <u>was agreed</u> to proceed directly to Publication stage under Regulation 19 of the Town and Country Planning (Local Planning) England Regulations 2012.”</p>	To take account of the passage of time	-
AM1.1 5	Para 1.63 to 1.68	18 - 20	<p>Delete paragraphs 1.63 to 1.68 and insert the following new text as paragraph 1.63:</p> <p>“<u>The consultation under Regulation 19 ran for 8 weeks, starting in August 2021. The draft joint DPD (Places for Everyone) and all representations received during the Regulation 19 consultation were sent to the Secretary of State</u>”</p>	To take account of the passage of time	-

Add. Mod. Ref.	PfE Ref.	PfE Page No.	Additional Modification Text	Reason for modification	Doc/ PQ/ MIQ Ref
			(the “Submission stage”) pursuant to Reg. 22 of the <u>Local Planning Regulations</u> . Following that, <u>three independent inspectors were appointed to examine the plan and the formal hearing sessions of the examination began in November 2022.</u> ”		
AM2.1	Para 2.4	24	<p>Modify sentences 3 to 6 of paragraph 2.4 as follows:</p> <p>“The population of Greater Manchester is forecast to have grown by around another 195<u>0</u>,000 people by 203<u>9</u> <u>7</u> (of which just over 177 <u>0</u>,000 will be within the nine districts making up the PfE Plan area). This growth, in turn, will contribute to a significant increase in households. 66 <u>9</u>% of the population growth is expected to be in those aged 65 and over, and approximately 40% of the growth will be amongst those aged 75 and over. Growth in the working age population (18-64) will be lower (approximately 40 <u>38</u>% of the total growth), but still significant at around 75,000. This concentration of growth is likely to continue in the future, with Manchester, Salford and Rochdale forecast to account for around 47% of Greater Manchester’s population growth over the period up to 203<u>9</u> <u>7</u> or just over 50% of the population growth in the PfE Plan area.”</p>	Consequential as a result of changes to the Plan Period	GMCA9 SQ1.12
AM2.2	Para 2.6	25	<p>Modify paragraph 2.6 from sentence 3 as follows:</p> <p>“The baseline economic forecast foresees an increase of around 100,000 jobs by 203<u>9</u> <u>7</u> (of which approximately 90%</p>	Consequential as a result of changes to the Plan Period	GMCA9 SQ1.12

Add. Mod. Ref.	PfE Ref.	PfE Page No.	Additional Modification Text	Reason for modification	Doc/ PQ/ MIQ Ref
			<p>is forecast to be within the PfE Plan area). Similar changes in the sectoral mix to the recent past are forecast, although a more ambitious accelerated growth scenario estimates an increase of just over 170,000 jobs across Greater Manchester. Employment opportunities are unevenly dispersed across Greater Manchester, with by far the most significant concentration currently being in the City Centre and adjoining areas such as Salford Quays, which collectively account for around 20% of all jobs. Baseline economic trends⁽³⁾ suggest the majority of the employment growth would be in Salford, Manchester and Trafford. The remaining districts would see only modest change in employment in the period 2020-39 7, with some districts (Oldham, Rochdale, Tameside and Wigan) seeing small decreases in total employment in this period.”</p>		
AM2.3	Para 2.10	26	<p>Modify the first sentence of paragraph 2.10 as follows:</p> <p>“This covers the City Centre and the Quays and extends eastwards to include Central Park and the Etihad eCampus, and westwards through Trafford Park which is one of Europe’s largest industrial estates.”</p>	Typo	-
AM2.4	Para. 2.14	27	<p>Modify the final sentence of paragraph 2.14, as follows:</p> <p>“More locally, the emerging Airport City development (part of the Greater Manchester Enterprise Zone) is creating a major</p>	To clarify the sustainable growth location of Manchester Airport ensuring consistency	M5.1 Q5.13

Add. Mod. Ref.	PFE Ref.	PFE Page No.	Additional Modification Text	Reason for modification	Doc/ PQ/ MIQ Ref
			new economic asset, attracting global occupiers and investment attracted by the unrivalled connectivity.”	across the Plan, including Policy JP-Strat10.	
AM2.5	Para 2.29	32	<p>Modify the penultimate sentence of paragraph 2.29 as follows:</p> <p>“This concentration of growth is likely to continue in the future, with Manchester, Salford and Trafford forecast to account for 44 <u>5</u>% of population growth up to 203<u>9</u>7, around 60% of GVA growth, and 90% of the increase in employment⁸.”</p>	Consequential as a result of changes to the Plan Period	GMCA9 SQ1.12
AM3.1	Objective 3	39	<p>Amend the start of bullet 4 of objective 3 as follows:</p> <p>“Facilitate the development of high value clusters in prime <u>key economic</u> sectors such as:”</p>	To clarify with a correctional wording change to ensure the policy is consistent with NPPF paragraph 123 which refers to key economic sectors, rather than prime sectors.	
AM3.2	Objective 4	40	<p>Amend the first bullet of objective 4 as follows:</p> <p>“Focus development in the Core Growth Area, Manchester Airport and key economie <u>growth</u> locations.”</p>	To ensure consistency with JP-J1 point G and to remove ambiguity.	-

Add. Mod. Ref.	PfE Ref.	PfE Page No.	Additional Modification Text	Reason for modification	Doc/ PQ/ MIQ Ref
AM4.1	Spatial Strategy Figure 4.1	48	Modify colour scheme of figure 4.1.	To clarify as a consequential change to other policies in the framework.	GMCA96 AP147
AM4.2	JP-Strat3: The Quays Figure 4.4	55	Modify figure 4.4 to add reference to 'Warrington,' and modified colour scheme.	To clarify as a consequential change to other policies in the framework.	GMCA96 AP147
AM4.3	JP-Strat6: Northern Areas Reasoned Justification Para 4.47	60	Modify the second sentence of paragraph 4.47 as follows: "There is a need to increase the density of high quality public transport routes to match that found in the southern areas. Improving connections between places in the north, and to key economic growth locations such as those within the Core Growth Area and Manchester Airport, would help to deliver a more integrated Greater Manchester economy where everyone can benefit fully from growth."	To ensure consistency with JP-J1 point G and to remove ambiguity.	-
AM4.4	JP-Strat 6: North East Growth Corridor Reasoned Justification Para 4.49	61	Modify the first sentence of paragraph 4.49, as follows: "The most significant proposed intervention in the northern areas is focused on the M62 corridor from Junction 18 (the confluence with the M60 and M66) to Junction 21 (Milnrow), extending across parts of Bury, Rochdale and Oldham (GM-Strat 7 JP-Strat7)."	To clarify, reflecting a consequential change to reference Policy JP-Strat7	GMCA96 AP147

Add. Mod. Ref.	PfE Ref.	PfE Page No.	Additional Modification Text	Reason for modification	Doc/ PQ/ MIQ Ref
AM4.5	JP-Strat9: Southern Areas Reasoned Justification Para 4.62	67	<p>Modify the second sentence of paragraph 4.62 as follows:</p> <p>“This will include the selective release of Green Belt for new employment and housing around the airport, including the Davenport Green area around the proposed HS2 station and beyond to the hospital and southern edge of Timperley.”</p>	In line with IN36 following removal of JPA-10	IN36 AP144 GMCA96 AP147
AM4.6	JP-Strat10: Manchester Airport Reasoned Justification Paras 4.66 and 4.68	68, 69	<p>Modify the last sentence of paragraph 4.66 as follows:</p> <p>“More locally, the emerging Airport City development (part of the Greater Manchester Enterprise Zone) is creating a major new economic asset for Greater Manchester, attracting global occupiers and investment attracted by the unrivalled connectivity.”</p> <p>Modify the fourth and fifth sentences of paragraph 4.68 as follows:</p> <p>“The M56 J6 to J8 smart motorway scheme will serve to maximises the benefits of recent/ongoing investment in the A556 and M6 J19 improvements. <u>National Highways England</u> have also commenced a South Manchester Highways and Transport Study which is exploring options for improvements to transport links to mitigate the impact on the M56 of proposed growth in this location.”</p>	<p>To ensure consistency across the plan.</p> <p>Updated to reflect current position</p>	M5.1 Q5.13 GMCA96 AP147

Add. Mod. Ref.	PfE Ref.	PfE Page No.	Additional Modification Text	Reason for modification	Doc/ PQ/ MIQ Ref
AM4.7	JP-Strat12: Main Town Centres Reasoned Justification Para 4.77	75	<p>Modify the second sentence of paragraph 4.77 as follows:</p> <p>“Increasing the numbers of residents in town centres will also enable more people to take advantage of their transport connections and for brownfield land to be prioritised in <u>development opportunities.</u>”</p>	Consequential change as a result of changes to policy JP-S1	GMCA96 AP147
AM5.1	JP-S1: Sustainable Development Reasoned Justification Para. 5.1	82	<p>Modify the first sentence of paragraph 5.1 as follows:</p> <p>“The purpose of the planning system as set out in legislation and the National Planning Policy Framework (2019<u>2021</u>) is to contribute to the achievement of sustainable development and to maintain a presumption in favour of such development as part of plan making and decision taking.”</p>	To clarify, reflecting the updated NPPF reference	M6.1 Q6.1 GMCA21.1 AP20a
AM5.2	<p>JP-S2: Carbon and Energy Reasoned Justification</p> <p>Paras 5.5, 5.7, 5.9, 5.11, 5.12, 5.18, 5.19,</p>	83, 84, 85, 86, 88, 89	<p>Delete footnote 17 to paragraph 5.5 as follows:</p> <p>“A Greater Manchester carbon budget compliant with the Paris Agreement was developed by Tyndall (2019)– https://www.research.manchester.ac.uk/portal/files/83000155/Tyndall_Quantifying_Paris_for_Manchester_Report_FINAL_PUBLISHED_rev1.pdf”</p> <p>Delete footnote 20 to paragraph 5.9 as follows:</p> <p>“Energy Systems Catapult (2016), Greater Manchester Spatial Energy Plan: https://www.greatermanchester-ca.gov.uk/media/1363/spatial_energy_plan_exec_summary.pdf”</p>	<p>Footnote unnecessary as GM’s international commitment to becoming a carbon neutral city region by 2038 is covered in the next footnote and the Carbon and Energy Topic Paper.</p> <p>Delete footnote as webpage has been removed.</p> <p>For clarity.</p>	PMM6 GMCA 12.3.3

1 Introduction

- 1.1 Following the Examination of the Places for Everyone (PfE) Plan, the Inspectors have recommended a series of Main Modifications to be made to make the Plan sound and legally compliant. To comply with the terms of the Conservation of Habitats and Species Amendment (EU Exit) Regulations 2019 it is necessary for these Modifications to be Screened and, if necessary, Assessed in order to confirm that they will not cause any Likely Significant Effects on European sites.
- 1.2 The purpose of this Report is to Screen and, if necessary, Assess, the Main Modifications proposed for Places for Everyone. The Report needs to be considered with full reference to the HRA of the PfE and associated Appendices, submitted to the Examination in November 2022 (Examination document ref: [OD7.1](#)).
- 1.3 Table 1 in Section 2 of this report summarises the Screening of the Main Modifications and the remainder of Section 2 explains how the modifications will not have a Likely Significant Effect on European sites.
- 1.4 Natural England has signed a Position Statement, a copy of which is in the Appendix, which confirms that Natural England considers that the Screening Assessment of the PfE proposed main modifications, together with the presenting of the results as an addendum report to the PfE HRA, is a reasonable approach. The Position Statement also confirms that Natural England agrees with the outcome of the Screening Assessment that there are no “Likely Significant Effects” on European sites, other than those identified in the HRA of the PfE. Therefore, Natural England agrees that it is not necessary to amend the PfE Appropriate Assessment as a result of the proposed main modifications.

2. HRA Screening of Main Modifications

- 2.1 The Places for Everyone Main Modifications have been Screened for Likely Significant Effects (LSE) on relevant designated sites. The summary table screens only the LSE of the Modifications. Screening of the LSE of the Publication Plan policies and allocations remains relevant, as does the proposed Assessment and Mitigation of LSE where these have been identified as part of the Screening of the Publication Plan in the HRA of the PfE ([OD7.1](#)).

Table 1: Summary of Test of Likely Significant Effects for the Main Modifications of the Places for Everyone Plan, September 2023

Main Mod Schedule Refs	Modifications to PfE Chapter	Likely Significant Effects?
MM1.1 – M1.12	1. Introduction	No Likely Significant Effects
MM2.1	2. Context	No Likely Significant Effects
MM3.1	3. Vision	No Likely Significant Effects
MM4.1 – MM4.32	4. Strategy	No Likely Significant Effects
MM5.1 – MM5.13	5. Sustainable and Resilient Places	No Likely Significant Effects
MM6.1 – MM6.15	6. Places for Jobs	No Likely Significant Effects
MM7.1 – MM7.9	7. Places for Homes	No Likely Significant Effects
MM8.1 – MM8.22	8. Greener Places	No Likely Significant Effects
MM9.1 – MM9.10	9. Places for People	No Likely Significant Effects
MM10.1 – MM10.14	10. Connect Places	No Likely Significant Effects
MM11.1 – MMW9	11. Allocations	No Likely Significant Effects
MM12.1 – MM12.5	12. Delivering the Plan	No Likely Significant Effects
MMApxA.1 – MMApxA.10	Appendix A – Replaced Local District Plan Policies	No Likely Significant Effects
MMApxB.1 – MMApxB.5	Appendix B – Additions to the Green Belt	No Likely Significant Effects
MMApxC.1	Appendix C – Places for Everyone Policies Map	No Likely Significant Effects

Main Mod Schedule Refs	Modifications to PfE Chapter	Likely Significant Effects?
MMApxD.1	New Appendix	No Likely Significant Effects
MM12.5	Annex 1 of the PfE Main Modifications Schedule – Proposed Main Modifications to Table 12.1 (MM12.5)	No Likely Significant Effects
MMApxA.2 – MMApxA.10	Annex 2 of the PfE Main Modifications Schedule – Proposed Main Modifications to Appendix A (Replaced Local District Local Plan Policies of the PfE Plan)	No Likely Significant Effects
MM2.1 – MMApxC.1	Annex 3 - Proposed main modifications to the illustrative maps, pictures and diagrams compared to the PfE Plan SD1	No Likely Significant Effects
MMApxB.3	Annex 4 of the PfE Main Modifications Schedule - Green Belt Additions	No Likely Significant Effects
MMApxD.1	Annex 5 of the Main Modifications Schedule – Proposed Main Modifications to Introduce a New Appendix D into the PfE Plan	No Likely Significant Effects

Explanation

- 2.2 The outcome of the screening assessment is that none of the Main Modifications to the PfE would have a Likely Significant Effect on European designated sites. The Main Modifications will not change the findings of the HRA of the PfE, November 2022 (OD7.1), in terms of the outcome of the Screening Assessment of Likely Significant Effects of the Plan or the further assessment and mitigation measures recommended in the Appropriate Assessment. Further explanation is provided below.
- 2.3 The Main Modifications would not raise traffic levels in and around the plan area such it would create an adverse air quality impact on the Holcroft Moss compartment of the Manchester Mosses SAC over and above the adverse impact that was identified, assessed and mitigated for in the HRA of the PfE, November 2022. Consequently, the proposed air quality mitigation in the HRA of the PfE, November 2022 for the Holcroft Moss site in the form of a developer contribution towards a Habitat Mitigation Plan and the provision of measures to reduce reliance of cars, reduce trip generation and promote ultra-low vehicle emissions remain a suitable mitigation package.

- 2.4 The Main Modifications would not increase recreation pressure on the South Pennine Moors SAC/SPAs over and above the adverse impact that was identified, assessed and mitigated for in the HRA of the PfE, November 2022. Consequently, the proposed recreation disturbance mitigation in the HRA of the PfE, November 2022 in the form of a development exclusion zone within 400m of the Moors, a requirement to assess and mitigate land for functionally linked habitats within 2.5km of the Moors and a requirement for development to provide or contribute towards the provision of Suitable Alternative Natural Greenspace and a Strategic Access, Monitoring and Management Strategy within 7km of the Moors remains a suitable mitigation package.
- 2.5 None of the Main Modifications would have an adverse impact on the Rochdale Canal SAC, such that they would change the findings of the HRA of the PfE, November 2022. Consequently, the proposed mitigation in the HRA to assess and potentially mitigate boat movement, water pollution, and light spillage and shading impacts on the Rochdale Canal SAC remains a suitable mitigation package.
- 2.6 None of the Main Modifications will have a Likely Significant Effect on or change the findings of the HRA of the PfE, November 2022 in relation to diffuse water pollution on the Mersey Estuary Ramsar/SPA, air quality impacts on the South Pennine Moors SAC/SPAs and Rochdale Canal SAC and functionally linked habitats of PfE allocations to the South Pennine Moors SAC/SPAs, nor would there be any impact on any other European designated site.

3. Conclusions

- 3.1 Following Screening of the proposed Main Modifications to the Places for Everyone Plan it can be concluded that the proposed Modifications will not lead to any Likely Significant Effects on European sites, alone or in combination with other plans and projects, other than those identified in the HRA of the PfE, November 2022, and adequately mitigated in the Appropriate Assessment in the HRA of the PfE. The Position Statement from Natural England in the Appendix confirms that Natural England agrees with this conclusion.

Notes

- 1 Certain Modifications to Thematic Policies and Allocations have been made in order to facilitate the implementation of the mitigation measures that were recommended in the Appropriate Assessment of the HRA, November 2022 in order to avoid Adverse Effects on Integrity on European designated sites.
- 2 Certain Modifications to Thematic Policies and Allocations have been made in order to strengthen the protection offered to designated sites, and therefore the Modifications have strengthened the overall conclusions of the HRA.

APPENDIX

Places for Everyone Main Modifications – HRA

Natural England position statement

Natural England considers that the screening assessment of the Places for Everyone (PfE) proposed main modifications, together with the presenting of the results as an addendum report to the PfE HRA, is a reasonable approach.

Natural England agree with the outcome of the screening assessment that there are no “Likely Significant Effects” on European sites, other than those identified in the HRA of the PfE, November 2022 ([OD7.1](#)). Therefore, Natural England agree that it is not necessary to amend the PfE Appropriate Assessment as a result of the proposed main modifications.

PfE Allocation Boundary Changes

1 Introduction

Following the examination of Places for Everyone (PfE), the Greater Manchester (GM) Authorities have amended PfE as a result of recommendations from the Inspectors, action points being raised during hearings and updated with minor changes for consistency and clarity. These changes are shown in the 2023 PfE Composite Plan. The background to the PfE and the history to this addendum report is explained below.

1.1 Background to the Plan

In November 2014, the AGMA Executive Board recommended to the 10 Greater Manchester local authorities that they agree to prepare a joint Development Plan Document (“Joint DPD”), called the Greater Manchester Spatial Framework (“GMSF”) and that AGMA be appointed by the 10 authorities to prepare the GMSF on their behalf.

The first draft of the GMSF DPD was published for consultation on 31st October 2016, ending on 16th January 2017. Following substantial re-drafting, a further consultation on the Revised Draft GMSF took place between January and March 2019.

On the 30th October 2020 the AGMA Executive Board unanimously agreed to recommend GMSF 2020 to the 10 Greater Manchester Councils for approval for consultation at their Executives/Cabinets, and approval for submission to the Secretary of State following the period for representations at their Council meetings.

At its Council meeting on 3rd December Stockport Council resolved not to submit the GMSF 2020 following the consultation period and at its Cabinet meeting on 4th December, it resolved not to publish the GMSF 2020 for consultation.

As a joint DPD of the 10 Greater Manchester authorities, the GMSF 2020 required the approval of all 10 local authorities to proceed. The decisions of Stockport Council/Cabinet therefore signalled the end of the GMSF as a joint plan of the 10.

Notwithstanding the decision of Stockport Council, the nine remaining districts considered that the rationale for the preparation of a Joint DPD remained.

Consequently, at its meeting on the 11th December 2020, Members of the AGMA Executive Committee agreed in principle to producing a joint DPD of the nine remaining Greater Manchester (GM) districts. Subsequent to this meeting, each district formally approved the establishment of a Joint Committee for the preparation of a joint Development Plan Document of the nine districts.

Section 28 of the Planning and Compulsory Purchase Act 2004 and Regulation 32 of the Town and Country Planning (Local Planning) (England) Regulations 2012 enabled a joint plan to continue to progress in the event of one of the local authorities withdrawing, provided that the plan has 'substantially the same effect' on the remaining authorities as the original joint plan. The joint plan of the nine GM districts has been prepared on this basis. Consequently, the Plan is proceeded directly to Publication stage under Regulation 19 of the Town and Country Planning (Local Planning) England Regulations 2012.

Following this consultation, the plan was submitted to the Planning Inspectorate for independent examination, as per outlined in Section 20 (2) of the Planning and Compulsory Purchase Act 2004. Three Inspectors, William Fieldhouse, Louise Gibbons and Steven Lee, were appointed by the Planning Inspectorate to assess the plan. Hearing sessions were held in 2022 and 2023 for participants to have the opportunity to provide evidence to support the Inspector's assessment of PfE.

Following these hearings, main modifications have been proposed to the plan by the Inspectors, as permitted by Section 23 of the Planning and Compulsory Purchase Act 2004, to ensure the plan is sound and legally compliant. All proposed main modifications need to be subject to a public consultation, and where required, with accompanying evidence base work such as Sustainability Appraisal and Habitat Regulations Assessment. A separate schedule of additional modifications has been prepared which will sit alongside the Main Modifications' schedule during the consultation period. It should be noted that these have been prepared at this point in time to make the modified plan more readable. The consultation is only about the proposed main and additional modifications, rather than the merits of the plan.

The plan's content has changed over time through the iterative process of plan making, but its purpose has not. In view of this, the environmental assessments carried out at previous stages remain valid (including their scope). To assess the impact of the main modifications between the submission version of PfE and PfE with the proposed main modifications against the IA framework, this addendum report has been prepared which forms part of the overall IA/SEA and should be read in conjunction with the previously completed GMSF and PfE IA documentation. A Non-Technical Summary and revised Equality Impact Statement has also been drafted.

1.2 Purpose of the Report

This current report provides an update to the previous 2020 GMSF IA (inclusive of the Scoping Report, Main Report, Main Addendum Report and Growth and Spatial Options Paper), the 2021 Growth and Spatial Options Paper, the 2021 Growth and Spatial Options and Reasonable Alternatives Addendum and the 2021 Non-Technical Summary.

This addendum report is to provide consideration of the impacts of the proposed main modifications to policies, as set out in the 2023 PfE Composite Plan. This report demonstrates that consideration has been given to the main modifications as part of the iterative IA process. This has been requested to be subject to the IA process as appropriate, as outlined in the inspector's letter from the 30th of March 2023 (titled IN33 in the PfE Examination Library).

Therefore, rather than reassessing all policies again, for transparency, this separate addendum report sets out the level of change between the submission PfE plan policies and the main modifications proposed for the PfE policies and whether this has resulted in a need for a reassessment. Where the main modification was 'significant' or 'potentially significant', those policies were subject to a full reassessment. The methodology of our approach is detailed in following section.

Where there has been no material change or 'minor change', those policies were not subject to a reassessment and the assessments from 2020 or 2021 IAs stand. It is considered that this IA approach is transparent and proportionate to the level of change as a result of the main modifications as the Plan evolved through to PfE.

This same approach has been used in 2021 following the withdrawal of Stockport Council.

It should be noted that no amendments have been proposed to PfE's vision and objectives as part of this process. Therefore, as part of this process it has not felt appropriate to re-assess these as the previous IA assessments of the plan's vision and objectives still stand.

With this addendum report, a non-technical summary has been written to support transparency as part of the IA process. This is not required at this stage but is good practise to enable greater understanding of the iterative IA process and how the IA is supporting the development of the PfE.

Additionally, a refreshed Equalities Impact Statement, which forms part of the Equalities Impact Assessment (EqIA), has been updated as part of the iterative IA process. EqIA is designed to ensure that discrimination does not occur in the drawing up of plans and policies, and that such plans or policies meet the requirements of equality legislation in the UK, most notably the Equality Act 2010. It is being used as part of the IA to add value and depth to the assessment process. Under the Equality Act, public bodies are required to:

- have due regard to the need to eliminate discrimination
- advance equality of opportunity, and
- foster good relations between different people when carrying out their activities.

In order to understand which groups of people (or individuals), may suffer discrimination, the Equality Act sets out a series of "protected characteristics":

- age
- disability
- gender reassignment
- marriage and civil partnership
- pregnancy and maternity
- race
- religion or belief

- sex, and
- sexual orientation.

EqIA is two-stage process:

- Stage 1: Screening - this involves the assessment of impacts of the strategy/plan against the protected characteristics outlined above. If no negative effects are identified during screening no further assessment is required. If there are effects that cannot easily be mitigated, a full EqIA should be undertaken.
- Stage 2: Full EqIA - this involves more in-depth assessment of the impacts of the strategy/plan, the recommendation of mitigation measures, definition of monitoring and evaluation measures and public consultation.

To ensure this IA meets the requirements of EqIA, it will consider whether there is potential for PfE policies to affect people differently based on the protected characteristics and this is reflected in the IA Framework. The refreshed Equalities Impact Statement is shown in Appendix A.

2 Methodology

A review was undertaken of the proposed main modifications to determine the extent and significance of change in the context of the IA since the previous IA work 2020 and 2021. All PfE policies were reviewed to ensure the 2023 IA was comprehensive in its assessment.

The assessment table in Appendix B depicts and summarises the review process primarily through the following headings:

- 2020 or 2021 PfE Policy Reference;
- Policy Title;
- Summary of PfE Changes;
- Reason for Change and;
- Summary of level of change in the context of the IA (minor, potentially significant, significant change).

The first step was to analyse the main modifications proposed within the 2023 PfE Composite Plan. Based on the significance of main modifications and utilising professional judgement, each proposed main modification was then identified as 'minor change', 'potentially significant change' or 'significant change', as indicated in Table 1, in terms of their potential effect on the IA objectives. 'Potentially significant change' demonstrates a precautionary approach, balanced with being proportionate.

This review was completed to assist in the reassessment of policies within this round of the IA. Any main modifications to the reasoned justification text or wider plan wording have not been considered as the IA only assesses policies within the plan.

Within the tables, an overall qualitative summary was included for each policy to explain the effect the main modifications would have on the IA scoring for this 2023 IA. This can be found in Appendix B.

Table 1: Level of change

Level of change
‘Significant’ level of change – where changes to the policy are significant within the context of the IA; therefore, a full reassessment is required.
‘Potentially significant’ level of change – where changes to the policy were potentially significant within the context of the IA; therefore, a full reassessment is required.
No change or ‘minor’ level of change – where changes to the policy were not considered to materially affect or impact on the IA Objectives; therefore, a full reassessment is not required.

It should be noted that this approach is consistent with our previous work following the evolution of the Greater Manchester Spatial Framework (GMSF) to PfE following the withdrawal of Stockport in 2021.

For those policies identified as ‘significant’ or ‘potentially significant’ in terms of their potential effect on the IA objectives, a full 2023 reassessment was subsequently carried out against the IA Framework. Where a main modification has been identified as ‘potentially significant’ but upon assessment did not result in an assessment change to that criterion, no amendment has been made to mitigation comments. These IA matrices are contained in Appendices C and D. The previous IA matrices for these reassessed policies have also been included for transparency, as well as to demonstrate the iterative IA process.

Where main modifications to policy wording have not been considered ‘significant’ or ‘potentially significant’ in terms of their potential effect on the IA objectives, a reassessment has not taken place within this round of the IA. This is because the proposed main modifications are not considered material within the context of the IA and therefore, the previous IA assessment conducted in 2020 or 2021, is still appropriate.

Where policies have been deleted, this is considered a 'significant change' in terms of their potential effect on the IA objectives. In other policies where the deleted policy has previously been referenced, we note this as a 'potentially significant' main modification. This resulted in the other policy being reassessed to ensure any implications of the deleted policy are identified as part of the IA process.

Designations proposed as part of the plan, including Green Belt additions, have not been assessed as part of the IA. However, we have noted and acknowledged the proposed designations included within the plan. Consideration has been given to the proposed Green Belt additions as to whether reasonable alternatives would be required to be considered as part of the IA. However, the proposed additions were felt to be minor when viewed against the Greater Manchester Green Belt as a whole, therefore it was not deemed to be required.

As part of this round of the IA, we have noted and have included the plan's Appendix D to be considered as part of our assessment where it is referenced within plan policies, as this constitutes policy and therefore needs to be considered as part of the IA process.

There has also been the creation of one new additional policy, titled 'Strategic Road Network' which has had a complete IA assessment. The assessment approach is in accordance with the set IA methodology and approach utilised in each iteration of the plan for consistency. This methodology is set out in the Main IA report.

3 Reasonable Alternatives

As one of the component parts of the IA, the Sustainability Appraisal, places specific emphasis on the consideration of reasonable alternatives. Planning Practice Guidance states that:

Sustainability appraisal should predict and evaluate the effects of the preferred approach and reasonable alternatives and should clearly identify the significant positive and negative effects of each alternative. (PPG: Paragraph: 018 Reference ID: 11-018-20140306).

The Growth and Spatial Options IA have been outlined and assessed in the IA Main Report and the Growth and Spatial Options Paper in 2020 and the Growth and Spatial Options and Reasonable Alternatives addendum in 2021. These reports explored the reasonable alternatives to the PfE Plan. Each of the options were appraised against the same IA Framework as used to assess the thematic and site allocations policies, with recommendations for enhancement and mitigation set out for each growth and spatial option for completeness.

For the individual policies, the main alternative considered is the “without policy” scenario. As most policy seeks to build-in some degree of environment and/or socio-economic consideration which aligns with some part of the IA, this is generally not considered to be desirable.

Please refer to the full report cited in the above paragraphs for details surround the methodology and assessment outcomes of these growth and spatial options.

It is considered unnecessary to undertake a further round of assessment of reasonable alternatives of the Plan’s growth and spatial options. This is because the proposed main modifications, as shown in the 2023 PfE Composite Plan, are felt to not impact the growth and spatial option strategies of the Plan. Therefore, the appropriate reasonable alternatives have already been considered by the IA process within 2020 and 2021.

4 IA of Thematic Policies

4.1 Introduction

This section presents a review of the main modifications made to PFE's thematic policies and the outcomes from the 2023 IA assessment of the main modifications. These thematic policies cover general topics within the plan, as opposed to the allocation policies primarily focusing on site-specific topics, summarised in Section 5. Where the IA objective is not relevant to the policy, it has been given a neutral score.

4.2 Summary of Amendments

The following section summarises the main modifications in the 2023 PFE Composite Plan in the context of the IA.

'Minor' main modifications to the thematic policies:

The majority of main modifications made to thematic policies that were considered to be 'minor' were made to ensure they were in accordance with the National Planning Policy Framework, to ensure consistency and clarity with amendments to phrasing or removal of sentences to avoid duplication across the plan. These main modifications were considered minor as they did not materially alter the effect of the Plan on the IA objectives. As a result, in these instances the 2020 or 2021 IA assessments were still valid and did not need to be changed.

'Potentially significant' main modifications to thematic policies:

The majority of main modifications made to the thematic policies that were considered to be 'potentially significant' were to ensure consistency of approach across the strategic policies in relation to general matters such as infrastructure provision and quality of design, to provide clarity and remove repetition across the plan. Such main modifications were considered 'potentially significant' as they had the potential to change key policy drivers, messages and could materially alter the Plan. As a result, in these instances the policies were re-assessed.

‘Significant’ main modifications to thematic policies:

The majority of main modifications made to the thematic policies that were considered to be ‘significant’ were to ensure consistency with the National Planning Policy Framework, to reflect agreement with key stakeholders, to provide clarity and remove repetition across the plan. Such main modifications were considered ‘significant’ as they changed key policy drivers, messages and materially altered the Plan. As a result, in these instances the policies were re-assessed.

There is also one additional new policy added to the Plan, ‘The Strategic Road Network’. This was identified as significant and has had a complete assessment within this round of the IA.

Removed thematic policies:

The removal of the thematic policies JP-S4 – ‘Resilience’, JP-G8 ‘Standards for Greener Places’ and JP-G11 – ‘Safeguarded Land’ have been noted as significant to the plan. Due to their removal, they have not been assessed as part of this round of the IA. However, the impact of their removal has been considered within the site, including the identified likely significant effects from these two policies.

33 thematic policies have been re-assessed as part of this round of IA work due to all including a ‘potentially significant’ or ‘significant’ proposed main modification, with 1 new assessment. The complete list of allocation policies is included within Appendix C.

4.3 Summary of Assessment

The following section summarises the outcomes from the 2023 IA assessment of the main modifications. Therefore, where amendments to policy text have not been made, the scoring from the previous IA assessment has been carried across to this 2023 IA of the policy. Where this occurs, this has been explained within each assessment table. It is important to note that the plan is expected to be read in its entirety, with the allocation policies picking up site specific requirements.

To allow comparison with the submission plan and the 2023 PfE Composite Plan, each 2023 IA assessment includes the relevant previous IA assessment with the updated 2023 IA assessment for each policy that has been reassessed for transparency in how the policy and the IA assessment has evolved. Some policies were assessed in 2020 and some reassessed in 2021 with the withdrawal of Stockport where relevant, therefore some policies have been assessed at different dates.

The PfE policy main modifications and their resultant effect on IA scoring are summarised in Appendix C.

Removed Policies

Due to the removal of the three thematic policies from the plan, they have not been assessed as part of this round of the IA. However, the impact of their removal has been considered, including the identified likely significant effects from these three policies.

JP-S4 Resilience

The 'JP-S4 – Resilience' policy would have provided support for future resilient cities, communities and centres and therefore as part of its assessment within the IA, likely positive effects were identified against objectives 1 to 13 in supporting infrastructure, accessible spaces, affordable homes and healthy lifestyles. Likely neutral effects were identified against objectives 15, 17 and 18 due to the policy not being relevant to the policy.

However, despite the removal of the thematic policy from the plan, these likely identified effects are felt to continue to occur. This is because all aspects of Policy JP-S4 were already incorporated within the plan, as noted in GMCA 21.1, with the exception being criterion 1 of Policy JP-S4, which has now been incorporated into JP-P1 'Sustainable Places' within criterion 8. Therefore, when the plan is read as a whole, the IA objectives are still met.

JP-G8 Standards for Greener Places

The 'JP-G8 – Standards for Greener Places' policy would have provided support for enhancing the green infrastructure and therefore as part of its assessment within the IA, likely positive effects were identified against objectives 6, 10, 11, 12, 13 and 15 in supporting the delivery and enhancement of green infrastructure. Likely neutral effects were identified against objectives 1, 2, 3, 4, 5, 14, 16, 17 and 18 due to the policy not being relevant to the policy.

However, despite the removal of the thematic policy from the plan, these likely identified effects are felt to continue to occur due to text being incorporated within the plan and specifically into JP-G2 'Green Infrastructure Network'. Therefore, when the plan is read as a whole, the IA objectives are still met.

JP-G11 Safeguarded Land

The 'JP-G11 – Safeguarded Land' policy would have provided support for safeguarded land and therefore as part of its assessment within the IA, likely positive effects were identified against objectives 1, 7, 9, 10 and 11 in supporting the delivery of development in sustainable locations. Likely neutral or uncertain effects were identified against objectives 2 to 6 and 12 to 18 due to the policy not being relevant to the policy.

However, despite the removal of the thematic policy from the plan, these likely identified effects are felt to continue. This is because while the policy has been removed to avoid confusion, with only one area of land being safeguarded, the land is covered by its own relevant allocation policy, JPA-3.2. Therefore, when the plan is read as a whole, the IA objectives are still met.

Strategy

Ten thematic policies within the Strategy Chapter were re-assessed. A number of the strategic thematic policies removed the specific number of identified available land supply and instead moved this to the reasoned

justification text. Whilst reference to the specific number has been removed from the policy, it is considered that these policies do not change against the assessment criteria when the plan is read as a whole, as the wording remains in the reasoned justification text. Therefore, the scoring has not changed against Objective 1 or 2.

In addition, all of the strategic thematic policies have amended wording to ensure consistency of approach across the strategic policies in relation to general matters such as infrastructure provision and quality of design. For example, JP-Strat 1 has changed the reference to homes being supported by social infrastructure with a signpost of JP-D1. However, it is considered that these policies do not change against the assessment criteria when the plan is read as a whole. Therefore, no residual impacts have been recommended across the strategic thematic policies. Table 2 below outlines where the amended policy wording is considered to be covered in the plan.

Table 2: Amended wording and related policy

Topic	Covered by Policy
Air Quality	JP-S6 – Clean Air
Education	JP-P1 – Sustainable Places JP-P5 – Education, Skills and Knowledge
Flood Risk	JP-S5 – Flood Risk and the Water Environment
Green Infrastructure	JP-G1 – Landscape Character JP-G2 – Green Infrastructure Network
Historic Environment	JP-P2 – Heritage

Mix of size, type and tenure of new housing	JP-H3 – Type, Size and Design of New Housing
Natural Environment	JP-P1 – Sustainable Places JP-G9 – A Net Enhancement of Biodiversity and Geodiversity
Necessary Infrastructure	JP-H1 – Scale, Distribution and Phasing of New Housing JP-D1 – Infrastructure Implementation JP-C2: Digital Connectivity
Previously Developed Land	JP-S1 – Sustainable Development
Reducing Poverty and being Inclusive	JP-P1 – Sustainable Places
Social Infrastructure	JP-P1 – Sustainable Places JP-P5 – Education, Skills and Knowledge JP-P6 – Health JP-P7 – Sport and Recreation
Transport	JP-C1 – An Integrated Network JP-C7 – Transport Requirements of New Development

Policy JP-Strat 4 – Port Salford has been amended with added text stating *"the growth of Port Salford will be managed to reflect the creation of additional capacity in the transport network and in accordance with the requirements of policy JPA29"*. The added policy text could ensure that

employment land is well connected and well served by infrastructure and therefore has the scoring increased against Objectives 2, 3 and 9.

Policy JP-Strat 6 – Northern Areas and **Policy JP-Strat 9 Southern Areas** have been amended from prioritising the re use of brownfield land to *'making as much use as possible of suitable previously-developed land'* to make as much use as possible of suitable previously-developed (brownfield) land through urban regeneration. The added policy text strengthens to requirement for using previously developed and therefore the scoring has changed to very positive against Objective 17.

Policy text has also been amended removing reference to the selective release of Green Belt and safeguarded land, to *'the allocation of sites for development identified in Chapter 11 of this plan'* to ensure consistency with Green Belt changes being as those set out in Chapter 11. The amended policy text strengthens consistency of Green Belt boundaries within the plan. Therefore, the scoring has increased against Objective 11 and 17.

Sustainable and Resilient Places

Six thematic policies within the Sustainable and Resilient Places Chapter were re-assessed, following the removal of JP-S4 – 'Resilience' policy.

Policy JP-S1 – Sustainable Development has amended the wording relating to previously developed land. The policy text now includes reference to making as much use as possible of suitable previously developed land, strengthening the requirements for using brownfield land. Therefore, the scoring has increased against Objective 17.

Policy JP-S2 – Carbon and Energy has had a number of main modifications to provide more clarity on expectations, be more consistent with national policy and avoid repetition within the policy. The policy text has been amended with additional wording referencing Part S of the Buildings Regulations and therefore, clarifying expectations for the number of electric vehicle charging points to be delivered. Therefore, the scoring has increased against Objective 9 and 15.

Policy text has been added with a requirement to work towards net zero carbon, including calculating unregulated emissions from 2025. The added criterion references all emissions, to clarify the approach to net zero development. Therefore, the scoring has increased to positive in the short term and very positive in the medium and long term against Objective 10.

Policy text has been added with a requirement for residual carbon emissions to be offset if they cannot be fully mitigated on-site, in agreement through a financial contribution to a carbon offset fund. Policy text has also been removed referencing keeping fossil fuels in the ground, as this is inconsistent with national policy. The added criterion provides greater clarity and aligns with national policy. Therefore, the scoring has increased against Objective 12 and 15.

Policy text has removed reference to new dwellings seeking a minimum 19% carbon reduction against Part L of the 2013 Building Regulations. However, the policy instead states that as an interim measure, development should be consistent with the 2022 Part L Building Regulations unless superseded by changes to building regulation or local/national policy. It is considered that this strengthens the policy by ensuring requirements follow the most up to date regulations. Therefore, the scoring has increased to positive in the short term against Objective 1.

Policy JP-S3 – Heat and Energy Networks has been amended with added wording referencing new development should be designed to enable future connection to heat/energy networks, to ensure the policy is effective. This could support the energy efficiency and resilience of the housing stock and therefore, the scoring has increased to very positive against Objective 1.

Policy wording has also been added in relation to Heat and Energy Network Opportunity Areas stating 'unless it can be demonstrated that there are more effective alternatives for minimising carbon emissions'. The added criterion references the potential for more effective alternatives for minimising carbon emissions, which allows scope for new technology in

energy efficiency and makes the policy more effective. Therefore, the scoring has increased to very positive in the long term against Objective 15.

Policy JP-S5 – Flood Risk and the Water Environment has been amended by added wording stating that local plans should consider setting more detailed surface water drainage policies to reflect local circumstances. Furthermore, policy wording has been added referencing the mandatory and suggested water efficiency standards. The added wording could ensure new developments are resilient to climate change. Therefore, the scoring has increased against Objective 12, 13, 14 and 18.

In addition, policy wording has been removed stating '*securing further investment in wastewater treatment to reduce the frequency of intermittent discharges of storm sewage*' to avoid duplication with Policy JP-D1. As reference to investment in wastewater treatment has been removed from the policy, the scoring has reduced from positive and very positive in the medium and long term respectively, to uncertain positive against Objective 14. However, it is considered that the assessment criteria are met when the plan is read as a whole, in particular in Policy JP-D1. Therefore, no residual impacts have been recommended.

Policy JP-S6 – Clean Air has been amended with added text to criterion 3 stating '*adverse impacts on air quality can be fully assessed and development only permitted where they are acceptable and/or suitable mitigation can be provided*'. Policy text has also been added to criterion 9 referencing '*other locations that are particularly sensitive to air quality*'. The added criteria could contribute to improving air quality within Greater Manchester. Therefore, the scoring has increased to very positive in the long term against Objective 10.

In addition, policy text has been amended to reference the Clean Air Plan, replacing the Clean Air Zone which is under review. This has not had an impact on the scoring against Objective 10.

Policy JP-S7 – Resource Efficiency has been amended removing reference to new development incorporating storage space to facilitate efficient recycling, to avoid duplication with policy JP-P1 criterion 10 and ensuring the plan is effective. Therefore, the scoring has changed from very positive to positive against Objective 18 and from positive to uncertain positive against Objective 12. However, it is considered that the assessment criteria are met when the plan is read as a whole, in particular in Policy JP-P1. Therefore, no residual impacts have been recommended.

Places for Jobs

Three thematic policies within the Places for Jobs Chapter were re-assessed, within the context of the removal of the ‘Global Logistics’ allocation policy.

Policy JP-J2 – Employment Sites and Premises has been amended removing reference to working with Government and other stakeholders to increase the delivery of previously developed sites for employment use and minimise the need for Green Belt release. This change is to clarify that it is not the intention of Policy JP-J2 to suggest that district local plans will need to remove land from the Green Belt to allocate employment sites. As the policy no longer makes reference to previously developed land for employment use, the scoring has changed from very positive to neutral. However, it is considered that the assessment criteria are met when the plan is read as a whole, in particular in Policy JP-S1. Therefore, no residual impacts have been recommended.

Policy JP-J3 – Office Development has been amended, adding reference to Part M (Volume 2) Building Regulations. This addresses previously recommended mitigation on including accessibility standards in the policy. Therefore, the scoring has increased to positive in the short, medium, and long term against Objective 5.

Policy JP-J4 – Industrial and Warehousing Development has been amended removing specific requirements for new industrial and warehousing floorspace, to avoid repetition in the Plan. This includes

removing reference to promoting access by sustainable modes of transport. Therefore, the score has changed from positive to neutral against Objective 9. However, it is considered that the assessment criteria are when the plan is read as a whole. Therefore, no residual impacts have been recommended.

Places for Homes

Three thematic policies within the Places for Homes Chapter were re-assessed.

Policy JP-H1 – Scale, Distribution and Phasing of New Housing Developments has been amended to include text that outlines that each local planning authority will be required to identify and update annually a supply of specific deliverable sites in their district to provide a minimum of five years' worth of housing against the minimum delivery rates. This would ensure an appropriate quantity of housing land to meet the objectively assessed need for market and affordable housing; therefore, the scoring has increased to very positive medium term and positive long term against Objective 1.

In addition, policy text has been removed from Table 7.1's description referencing brownfield land as the predominant source of land supply over the plan period. This was to ensure consistency within policies. Therefore, the score has remained as uncertain. Furthermore, it is considered that the assessment criteria are met when the plan is read as a whole, in particular in Policy JP-S1. Therefore, no residual impacts have been recommended.

Policy JP-H2 – Affordability of New Housing has removed wording outlining the specific figures for delivery of affordable homes has been removed. However, policy wording has been added which outlines maximising the delivery of additional affordable homes, including through local plans setting targets for the provision of affordable housing for sale and rent as part of market-led developments based on evidence relating to need and viability. Whilst reference to specific figures for the delivery of

affordable homes has been removed from the policy, the added wording provides more clarity on target setting for affordable homes. However, the scoring is already very positive and so the scoring remains the same against Objective 1.

Policy JP-H4 – Density of New Housing has been amended to include the requirement to achieve efficient use of land however, no amendments have been made to the policy text which considers previously developed land. Therefore, the scoring remains the same against Objective 17.

Greener Places

Five thematic policies within the Greener Places Chapter were re-assessed, following the removal of the JP-G8 ‘Standards for Greener Places’ and JP-G11 – ‘Safeguarded Land’ policies.

Policy JP-G2 – Green Infrastructure Network had policy text amended that outlines how the protection, management and enhancement of green infrastructure will contribute to the development of a Local Nature Recovery Strategy for Greater Manchester, which will feed into the development of a Nature Recovery Network locally and nationally. The added criteria references protection, management and enhancement of green infrastructure and therefore, the scoring has increased to very positive long term against Objective 11a.

In addition, policy wording has been added outlining that development which involves the removal of land from the Green Belt will be required to offset the impact through identifying and delivering compensatory improvements the environmental quality and accessibility of remaining Green Belt in the vicinity of the site. However, as the score was very positive against Objective 11c, the scoring remains the same.

Policy JP-G5 – Uplands has been updated a new criterion to ensure that new development does not have an adverse impact on protected habitats of the South Pennine Moors SAC, the Peak District Moors SPA and the South Pennine Moors Phase 2 SPA. The added criteria references policy wording to mitigate adverse impact on protected habitats. Therefore, the

scoring has increased to positive short term and very positive medium term against Objective 11.

Policy JP-G6 – Urban Green Space has been amended removing reference to green spaces meeting accessibility standards. Yet it is important to ensure equal opportunity for all. Therefore, the scoring changed from neutral to uncertain against Objective 5. However, it is considered that the assessment criteria are met when the plan is read as a whole, particularly Policy JP-P1 and therefore no residual impacts were recommended.

Policy JP-G7 – Trees and Woodland has been amended to include the requirement for development resulting in the loss of existing trees to incorporate measures that would result in a net enhancement in the character and quality of the treescape and biodiversity value in the local area, as an alternative to replacement on the basis of two trees for each tree lost. Therefore, the scoring has increased to positive in the short term against Objective 11. The scoring is already very positive in the long term and so the scoring remains the same.

Policy JP-G9 – Biodiversity and Geodiversity has been added to include a requirement for development to mitigate air pollution impacts on Manchester Mosses SAC and to assess and potentially mitigate boat movement, water pollution and lighting spillage and shading impacts on the Rochdale Canal SAC. Therefore the scoring has increased against Objective 10 and 14 in the medium to long term.

Policy wording has also been amended to ensure development achieves a measurable net gain in biodiversity and that development proposals should be informed by biodiversity/ecological assessments. Therefore, the scoring has increased to very positive against Objective 11 in the medium to long term.

Places for People

Two thematic policies within the Places for People Chapter were re-assessed.

Policy JP-P2 – Heritage has been amended to remove specifics regarding designated heritage assets, archaeological assets and conservation areas. However, the policy now includes reference to national planning policy when considering proposals affecting designated and non-designated heritage assets and/or their settings; therefore, it is considered that the added wording strengthens the policy by ensuring it is more consistent with national planning policy. However, the scoring is already very positive and so the scoring remains the same against Objective 16.

Policy PJ-P7 – Sport and Recreation has been amended removing reference to new sports facilities meeting accessibility standards. Yet it is important to ensure equal opportunity for all. Therefore, the scoring changed from neutral to uncertain against Objective 5. However, it is considered that the assessment criteria are met when the plan is read as a whole, particularly Policy JP-P1 and therefore no residual impacts were recommended.

Connected Places

Four thematic policies within the Connected Places Chapter were re-assessed and the additional new policy, within this chapter, had a complete IA assessment.

Policy JP-C3 – Public Transport had policy text removed referencing the 'Our Five Year Transport Plan' to clarify that the reference is appropriately phrased. However, it was considered that this policy does not change against the assessment criteria when the plan is read as a whole, as the wording remains in the reasoned justification text. Therefore, the scoring has not changed against Objectives 3 and 9.

Policy JP-C5 – Walking and Cycling had policy text removed referencing new developments should be planned and constructed with walking and cycling as the primary means of local access, and fully integrated with walking and cycling infrastructure, to avoid duplication of the policy criterion. However, it is considered that this policy does not change

against the assessment criteria when the plan is read as a whole, in particular in Policy JP-C7 and the remaining criterion in JP-C5. Therefore, the scoring has not changed.

Policy JP-C6 – Freight and Logistics had a criterion added to the policy enabling the provision of overnight parking and rest areas for heavy goods vehicle drivers. It was considered that the added criterion supports infrastructure improvements that could ensure safer driving conditions. Therefore, the scoring has increased from neutral to positive against Objective 6 and from positive to very positive against Objective 3.

Policy JP-C7 – Transport Requirements of New Development had text added that references the layout, design and landscaping of development should prioritise the provision of safe, secure and attractive access to local services and facilities for pedestrians, cyclists and people with a disability. Therefore, the scoring has increased from positive to very positive against Objective 5. This change would also improve against Objective 9, but as the scoring was already very positive, the scoring remains the same.

In addition, main modifications have been proposed stating that “*Planning applications which are required to be accompanied by a Transport Assessment will need to consider air quality impacts on Holcroft Moss, within the Manchester Mosses Special Area of Conservation (SAC).*” The added criteria references mitigations to improve air quality; therefore, the scoring has increased to very positive across medium term and long term against Objective 10. The criterion also has a requirement for contributions towards restoration measures in accordance with the Holcroft Moss Habitat Mitigation Plan, which improved the scoring from neutral to very positive against Objective 11.

As above, Policy JP-C7 also includes an added criterion referencing overnight parking for HGV drivers increasing the scoring against Objective 3 and 6.

The new Policy – **The Strategic Road Network** outlines a requirement to work with key stakeholders to ensure a co-ordinated approach to the

planning and delivery of potential interventions on the Strategic Road Network. This had a positive score against Objective 3 by ensuring that the transport network can support and enable the anticipated scale and spatial distribution of development and improve transport connectivity. However, it scored uncertain against Objectives 9, 10, 12 and 15 due to the policy making no reference to sustainable transport, climate change or mitigation measures to improve local air quality. It also scored uncertain against Objective 4 and 5 due to the policy making no reference to equal access to transport or fuel poverty. As a result, the assessment recommended mitigation measures to address these concerns. However, it was also recognised that these recommended measures are addressed when the plan is read as a whole, in particular through policies JP-S1, JP-S2, JP-S6, JP-P1, JP-D1, JP-C1, JP-C6 and JP-C7.

Delivering the Plan

One thematic policy within the Delivering the Plan Chapter was re-assessed. **Policy JP-D1 – Infrastructure Implementation** has been amended to remove specific actions for applicants regarding identification of and planning for infrastructure demand. In particular, removing referencing to minimising demand for energy, water and utility services and requiring sustainable building design. Therefore, the scoring changed to positive/uncertain or neutral against Objectives 1, 3, 9 and 15. However, it is considered that this policy does not change against the assessment criteria when the plan is read as a whole. Therefore, no residual impacts have been recommended.

5 IA of Allocation Policies

5.1 Introduction

This section presents a review of the main modifications made to the plan's allocation policies and the outcomes from the 2023 IA assessment of the main modifications.

The allocation policies primarily focus on the site-specific topics, and the thematic policies, summarised in Section 4, pick up the general topics. Therefore, some of the IA objectives are less relevant for most allocations as they are picked up in the thematic policies. The cross-references have generally been flagged within the assessment tables in Appendix D. Where the IA objective is not relevant to the allocation, it has been given a neutral score.

5.2 Summary of Amendments

The following section summarises the main modifications in the 2023 PfE Composite Plan in the context of the IA.

'Minor' main modifications to the allocation policies:

The majority of main modifications made to the allocation policies that were considered to be 'minor' were to ensure they were in accordance with the National Planning Policy Framework, to ensure consistency and clarity with amendments to phrasing or removal of sentences to avoid duplication across the plan. These main modifications were considered minor as they did not materially alter the effect of the Plan on the IA objectives. As a result in these instances, the 2020 or 2021 IA assessments were still valid and did not need to be changed.

'Potentially significant' main modifications to allocation policies:

The majority of main modifications made to the allocation policies that were considered to be 'potentially significant' were to ensure consistency of approach across the allocation policies in relation to infrastructure delivery, affordable housing requirements and heritage assets, to provide

clarity and remove duplication were covered by a thematic policy across the plan. Such main modifications were considered 'potentially significant' as they had the potential to change key policy drivers, messages and could materially alter the Plan. As a result in these instances, the policies were re-assessed.

'Significant' main modifications to allocation policies:

The majority of main modifications made to the allocation policies that were considered to be 'significant' were to provide clarity on policy requirements and consistency with thematic policies and other allocation policies across the plan. Such main modifications were considered 'significant' as they changed key policy drivers, messages and materially altered the Plan. As a result in these instances, the policies were re-assessed.

'Significant' main modifications to allocation policies following amended boundaries:

All boundary changes proposed to the allocations within the Plan have been considered 'significant' and therefore have been re-assessed. The following boundaries of these allocations were changed:

- JPA1.2 - Simister and Bowlee
- JPA14 - Broadbent Moss
- JPA18 - South of Rosary Road
- JPA26 - Land at Hazelhurst Farm
- JPA32 - South of Hyde

The following allocations have been noted as having their Green Belt boundary changed within the allocation boundary:

- JPA 3.2 – Timperley Wedge
- JPA7 – Elton Reservoir

We have considered the change in Green Belt boundaries within the allocations as part of the reassessment of these policies. It was found that within the re-assessments of JPA 3.2 and JPA7, the change of Green Belt boundary within the allocation boundaries did not result in changes to assessment criterion as part of this round of IA assessment.

The boundary changes considered as part of this round of the IA are included within Appendix E. The other allocation policies did not have site boundary changes.

Removed allocation policies:

The removal of the site allocations 'JPA10 – Global Logistics' and 'JPA28– North of Irlam Station' have been noted as significant to the plan.

However, due to their removal, they have not been assessed as part of this round of the IA. However, the impact of their removal has been considered within the site, including the identified likely significant effects from these two policies.

All 33 allocation policies have been re-assessed as part of this round of IA work due to all including a 'potentially significant' or 'significant' proposed change. The complete list of allocation policies is included within Appendix D.

5.3 Summary of Assessment

The following section summarises the outcomes from the 2023 IA assessment of the main modifications. Therefore, where amendments to policy text have not been made, the scoring from the previous IA assessment has been carried across to this 2023 IA of the policy. Where this occurs, this has been explained within each assessment table.

There have been no new site allocations added to the 2023 PfE Composite Plan as part of this process.

The plan is expected to be read in its entirety, with several thematic comments picking up wider themes and general topics. This is noted

throughout all the assessments however every individual cross reference is not specified due to the number of these. Where there is something of note, or an exception, this has been identified.
