relevant to your comments on this application: :

Which of the licensing objectives are relevant to your comments on this application: :

The protection of children from harm

In general, this is a positive activity. However, it takes place in a venue that includes a National Cycle Network route that runs through it (Route 6).

Please state your comments on this application:

To improve public safety, minimise public nuisance and protect children from harm, granting the application must come with conditions to provision an alternative, marked, continuous and equally safe (separated from motorised traffic) route for users of National Cycle Route 6 on the day. This will enable a safe delivery of the event in the park, maximise public safety for participants by avoiding cycle traffic through the park on the day and deconflict pedestrians (who may have consumed alcohol) from people on bikes. This, in turn, will prevent the event from being a public nuisance in the space and additionally protect children from harm should they come into conflict with people on bikes. It will also have the added benefit of attracting people to the event on bikes by highlighting the steps taken to improve safety.
