

## Covid Vaccination Programme

Dr Manisha Kumar

Medical Director MHCC

8<sup>th</sup> September 2021

# COVID Vaccination Coverage as of September 1, 2021: Summary Position

Data Source: NIMS, Patients Registered with a Manchester GP Practice Only

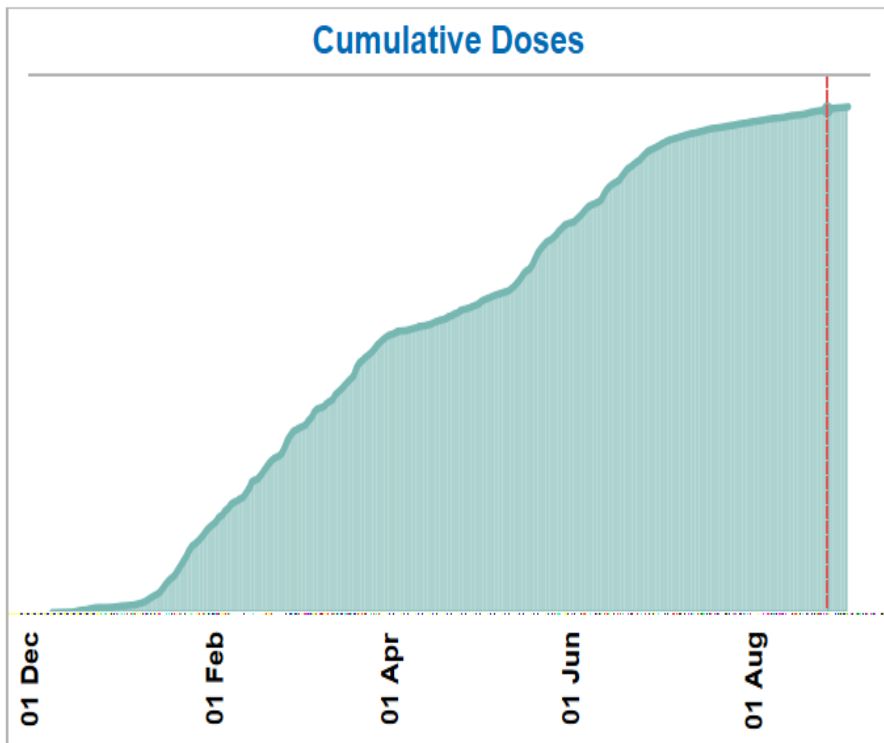

## Vaccination Doses Given

Change since previous week

359,645 first doses given

△ 1,972

### Cumulative Doses

## First Dose Coverage by Cohort (change since previous week)

Cohort	Vaccinated	Eligible	% Coverage
Age 80+	13,184	14,644	90.0%
Age 75 - 79	9,862	10,842	91.0%
Age 70 - 74	14,739	16,300	90.4%
Clinically Extremel..	33,451	38,568	86.7%
Age 65 - 69	17,227	19,950	86.4%
COVID19 at risk	51,960	66,358	78.3%
Age 60 - 64	22,068	26,631	82.9%
Age 55 - 59	26,900	33,735	79.7%
Age 50 - 54	29,687	38,648	76.8%
Age 40 - 49	61,666	91,640	67.3%
Age 30 - 39	73,858	124,595	59.3%
Age 18 - 29	85,805	156,598	54.8%
Age 16 - 17	4,387	15,229	28.8%
<b>Grand Total</b>	<b>359,645</b>	<b>549,108</b>	<b>65.5%</b>

This is the most up to date data available on vaccination coverage, taken from the National Immunisation Management System (NIMS). This is the same data source that is used for national daily reporting.

Please note that there is double counting within the Cohorts, e.g. if a patient is 73 years old and Clinically Extremely Vulnerable they will appear in both the **Age 70 - 74** and **Clinically Extremely Vulnerable** cohorts.

# COVID Vaccination Coverage as of September 1, 2021: Summary Position

Data Source: NIMS, Patients Registered with a Manchester GP Practice Only

## Vaccination Doses Given

Change since previous week

312,241 second doses given

△ 7,025

## Second Dose Coverage by Cohort (change since previous week)

Cohort	Vaccinated	Eligible	% Coverage
Age 80+	12,914	14,644	88.19%
Age 75 - 79	9,697	10,842	89.44%
Age 70 - 74	14,452	16,300	88.66%
Clinically Extremel..	31,873	38,568	82.64%
Age 65 - 69	16,812	19,950	84.27%
COVID19 at risk	47,723	66,358	71.92%
Age 60 - 64	21,291	26,631	79.95%
Age 55 - 59	25,716	33,735	76.23%
Age 50 - 54	28,056	38,648	72.59%
Age 40 - 49	56,122	91,640	61.24%
Age 30 - 39	63,106	124,595	50.65%
Age 18 - 29	63,210	156,598	40.36%
Age 16 - 17	860	15,229	5.65%
<b>Grand Total</b>	<b>312,241</b>	<b>549,108</b>	<b>56.86%</b>

This is the most up to date data available on vaccination coverage, taken from the National Immunisation Management System (NIMS). This is the same data source that is used for national daily reporting.

Please note that there is double counting within the Cohorts, e.g. if a patient is 73 years old and Clinically Extremely Vulnerable they will appear in both the **Age 70 - 74** and **Clinically Extremely Vulnerable** cohorts.

# First Dose COVID Vaccination Coverage for Priority Cohorts 1 to 12 by Ward

Data Source: GP Clinical System (EMIS), Patients Registered with a Manchester GP Practice Only

Ward	Vaccinated	Eligible	% Coverage (increase from 2 weeks ago)	Ward	Vaccinated	Eligible	% Coverage (increase from 2 weeks ago)
Chorlton	9,594	11,766	81.5%	Withington	9,767	14,473	67.5%

Mixed or Multiple ethnic groups	No record of ethnicity st..	49,798 / 94,671	52.6%
	White and Asian	1,567 / 2,410	65.0%
	White and Black African	2,054 / 3,764	54.6%
	White and Black Caribb..	1,800 / 3,590	50.1%
Other ethnic group	Any other Mixed or Multi..	2,910 / 5,467	53.2%
	Arab	2,321 / 4,272	54.3%
Grand Total	9,577 / 19,068	50.2%	

### Trend in First Dose Coverage by Ethnicity

This slide uses patient level data flowing from NIMS to GP Clinical Systems. This means that the data is a few days behind NIMS.

Ethnicity data is based on information stored within GP Practice records only. Approximately 20% of patients do not have their Ethnicity recorded and work is ongoing to reduce this.

# First Dose COVID Vaccination Coverage for Priority Cohorts 1 to 12 by Ethnicity

Data Source: GP Clinical System (EMIS), Patients Registered with a Manchester GP Practice Only

## Change in First Dose Coverage by Ethnicity from 2 weeks ago

Ethnicity	Eligible	Change in % Coverage (Additional Patients Vaccinated)
Pakistani	45,202	1.1% (+481)
African	29,099	1.0% (+288)
Any other Black, African or Caribbe..	7,241	1.0% (+70)
Arab	4,272	0.9% (+40)
White and Black African	3,764	0.9% (+32)
Bangladeshi	5,263	0.8% (+44)
No record of ethnicity status	94,671	0.8% (+757)
White and Black Caribbean	3,590	0.8% (+27)
Indian	14,099	0.7% (+104)
Declined to provide ethnicity status	6,616	0.7% (+48)
Caribbean	7,506	0.7% (+52)
Any other Asian background	14,610	0.6% (+89)
Any other Mixed or Multiple ethnic ..	5,467	0.5% (+30)
Any other ethnic group	19,068	0.5% (+99)
White and Asian	2,410	0.5% (+12)
Any other White background	38,752	0.4% (+156)
English, Welsh, Scottish, Northern I..	213,619	0.4% (+850)
Irish	7,199	0.3% (+22)
Chinese	19,880	0.3% (+54)
Gypsy or Irish Traveller	238	0.0% (+0)
Grand Total		0.6% (+3,255)

## First Dose Coverage Gap by Ethnicity

	16 Aug	30 Aug	Change
White Coverage	76.2%	76.6%	0.4%
BAME Coverage	57.2%	58.0%	0.8%
Difference in Coverage	19.0%	18.6%	-0.4%

The difference in first dose vaccination coverage between White and BAME patients has **decreased** by **0.4%** over the last 14 days. This has **decreased** the inequalities gap across Manchester.

This slide uses patient level data flowing from NIMS to GP Clinical Systems. This means that the data is a few days behind NIMS.

Ethnicity data is based on information stored within GP Practice records only. Approximately 20% of patients do not have their Ethnicity recorded and work is ongoing to reduce this.

# Achievements in First Dose COVID Vaccination Coverage for Priority Cohorts 1 to 12

Data Source: EMIS, Patients Registered with a Manchester GP Practice Only

Over the last 2 weeks .. Coverage for Patients in Priority Cohorts 1 - 12 has increased by 0.6% (+3,349 patients vaccinated)

## Increases in Coverage by Ethnicity

### Percentage increases:

### Volume increases:

Pakistani	1.1% (+485)	English, Welsh, Scottish, Northern Irish or British	0.4% (+875)
Any other Black, African or Caribbean background	1.0% (+75)	No record of ethnicity status	0.8% (+770)
African	1.0% (+299)	Pakistani	1.1% (+485)
Arab	1.0% (+42)	African	1.0% (+299)
White and Black African	0.9% (+34)	Any other White background	0.4% (+160)

## Coverage Difference between White and BAME Patients

The difference in first dose vaccination coverage between White and BAME patients has **decreased** by 0.4% over the last 14 days. This has **decreased** the inequalities gap across Manchester.

## Coverage Difference by Gender in BAME Patients

The difference in first dose vaccination coverage between Gender in BAME patients has **increased** by 0.2% over the last 14 days. This has **increased** the inequalities gap across Manchester.

Coverage for patients with a **Learning Disability (LD)** has increased by 1.0% (49 additional patients vaccinated). This is compared to a 0.2% increase for all patients in Priority Cohorts 1 - 6.

The difference in first dose vaccination coverage between patients with LD and the general population in Cohorts 1 - 6 has **decreased** by 0.7% over the last 14 days. This has **decreased** the inequalities gap across Manchester for patients with LD.

Coverage for patients with a **Serious Mental Illness (SMI)** has increased by 0.3% (29 additional patients vaccinated). This is compared to a 0.2% increase for all patients in Priority Cohorts 1 - 6.

The difference in first dose vaccination coverage between patients with SMI and the general population in Cohorts 1 - 6 has **decreased** by 0.1% over the last 14 days. This has **decreased** the inequalities gap across Manchester for patients with SMI.

## Enhanced Response Area - Manchester

Manchester was a designated Enhanced Response Area between 16th June – 18th July 2021. Additional resource and activity was needed as a result of a significant increase in cases, the rapid spread of the Delta variant and a lower uptake of vaccines in some areas of the city.

### What we achieved:

On the 16th June 57.3% of the population in Manchester had been given their first dose and 34.8% their second dose. On the 19th July 64.3% of the population in Manchester had been given their first dose and 46.2% their second dose. Translated into numbers this is an additional 37,659 first doses and 61,356 second doses administered. **During the ERA period 99,015 vaccines were given in Manchester .**

Highlights of what we achieved in our attempts to rapidly increase uptake across the 8 LSOA areas include:

- 24,526 vaccines were delivered to patients across the targeted areas.
- The percentage of people unvaccinated across the targeted areas reduced from 51% to 42%
- Percentage of people unvaccinated dropped across all cohorts – with the biggest drops in Cohort 12.
- A presence in the Moss Side area of Manchester for the first time since the vaccine programme commenced. In an area of low uptake 6449 vaccines were delivered over a 21 day period – an average of 307 a day.

# Winter Vaccination Programme

# Covid Vaccination Booster Programme - Phase 3 Planning

As recommended by the Joint Committee on Vaccinations and Immunisations (JCVI) from September 2021 we will be embarking on a COVID booster vaccination programme, alongside an expanded annual Flu vaccination programme for 21/22. The COVID booster vaccination programme is also known as **Phase 3**. Initial planning was for a start date of 6th September. This has been delayed but we expect confirmation of the revised start date imminently. There has also been a lack of clarity on which cohorts will be eligible for the booster programme. However we are preparing on the basis that the groups will include:

## Patients Eligible for Phase 3 - COVID Booster and Flu Vaccinations

Practice Name All

Primary Care Network All

COVID Booster Cohort	Eligible for COVID Booster	Eligible for Flu	Patients
1.1 Immunosuppressed	Yes	Yes	16,130
1.2 Resident of Nursing or Residential Care Home	Yes	Yes	1,597
1.3 Aged 70 and over	Yes	Yes	39,092
1.4 Clinically Extremely Vulnerable	Yes	Yes	23,241
2.1 Aged 50 and over	Yes	Yes	102,810
2.2 Aged 16 - 49 At Risk	Yes	Yes	56,224
2.3 Contact of Immunosuppressed	Yes	Yes	20
Not eligible	No	Yes	112,189
Not eligible	No	No	334,225

COVID Booster Stage	Eligible for COVID Booster	Eligible for Flu	Patients
Stage 1	Yes	Yes	80,060
Stage 2	Yes	Yes	159,054
Not eligible	No	Yes	112,189
Not eligible	No	No	334,225

**Total Eligible for COVID Booster:**

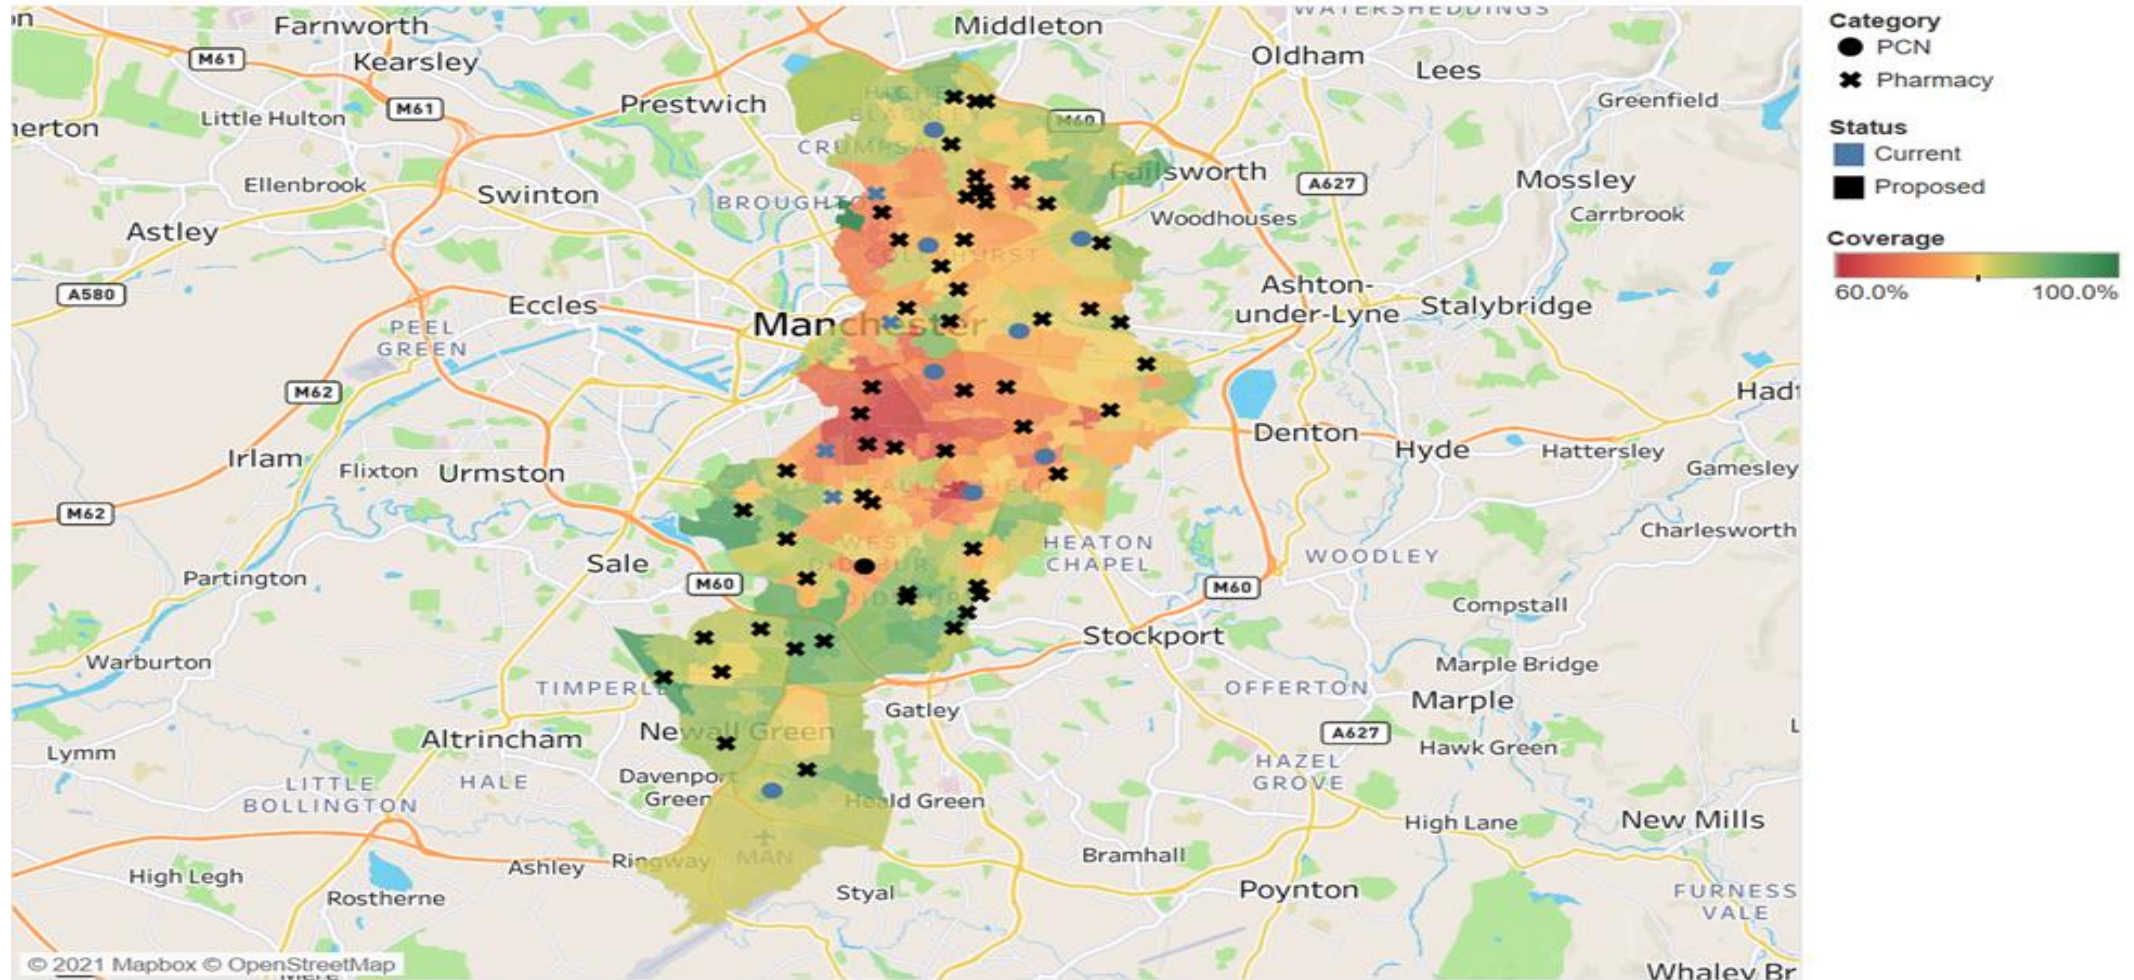

239,114 (34.88% of the registered population)

**Total Eligible for Flu:**

351,303 (51.25% of the registered population)

# City wide vaccine offer

The map highlights the current and proposed sites over a heatmap of first dose vaccination coverage for cohorts 1 - 9

## 12 – 15 Cohort

There has also been significant discussion around the 12 – 15 cohort. Currently the only 12 – 15 year olds that are eligible for the vaccine are those that have been assessed as vulnerable. However, as there is a possibility that the wider cohort will be eligible for the vaccine we have been planning accordingly.

Currently there are 3,485 children aged 12 – 15 who fall under the vulnerable cohort. If the offer is expanded to the wider 12 – 15 cohort we are looking at circa 42,000 children who would be eligible.

## Student offer

With the return of students to Manchester a bespoke offer has been designed which will include regular clinics at key locations including:

Sixth form colleges across the city

Owens Park

Whitworth Street Corridor

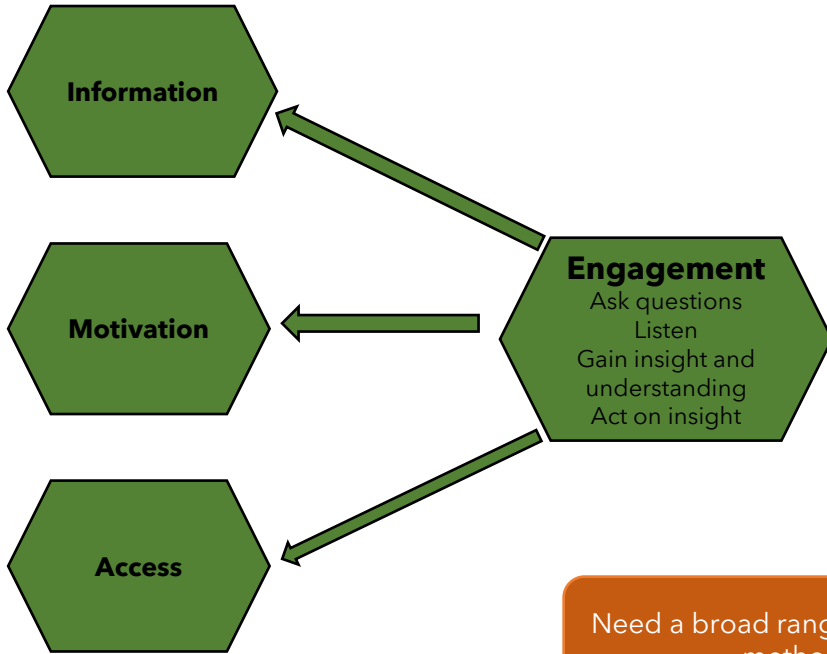

Town Hall Extension

A targeted comms programme has also been designed which will utilise the appropriate strategy to ensure we can engage fully with the student population. Work is also being undertaken to ensure that all associated risks with the return of overseas students are identified and addressed.

# Vaccine Equity Approach

Vaccination Coverage

Need a broad range of engagement forums and methods to extend reach

Rapid Evaluation & Lessons Learnt

## Phase Three Priorities (Covid & Flu)

- EIA of Phase Three delivery model
- Integrated helpline to support access
- Care Home staff & link to communities with low coverage
- Targeted messages within themes of ethnicity, disabled people & LT conditions; inclusion groups
- Targeted delivery plans for wards and communities where gaps in coverage are highest
- Evaluation

### Targeted delivery plans for

- Learning Disability
- Asylum Seekers/Refugees/migrant communities
- Homelessness
- Severe Mental Illness

### Targeted engagement through

Covid Health Equity Manchester & Sounding Boards  
Covid Champions, Teams around the Neighbourhood,  
Covid Chat Co-ordinators

## Improving access via Pop Ups

Pop Up sites have been identified as a good way of reaching people who we have had difficulty engaging through our established sites. As such Pop Ups have become a prominent feature across Manchester. Locations such as China Town, Exchange Square and Heaton Park have been used to deliver vaccinations.

# Communication and engagement

**Key focus for Phase Three: co-ordinate activity to make sure the general public and other key stakeholders have clear information about the vaccination programme, its delivery and effectiveness.**

**Activity undertaken will specifically:**

- **Drive awareness** of the availability to eligible groups, explain how to get a vaccine and encourage uptake. There will also be a continued push to encourage those who are unvaccinated to take up the evergreen offer.
- Help people **understand the benefits** of being vaccinated, **dispel any myths and** reassure those who have concerns or reservations.

**Key facets that underline our approach include:**

- Activity **jointly commissioned** by partners across the city. Plans will incorporate **learning** from Phase 1 and 2 Covid-19 vaccination and 2020-21 flu vaccination campaigns.
- Key focus on **simple messaging**.

**Key focus for Phase Three: develop and implement community engagement plans for targeted work, ensuring messages are culturally relevant with an emphasis on neighbourhood-level messaging from trusted sources.**

**Activity undertaken will specifically:**

- Encourage 'at risk' communities to participate in the vaccination programme through **targeted engagement**. Tailored materials are used to address the information needs and concerns of priority audiences.
- **Localised engagement** approach based on local insight, knowledge and connections.
- Use a **data and intelligence led approach** to help inform areas of specific engagement activity outside of the city wide comms activity.

# Care Sector

*Under new guidance released this month, all staff in care homes are required to have received their first dose of the vaccination by the 16<sup>th</sup> September; currently 83% have met this requirement. Second doses must be administered by the 11<sup>th</sup> November, currently 68% have met this requirement.*

## Phase Three Priorities

- Finalise delivery partners and plans for all care homes – PCNs & subcontracted providers
- Engage with care homes about the process and preparation needed
- Create overall programme for care home delivery, ideally co-delivering with flu vaccine
- Ensure care home workers have additional routes for vaccination
- Understand and communicate priority and access for the rest of the care sector for **both Flu and Covid Booster**: Supported Accommodation, Extra Care, homecare, Personal Assistants, unwaged carers, VCSE.
