

Appendix 3 – KPIs for the Young Person’s Substance Misuse Service, 2020/21

Numbers in specialist treatment -

- 141 young people were in specialist treatment including 70 new presentations to the service. When compared to 2019/20, this represents a drop of 17% (compared with a drop of 23% nationally.)

3 weeks wait -

- 99% of young people did not wait longer than 3 weeks for a 1st intervention. This compares with 98% nationally.

Average time in treatment -

Young people spend less time in specialist treatment than adults because substance misuse is not as entrenched. However, those with complex needs often require support for longer.

- The average length of time in treatment in Manchester is 30.66 weeks. This compares with 24.8 weeks nationally.

Successful completions -

- 83% (69 young people) completed treatment successfully. This compares with 79% nationally.
