## 1. Monitoring Previous Recommendations

This section of the report contains recommendations made by the Committee and responses to them indicating whether the recommendation will be implemented, and if it will be, how this will be done.

There are no outstanding previous recommendations.

## 2. Key Decisions

The Council is required to publish details of key decisions that will be taken at least 28 days before the decision is due to be taken. Details of key decisions that are due to be taken are published on a monthly basis in the Register of Key Decisions.

A key decision, as defined in the Council's Constitution is an executive decision, which is likely:

- To result in the Council incurring expenditure which is, or the making of savings which are, significant having regard to the Council's budget for the service or function to which the decision relates, or
- To be significant in terms of its effects on communities living or working in an area comprising two or more wards in the area of the city.

The Council Constitution defines 'significant' as being expenditure or savings (including the loss of income or capital receipts) in excess of £500k, providing that is not more than 10% of the gross operating expenditure for any budget heading in the in the Council's Revenue Budget Book, and subject to other defined exceptions.

An extract of the most recent Register of Key Decisions, published on **30 December 2022**, containing details of the decisions under the Committee's remit is included below. This is to keep members informed of what decisions are being taken and, where appropriate, include in the work programme of the Committee.

Decisions that were taken before the publication of this report are marked \*

There are no Key Decisions currently listed within the remit of this Committee.

The December data from the Office for National Statistics COVID-19 Infection Survey showed an increase in people testing positive for COVID-19. The last available dataset indicates that 2.01% of the population in England (around 1 in 50 people) have tested positive for COVID-19. This increase relating to the north west as well as other parts of the country.

However, we do know that flu, Strep A and other respiratory infections have placed significant pressure on primary care and hospital services since November, particularly in relation to children. It is hoped that the school holidays will help to reduce the spread of infections.

Over 1 million COVID vaccinations have now been delivered in Manchester including first, second and booster doses. A full final dataset covering uptake of COVID vaccination and flu vaccination uptake will be available in February.
