integration and service will provide strategic support to develop pathways
improved care and partnerships between CGL and criminal justice settings. This will support the development and application of
the criminal justice community service treatment requirements and support
settings and drug improved compliance with court mandated orders. This
treatment resource will also provide necessary oversight to continuity
of care engagement and retention from secure estate to
community treatment services and implement strategies to
improve systems.
Enhancing Additional clinical support within both the substance misuse
treatment quality service and the newly developed alcohol care team, which
will see a consultant clinical lead to oversee the ACT's and
supportive outreach and engagement to support pathways
into treatment services and multi-agency planning for
vulnerable people who may have complex needs. The grant
will also fund a specific post in CGL to support workforce
development and recruitment to improve quality and reduce
caseloads.
Residential rehab Additional inpatient detox and residential rehab placements.
and inpatient detox An additional social worker in Adult Social Care will provide
a resource to respond to responsibilities under the Care Act
2014. The grant will also fund the continuation of a specialist criminal justice social worker.

Better and more integrated responses to physical and mental health issues	Priority work-streams will focus on the interface between the substance misuse service, primary and secondary care to respond to non-fatal overdoses and co-morbidities affecting both physical and mental health.
Enhanced recovery support	Development and expansion of a recovery community and peer support network, including in treatment, to sustain long-term recovery and increase the visibility of recovery and social integration. This will include funding to build the capacity of community mutual aid and recovery groups, linked to the 5 ways of well-being.
Other interventions which meet the aims and targets set in the drug strategy	The substance misuse service aim to expand on the number of physical bases within the north and east of Manchester to increase accessibility to face to face interventions and specialist clinical provisions.
Expanding the competency and size of the workforce	The service will see an increase in the number of keyworkers delivering structured treatment, aligned both to local demand and unmet need. Alongside service managers and clinical staff, the grant will fund an addition 20 key workers.
