

GM Green Spaces Fund summary tables

Summary Round 2

Project name	Project description	Funding
Brotherhood Peace Garden (Moss Side)	A new highly visible and accessible community garden for food growing, therapy and education into the climate crisis, created in the heart of one of Manchester	£12.8k
St Wilfrid's Home Garden (Hulme)	Development of a garden for the benefit of the local community including the diverse group of people who access services at the Centre	£14.8k
The Whitemoss Falls Pond Action Team (Blackley):	The project seeks to introduce high quality and accessible ponds, streams, and bog gardens to the youth centre within the heart of Blackley, North Manchester.	£11.5k
Green Collyhurst:	Transformation of several unused pieces of land in the centre of Collyhurst into an openly accessible community garden and growing space.	£40k
Manchester green pathway (Hulme):	The project will transform an abandoned concrete slip road into a dynamic and thriving green pathway. (AKA Gaskill Garden Project)	£40k
Sustainable Northmoor by Urban Greening (SNUG) (Longsight):	A long term programme to provide accessible, quality, green spaces through orchard planting, renovation and greening.	£40k
Highfield Habitats (Levenshulme/Stockport) :	Highfield Habitats will increase accessibly by offering training and nature walks to those in greatest need living adjacent to and within the	£15k

	wider catchment of the park.	
Green Hub: (Levenshulme)	Co-creation of an inspiring community growing and wildlife space; an accessible hub of climate friendly activity. (run by Station South CIC)	£28.4k

Summary Round 3 (announced 01/09/2023)

Project name	Project description	Funding
Miles Platting Wildlife Corridor	The Miles Platting Wildlife Corridor for people and nature will enhance identified spaces and create new habitats in the neighbourhoods of Miles Platting, Manchester. The aim is to improve biodiversity and the local ecosystem, increase interaction and connection between residents and their natural environment, mitigate impacts of climate change, and encourage physical activity between sites and along the Rochdale Canal.	£39,970
The Forever Fields (Chorlton Park)	The Forever Fields project is aimed at enhancing a section of underused land adjacent to the street for local residents to engage with nature through play, experimentation and growing.	£39,848
Biodiverse Play Area (Hulme)	An under-used former wasteland will be transformed into an accessible 'pocket-park' incorporating imaginative landscaping, a variety of	£38,233

	habitats to enhance biodiversity, and sustainable natural play areas.	
Ryder Brow Pocket Park & Woodland Walk (Gorton & Abbey Hey)	This project will create a high quality and accessible pocket park on an under-utilised space adjacent to allotments in Gorton. With community input, the space will be revitalised as a community orchard with incredible edible beds, new wildlife habitats and open up access to a remarkable woodland area.	£30,320
Withington Baths Community Garden	Creation of a new high quality pocket park to the front of a community asset, currently a poorly configured space with several design flaws which when addressed will provide a more functional, accessible and attractive community space.	£17,600
Green Spaces for Smithfield (Piccadilly)	Engaging and empowering the community to get involved with nature by seeking environmental improvement with tree, flower, and shrub planting together with bird and bat housing. Furthermore, the project will boost health, biodiversity, and the visual appearance of the NQ, complementing its creative quarter status.	£15,000
