Annex 2 – Assessment of options by success criteria

| Success Factor | Option 5(i) 2021: CAZ B GM-wide, CAZ D in IRR 2023: CAZ C GM-wide | Option 5(ii) 2021: CAZ B GM-wide, CAZ D & all diesel cars charged in IRR 2023: CAZ C GM-wide | Option 8 2021: CAZ B GM- wide, 2023: CAZ C GM- wide | Summary |
|---|---|---|---|---|
| Compliance in the shortest possible time Which option reduces to zero the number of locations predicted to be in exceedance of the legal limits of NO ₂ concentrations in the shortest time? | Yes | Yes | Yes | All Options deliver compliance in 2024, considered to be the shortest possible time for achieving compliance in GM. |
| Reduction in NO ₂ emissions Which option delivers The greatest reduction in the number of locations in exceedance (presumed to represent human exposure) in each year? | | | | All Options deliver significant reductions in the number of locations in exceedance of 70-80% in 2021, with Option 5(ii) predicted to marginally deliver the greatest reductions in each year prior to compliance being achieved. |
| The greatest reduction in NO2 concentrations at the roadside in each year prior to compliance being achieved? | | | | All Options deliver reductions in mass emissions across GM of between 20-30% in 2021, with the greatest reductions forecast to be delivered by Option 5(ii). |
| Compliance without putting other sites closer to exceedance (defined as concentrations of 38-40µg/m3) than without action? | | | | All Options are forecast to deliver compliance without putting other sites closer to exceedance, risk that Option 5(ii) leads to more re-routing than forecast. |
| Feasibility Are the measures proposed within the legal powers of the Greater Manchester Local Authorities? | | | | The measures proposed in all Options are within the legal powers of the authorities. |

| Success Factor | Option 5(i) 2021: CAZ B GM-wide, CAZ D in IRR 2023: CAZ C GM-wide | Option 5(ii) 2021: CAZ B GM-wide, CAZ D & all diesel cars charged in IRR 2023: CAZ C GM-wide | Option 8 2021: CAZ B GM- wide, 2023: CAZ C GM- wide | Summary |
|---|---|---|---|---|
| Can a governance route be developed to enable timely local government joint working as required for delivery? | | | | GM has proposed a governance route that facilitates the local government co-operation required for delivery. The complex vehicle change requirements nature of Option 5(ii) is likely to make approvals more difficult. |
| What is the likelihood of the measures being effective? | | | | Clean Air Zones are presumed to be effective, but there is considerable uncertainty about how drivers will respond within the local context and to a scheme on a region-wide scale. Option 5(ii) is more complex and thus more uncertain. |
| Is delivery of the option subject to significant risks that make achieving compliance in the shortest possible time less likely? | | | | If the full CAP cannot be delivered or funded, compliance may be delayed e.g. if there is not sufficient time or funds to achieve a clean hackney cab or bus fleet. The Plan is subject to risks in terms of the need for multiple approvals from different bodies; the political sensitivity of the proposals; and the need to run activities in parallel. Option 8 involves one rather than two CAZ schemes so is subject to less risk. |
| Strategic fit with local strategies and plans Air quality and climate change | | | | All Options deliver improvements in NO ₂ concentrations, and also reduce PM and greenhouse gas emissions. |
| Transport | | | | All options act to promote sustainable travel and will deliver a cleaner, newer bus and taxi fleet for GM passengers. |

| Success Factor | Option 5(i) 2021: CAZ B GM-wide, CAZ D in IRR 2023: CAZ C GM-wide | Option 5(ii) 2021: CAZ B GM-wide, CAZ D & all diesel cars charged in IRR 2023: CAZ C GM-wide | Option 8 2021: CAZ B GM- wide, 2023: CAZ C GM- wide | Summary |
|--|---|---|---|---|
| Growth | | | | Risk that the city centre CAZ schemes deter housing and employment development; which could impact on the delivery of the Greater Manchester Spatial Framework. Option 8 delivers clean air without this risk. |
| Economy | | | | Risk that the city centre CAZ schemes affect economic performance. Option 8 delivers clean air without this risk In all Options, CAZs will impose costs on local businesses. |
| Value for money Estimated value for money of the option compared to the risk of inaction | | | | It would be more cost effective to deliver the changes more slowly; however this is a public health emergency so action is vital. Option 8 delivers compliance at the lowest imposed cost. |
| Distributional impact Health benefits | | | | All groups will experience health benefits. Those living in areas with the worst air quality and those most vulnerable to the effects of poor air quality will benefit the most. |
| Accessibility (in terms of journey time and connectivity to opportunities and services) | | | | The scheme brings improved accessibility in terms of small reductions in journey times for road traffic. Option 8 does not impose costs on private cars. |
| Affordability (for users) | | | | Options 5(i/ii) impose costs affecting low income car drivers, with more vehicles in scope for charges in Option 5(ii). Option 8 delivers clean air without this risk but still imposes costs on small businesses and sole traders. |

| Success Factor | Option 5(i) 2021: CAZ B GM-wide, CAZ D in IRR 2023: CAZ C GM-wide | Option 5(ii) 2021: CAZ B GM-wide, CAZ D & all diesel cars charged in IRR 2023: CAZ C GM-wide | Option 8 2021: CAZ B GM- wide, 2023: CAZ C GM- wide | Summary |
|--|---|---|---|---|
| Impact on the local economy – considering low income workers, small businesses, town centres and key sectors | | | | All Options impose costs on small businesses and low income professional drivers; proposals to support fleet upgrade mitigate this somewhat. Options 5(i/ii) risk impacts on the city centre economy avoided in Option 8. |
| Impact on the quality of life of local residents and on equalities | | | | Options 5(i/ii) may affect the quality of life of low income car drivers. Option 8 delivers clean air without this risk. Low income professional drivers may be affected by all Options. |
| Deliverability The Affordability of the cost of implementation (for the public sector) | | | | Option 8 is the lowest cost option and is thus the most affordable for the public sector. |
| The Supply-side capacity and capability to deliver the measures outlined in the option | | | | There are concerns about supply side capacity e.g. the availability of specialist compliant vehicles such as hackney cabs, and retrofitting capacity and risks of delays. |
| The Achievability of delivering the option, considering issues such as difficulty with scale or obtaining resources to implement and operate a measure/option | | | | The scale of the region-wide CAZ, supporting programme and associated cost, and the need for cross-district collaboration, creates delivery risk. This risk is even greater for a city centre CAZ D scheme. |
